ONE of the connecting links of Druid medicine was formed by an order of physicians which flourished in South Wales in the 13th century under the name of Medhygon Mydhvai, or Medici (physicians) of Mydhvai. They were not the sole connecting link between the remains of the ancient medicine of the Druids and later medicine, but a collateral one, for the ancient medical system and practice of the aborigines survived without intermission in many parts of Britain. The founders of this particular College of Medici, were Rhiwalhon and his three sons, Cadoogan, Gruffydh and Einion, who lived at Mydhvai in Carmarthen county, about the year 1230. They were physicians to Rhys Grug, Lord-of-Dynevor-and-Ystrad-Tywi, a nobleman whose full name is recorded as Ap Rhys-Ap Gruffydh-ap Rhys - ap Tewdwr - Mawr. The *father* and *three sons* stand here in due form according to the mysticism and requirements of Bardic ceremonial, a matter which suggests a comparison with a like arrangement in several Hebrew records, *e. g.*, Adam and his three sons, Noah and his three sons. Rhys Grug, their secular patron, gave them a parcel of land near the village of Mydhvai, whereon to pursue the work of their profession. Here they had a plantation and an herb garden in which they raised all the plants used in the manufacture of their drugs. Of this garden, some traces have been observed within a few years ago, with some stray sprouts of strange and unknown plants. There are various relics of this College of Physicians, by way of ancient manuscripts, which have been jealously guarded to the present time; and a few years ago the Welch Manuscript Society printed a volume of their medical practice, in the beginning of which is inserted the famous legend of the Lady of the Lake, a fairy who, according to the tradition, imparted to the Medici, the knowledge of the nature and virtues of medicinal plants.—*Der Erz Druide.*

Christian Temperance Union.

SELECTIONS from the temperance department in the Salinas City *Index*, edited by the ladies of the Christian Temperance Union:

DR. WILLARD PARKER says: "It has been demonstrated that the use of alcohol when employed moderately, as many young men often use it, as they think with impunity, makes the average of life 35½, while that of non-users reaches an average of 64⅛ years, a difference of about 29 years to each individual—1,000 individuals, 29,000.

"LOOK not upon the wine when it is red, when it giveth its color in the cup, when it moveth itself aright; at the last it biteth like a serpent and stingeth like an adder."

Had these warning words of Solomon been heeded centuries ago, how much misery, and want, and woe, and wretchedness, the records of which now blackens the pages of history, would never have been; how many hearts would have been unbroken; how many bright hopes never have been quenched in death; how many gray-haired parents would have been spared the agony of weeping over loved and lost ones; how many noble-minded men, who otherwise might have been land-marks of their country's genius, have sacrificed fame, fortune and happiness, and instead of enrolling their names high upon the roll of fame, are now occupants of a drunkard's grave. Yes, the serpent has bitten, the adder has stung, and a miserable fate has befallen men, noble, gifted men. Father, are you, by precept or example, holding this serpent to the breast of your son? Are you aiding this adder to instill his poison into the veins of your offspring? Mother, is your voice, instead of being raised in warning tones against the destroyer, hushed? And are you looking on with indifference while this deadly serpent is entwining with slimy folds the babe who once laid on your bosom, and whose life was drawn from your veins, whose every touch to you was a thrill of pleasure, whose infant eyes once gazed so lovingly into yours, and whose sweet lips were so often pressed to your cheek and brow? Are you standing idly by and, without a single effort to prevent it, allowing this dear one to be bitten and stung, to become a victim to the demon of the cup, to have his happiness, not only for time but for eternity, destroyed, and yet not be aware of the danger nigh? Let me warn you to beware of sleeping at your post! Mother, wife, sister, daughter, look to the welfare of those bound to you by the ties of kindred and affection; aid and assist your loved ones by every means in your power, and shield them in their time of trials and temptations with your prayers; ever throw around them the arms of your protecting love, by words and deeds of kindness bind them to you by chains stronger in the human heart than links of steel. Thus you will keep them not only from the cup which intoxicates, but also from other vices which often follow in its train, bringing sorrow and ruin and misery to many a happy home—and, perchance, save yourselves from ever being obliged to listen to the sad tones of some human soul when, just on the brink of eternity, it wails forth, "Lost! Lost forever! Lost and you might have saved me."—*E. L.*

Selections.

THE *Forester*, Charleston, W. V. says: We hope the E. C. of the Supreme Court of the world will postpone the meeting of the Supreme body until June, 1882. The expense of $4,000 can be saved; our present officers can hold over, and thus the work will go on. There is no good in meeting too often, and we are sure nothing will please the Subordinate Courts more than a postponement. In fact, there is no necessity for it.

THE annual gathering and reunion of the Turners of the Pacific coast will be held at Redwood City, beginning June 11th and lasting until the evening of the 14th. The *Times and Gazette* says that it is estimated the affair will bring not less than 15,000 visitors to the town during its continuance. How these are to be disposed of and cared for is the problem now engaging the serious attention of the local committee of Turners appointed to wrestle with it. The festivities of the gathering will be held at Turner's park, which is to be extended for the occasion by the addition of five or six acres of adjoining ground already secured for that purpose. Additional buildings for dancing and other purposes are to be erected at the park, which will be a scene of continual enjoyment from the beginning to the end of the four days. Prizes for gymnastic exploits and athletic games will be offered on a liberal scale. Arrangements have already been effected for special trains to and from San Francisco to accommodate the multitude of expected visitors; and to induce a general attendance the fare for the round trip has been fixed at one dollar, including admission to the grounds. Last year the festival was held at San Jose, and the round trip fare from San Francisco was $2.50, with an extra charge for admission; and at least 12,000 visitors were attracted. The greatly lower rates here, and the increased facilities for coming and returning will undoubtedly greatly increase the attendance this year. The Germans know how to manage a monster picnic like this is, to be successful, and while giving full enjoyment to all, manage to preserve good order, and most of all to avoid collisions and disturbances.

ON Saturday evening, April 9th—the anniversary of the surrender of Lee's army—Ellsworth Post, No. 20, Dept. of California, Grand Army of the Republic, was launched upon the sea of Fraternity from the village of Santa Rosa. Asst. Adj. Gen., W. A. Robinson, and Quar. Gen., O. B. Culver, assisted by Commander Walter H. Holmes, with Comrades Tharp, Stone, Downer, Cutting, Robinson, Wilder, Sayers, C. E. Wilson, and Symmes, of Geo. H. Thomas Post, No. 2, and Commander Sargent, with Commander Kinsley, of Lincoln Post, No. 1, of this city, gave their services to the occasion, and the Post was organized in due form. Twenty applications for new membership were read, and one by transfer from Lincoln Post, No. 1. After the mustering in services were performed, the following officers were elected for the ensuing year, and the visiting brothers vacated the offices accordingly: Wyman Murphy, P. C.; John Miller, S. V. C.; W. O. Howe, J. V. C.; S. W. Metcalf, Q. M.; M. V. Vanderhoff, Adj.; Dr. M. M. Shearer, Sur.; S. Wells, Chap.; J. N. Boswell, Officer of the Day; Geo. Pflying, Officer of the Guard. After remarks from the new officers, the visiting Comrades were invited to the Grand hotel, where a fine collation awaited them. Here the party was regaled by speeches of congratulation and rejoicing, interspersed with music from the quartette of Geo. H. Thomas Post. Serenades were next in order, and the entire party joined in doing honor to some of the prominent citizens of the town. On Sunday, the S. F. Comrades were entertained by ex-Sheriff Adams, of this city, at his elegant country seat; by J. B. Armstrong, editor of the Santa Rosa *Republican;* Mr. Byington, an old San Franciscan; and by Mr. Supper, proprietor of the Occidental hotel; and the party gratitude was expressed through the vocal efforts of the quartette, who performed most excellent services, and this feature of the trip proved a source of much pleasure in every direction. The Santa Rosa residents seemed much pleased by the visit, and when the city Comrades left the station they were fairly loaded down with the choicest flowers of the place.—COM.

THE importance and necessity of a new hall for the Odd Fellows of this city is becoming more and more noticeable, with every recurrence of the annual gathering of our Representatives in Grand Lodge sessions. We have no Lodge-room of suitable capacity and convenience in which our Grand Lodge can meet, nor have we as much room as will accommodate all the O. F. Lodges now in active operation in this city. Bro. J. M. Chapman, in conversation upon the subject, has suggested the desirability of immediate steps being taken in this direction; that the Lodges, not only of our city, but those of interior towns and cities, may have what he thinks would be an excellent opportunity for investment of their surplus funds in a permanent and paying institution. We think he is right, and believe there are many Lodges and members that would hail with joy the building of a magnificent Temple of Odd Fellowship in San Francisco.—*New Age.*

Knights of Honor.

The second annual session of the Grand Lodge K. of H. was held in this city, April 13th, at Shiels' building, David McClure, Grand Dictator, in the chair. The following Grand officers were present: David McClure, Grand Dictator; E. F. Aiken, Grand Vice-Dictator; Adrian Spear, Grand Assistant Dictator; W. H. Mahony, Grand Reporter; R. H. Warfield, Grand Treasurer; L. R. Webster, Grand Chaplain; J. S. Alexander, Grand Guardian; J. H. Harney, Grand Trustee.

The Grand Dictator appointed Charles H Richards, of Tahoe Lodge, No. 1,876, J. A. Calhoun, of Charter Oak, No. 1,755, and A. Ryhiner, of Germania, No. 1,718, as a Committee on Credentials, who reported the following representatives and alternates as elected to this session:

California, No. 1,580, Sacramento—Grove L. Johnson.
Stockton, No. 1,596, Stockton—J. W. Hart, R.
Marysville, No. 1,656, Marysville—J. G. Shepard, R.; Philip Hortop, A.
Victory, No. 1,675, Chico—C. C. Mason, R.
Progress, No. 1,679, Yuba City, R. W. McGrew, R.
Butte, No. 1,687, Oroville—G. H. Cordy, R.
Colusa, No. 1,688, Colusa—J. H. Pope, R.
Ivy, No. 1,716, S. F.—J. F. Prescott, R.; E. W. Hewitt, A.
Germania, No. 1,718, S. F.—A. Ryhiner, R.; C. L. Ilsen, A.
Friendship, No. 1,731, S. F.—R. G. Sawyer, R.; G. T. Emerson, A.
Garden City, No. 1,745, Alameda—R. Wheeler, R.
Charter Oak, No. 1,755, S. F.—J. A. Calhoun, A.; M. Eyre, Jr., R.
Eureka, No. 1,756, S. F.—D. G. White, R.
Yerba Buena, No. 1,788, S. F.—A. A. Egleston, R.; John Henderson, Jr., A.; F. G. Thomas, P. D.
San Jose, No 1,808, San Jose—Not represented.
Norman, No. 1,841, S. F.—Paul Tromlitz, R.; A. Pinkus, A.
Saxon, No. 1,848, S. F.—W. H. Holmes, R.
Tahoe, No. 1,876, West Berkeley—C. H. Richards, R.; S. A. Penwell, A.
Ivanhoe, No. 1,889, S. F.—N. B. Hoyt, R
Union, No. 1,895, S. F.—D. A. Baum, R.; Frank J. Ballinger, A.
Napa, No. 1,897, Napa—A. D. Stockford, R.
San Francisco, No. 1,922, S. F.—R. A. Lindsay, R.; H. Wolfsohn, A.
Petaluma, No. 1,923, Petaluma—G. E. Millet, P. D.
Tancred, No. 1,927, S. F.—J. S. Bugbee, P. D.
Yosemite, No. 1,930, S. F.—Emil Magner, R.
Alpha, No. 1,954, Grass Valley—Frank G. Beatty, R.
Lincoln, No. 1,971, West Oakland—N. Steinhardt, R.
Occidental, No. 1,990, S. F.—G. Winehill, R.
Cedar, No. 1,992, Modesto—J. S. Alexander, R.
Alta, No. 2,013, Vallejo—J. G. Smith, R.
Clinton, No. 2,019, Brooklyn—W. H. H. Hamilton, R.; L. J. Rector, A.
Santa Cruz, No. 2,046, Santa Cruz—Benj. Wright, Jr., R.
Security, No. 2,055, Watsonville—Jerome Porter, R.; J. L. Halstead, A.
Golden State, No. 2,058, Oakland—W. H. H. Hussey, R.
Unity, No. 2,088, Sacramento—Not represented.
Healdsburg, No. 2,093, Healdsburg—T. J. Riley, R.
Mission, No. 2,106, S. F.—G. W. Lamont, R.
Keystone, No. 2,107, S. F.—C. E. Travers, R.; E. J. Fraser, A.
Fidelity, No. 2,108, S. F.—C. E. Wilson, A.
Oriental, No. 2,163, S. F.—J. H. Harney, R.; C. C. Gilmore, A.
Eagle, No. 2,204, S. F.—J. K. Phillips, R.; J. Israel, A.
Santa Rosa, No. 2,208, Santa Rosa—Not represented.
America, No. 2,229, S. F.—Dr. Samuel American, R.
Franklin, No. 2,268, S. F.—J. L. Franklin, R.; M. F. Cummings, A.
Mispah, No. 2,277, North San Juan—Edward V. Joye, R.
Confidence, No 2,282, S. F.—H. J. Lask, A.; W. T. Hamilton, R.
Far West, No. 2,324, S. F.—L. D. Allen, A.; J. Martins, R.
Anchor, No. 2,366, S. F.—Dr. C. S. Haley, R.; F. H. Dennis, A.
West Lodi, No. ——, Hill's Ferry—H. Klohn, R.

Upon presentation and acceptance of the report of the Committee on Credentials, the Grand Lodge Degree was conferred upon 36 Representatives and Past Dictators.

The Grand Dictator then presented his report, from which the following is taken:

"On the 1st of January, 1880, there were 37 Lodges in this State, with a membership of 1,109. On March 24, 1880, the date of the organization of the Grand Lodge, there were 40 Lodges, with a membership of 2,000. There are now 49 Lodges, with a membership of about 3,500, a net gain of 9 Lodges and about 1,500 members. The membership in this jurisdiction has paid during the last year to the families of deceased brothers, $31,000."

From the report of the Grand Reporter, we take the following: There are now in existence in good standing in this State 49 Lodges. Since the last meeting of the Grand Lodge, ten lodges have been instituted, one of which, Beacon Lodge, of Oakland, shortly after its institution consolidated with Golden State Lodge No. 2,068, of the same place, making a net increase of nine Lodges since the last session. The increase of membership in the Order in this State during the year 1880, has been all that could have reasonably been expected.

The number of members in the Order in this State on January 1st, 1880, was	1,135
There were initiated during the year	2,050
Admitted by card	29
Reinstated	6
Total	3,220
From which is to be deducted:	
Withdrawn	43
Suspended	76
Expelled	1
Died	17
Total	137
Leaving a total membership on January 1st, 1881, of	3,083
Increase during the year	1,948

Since the 1st of January, 1881, the increase in membership, as I have been informed by the various Reporters, by postal card, in response to communications sent by me to each subordinate Lodge in the State, has been 335. From these sources I have estimated the total membership April 1, 1881, to be 3,417, with 136 applications on file. With few exceptions, the financial condition of the various Lodges in this jurisdiction was, at the close of the last term, very satisfactory.

The total amount which they had on hand to the credit of the General Fund on June 30th, 1880, was	$ 6,447 07
Received during term ending December 31st, 1880	14,405 68
Total	$20,852 75
Expended for relief and general expenses during same term	$14,538 29
Leaving a balance on hand December 31st, 1880, of	$6,314 46

Amounts received and paid by the various Lodges into the W. and O. B. Fund during the year of 1880:

From this it appears that the amount on hand January 1st, 1880, was	$ 1,275 09
Received during term ending June 3d, 1880	11,333 22
Received during term ending December 31st, 1880	21,328 65
Total amount on hand and received	$33,963 96
Paid Supreme Treasurer 1st term	$10,347 20
Paid Supreme Treasurer 2d term	$21,165 74
Total amount paid Supreme Treasurer	31,512 94
Leaving a balance on hand December 31st, 1880, of	2,424 02
Since the last session of this Lodge I have received from subordinate Lodges for dues to Grand Lodge	2,809 00
For supplies sold to Lodges	544 75
Total	$3,353 75
In addition to the above sums I have received for full sets of supplies furnished to the Grand Dictator and to District Deputies the sum of	500 00
And for blanks sold to them	1 80
The amount received by me for supplies sold from time to time for cash is	141 10

The supplies purchased by me from the Supreme Lodge, and the amounts paid for the same by orders drawn upon the Grand Treasurer, together with a statement of dues to Supreme Lodge, are as follows:

Amount of supplies purchased	$895 90
Amount due for dues	687 40
Total	$1,583 30
Paid Supreme Lodge on supply account	$763 60
Paid Supreme Lodge on dues account	687 49
Total	$1,451 09
Balance due Supreme Lodge	$132 21

The liabilities of this Lodge on April 1st, 1881, consisted of—

Amount due Representatives on mileage account, orders Nos. 6 to 28 inclusive	$192 95
Amount due the Supreme Lodge	132 30
Amounts due Subordinate Lodges	68 25

A summary statement of the financial condition of the Grand Lodge, gathered from these exhibits shows—

Amount received for dues from Subordinate Lodges, as shown by exhibit F	$2,809 00
Amount received for supplies, as per same exhibit	544 75
Amount received from Grand Dictator and his Deputies	501 80
Amount received from cash sales of supplies	141 10
Amount borrowed from Union Lodge	200 00
Total receipts	$4,196 65
Amount paid to Grand Treasurer	$4,196 65
Amounts disbursed by orders, as per vouchers, on Grand Treasurer, as per exhibit G	$4,030 41
Leaving balance in hands of Grand Treasurer of	166 24
The assets of the Grand Lodge consist of supplies as shown by exhibit H, valued at	481 23
Cash in hands of Grand Treasurer, April 1st, 1881	166 24
Amounts due from Subordinate Lodges as shown in exhibit F	74 00
Total assets	$721 47

The liabilities as herinabove stated are—

Due Representatives	$192 95
Due Supreme Lodge	132 30
Due Subordinate Lodges	68 25
Total liabilities	$393 50
Excess of assets over liabilities	327 97

The Grand Treasurer also presented his report of the year's transactions. The report of the Supreme Representatives, George M. Dixon and Alexander P. Murgotten, was presented and read, and referred to the Committee on Distribution. The State Medical Examiner, Dr. C. G. Kenyon, presented his annual report, which was, after reading, referred to the Committee on Distribution. The Committee on Credentials, appointed at the morning session, were appointed to act as a Committee on Credentials and Mileage during the session. The Grand Dictator appointed A. Pinkus as Grand Guide during the remainder of the session. The Grand Dictator filled the vacancies in committees as follows: Appeals and Grievances—J. H. Barry, D. A. Blum. Laws and Supervision—C. E. Travers, W. H. Hussey. State of the Order—Frank G. Beatty, (Chairman), A. A. Egleston. Finance and Return—W. H. H. Hamilton. The Finance Committee presented their report, which was accepted and adopted under suspension of the rules.

On motion, Committee on Laws and Supervision was increased from three to five for the session, for the purpose of revision, and the Grand Dictator appointed Knights Porter and Riley.

A number of amendments to the constitution and laws of the Order were offered, and were referred to the Committee on Laws and Supervision.

A number of resolutions were offered and referred to different committees.

A resolution was presented by C. S. Haley, asking for a division of the city of San Francisco into geographical districts, and was refer-

red to a special committee, consisting of C. S. Haley, Emil Magner and H. J. Lask.

Knights Warfield, Webster and Holmes were appointed a committee to prepare a memorial on the late Supreme Treasurer, R. A. Osmer.

A resolution was referred to the State of the Order, asking the Supreme Lodge to revise, modify and simplify the secret work of the Order.

Also, resolution requesting the Supreme Lodge, in the interest of economy, to hold biennial sessions instead of annual.

Also, a resolution requesting the representatives to the Supreme Lodge to advocate the passage of a law changing the collection of the W. and O. B. Fund so that it shall pass from the Subordinate Lodge through the Grand Treasurer to the Supreme Treasurer, instead of direct from the subordinate to the Supreme Lodge. Referred to the Committee on the State of the Order.

At the opening of the Lodge on the second day, after the routine business was transacted the special order, election of officers, came up, and the following were elected :

Grand Dictator, Charles E. Travers of Keystone Lodge, No. 2,107, San Francisco. Grand Vice-Dictator, L. R. Webster of Alpha Lodge, No. 1,954, Grass Valley. Grand Assistant Dictator, William T. Hamilton of Confidence Lodge, No. 2,282, San Francisco. Grand Reporter, W. H. Mahony of Tancred Lodge, No. 1,927, San Francisco. Grand Treasurer, R. H. Warfield of Healdsburg Lodge, No. 2,093, Healdsburg. Grand Chaplain, G. W. Lamont of Mission Lodge, No. 2,106, San Francisco. Grand Guide, H. J. Lask of Confidence Lodge, No. 2,282, San Francisco. Grand Guard, N. Steinhart of Lincoln State Lodge, No. 1,971, West Oakland. Grand Trustee, long term, G. Winehill of Occidental Lodge, No. 1,990, San Francisco. Representative to the Supreme Lodge, W. C. Van Fleet of Unity Lodge, No. 2.088, Sacramento. Alternate Representative, R. L. Behre of Tancred Lodge, No. 1,927, San Francisco.

The resolution asking the Supreme Lodge to change the payment of the Widows' and Orphans' Benefit Fund so that it will pass through the Grand Lodge, was recommended by the Committee on the State of the Order, and was adopted.

The Committee on State of the Order reported against the reinstatement of the German ritual, and the report was adopted.

The Committee on State of the Order reported in favor of the Supreme Representative urging the simplifying of the ritual, and the recommendation of the Committee was adopted.

The thanks of the Grand Lodge were tendered to Yosemite Lodge, of San Francisco, for the use of Protection hall for holding its sessions.

The memorial sent out from members of the K. of H., of Kentucky, in regard to instructing Representatives to the Supreme Lodge to vote for a restriction of the powers of the Supreme Lodge was concurred in by the Grand Lodge.

The Committee on Laws and Supervision recommended the adoption of the report of the Supreme Representatives, which was concurred in. Also, that the representation of the Grand Lodge be changed to one Representative to 100 members, and for each additional 50 members one Representative. Adopted. Also, that the Subordinate Lodge Constitution, recommended by the Supreme Lodge, be adopted, instead of the one adopted at the last session of the Grand Lodge. Adopted. Also, that the charter fee of members of new Lodges be not less than $5. Adopted.

The salary of the Grand Reporter was fixed at $1,000 for the current year.

The Committee on Finance and Returns report the estimated expense of the year will be about $3,300. Also, that the per capita tax for the year be $1, payable at 50 cents, semi-annually. Adopted.

It was ordered that 300 copies of the proceedings be printed, and two copies sent to each subordinate Lodge, and one to each Representative and Past Dictator.

The committee to whom the report of the Medical Examiner, Dr. C. G. Kenyon, was referred, under the report of the Committee on Distribution, reported in favor of its adoption, which was concurred in.

The committee appointed to prepare and submit a memorial to the late Supreme Treasurer, R. A. Osmer, presented a suitable one, which was adopted, and it was ordered that a page be set apart in the printed proceedings of the Grand Lodge for that purpose.

The resolution asking the Supreme Representatives to advocate biennial sessions of that body, reported in favor of the adoption, and it was so done.

No action was taken in regard to the geographical division of the city, which leaves the matter in the hands of the Grand Dictator, as before.

The Grand Lodge on motion unanimously asked the Supreme Dictator to reappoint Dr. C. G. Kenyon as State medical examiner.

The Committee on Credentials and Mileage reported in favor of three cents per mile each way which was amended to five cents per mile, and adopted. Also, against any per diem for attendance on the session, which was adopted. The total mileage was about $300.

The place of holding the next annual session was fixed at San Francisco.

Past Grand Dictator, David McClure, installed the officers of the Grand Lodge.

Upon taking the chair, Grand Dictator-elect Travers made a few remarks outlining the purpose of the work for the ensuing year.

The following standing committees were appointed by the Grand Dictator:

Appeals and Grievances—R. L. Behre, of Tancred Lodge, No. 1,927; W. C. Van Fleet, of Unity Lodge, No. 2,088; George W. Lamont, of Mission Lodge, No. 2,106.

Laws and Supervision—Jerome Porter, of Security Lodge, No. 2,055; W. H. H. Hussey, of Golden State Lodge, No. 2,058; T. J. Riley, of Healdsburg Lodge, No. 2,093.

Credentials and Mileage—C. H. Richards, of Tahoe Lodge, No. 1,876; J. A. Calhoun, of Charter Oak Lodge, No. 1,755; A. Ryhiner, of Germania Lodge, No. 1,718.

Finance and Returns—John Henderson, Jr., of Yerba Buena Lodge, No. 1,788; W. H. H. Hamilton, of Clinton Lodge, No. 2,019; J. S. Bugbee, of Tancred Lodge, No. 1,927.

State of the Order—Edward V. Joyce, of Mispah Lodge, No. 2,277; Benj. Knight, Jr., of Santa Cruz Lodge, No. 2,046.

The Grand Dictator then announced that he would make his appointments for District Deputy Grand Dictators at some future time, as he desired to select the members best fitted for the duties before making the appointments.

Past Grand Dictator David McClure was called upon and made a short address.

The Grand Lodge, at the hour of 5 P. M., adjourned, to meet in this city on the second Wednesday of April, 1882.

The Grand Dictator and Grand Reporter were empowered by the Grand Lodge to examine and approve the minutes of the session.

Everything during the session passed off pleasantly and in perfect harmony, and much business was done in the short session.

The Reception at Woodward's Gardens.

Woodward's Gardens were thronged at the reception given to the Grand Lodge, by the subordinate Lodges of this city. Elaborate preparations had been made for the affair. The Gardens were lighted with Japanese lanterns, and besides were handsomely decorated. The pavilion was not commodious enough, even with its roomy galleries, to accommodate one-half of the guests present, and the music-room adjoining, and the Gardens themselves, were thronged with people.

At the entrance of the pavilion was the sign "Welcome," formed of numerous gas jets. Inside of the pavilion, from the center of the ceiling, was suspended streamers to the pillars of the balcony circle in the shape of a semi-circle, and from different points of the ceiling were hung *papier-mache* baskets. The pillars and the front railing of the balcony circle were draped with banners and the flags of all nations. The floor was covered with blue and brown-striped canvas. At 8 o'clock the following programme was excellently rendered before an audience of over 10,000 persons: Overture, Second Regiment band; song, "The Knights of Honor," quartet—Messrs. J. S. Swan, J. Booth, C. Parent and S. Booth; welcome address, C. E. Travers, V. D.; response. Hon. David McClure, G. D. of California; song, "Song of the Whippoorwill," Mrs. Blake Alverson; poem, "Who shall Provide" (original), M. M. Stern; music, Second Regiment band; cornet solo, Prof. I. C. Coggin; song, quartet, J. S. Swan, J. Booth, C. Parent, S. Booth; finale march, Second Regiment band, Oscar Herold accompanist. The floor was then cleared of the benches and chairs, and dancing was indulged in by the large number present until daybreak in the morning. The affair was one of the most successful of the kind that has ever been given in this city, and great credit is due to the following committees who had the reception in hand. General committee—J. H. Barry. Ivy, No. 1,716; H. Freidlander, Germania, No. 1,718; E. P. Cressey, Friendship, No. 1,731; P. R. Downer, Charter Oak, No. 1,755; N. B. Rowley, Eureka, No. 1,756, F. G. Thomas, Yerba Buena, No. 1,788; J. D. Sullivan, Norman, No. 1,841; J. Whitaker, Saxon, No. 1,848; A. W. Prevost, Union, No. 1,895; M. M. Stern, San Francisco, No. 1,922; R. L. Behre, Tancred, No. 1,927; Emil Magner, Yosemite, No. 1,930; G. Winehill, Occidental, No. 1,990; J. Mason, Mission, No. 2,106; O. Greenbaum, Keystone, No. 5,107; C. E. Wilson, Fidelity, No. 2,108; J. Israel, Eagle, No. 2,204; W. H. Edwards, American, No. 2,229; J. G. Severance, Franklin, No. 2,268; Harry J. Lask, Confidence, No. 2,282; L. D. Allen, Far West, No. 2,324; C. G. Ewing, Anchor, No. 2,366. Reception Committee—A. Berenz, E. F. Knorp, D. E. Barger, W. T. Hunter, J. A. Magagnos, B. F. Jacobs, B. L. Lewis, W. L. Hodgkins, M. S. Hill, J. W. Lee, J. S. Graaf, M. Levingston, T. J. Day, H. F. Marsh, A. Badlam, F. J. Ballinger, G. A. Knight, J. Langhan, S. Galavotti, S. J. Hendy, J. M. Lenhart, E. C. Hughes, J. T. Hollings, S. Rosenfeld, T. F. O'Connor, W. L. Hallett, T. Thompson, M. Levinsohn, W. H. Penfield, A. W. Follansbee, I. H. Small, D. C. Fox, N. J. Schou, O. McElroy, J. C. Brennan, A. S. Adler, D. Irwin, T. Vice, J. L. McKee, G. Krohn, J. O. Jephson, J. Connor. Floor Director—Harry J. Lask. Chief Aid—J. T. Kavanagh. Floor Committee—E. P. Holensen, F. Vaughn, W. T. Gorham, E. P. Figel, W. S. Pierce, P. Trommlitz, J. F. Curtis, H. A. Steffens, J. Costa, P. S. Hunter, C. Nelson, E. H. Jackson, R. Faraday, F. Thibault, J. Harris, W. Kitchen, I. Abrahams, F. J. Krempel, E. J. Chandler, H. Glissman. Although all could not indulge in the dancing which followed the literary programme, there was sufficient enjoyment in the promenades of the gardens, and the affair terminated to the satisfaction of every one present.

Rustic Adornments and Furniture.

There was nothing shown at our Citrus Fair so indicative of individual genius as the rustic furniture made by Mr. Bronk on his mountain bee ranch, a few miles back of Pasadena. Mr. Bronk, who bears among his lowland neighbors the title of Judge, has lived as many lives in his 30 California years, as would have sufficed several generations of our English ancestors; has made and lost fortunes in mining enterprises; tried the Bench and the Bar, and finally risen above Fate and the vicissitudes of human associates, where only bees and grizzlies can keep him company. He carries a hugh frame strongly knit by three-score years of active mountaineering, where younger feet are loath to follow; and it is well worth a trip into these parts to go up into his eyrie, and sit an hour or so in the sylvan workshop where this beautiful furniture is made. We went there a year ago with a much-traveled friend, lately returned from foreign lands, and she, who had scaled Etna as well as Alps, took away a sketch in oils of this unsurpassed retreat. We crossed the Arroya, our wildling river, 16 times before we reached the bee ranch, and then dove into the Arroya again to find Mr. Bronk's shop and garden. And what a garden! A glen shut in by precipitous rocks, yet open enough for large trees on the margin, with glades of fern and great moss covered boulders, had been furnished in the quaintest fashion. There were rustic baskets hanging all around the trunks of the oaks; baskets on pedestals, Wardian cases full of delicate selaginellas and rosettes of mountain houseleeks; and fanciful seats of gnarled roots, which one thought were meant for grizzlies to rest in; and there was the constant music of the stream, and of the happy birds, seldom disturbed in these solitudes. A humming bird had built her nest on a swaying bough which hung low over the water, and we sat and watched her movements a long while, wondering that she should choose so exposed a place to cradle her two wee babies in.

There is something about Mr. Bronk's rustic settees, tables and jardinieres which perpetually suggests wildness and woodsyness; they are not fussy as such things usually are, but look as if "they growed."

The great failing with rustic furniture is its fragility. The pattern usually followed is in the French style of household furniture, not carrying out at all the idea of a simple natural seat, such as we often find inviting us to rest in old woods. Nothing could be simpler than the design of these. They are broad, low, and strongly supported, with little, or often no attempts at *parqueterie* in colored bark of twigs. But some of the pendants of his flower baskets are a perfect fringe of bright-colored and twisted branches, which make a pretty background for the drooping linarias and other vines.

What richness there is in manzanita thickets for an artistic eye to seize and appropriate! Even white birches cannot hold a candle to the manzanita. And if you want coils and arabesques to fill in the backs of your sofas, why there are such wild grapevines as grow only on these south-streams, thick as your wrist, and supple as a rubber band when full of sap. All of which our artist has seized and appropriated. To have one of his dainty *jardiniere* stands for a Christmas gift, filled with violets or lilies-of-the-valley, might satisfy the most fastidious taste. Without exaggeration there is a great deal of encouragement for the manufacture of just such wares as we have been describing: light, graceful and, if well braced, very durable. They are richer than bamboo; the chairs with red or bronze leather cushions are very handsome, and work baskets lined with cherry or old gold silk are as pretty decorative pieces as one could wish.

I see in my mind's eye a vestibule furnished with this kind of bric-a-brac: Say a superb pair of antlers for the hat rack, one or two richly cushioned manzanita arm chairs, a fine rustic table holding a turned polished plaque of redwood burl for visitors' cards, handsome bear skin or lion skin rugs partly covering the wood floor—is there not something beyond carpentery or cabinet making in this?

Mr. Bronk, though taking great delight in his work, has never suspected himself of being an artist, and will scarcely forgive my exposure of his hiding place. My excuse is my desire to set the boys and girls to work at this rustic adornment and furnishing in the thousand places where its fitting material is abundant. There are suggestions and patterns to be found in books upon home adornment.—*Jeanne C. Carr, Pasadena.*

CONVENIENT FOR TRAVELERS.—An invention has been made in Hartford for announcing the stations on railroad trains, which can be worked by steam from the engine or by electricity, and a company has been formed, with a capital of $100,000, to manufacture it, with W. H. Goodrich, of the Hartford *Courant*, as president.

THE WISEST MAN may be wiser to-day than he was yesterday, and to-morrow than he is to-day. Total freedom from change would imply total freedom from error; but this is the prerogative of Omniscience alone.

The Pacific Business College.

Readers have doubtless often noticed the handsome engraving of the Pacific Business College, which appears from time to time in our advertising columns, and would like to know more about the institution thus placed prominently before them. The Pacific Business College was the first established commercial school on this coast. Through its intrinsic merits it has gained a reputation for thoroughness and system second to no institution of the kind on the continent; and as a consequence, it enjoys a patronage not only from all parts of this coast, but from adjacent territories, Mexico and South America. The college is endorsed by the prominent business men of the country, by the leading journals, and by eminent educators generally.

The proprietors—Professors W. E. Chamberlain, Jr., and T. A. Robinson—are so well and favorably known in educational circles throughout the coast, as being eminently fitted for the responsible positions they occupy, that they require no commendation from us. These gentlemen are ably supported in their work by a full corps of teachers thoroughly qualified for their respective duties.

The college is located at 320 Post street, opposite Union square, and occupies the entire upper story of the Red Men's building. The site is one of the most desirable in San Francisco, as it commands a splendid view of the city and its environs, and is convenient to the leading thoroughfares, while sufficiently removed from their bustle and excitement. Union square is one of the most attractive and picturesque breathing spots in the city.

Courses of Study.

These have been specially prepared to meet the requirements of business life; and no person of ordinary ability and application can complete a course of instruction in the Pacific Business College without becoming well qualified for the practical duties to which the studies pursued refer. The courses of study, and methods of imparting instruction are thorough and practical, and fully up with the demands of the age. The system pursued is peculiar to this college, and is well calculated to accomplish the desired results.

The commercial course is thorough and comprehensive. A system of actual business is employed, combining theory and practice in the most perfect manner, and is at once so simple and natural that it needs only an examination of its merits to convince the most skeptical of its superiority over all other systems. Bookkeeping by both double and single entry as applied to all kinds of business, penmanship, commercial calculations, business correspondence, business forms, wholesale and retail merchandising, commission and forwarding, etc., etc. Commercial law, political economy, business ethics and other subjects of interest receive that attention which their importance demands. The student buys, sells, ships, consigns, discounts, insures, draws checks, notes and drafts, etc., and goes through the entire routine of actual business. There is in active operation a banking house, with checks, drafts, notes, bills of exchange, certificates of deposit, etc., fully illustrating the banking business. Students receive while attending this school the same practice in conducting business affairs that they would in a *bona fide* bank, office or counting house.

The telegraphic course is unsurpassed, and includes everything requisite to make students proficient operators.

The academic course is designed to give regular and systematic training in ordinary English and advanced mathematical branches, and to prepare those who need elementary education to enter upon the commercial course with a better foundation, and with more certainty of success. It furnishes thorough instruction in spelling, reading, arithmetic, penmanship, English grammar, letter writing, rhetoric, etc., also in algebra, geometry, mensuration, surveying, navigation, etc., including the differential and integral calculus. Students can make arrangements for studying the modern languages or other special branches; and they have the privilege of combining the studies of the different courses on very reasonable terms.

Individual Instruction.

In the business course the class system is entirely discarded. Students receive such individual instruction in the several departments as enables them to pursue their studies as rapidly as their ability will admit. No student, therefore, is kept back in his course by those of less ability and application. On the contrary, he is always advanced as rapidly as is compatible with thoroughness. Ladies are admitted into all the departments of the college, and have in every respect the same advantages as the other sex. The tendency of the age is to remove all obstacles that have hitherto prevented women from competing with men in the different professions and industries. One of these disabilities is found in the fact that girls have not been properly educated for the practical duties of life.

These are some of the leading points of the institution. There is much other information of importance which can be gained from the publications of the college, which can be had by addressing the proprietors at 320 Post street, San Francisco.

THE postage stamp is alway getting the upper corner on letters.

A. O. U. W. Directory.

Cards inserted in this list at the rate of 25 cents per month payable semi-annually in advance. If errors or omissions are noticed, please write the office direct.

OFFICERS and members of the A. O. U. W. receiving a complimentary number of the WATCHMAN with this notice marked are invited to examine its merits for their support, as we expect our agent to call and present personally further information concerning our enterprise for the future. Should our agent fail to call soon in some instances, we shall be glad to have our friends favor the office directly with their response. Persons receiving duplicate copies are requested to circulate them to the advantage of our cause and the publishers.

BRO. JOSEPH GIUSTI'S OYSTER, CHOP, AND CHOWDER HOUSE, 105 California Market, for ladies and gentlemen, is the place to get an oyster cocktail, or a meal fit for a king. His customers always feel happy after partaking of his good cheer. His parlors are open night and day.

A SPANISH BREAKFAST.—All the members of the family are present at this meal, the first of the day. The table is laid with a snowy cloth, with porous Andujar pitchers of classic shape, with a melon rolling here and there; knives, forks, plates put on without any regard to order or arrangement, large bunches of white and purple grapes, and a few bottles of red astringent wine; bread lies in spiral or long rolls all about the table, in the center of which stands some flowers. When all is ready, the mother and father and one or two daughters of the family come in and take their places; the family come in and take their places; the father quietly takes the melon before him and cuts it into slices, and passes the plate round from one to the other; all are wonderfully silent, respectful, self-controlled; the household seems so peaceful, so patriarchal in its simple primitiveness that the stranger seems out of place. The sons saunter in, cigar in mouth, but reverent toward their parents, and saluting them with the morning kiss of affection and peace, take their slice of melon. Then the soup, or *caldo*, is placed carefully on the table anywhere, and each takes a plateful; then comes *cocida*, meat stewed to rags from which the *caldo* is taken, with rice and slices of every sort of stewed vegetable of the luscious, aromatic, semi-pungent vegetables of the country. A little dish of sausage or of bacon follows; then bread and cheese, and then fruit again, and the men drink a little, but very little, wine, the women only water. A cup of coffee and a cigarette follow—the meal is over, and the family quietly disperse to pursue the occupations of the day.—*Selected.*

THE POPULATION CENTER OF THE UNITED STATES.—Ten years ago the center of the population of the United States was about 48 miles east of Cincinnati, Ohio. The Superintendent of the late census announces that the growth of the great West during the past decade carried the center of population about 50 miles west, while the large increase in the Southern States carried it a little southward. The result places the center of population within the limits of Cincinnati.

PACIFIC STATES WATCHMAN.

A. O. U. W. Home Paper.

Issued on the 1st and 15th of each month.

Subscription (in Advance), $2 a Year.

Favorable to Advertisers.

By consolidating the large subscription lists of the *Pacific Workman* with the PACIFIC STATES WATCHMAN our advertisers gain an unusually great advantage. We doubt if any one weekly newspaper has ever been circulated to as many different readers on this coast, as have been served heretofore by the *Workman* and WATCHMAN together. Certainly, no other periodical is now patronized by a better class of industrial, professional and business men. In fact, our subscription list (like the A. O. U. W., still increasing), embraces many of the foremost business and representative men throughout the towns and cities of the coast.

We have pride in making our paper "clean and handsome," and first class in all respects—to the benefit of both our readers and advertisers.

ADVERTISING RATES.

One Square (¼ inch), per issue	$ .75
One Square per month	1.25
Two Squares, per issue	1.50
Two Squares per month	2.50
Obituary notices and resolutions (with 25 copies post-paid for friends of deceased) per sq. (¼ inch)	50

☞For reading notices, extraordinary display, special advertising and choice places permanently, extra rates will be charged. Reasonable reduction will be made for large and long-continued advertisements. No extra rates for the space occupied by engravings.

OFFICIAL RECOMMENDATION.

[*Resolutions adopted by Grand Lodge of Cal., Feb. 3, 1881*]

WHEREAS, the PACIFIC STATES WATCHMAN, the pioneer A. O. U W. advocate on this coast, without official aid, has long rendered able and valuable services for the good of our glorious organization, we earnestly recommend that our Lodges and the brethren individually patronize the WATCHMAN as liberally as circumstances will justify.

Entered at San Francisco P. O. as second-class matter.

San Francisco, - May 1, 1881.

Read and Ponder.

Beyond question, that community or people is most happpy and prosperous where wealth is most evenly distributed amongst the people. It is not desirable that the few should be very rich and the many very poor. History has taught humanity this lesson in the text book of misery, desolation and blood. Not the least of the blessings which fraternal societies like the A. O. U. W. promise, may be found in their powerful agency in the distribution of wealth. By positive demonstration, fully three-fourths of all their benefactions go down to the plane of actual want, giving to each beneficiary more than the average citizen is worth over and above all just liabilities. From the nature of the case this immense transfer of funds into the hands of the needy puts the money where it must soon again go out amongst the people to be gathered little by little, only to be placed down again where most needed, and so on, day after day, month after month and year after year. There is another pleasant feature about this business. A great portion of the money paid into beneficial societies represents what would otherwise be given as a tribute to sheer luxury, wastefulness, or, possibly, vice. If every man who is eligible belonged to the A. O. U. W., poverty would be almost an utter stranger in the land, and God knows how much of crime would thereby be averted.

Our Order is yet young, and within the folds of its legitimate offspring are nearly one million of the best men of our country. Its influence for good, directly and indirectly, is seen and felt in almost every neighborhood, hamlet, village and city in the land. How carefully and faithfully, then, should we watch over, guard and protect it! How small, in comparison, are our ordinary interests, and yet how apt are we to regard the latter first and the first last! Brother Workmen, consider these things, and when you weary of paying assessments, stop and ask yourselves if you had not better weary of paying for some other thing from which you reap little or no benefit either to body, mind or conscience. As we sow so shall we reap.

As an evidence of the favor and widespread influence and popularity of the WATCHMAN, we are in receipt of letters from several different towns in Illinois containing P. O. orders for subscriptions to our paper.

Two assessments in the Supreme Lodge jurisdiction for the month of April.

A. O. U. W. and Economy.

Few of our readers have any proper conception of the amount of labor devolving upon the Grand Master and Grand Recorder of this jurisdiction. It is safe to say that no President of any Life Insurance Company in the country has so much to do as our G. M. W., and yet the insurance official gets a princely salary, while our Grand Master has only an allowance for incidental expenses. The Grand Recorder gets a salary about equal to that of a first-class clerk, with an additional allowance for an assistant. The Grand Receiver gets his expenses, not to exceed $300 a year. A little is also paid to committees, the whole falling below $5,000 a year, paid by a membership of 12,000, who have an aggregate assurance of $24,000,000. In other words, each member pays at the rate of about 42 cents yearly for official services in conducting the business of the organization, or 21 cents on each $1,000 assured. If any one thinks this is too much, let him investigate the cost for similar service in any ordinary business institution where a like amount of labor and responsibility is involved, and a comparison will astonish the investigator. How would a salary of $20,000 a year look for the Grand Master; and for the Grand Recorder, with the usual complement of clerks, $30,000 more; and for the Grand Receiver, $5,000, and for other officials $5,000 more—in all $60,000 instead of $5,000? And yet $60,000 falls far below the usual figures for salaries in a business the magnitude of ours. Herein we see the advantages of a fraternal organization, and not only in this regard, but in others as well. The A. O. U. W. was not organized to make money for anybody, and is conducted on the principle of the strictest economy compatible with efficient service. All moneys received are applied solely to the purposes for which they are raised. That paid into the beneficiary fund is sacredly applied to the last penny in the payment of death losses, and for that purpose alone. All that results from lapsing of beneficiary certificates goes in with the rest and aids tremendously in keeping down assessments, insomuch that the cost of carrying $2,000 assurance in the A. O. U. W. is only about one-third that charged by any first-class insurance concern.

For years our ears have been filled with prophecies that our system would not work; that gradually our assessments would so increase that the Order would fall beneath the ever accumulating burden; that those who should survive to see the end would lose all they had contributed. More than 12 years have passed away and the A. O. U. W still survives and never was so prosperous as this very day. Moreover, its popularity increases with a more than geometrical ratio according to its increasing age. And yet it may some time die. It is generally conceded that all things earthly will some time have an end. But what of that? Though it should perish to-morrow, the good it has accomplished would not perish with it. Nor would anyone lose anything. We all have our assurance at absolute cost. Every month our balance is struck, and the Order owes us nothing, for we have no reserve fund made from surplusages paid over and above the cost of our protection. You insure your house for a year and pay the required premium. At the end of the year your balance is struck and the insurance company cancels its obligation, and rightfully. You have enjoyed the protection you paid for, and have no right to complain. So if the A. O. U. W. should die, your account would be even. But it will not die until madness shall usurp the place of reason; till hope and love and charity shall give way to despair and hate and malevolence, or until the world shall need its beneficence no longer.

AND still the work goes on with 195 lodges in California, and five more in process of formation. On the first day of April there were 11,550, M. W. in good standing, and 13,373 beneficiary certificates written.

SIXTEEN deaths to be paid for in the Supreme Lodge jurisdiction in April, distributed as follows: Ohio, 6; Kentucky, 6; Kansas, 3; and Texas, 1.

SUPREME RECORDER SACKETT places the membership of the A. O. U. W. in February at 94,377.

THE brethren of Woodland, Yolo county, will have a celebration on May 7th.

Get a Home.

Californians may be justly proud of their country. It is emphatically a land of wheat and fruit, and wine and oil, and milk and honey, and gold and silver. The climate challenges comparison with any other on the face of the earth. Nothing that man can desire wherewithal to eat, or drink, or wear, or shelter himself—nothing to gratify his five senses but can be obtained here more easily than anywhere else under the sun. The mountains are full of precious metals and clothed with peerless forests. The streams teem with fish, and the generous earth yields here tribute to the husbandman with such alacrity as almost to invite indolence. Nowhere else on the continent can an earthly paradise be so easily built up nor so easily maintained. It is a country where every man should have not only a home, but a little Eden of his own, and yet it is said of California, and with too much of truth, that it is a country without homes. We are still nomads to a degree. We follow the sound of the pick and the shovel and quartz crusher. We gamble away our gettings in games and stocks. We live at the rate of sixty miles an hour and wind up our career by dashing madly into eternity. Whereas, in so healthful and delightful a country, we ought to add at least a score of years to our allotted three score and ten. We subtract where we ought to add. The human machine can endure only a given amount of strain and then comes collapse. Every excess, whether of physical or mental effort, is scored against us and counts in the final reckoning. It should be the aim of every lover of his country and his race to correct, so far as he may, these evils that are too patent to need any proof of their existence. The WATCHMAN will but partially fulfill its mission if it does nothing in this direction, even though successful in all else. We would have every true Workman build for himself a home, be it ever so humble in its beginning. Industry and frugality and good judgment will make of it the most lovely spot of earth. The man without a home is like a sojourner without a country. Home, health and friends make a trinity that might appropriately be set up as the god of happiness. In our glorious heritage we have 12,000 Workmen. Half of them might say with the poor Nazarene, "the foxes have holes, and the birds of the air have nests, but the son of man hath no where to lay his head." In becoming Workmen they have performed a duty they owe to those dependent upon them. For them they have provided a benefaction more than equal to the average wealth of man. Next should come the home and that clear of all incumbrance, even if it be but a cabin with a climbing rose over it; after that, as ability may come, the pretty cottage or pretentious villa in a paradise of flowers and rarer shrubs may take the place of the primitive structure, but not with a possible mortgage or lien. The richest, happiest and best man in the wide world is he who has a pretty, comfortable home of his own, a family, good health, and owes no man a cent, even though his entire worldly possessions would not sell for a thousand dollars, and though he has never held so high an office as town constable or roadmaster. We sometimes feel constrained to doubt whether a man without a home can at best be but an indifferent citizen and a more indifferent patriot. He cannot feel that interest in other people's real prosperity that he feels in his own, and without such prosperity we could have no country worthy a name. He would scarcely care to risk his life in defence of the hearthstone of his landlord, but let that hearthstone be his own, and woe to the invader who should threaten it with desecration. The homes of the people are the strength of the State. Build them, beautify them, own them and be happy,

---

THE record for March shows that we had 380 applications for membership, of which there were 63 rejections by the Lodge and physicians It seems to us that this record is the key-note to our future prosperity. That while our Order is increasing very fast, the precaution used in selecting members has made the rejections larger than ever before.

THEY have a live Lodge down at Anaheim, Los Angeles county. We learn that their meeting evenings are profitably spent after the regular business, by having a literary programme, consisting of declamations, songs, etc.

Important Decision.

The following is of special interest to many members of the A. O. U. W. whose beneficiary certificates are made payable "to my order" or "subject to will." We personally know that there are some members who have directed these words to be so placed, intending, at least for the present, that in case of their death, the money shall not be drawn from the Order; but there are others who are undecided on the subject, who should positively name one or more persons, and the decision alluded to may have the effect to induce brethren to have their certificates filled out. The case is as follows:

A person in an Eastern State, learning that his son, who was a member of an A. O. U. W. Lodge in California, had died, wrote to the Grand officers, requesting that the $2,000 be sent to him (the father) "as he was the proper heir," and that "he would see that the other heirs (the brothers and sisters of deceased) received a proper share," etc.

The deceased brother's beneficiary certificate is made payable "subject to my will."

G. M. Workman Barnes, on this claim, rendered a decision the pith of which is the following: That when beneficiary certificates are delivered, it is with the words to each one "that the $2,000 are payable at death, in the manner in which you have decided," and if the party during his life gives no direction, the certificate cannot be paid. That the law of the Order requires each one, when applying for a beneficiary certificate, to name the person or persons to whom the money shall be paid at his death, and that the declination of a member to do so, and making the same payable "to my order," or "subject to my will," is to be taken as positive proof that he does not wish said amount to be paid to his relatives, or any other person, or he would have named them. That the laws of the Order require that the payment of the certificate can only be made to the person named therein, or "in the manner directed" by the brother himself, and that if it is made "subject to will" or "to my order," that the production of a duly authenticated "will" or "order" is essential and necessary before said certificate is of any money value at the decease of the brother, and that no claim of administrator, heirs, etc., will be entertained, without the production of such "will" or "order."

That when a certificate is made payable as above, to "will" or "order," and a reasonable time has been afforded for the production of such, and none having been brought forward, said certificate shall be null and void, and no assessment shall be levied for same.

The claim therefore of any heir or heirs to any amount on a beneficiary certificate which reads "subject to my will," or "subject to my order," is not to be recognized, or admitted, except when accompanied by a "will" or "order."

OUR sanctum was graced with a visit from J. F. McMullin, P. G. M. W. of Wisconsin. Bro. McMullin's stay in this city was unavoidably short, but we managed to introduce him to Grand Master Barnes and Grand Recorder Pratt. He is elected one of the representatives to the Supreme Lodge, and from a long conversation with him, we are convinced that nothing visionary will emanate from him, as he impressed us as being a man of sound, practical sense. He speaks well of the Workmen of his jurisdiction, and says that the Lodges are composed of first-class men in every respect. He has been on a visit to Oregon and Washington Territory, and says that in the Puget Sound country the Order is growing rapidly, no less than eight Lodges being recently organized. In those Lodges that he visited up there he found the material of which they were composed of the right sort. He stated that the country offers excellent inducements for young men of the right sort who desire to better their condition. If they are industrious and capable, they will, in time, amass fortunes. Bro. McMullin had a taste of the "glorious climate of California." He said he would never forget the scene presented as the steamship, *State of California*, slowly made its way through the Golden Gate. The sun was just rising, kissing the waters of the bay with its effulgent light, while on either side were the green hills, with San Francisco in the distance. "It was truly grand," he said. We were sorry he could not stay and visit some of our San Francisco Lodges, as he would there find Workmen whom he would delight to honor.

Grand Recorder's Department.

Headquarters of Grand Lodge, A. O. U. W., Rooms 40 and 41, St. Ann's Building, corner of Eddy and Powell, San Francisco. H. G. Pratt, G. R.

Wm. C. Flint, Esq., 216 Sansome street, San Francisco, is Chairman of Committee on Laws and Supervision. All By-Laws, or amendments to same, should be sent directly to him.

Every Lodge should have one or more copies of the constitution and laws of the Supreme Lodge. They can be had at this office. Price, 5 cents each.

Any Lodge failing to get the list of death notices on the first of each month will confer a favor by notifying this office immediately. They will always be sent whether any assessment is required or not.

We are constantly obliged to return beneficiary certificates sent in for change in direction of payments, that the blank on the back of the paper made for that purpose may be properly filled. Section 16 of Article XIII, Grand Lodge Constitution, should be consulted.

Some of our Lodges are constantly casting about for something new with which to make their meetings interesting. The following is suggested as worthy of a trial: Take up the constitutions and laws of the Order and discuss them. It would have the effect to make them more thoroughly understood.

The amended and revised constitutions are now going through the press of A. L. Bancroft & Co. They will be ready for delivery in the course of a week or ten days. Orders should be sent in at once, and will be filled as soon as possible and in the order in which they are received.

Some of our Lodges are a little slow in remitting on their assessment calls. Of course this is for want of a close attention to duty in most instances, for the funds are always on hand ready to meet a call on the first of each month, and there is nothing to do but make a remittance report and send the funds along accordingly. Brethren, remember that the promptitude with which you remit determines the promptitude with which we can pay death losses.

No further contributions have been received to the Upchurch Fund since last report. We desire to remit the balance on hand before the session of the Supreme Lodge, and ask such Lodges as have contributed nothing (there are some 20 of them who were organized before the call was made) to take action at once, if they desire to do so at all. We want about $90 more to make an even $1,000. Twenty Lodges at $4.50 each, will bring up the amount, or 10 at $9 each will do it. If Lodges will not liquidate the balance, let's try individual contributions. It should never be said that California ever undertook any good work and failed in accomplishing all and more than was expected of her!

The rapid progress of the Order since the meeting of the Grand Lodge is very gratifying. From north and south, east and west, does cheering news come of the onward march of the A. O. U. W. From present appearances it seems that this will be the most prosperous year the Order has yet experienced in California. It must be very gratifying to the old sentinel—Grand Recorder Pratt—to see his beloved Order so full of vim and activity. Then our new Grand Master, Bro. Barnes, will undoubtedly feel proud that during his administration the Order is forging so steadily forward. In city and country he is doing yeoman service for the cause, scarcely a night passing but what he is encouraging the brothers by his presence. Let the people take heed, for here is something that merits their attention.

Dr. A. S. Adler, Medical Examiner of Friendship Lodge 179, has resigned, having received the appointment of Acting Assistant surgeon at the United States army station, Fort Point.

Memorial, 174, will give its first anniversary ball on June 10th. From the known character of their membership we may expect a recherche affair.

The Lodges of San Francisco have almost unanimously agreed to let the General Relief Committee take charge of the annual picnic.

From Grand Master Workman.

The Select Knights.

Office G. M. W. of Cal., A. O. U. W.
San Francisco, Cal., April 22d.

Editors Watchman:—I had perused the editorial in the *Overseer* (Missouri), prior to the reception of your note, and without referring to the assertions of that journal which, while claiming to be an organ of the Order, totally ignores and disregards the opinion of the Supreme Master Workman on the subject of the "Select Knights," I will give you, in brief, the reasons why we have deemed it advisable to discountenance the organization in California.

1. The Supreme Lodge has exclusive control of all ritualistic work, regalia, etc., of the A. O. U. W., and any "degrees" conferred under said title, except those promulgated by the Supreme Lodge, are clandestine, illegal and spurious.

2. The Supreme and Grand Lodges are the only authorities that can issue charters to bodies of men to work under the name of A. O. U. W., and any body of men claiming to meet and do "work" under the title of A. O. U. W., without a legal charter from said Supreme or Grand Lodges, is "a spurious and illegal body."

3. The title "A. O. U. W." is an original and peculiar title, adopted by this fraternal society, which has been acknowledged and legalized by the various courts, States, etc., in acts of incorporation, etc., as belonging exclusively to this Order; therefore the assumption of this title, or initials, by any other organization, would be and is not only a grave offence against all fraternal law, but against the common law of the land, and renders the offenders liable to prosecution. (See laws relating to trade-marks.)

4. The association called "Select Knights" has, without the authority or permission of the Supreme Lodge, attached the title of A. O. U. W. to its name, has advertised and pretends to confer "advanced" or higher "degrees of the A. O. U. W.," has a ritual and regalia not authorized and prescribed by said Supreme Lodge, and the Supreme Master Workman has declared its use of the title, its so-called degrees, ritual and regalia, totally unauthorized by the Supreme Lodge. It is therefore a "spurious" body, in the fullest sense of the term.

5. Section 665 of the Digest forbids under severe penalties the organizing, countenancing, or visiting, by M. W. of this Order, any "spurious Lodges," which plainly infers that no illegal or unauthorized associations of any character under the title of the A. O. U. W. are to be encouraged.

6. The Grand officers of California, last year, unanimously expressed their opinion as above, and although several bodies of so-called "Knights" were in process of formation, when the attention of the membership was called to the facts of the case and the opinions of the State authorities, as well as that of the S. M. W., they immediately acquiesced, and to-day, within this jurisdiction, cannot be found an intelligent M. W. who would join said "Select Knights" under its present assumed illegal title.

In my judgment, the failure of the Supreme authorities to promptly bring to account the originators of this scheme, and the lethargy evinced in regard to it, and the joining of it by men who have gone in without even looking at the question of legality, largely accounts for the degree of boldness with which the *Overseer* speaks, and the assumption "that this is a free country, and men can call themselves what they please," and "what is the Supreme Lodge going to do about it," etc. It is an old saying, but not a true one, "that men can do as they *please*." It is only true "when they *please* to *do right*." I have every confidence that time will satisfactorily settle this, as it has similar matters in days gone by. The Supreme Lodge is amply able "to do" whatever is necessary.

We have taken our position in this State on the subject, and no "degrees" will be conferred here except those authorized by the Supreme Lodge, nor will any misleading of the public on the subject be permitted. Should the Supreme Lodge adopt the degrees and promulgate them, then the "Select Knights" may come in welcome. Until then, they will not find even the "glorious climate" of California, congenial.

Long ago I expressed my views upon this matter, to the S. M. W., which accorded with his own. I should have had nothing further to say at present but for your request on the subject, and believing it an important one, I have no hesitancy in giving you the opinions we hold here in regard to it. Fraternally yours,

Wm. H. Barnes, G. M. W.

Thomas Wilburn Cunningham.

Bro. Thomas Wilburn Cunningham, acting P. M. W. of Hercules, No. 53, was borne to his grave on Sunday, April 23, 1881, under the auspices of the Ancient Order of United Workmen, Free and Accepted Masons, Independent Order of Odd Fellows, Knights of Honor and Order of Chosen Friends. King Solomon's Lodge, No. 260, F. and A. M., performed the burial service, the other societies acting as escorts. There was a large concourse of our citizens in attendance; less than one-third could gain admission in Hamilton hall, corner Steiner and Geary, where the body lay in state. The elegant casket and pedestals were profusely covered with wreaths, crosses, floral emblems and beautifully wrought pillars of flowers, over which lay the lamb-skin or apron of a Master Mason. The Worshipful Master, Thomas H Wands, assisted by the brethren and the Masonic choir, performed the burial service in a dignified and imposing manner. The procession was formed by his brethren of I. O. O. F., numbering 30; K. of H. with 30; O. C. F. with 60; A. O. U. W. with 70, and F. and A. M. with 60, all in their appropriate regalia. The first named societies opened ranks and the brother Masons marched through, followed by the hearse and a large number of carriages and citizens. This was repeated at the Odd Fellows' cemetery, where hundreds had gathered to witness the last ceremony before depositing the body of our lamented brother in the vault. The procession of societies named marched in front of the hearse, followed by the carriages containing the family of deceased, and citizens in carriages, the procession reaching over one mile in length. The heart-stricken widow, surrounded by her little family of four children, two of whom are twins (two and a half years old), presented a sad sight. Of the causes that led to this unfortunate affair, we will not discuss them; suffice to say our departed brother was drawn into this quarrel in trying to assist the distressed and protect those who needed his protection. He was young, in the prime of life, a devoted husband and father, beloved and respected by a large circle of acquaintances throughout the State, and a leading member in the fraternal and beneficiary societies of which he was a member. Bro. Cunningham has left his family in comfortable circumstance in a pecuniary sense; the beneficiary societies alone will pay to his family $12,000. And this forcibly illustrates the necessity of making provision for the exigencies of life. There were many notable and touching incidents at the funeral: the innocent babes clinging to the mother, who was dressed in heavy mourning, and whose overwhelming grief found vent in deep, loud and subdued sobs and sighs. As the brethren of the mystic tie marched around the casket depositing the sprig of acacia, while around them stood hundreds of his brethren also, only wearing different regalias, it was an impressive scene. But more than all was the undying love of the true wife evinced. As the casket was borne away a single beautiful rosebud fell to the ground, which was immediately picked up by the heart-broken widow and in agonizing accents of grief clasped to her bosom. Stout hearts gave way in tears and the silent farewell was said to our noble, generous brother, Thomas Wilburn Cunningham.

Bay View, 159, South San Francisco, assisted by "The Originals of '81," gave a literary and musical entertainment at Myrtle hall, on the evening of the 29th inst. It was a very creditable and enjoyable affair. An extended notice will be given in our next.

We had the pleasure of meeting our young brother, John P. Zipf, of Manzanita Lodge, No. 154, at Forest Hill. Bro. Zipf is now Recorder of his Lodge, and reports a gradual increase in membership.

The following is a statement of the condition of the Order in this State up to April 1st: Total M. W. in State, 11,550; ditto in city, 3,552; gain in city in March, 125; in State, 317; rejections, 63.

The ladies of Silver Star, No. 2, D. of H., will give one of their pleasant re-unions at Temescal on May 20th.

The Relief Committee is active and successful in procuring employment for brothers of our Order.

A. A. Egleston has been appointed D. D. G. M. W. for District No. 4, this city.

A Sad and Fatal Accident.

One of those heartrending afflictions which appeal so strongly to the feelings and in which words fail to picture the sympathy felt, occurred at Salinas on Friday, April 22d, by which Bro. H. S. Ball, P. M. W., of Sausal Lodge, No. 47, and Mayor of Salinas, lost his wife and two sweet little children. Bro. Ball had left home about 8 o'clock for the purpose of attending his Lodge, and on his return he found his house in flames. Every effort was made to rescue the loved ones, but without avail. Two streams of water were thrown upon the portion of the building where they were supposed to be, and in about 10 minutes the flames were sufficiently under subjection to allow entrance into the room, where the remains of Mrs. Ball and her two little daughters—Henrietta and Nelly—were discovered and brought out.

A dispatch from Salinas City, dated April 24th, says: Never in the history of Monterey county has there been witnessed such an outpouring of sympathy as was to-day observed at the funeral of the lamented Mrs. Ball and her two children. The remains, inclosed in handsome caskets, were taken to the United Presbyterian Church early on Saturday morning, where they laid until taken from thence to their final resting place to-day. All Saturday the church was thronged with ladies and gentlemen, eager to render what assistance they could in paying the last sad tribute to the unfortunate dead. Enormous quantities of flowers were contributed, and the decorations of the church were magnificent, showing the esteem in which the family was held. Although it was announced that the funeral would not take place until 11 A. M., as early as 9 o'clock the people commenced visiting the church, and by 10 o'clock the building was filled to its utmost capacity, hundreds being unable to gain admittance. The streets leading to the church were closely packed with vehicles of all descriptions. The cemetery is located a mile and a quarter from town, and when the head of the procession reached the city of the dead the latter portion had not left the church. Two hearses were used in bearing the coffins, and these were followed by 223 carriages containing sympathizing friends. It was by far the largest procession ever witnessed in the county. Flags were displayed at half-mast, buildings covered with the insignia of mourning, and during the services at the church all the bells in town were tolled. Thus closed one of the most heartrending and gloomy scenes it has ever been the lot of the inhabitants of this city to witness. Mr. Ball is driven almost to distraction with grief, which kind hearts and willing hands are trying to assuage.

No man should consider his duty ended when he has joined the Order. It is not reasonable to expect great results and $2,000 upon his death, and do nothing for it. Members should always remember that the reason the beneficiary money to be paid is carried so cheaply is that the work is done at the lowest rate compatible with safety. Hence when members do not do something that will bring strength to the Order, they are forgetful of the fundamental principles on which every beneficial organization is founded.

A new idea is about to assume shape in regard to fraternal societies. We notice in the *Banner of Chosen Friends* that an organization is in the process of formation which proposes to pay sick benefits from a supreme head on the assessment plan. From $10 to $25 per week will be paid, and the society is to be run in connection with all beneficiary organizations paying death losses.

A plan is in favor in a Lodge in Maryland having for its object an increase in the membership of the Lodge. It is that each member who proposes a candidate shall be credited with the sum of $3 on assessments. It is stated that this action has proved successful, and other Lodges have imitated it.

Shasta county has two Lodges of the A. O. U. W.—one at Shasta and the other at Redding.

Iowa reports 105 new beneficiary certificates issued during March.

To Keep Gun Barrels from Rusting.

The Boston *Journal of Commerce* says: One of the great difficulties which the sportsman has to contend against is the rusting of his barrels, even when protected by the best browning. The alkaline matter existing in snow and in rain, under certain conditions of the atmosphere, works through the best coatings, and reaches the iron. Varnish, as ordinarily laid on, is objectionable, as it gives a gun a "Brummagem" look. The best plan is the following: Heat the barrels to the temperature of boiling water (not any hotter, or you may injure them), and rub them with the best copal varnish, giving them a plentiful coating. Let them remain hot for half an hour, and then wipe them clean with a soft rag. In this way you can get enough of the varnish into the pores of the metal to act as a preservative, and, at the same time, no one would suspect that the barrels had ever been touched with varnish. We have applied boiled oil, beeswax, paraffine, and some other substances, in the same way, and obtained good results; but on the whole, we find nothing better than good copal varnish.

The same journal, in speaking of the rust and corrosion of iron in general, says: Iron is easily corroded by even the weak acids. Sulphuric acid, nitric acid and hydrochloric acid all act on it quickly and powerfully. Air and moisture also quickly corrode it. It is a curious fact that carbonate of soda protects iron very perfectly from rust. We have seen a piece of iron that had been kept in a solution of soda for 20 years, and yet was quite bright.

There are several methods of protecting iron from rust. Painting, varnishing, tinning, zincing, etc., have all been tried with good effect. Painting and varnishing need no remarks. Where bright work is to be temporarily protected, however, a paint of white lead and tallow may be used. This will not dry, and may be easily and quickly removed with a little turpentine.

SUCH IS THE POWER OF HEALTH that, without its co-operation, every other comfort is torpid and lifeless as the power of vegetation without the sun. And yet this bliss is commonly thrown away in thoughtless negligence or in foolish experiments on our own strength; we let it perish without remembering its value, or waste it to show how much we have to spare; it is sometimes given up to the management of levity and chance, and sometimes sold for the applause of jollity and looseness.

Industrial Secrets.

A century ago, what a man discovered in the arts he concealed. Workmen were put upon an oath never to reveal the process used by their employers. Doors were kept closed, artisans going out were searched, visitors were rigorously excluded from admission, and false operations blinded the workmen themselves. The mysteries of every craft were hedged in by thick-set fences of empirical pretensions and judicial affirmation. The royal manufactories of porcelain, for example, were carried on in Europe with a spirit of jealous exclusiveness. His Majesty of Saxony was especially circumspect. Not content with the oath of secrecy imposed upon his workpeople, he would not abate his kingly suspicion in favor of a brother monarch. Neither king or king's delegate might enter the tabooed walls of Meissen. What is erroneously called the Dresden porcelain—that exquisite pottery of which the world has never seen its like—was produced for 200 years by a process so secret that neither the bribery of princes nor the garrulity of the operatives revealed it.

Other discoveries have been less successfully guarded, fortunately for the world. The manufacture of tinware in England originated in a stolen secret. Few readers need be informed that tinware is simply thin iron plated with tin by being dipped into the molten metal. In theory, it is an easy matter to clean the surface of iron, dip it into a bath of boiling tin, remove it enveloped with a silvery metal to a place of cooling. In practice, however, the process is one of the most difficult in the arts. It was discovered in Holland, and guarded from publicity with the utmost vigilance for more than half a century. England tried in vain to discover the secret, until James Sherman, a Cornish miner, insinuated himself master of the secret, and brought it home. The secret of manufacturing cast steel was also stealthily obtained, and is now within the reach of all artisans.

ANGRY wife (time, 2 A. M.): "Is that you, Charles?" Jolly husband: "Zash me!" Angry wife; "Here have I been standing at the head of the stairs these two hours. Oh, Charles, how can you?" Jolly husband (bracing up): "Shtandin' on you head on t' shtairs! Jenny, I'm shprized! How can I? By Jove, I can't! Two hours, too! 'Stronary woman!"

Are You Really Clean?

The advantages of thorough personal cleanliness are only appreciated by a few, for most people are ignorant of what thorough personal cleanliness means, and consider ablutions which are confined to the face, neck, and hands all that is necessary. If one were to say to the average man or woman, "You are not clean," it is very certain the average man or woman would be horrified and feel insulted. It is a fact, nevertheless, that largely from ignorance, and partly from prejudice, we go through life "dirty," rarely, if ever, cognizant of the physical pleasure to be derived from perfect cleanliness.

Now, it may be asked here, not inopportunely, "What is perfect cleanliness?" Briefly, let us describe it as that condition which enables the body to breathe with regularity and ease through the pores of the skin. Whenever the body cannot so breathe, we are not clean, and some internal disorder, more or less severe, is the inevitable result. A great many people are sick simply because they are dirty. Cleanliness, as it is generally understood, means that the surface of the skin is free from dirt. This, however, is not real cleanliness. To be really clean, not only the surface of the skin, but its pores must be free from dirt, furthermore the blood itself should be free from impurities.

It may be said with truth that dirt on the surface of the skin is not nearly so deleterious as dirt in the pores. This statement is proved by the fact that workmen engaged in labor where proper perspiration is induced are rarely unhealthy, simply because, though dirty in the ordinary sense of the term, the pores of the skin are kept constantly washed and clean.

Of this fact most of us are ignorant. Our ancestors in olden times were not so ignorant, and knowing full well that hot and cold water washed the skin, but not its pores, in order to keep themselves perfectly clean, used the hot air bath.

Interesting remains of the hot air bath exist in Assyria, Egypt and Morocco, and in the district of Lebanon, where the habits of the people have always been the same within the memory of man. We have abundant evidences that this kind of bath flourished centuries ago, throughout Europe, particularly in France and England. The North American Indians have a rude form of hot air bath, so also had the ancient Mexicans.

We are indebted to the Turks for the preservation of the bath as it was in vogue in ancient times, hence the name, Turkish bath. The Turks adopted it from their conquered enemies, the Greeks, and made no modification in its practice. During the middle ages, when a bigoted and rabid ecclesiasticism ruled Europe, and when "dirt" became a religious duty, this bath disappeared from use, and public attention was not again drawn to it till about fifty years ago, when David Urquhart, an enthusiastic and scholarly Englishman, who had resided many years in Constantinople as a member of the English embassy, became convinced of the immense benefit its adoption might be to his own countrymen, and wrote a book upon the subject. Twenty years later, Dr. Richard Barter, a hydropathic physician, located at St. Anne's, in Ireland, took up Urquhart's ideas, went to work and constructed the first Turkish bath in Great Britain. From that time the movement spread all over Europe, and more lately all over this country.—*Food and Health.*

DANGER OF LIGHTNING FROM TELEPHONE CONNECTIONS.—The Cantonal government of Zurich, having been applied to by a telephone company for permission to fix the supports of insulators on the tops of certain public buildings, applied to Prof. Kleiner for an opinion. The following is a summary of the chief points in his report:

1. The danger of lightning in houses over which telephone wires are stretched is not increased, but lessened, if the total conductivity of a wire is approximately equal to that of a lightning conductor. This condition is not always fulfilled under existing arrangements. It may be insured by very simple arrangements, such as the introduction of a special wire for the conduction of lightning wherever the number of wires of two millimeters in thickness running in the same direction is less than 60. This should be insisted upon in all cases. Single connections running along the houses should be stronger than at present—at least as strong as telegraph wires.

2. As the properties of a telephonic plexus for attracting and conducting lightning extend over far wider tracts than those of a lightning rod, a strict regulation of their make and condition is necessary.

The use of telephones should be suspended during thunderstorms.—*Neue Zurich Zeitung.*

COLOR AND HEAT.—The following experiment was performed by Franklin to ascertain the absorption of light and heat by various colors. He took a number of little square pieces of cloth of various colors—black, deep blue, lighter blue, green, purple, red, yellow and white, and laid them down on the snow on a bright, sunshiny morning. In a short time the black, bieng most warmed by the snow, was sunk so low as to be almost below the stroke of the sun's rays; the dark blue almost as low; the lighter blue not so low as the dark; the other colors less as they were lighter, and the quite white remained on the surface of the snow. We thus learn that black cloths are not so fit to wear in a hot sunny climate as white ones.

Lodge Locals.

Recorders are invited to correspond. Members may also find suitable reading here for "good of the Order" in the Lodge.

Notes from Walnut Creek.

EDITORS WATCHMAN:—A Degree of Honor, A. O. U. W., was organized here April 5th. It was instituted and officers installed by Bros. D. S. Hirshberg, D. D. G. M., of Oak Leaf Lodge, No. 35, and Bro. S. F. Morrill, P. M. W., of Temple Lodge, No. 11, of Temescal. The following officers were elected: Mrs. Thomas Johnson, P. W. S. of H.; Mrs. H. S. Shuey, W. S. of H.; Mrs. G. W. Yoakum, S. of H.; Mrs. M. Kirsch, S. of C.; Miss May Lawless, Secretary; Mrs. J. M. Wilson, Treasurer; Mrs. Nellie Moore, Usher; F. L. Foster, I. W.; M. Kirsch, O. W. We instituted with 37 charter members, and this promises to be a very prosperous Lodge. Name, Bay Leaf, No. 7. Our meeting nights will be the first and third Tuesdays of each month.

We had made arrangements to have a picnic and ball on April 6th, but owing to the inclemency of the weather the picnic had to be postponed. Notwithstanding this, it cleared off about noon, and quite a number gathered. We then met in the hall, and Bro. Hirshberg made a very able address. Bro. W. S. Urmy, Recorder of our Lodge, also made some very appropriate remarks in favor of the Order. Wm. H. Barnes, G. M. W., and Oscar T. Shuck and J. H. Barry, of Myrtle, 42, were to have been present, but owing to the state of the weather did not come. The ball was well attended, nearly 100 couple present. Our Lodge still prospers. We took in six new members last month, all number one men.—J. M. WILSON, D. D. G. M. W.

Del Norte, 183.

This Lodge, located at Crescent City, writes Bro. Woodbury, started Nov. 11th with 28 members. We now have 34, with prospects of many more, all good material, and expect before the year is out to have at least 60 members, which, considering the size of the place, is a good number.

Empire, 112.

Wm. H. Barnes, G. M. W., visited this Lodge recently, located at Modesto, Stanislaus county, and gave a lecture in Rogers' hall explaining the object and the aims of the Order of United Workmen. To say, says the Modesto *Herald*, that Mr. Barnes is a genius would only name a simple fraction of his abilities. He is an orator, a splendid singer, a fine musician and a splendid fellow generally. The hall was not crowded, which can only be accounted for in the fact that the people had never heard him. Should he ever visit Modesto again, that hall will not be able to hold the people. After about half an hour occupied in explaining the objects of the Order, he seated himself at the piano and entertained the audience by singing several songs, one or two of which were of a humorous character. After the exercises at the hall, the members of the Order in Modesto tendered him an excellent supper at the French restaurant, and his genius for entertaining was again called into requisition. He also visited the Lodge at Turlock, and gave the members there instructions in the workings of the Order.

Gilroy, 26.

The third anniversary of the organization of Gilroy Lodge, No. 26, was celebrated at Music hall, Gilroy, on Monday, April 11th. At 8 o'clock the members with their families and invited guests began to arrive, and in a short time a party 200 strong were present. An excellent quadrille band filled the orchestra and an expert player sat at the piano. Card tables were placed around the room, and quartettes engaged in favorite games. The ladies did noble work. With a generosity for which they are noted, they prepared a bountiful feast. The supper tables were arranged with good taste. The spring crop of Gilroy's flower gardens was well represented in handsome bouquets. A few hours passed in dancing and social conversation, when supper was announced, and a most tempting spread made of well cooked meats, salads, confectionery, etc. All heartily enjoyed the entertainment, and all retired more favorably impressed than ever with the grand fraternal institution which has brought to many families here as elsewhere, a sense of security and protection.

Humboldt.

EDITORS WATCHMAN:—The members of Bay City, 111, congratulate their Trinity neighbors on the organization of a second Lodge of the Order in that county. Weaverville, as usual, took the lead, and now Trinity Center has a healthy, vigorous Lodge of Workmen. As yet Humboldt county has only one Lodge, but two others will be instituted soon. F W. Bell, D.D.G.M.W., has received the charter, etc., for a new Lodge at Trinidad, 25 miles up the coast from Eureka, and, assisted by a deputation of members of Bay City will institute the Lodge on the 30th inst. Trinidad and neighborhood contains the material with which to inaugurate and maintain a creditable Lodge of Workmen, and I believe it will be done. Prominent citizens of Ferndale, a thriving town 20 miles south of us, desire to have a Lodge of the Order there, and I am inclined to believe they will accomplish it soon. It is possible that Arcata will apply for a charter before many months. As the workings and intent of our Order became more generally known, a greater interest in it is evident, and Bay City is having a steady, healthy growth. Members are consulting as to the propriety of celebrating our second anniversary in June, but no direct action has yet been taken in the matter. When there is you shall know it.—D. E. G.

Los Gatos, 76.

EDITORS WATCHMAN:—Los Gatos is not the least of the cities of California, for out of her has grown a Lodge of the A. O. U. W., which you and the readers of the WATCHMAN will hear more of in the future. Although we are away down in the foothills, we are not ashamed of our work. We have received quite an addition to our membership since your humble correspondent had the honor of being admitted as a member of this Lodge of the A. O. U. W. I here wish to state that we have had with us a good brother of Burns Lodge, No. 68, who was kind enough to present to our Lodge a copy of the WATCHMAN for the period of six months. The Workmen of our Lodge were also agreeably surprised at a recent meeting to find, gracing the walls of the Lodge-room, two nice large pictures, which had been placed there by our good brother, Samuel Leydeson, which cost about $12. Yours in C. H. and P., L. L. MAJORS.

Pasadena, 151.

We recently learned that this Lodge is active, with progressive work in prospect. A picnic was to be given April 30th, at Oak Grove. No doubt the Workmen of beautiful Pasadena and vicinity had an enjoyable season with their numerous friends, and one of profit to all concerned. We hope some brother will favor the WATCHMAN a report.

Redding, 72.

This Lodge will give a grand picnic May 2d. Extensive preparations have been made and a good time full of healthful fun and amusement is assured There will be Calithumpian fancy-dress maskers, and also boys and girls in fancy-dress costumes, and a prize will be given to the best sustained character. A May Queen and King will be selected, and they request the boys and girls to do their best to win the various prizes.

Stockton, 23.

EDITORS WATCHMAN:—This Lodge is making solid, material progress. It was my privilege to visit this Lodge last Friday evening and witness its workings. The roll call evinced every officer in his place, each one of them being the embodiment of health and corresponding good nature. The Master Workman degree was conferred with a systematic ease which manifested careful study and commendable familiarity with the ritual. The Lodge is careful in the selection of its material, hence while its growth is slow, it is healthy. Its membership is as genial, affable and social as any I have met in California. Stockton, 23, will long grace our Order in the Golden State. Suggestion—Grand officers should be cautious and not cast unmerited reflections on Lodges such as this; it can do no good, and may do much harm. Yours in C., H. & P., J. A. MILLER, M. D.

Temple, 11.

Wm. H. Barnes, G. M. W., visited Temple Lodge, No. 11, Temescal, on the evening of April 11th. The unwritten work was exemplified by him, and a live address was given to the brethren. Three candidates received the M. W. degree. There were delegations present on this evening from Berkeley, 10; Hearts of Oak, 61; and University, 88, completely filling the cosy hall of No. 11. The Lodge-room has recently been altered, refitted and decorated, and is bright and cheerful. Brief remarks were also made by A. Fleming, D. D. G. M. W., and Bros. Dupree, Graber, Morgan, Hans, Schultze, Conger, Craibe, and others, after which a generous collation prepared by the fair hands of some of the officers and members of Silver Star, Degree of Honor Lodge, was enjoyed. The evening was well and profitably used.

Trinity Center, 194.

A new Lodge of the A. O. U. W. was instituted at Trinity Center, Trinity county, April 2d, by C. W. Craig, D. D. G. M. W. The editor of the Trinity *Journal* writes as follows of the proceedings: In company with Dr. J. C. Montague, medical examiner of Weaver Lodge, No. 161, A. O. U. W., we left Weaverville on Friday afternoon on horseback. We reached Trinity Center in time for a good dinner at Williams & Shuford's hotel. Soon thereafter we were comfortably installed in the school house, and applicants for membership in the new A. O. U. W. Lodge were sent in for examination, this being much the same as is required for life insurance. With a reasonable intermission for supper these were continued until about 8 o'clock in the evening. Meantime Comet Lodge, No. 84, I. O. O. F. had met, hurried through with their business and kindly tendered the use of their neatly furnished and comfortable hall to the would-be Workmen. An adjournment was therefore taken to Odd Fellows' Hall, 18 charter members chosen, and afterwards instructed by the District Deputy in the Junior Workman and Master Workman Degrees, after which an election of officers was held. The hour of midnight having arrived, the fact that a chicken supper had been prepared at the hotel was announced and a recess was declared for the purpose of investigating the matter. It is, perhaps, useless to say that the supper was not only investigated, but annihilated, and a unanimous verdict rendered that it was a splendid supper, and reflected credit on all engaged in its preparation. Returning to the hall the meeting was again called to order, and the newly elected officers regularly installed in their respective positions. After installation, Trinity Center Lodge, No. 194, A. O. U. W., under the jurisdiction of the Grand Lodge of the State of California, was declared regularly instituted and in working order. After a few pertinent remarks relative to the merits and workings of the Order by the deputy, the Lodge adjourned until 2 P. M., it being then nearly 3 A. M. During the forenoon of the following day, three more examinations were made by Dr. Montague, and, while these were going on at the schoolhouse, the officers and members of the new Lodge were being lectured at Odd Fellows' hall on the work of the A. O. U. W. At 2 o'clock in the afternoon the new Lodge was called to order and opened in the usual form by its own officers. Applications for membership, accompanied by favorable recommendations from the medical examiner were received and three applicants were duly elected. The applicants were then regularly admitted to membership through the usual initiatory ceremonies, and were declared to rank as charter members. In order to permit this work to go on, the Good Templars postponed their regular meeting from 2 P. M. to 4 P. M., at which hour the Workman's Lodge again adjourned. Learning that the officers would like further instructions in the secret work during the evening, the Council of Champion of Honor, who meet in Odd Fellows' hall on that evening, most generously decided to hold no meeting, but permit the new organization to occupy the Lodge room. Accordingly the deputy met there with the officers and several members of the new Lodge and gave them a good drilling in the "work" of the A. O. U. W., running until after 10 P. M., and putting some of the brothers to sleep in their chairs. Following is a complete list of the charter officers and members of Trinity Center Lodge, No. 194, A. O. U. W.: Samuel Hubbell, P. M. W.; Augustus Rumfelt, M. W.; John Larsen, F.; Fred. Zarli, O.; John W. Shuford, Recorder; John H. Carter, Financier; Geo. R. Dack, Receiver; John Coyle, G.; Richard Frasier, I. W.; Alex. Sandford, O. W.; Henry L. Gates, Samuel Borden, Chas. E. Joy, A. C. Galland, Amos Bradley, George Rostetter, Louis Johnson, Jens Johansen, Erick Peterson, M. Heimbucher and Dennis F. Deasy, numbering 21 in all. Bros. John Larsen, Fred. Zarli and John H. Carter were chosen Trustees. The new Lodge starts with a good membership and under favorable auspices. The Order is one which commends itself to all who would in health make sure provisions for the near and dear ones who survive them, and thus attracts the best elements of citizenship in every locality. So it will be that Trinity Center Lodge will increase in strength and usefulness until its membership includes about all the worthy people of that locality, who have the required qualifications.

Oakland Lodge Locals.

Oak Leaf, 35.

Among the prominent and pleasant features of our Order are the social and intellectual entertainments given from time to time in the Lodge room, after the regular business is attended to. Our brethren of Oak Leaf are not excelled by any Lodge in this jurisdiction, from the fact that they manage to have interesting and profitable exercises of this kind on each Lodge meeting. As showing their mode of conducting these adjuncts, their last four meetings have been utilized as follows: 1st. A debate on this question: "Will the S. P. R. R. be a benefit to the State of California?" 2d. "What is, is right." 3d. Original essay, read before the Lodge; also an original poem, by Bro. Dunton, P. M. W., whose modesty is a barrier to publication in the WATCHMAN. 4th. Varieties, chiefly music, of which this Lodge has an abundant talent among their membership. The programme for this evening we give more fully: First, instrumental music, piano and harmonies on the organ, Bro. G. F. Page. Zither, instrumental, Bro. G. A. Trost and guitar, "Shells of Ocean," Bro. Babcock and flute accompaniment Bro. Page. Solo and guitar, Bro. N. H. Babcock. Solo and piano accompaniment, Bro. W. E. Frost. The music was artistic and very acceptable to the listeners. L. J. Rector. D. D. G. M. W., of District No. 2, Alameda, being present, made a few congratulatory and advisory remarks that were well received; followed by Bro. Dunton, P. M. W., in his interesting manner, not forgetting to throw hits at those brethren whom he loved the best. As an antidote to the bombs that had been thrown, P. M. W. Robinson was called, and in his quiet but incisive manner, turned the bombs into boomerangs. These intellectual tilts are quite common among the brethren of this Lodge. As a proper closing to a very pleasant evening, Dr. J. A. Miller, P. M. W., made one of his interesting and acceptable speeches, in which he paid the PACIFIC STATES WATCHMAN a high compliment, saying: "I regard it as the best fraternal family paper published." The young but efficient M. W., J. J. Jones, appoints leaders, who select subjects and choose assistants for the next meeting. Workmen can always spend a pleasant evening in Oak Leaf, and we commend their course of procedure as worthy of imitation by other Lodges.

San Francisco Lodge Locals.

Fidelty, 136.

Wm. H. Barnes, G. M. W., and E. F. Loud, D. G. M. W., paid Fidelity an official visit on Wednesday evening, April 21st. The J. W. degree was conferred on one, and a pleasant recess had. Bro. Barnes, in his usual entertaining manner, made a short speech that was acceptable and instructive, followed by Bro. Loud in a few congratulatory remarks. This Lodge, less than two years old, has now 287 members, and will soon pass the 300 mark. At their last meeting Bro. Sanderson resigned his position as Foreman. An election was held and Bro. F. J. Symms was elected Foreman and Bro. J. R. Sayers Overseer. They were duly installed by Bro. Smith, D. D. G. M. W. This Lodge has provided itself with a full set of by-laws, which, for style and usefulness, are better than any we have seen. They contain constitution, officers and P. M. W., rules, etc., together with the names, occupation and place of business of each member of the Lodge. For the use of the members a number have been bound in leather. In order that those who may join the Lodge hereafter can have their names inserted stubbs have been left in the front part. Other Lodges might profitably adopt the same plan.

Harmony, 9.

The semi-annual literary and social entertainment given by Harmony, No. 9, at Ixora hall, on Wednesday evening, April 20th, proved a complete success. The following programme was given to a good audience: Opening address, S. S. Johnson, Foreman, which was very appropriate and well received; cornet solo and encore, Prof. Coggin, of the Ixora Hall band, Mrs. M. E. Joost accompanist on the piano; song and encore, "The Golden Days," Miss E. S. Coon, daughter of Bro. Coon, Recorder of Yerba Buena; recitation, the "Baron's Last Banquet," Mr. W. D. Duane—an acceptable effort; piano solo, C. S. Hoffman, P. M. W.—a fine specimen of high art music; Highland fling and encore (in costume), Miss Jane Carbrae; Chinese impersonation, J. Gorf—a very clever effort; selections (comic) and double encore, Mr. Howard McGill; solo and double encore, Bro. James Booth; recitation, Bro. H. F. Morris—a very pleasing and artistic effort; female impersonations, Mr. Bamford—a very pleasing effort; Hebrew specialties, with three encores, Mr. John Stokes; closing with a piano solo by Bro. H. F. Morris. This literary entertainment was worthy of the occasion, with so many recalls that it was 10 o'clock at the close. The evening's entertainment was closed with dancing a short list of dances. The Ixora Hall band, of 11 pieces, discoursed the late and popular music in a manner that drew from the dancers many compliments. It was a very enjoyable evening, the best feeling prevailed, and not a jar or discord the whole evening. The several committees were very attentive to their guests, and made them feel that this was a family gathering of Workmen. That their efforts to please have been so successful we publish the several committees: Committee of Arrangements—S. S. Johnson, Frederick Blight, Matt. Lindsay, Chas. W. Kramer, Z. T. Whitten, D. Cohan, M. J. Sullivan. Reception Committee—James McCann, W. P. Carman, W. Thackeray, John R. Fischbeck, Dr. L. J. Henry. Floor Manager—Thos. H. Wilton. Floor Committee—Capt. W. M. Redmond, A. O. Colton, John H. Schick, J. B. Neiderost.

Hercules, 53.

Our brethren of Hercules held a large and interesting meeting on Friday evening, April 15th. The business of the Lodge was quickly dispatched and closed, after which the audience turned themselves into a "free and easy." The "Hercules minstrel club" appeared in costume, numbering eight, and in very pleasing and acceptable manner carried out the following programme: Bro. Rhind, organist, and Bro. Phillips accompanying, piano and violin overture. Opening chorus, "Across the River," followed by "Little Footsteps," by Bro. Bergeman, all joining in the chorus, which was heartily applauded; song, "Susan Jane," and full chorus; fresh conundrums; solo and chorus; scientific questions; song and chorus; some knotty questions; song, Bro. Vining, and full chorus; some weighty questions; closing with "Auld Lang Syne," the audience by request joining in full chorus. This, their first effort, was so entertaining and so well received by their brethren they will give a similar one once a month with additional attractions. The Hercules minstrel club as now constituted is made up as follows: Brothers Vining, M. W., leader; Hastings, Rec., tamborine; Nichols, bones; Bergeman, balladist; Powell, triangle; Parasault, balladist; Rhind, pianist; Phillips violinist.

Noe Valley.

The entertainment given by this young subordinate on Tuesday evening, April 26th, proved a complete success; in fact, it excelled any one held before. A stage had been erected, extending across the hall, with curtains, paraphernalia, etc. At an early hour the large audience assembled, consisting of delegations of ladies and their escorts, wives, and a sprinkling of young people. The programme was then opened by humorous reading by Bro. Watson; instrumental quartette, known as the Diana Club band, consisting of the Messrs. Westenhaver and Messrs. Edwards; reading, Bro. Lawton, P. M. W.; Stages of Intemperance, a local drama, by J. D. Thompson, M. W. There was a good moral in this play, and quite ably brought out by the actors on this occasion. It was played in three acts, interspersed with song and ludicrous scenes of daily life. Its lesson was forcibly illustrated in total abstinence as the only safe course. Accordeon solo, Bro. Jos. Neiderhaust; song, the Misses Madsen. These sweet little singers of seven and nine years were very well received. Piano duet, Miss Sarah Welbon and Miss Lora Jordan. A good performance and a hearty en-

core. Recitation, D. V. Thompson, Recorder. Song, the Misses Axford, daughters of Wm. Axford, Receiver; accompanist, Mrs. Dr. McDermott. These young ladies acquitted themselves with great credit, and were rewarded with an enthusiastic encore. Piano solo, Mrs. McDermott. This lady is at home on the piano, her performances on all occasions being very good indeed. At the conclusion of the programme noted, the hall was cleared and dancing held the audience until 12 o'clock. The good feeling manifested upon these occasions is quite apparent, the whole audience resolving itself into one happy family. While the young folks were indulging in the light fantastic, the elderly people looking on with evident pleasure, the Master Workman was busily engaged, and with success, explaining the objects of the Order and seeking recruits. The Lodge is very careful as to the material admitted, as we understand there has been more rejections, according to its size, than in any other Lodge. Success to Noe Valley, its officers and members.

Olympic, 127.

Since our last report we note a continued progress in No. 127. Without being in any manner startling (and this Lodge is not given to surprises, except when a brother offers a resolution that it visit some of the South Sea Islands on a fraternal visit, or some other place) a good record is being made. The brethren of Triumph, 180, recently made a fraternal visit. Addresses were made by Bros. Waterman, senior P. M. W.; Lichau, M. W.; excellent remarks by Bro. Lochner, G., replete with many bright and original thoughts; also, by the sitting P. M. W., Bro. McKay, and others. On the part of Olympic, Bros. Dixon, P. M. W., Morgan, P. M. W., and Cummins, represented the Lodge worthily and well. A plan is now underway which we hope will increase the interest in the meetings. The Lodge aims at excellence in all things, and we have no doubt but that they will succeed in this.

Spartan, 36.

This old pioneer is moving along with unusual prosperity. On April 21st there were two applications, and four received the M. W. degree, swelling their membership to 128 M. W. This was quite an interesting meeting, and several of the brethren, who are leading men in our city, indulged in an earnest debate. A resolution was offered and carried that a fund of $20 be set apart to be used in keeping delinquent members in good standing.

Silver Spray Visitation to Golden Gate, No 8.

Quite a large delegation of the members of Silver Spray, D. of H., paid a visit to Golden Gate, No. 8. This being the meeting night of No. 8, the members of Silver Spray timed their call for an early closing. It seemed that this was a heralded visit, as preparations had been made to receive them. After a welcome from the M. W., Bro. Voorhees, each guest was presented with a beautiful card on which was tastefully printed:

GOLDEN GATE, No. 8.

A. O. U. W.

Welcome.

SILVER SPRAY LODGE, No. 3, D. OF H.

Thursday Evening, April 21, 1881.

A short time was spent in listening to some instrumental music by Harry J. Lask, P. M. W., and short speeches by Sister McCloud, Sister Holliday and Bro. Macdonald. Bro. Morris, of Myrtle, being present, was called and read some comic selections. An adjournment was then made to Laurel hall and dancing indulged in a short time. The only complaint we heard came from one bachelor Workman, who said there were not enough ladies present. We learned that this was to be a surprise party, but as some gave the project away, it was a surprise to the Silver Sprays to see so many brethren in Golden Gate. These friendly calls are productive of fraternity and good feeling among Workmen and will be continued.

Triumph, 180.

Geo. T. Shaw, D. D. G. M. W. of District, No. 2, paid Triumph an official visit on the 19th inst. He received a very cordial welcome from this Lodge, and in his pleasant and agreeable manner helped to spend a very profitable evening. There were six applications for the degrees. The J. W. degree was conferred on three, in a manner that reflected great credit on *each* officer. The work was given almost letter perfect without the use of the Ritual by any officer. A short recess was spent in a style peculiar to Workmen. Under head of "Good of the Order" E. F. Loud, Deputy Grand Master, took occasion to congratulate this Lodge at its extraordinary success since its formation under the most trying and prolonged opposition from a number of Lodges in this city. George T. Shaw, D. D. G. M. W., followed in extended remarks in which he said "I have not seen better work done in any Lodge of Workmen. You have the unwritten work letter perfect, and your charges are given in a manner calculated to impress the candidate at once with the beauty and usefulness of the Order." Bro. Coon made some felicitous remarks, followed by Bro. McKay, acting P. M. W., in remarks that were appropriate to the occasion and well received. Triumph Lodge, No. 180, is a fixed fact as one of the leading Lodges of this city.

Valley, 30.

At a meeting held on April 21st by Valley, No. 30, there were eight applications for the degrees, and one admitted by card, the J. W. degree was conferred on twelve, and the M. W. on eleven. It is almost needless to say that the work was done in that dignified and correct manner for which this Lodge justly has the reputation. Under the able management of Geo. A. Case, M. W. and his able assistants this Lodge with a membership of 790 attends to the personal wants of each member with strictness and fidelity. On this evening the Lodge-room was well filled, a number of visitors being present. The increase in membership for the month of April will be about 50, which will pass the 800 mark, with a commencement on the last 200 to make the 1,000 members.

TESTIMONIAL CONCERT.—The testimonial concert tendered to Prof. H. C. Seib, organist of Fidelity, was held at B'nai B'rith hall, on Thursday evening, April 21st. The weather proved unfavorable, yet a fair and select audience was in attendance. The following programme was given: Part First.—Duett for violin and piano, fantasie on themes from "Lucrezia Borgia" (Donizetti), Messrs. Chas. Goffrie and H. C. Seib; song, "Amalia" (Millard), with hearty encore, Mrs. Blake Alverson; aria, "Non piu Andrai" (Mozart), Prof. Seib; song, "Deep in my Heart" (Centemeri), with a hearty encore, Mrs J. M. Pierce; theme with variations (DeLorenz), Herr Ernst Schlott. Part Second.—Duett for violin and piano, "Le Tremolo" (DeBeriot) Messrs Chas. Goffrie and H. C. Seib; vocal duett, "Come to the Woods" (Alavy), with hearty encore, Mrs. J. M. Pierce and Mrs. Blake Alverson; song, "Ave Maria," with violin obligato (Gounod) and complimentary encore, Mrs. J. M. Pierce; reminiscences from "Martha" (Flotow), H. C. Seib. This was a very pleasing concert, consisting of varied selections of high-art music, that was listened to with rapt attention and satisfaction.

ELECTRO-THERAPEUTICS as a science is growing in favor as one of the best and surest medical agencies in the treatment of almost all diseases, especially those of a chronic nature, or diminution of the vital forces. Bro. W. J. Horne, has made this science a life long study, and by patient and persevering industry has succeeded in making what is known as the *Electro-Magnetic Medical Belt*, that is receiving the highest testimonials as one of the greatest curative agents in the disease of the human system. He has lately succeeded to the firm of Horne & West, 702 Market street, and is now the proprietor and manufacturer of this celebrated Electro-Magnetic Belt. The first number of his *Electro-Magnetic Journal*, of 28 pages, has just been issued, giving the history, influence, and remedial agency of electricity in diseases, together with the manner of using and appliances therefor. This journal will be sent to any one wishing to make this a study, or avail themselves of the knowledge of enjoying perfect health. In this connection we cannot but regard our esteemed brother in his researches and inventions as one of the benefactors of this age.

BRO. BYRON JACKSON, whose agricultural machine works and foundry are located on Sixth and Bluxome streets, has admitted as a partner I. J. Truman, and the firm will hereafter be known as Jackson & Truman. Mr. Truman has been in the hardware and agricultural implement business for the past 21 years in this State. The capital of the new firm will be ample for the enlargement of the business, and which they expect to increase. They start under favorable auspices, and will, no doubt, meet with success.

J. MEREDITH DAVIES, P. M. W., our esteemed brother from Iowa, has just returned from a flying trip to the East, bringing with him his wife and family. We welcome him to his new home, hoping he will find it as pleasant to remain here as it is for Workmen to have him. Having charge as general agent of the Chicago and Northwestern railway, being 3,000 miles under one management, any one desirous of traveling by rail, would do well to call on J. Meredith Davies, general agent Pacific coast, Lick House, San Francisco.

IXORA HALL.—This new hall is growing in popularity under the present lessees. It has the reputation of having the best floor for dancing in this city. The ventilation is very good. It is easy of access, centrally located and under the immediate supervision of the proprietors. No questionable parties or entertainments are allowed here, it being the desire of the proprietors to furnish a place only for the respectable portion of our community. Connected with this hall is the Ixora Hall band, which has facilities for furnishing the choicest music for balls or private parties.

THE house of J. W. Burnham & Co., 618 Market street, and 16 and 18 Post street, has dissolved, Bro. J. W. Burnham succeeding to the business. His long experience and extensive stock of goods is a guarantee that purchasers can be satisfied. Goods will be sold at extremely low rates for 30 days for cash.

GEO. T. SHAW, D. D. G. M. W., and one of the firm of Turner, Kennedy & Shaw, wholesale and retail lumber dealers, corner of Fourth and Channel streets, is always glad to receive his friends, either officially or to sell all varieties of lumber for house building or fencing.

Bro. M. LEVINGSTON, 208 Kearny, who is Med. Ex. of Memorial, has been appointed Med. Ex. of Friendship, No. 179.

Human Nature.

To the casual reader there may be nothing beyond a humorous aspect to the above cut, but to those of a philosophical turn of mind there is ground for reflection and study. A description of the picture is hardly necessary. A chimney sweep has prevailed upon a bootblack to polish his boots and give to his pedal extremities a shade similar in appearance to his face. That it is not a savory job is apparent from the distance at which he holds his face from his customer's foot and the way in which he percolates the abundant saliva through his clenched teeth. It is evidently not a labor of love. The sweeper of chimneys seems to be elated at the thought that there is some one menial enough to minister to him—the celestial angle of his nasal organ, the curl of the lip, half scornful, half patronizing, the backward tip of the head—in fact, the whole pose of the figure shows that the man has, for a few brief moments at least, a fellow being at his feet.

HOME INDUSTRY.—We always take pleasure in noting the progress of home manufactures. The Mission Iron Foundry, Bro. Wm. Axford proprietor, is a notable one in this respect. Formerly all those fine castings that go into furniture and pianos were made in the East. Since the establishment of this foundry they have been completely driven from the coast. Bro. Axford furnishes Sacramento with castings equal to 100 sets per week. He also supplies all the manufacturers in this city. He confines himself to intricate and fine castings, and his work in this line has received well-merited commendation. The natural increase of his business has compelled him to increase the capacity of his works, and he has recently erected a large addition to his premises. The foundry is located on the northwest corner of 25th and Noe streets, and merits the encouragement of all who desire to see California stand on an equal with other manufacturing States.

GRAND EXCURSION TO MONTEREY.—The grand excursions to Monterey via S. P. R. R. (broad gauge) last year, that were so attractive and popular, will be resumed this season. The first one will be on Sunday, May 8th, leaving Fourth and Townsend at 8 A. M., Valencia and Twenty-sixth, 8:10. Tickets for the round trip can be procured at office, No. 2 New Montgomery, under Palace hotel, for $3; children half price. These excursions will be under the management and personal supervision of Bros. McCord and Gyselaar, whose long experience in this line warrants them in the future, as they have been in the past, the chief attractions of the season. Lodges can make arrangements and have special cars. All will be provided with a good seat.

NEWPORT SWIMMING BATHS.—These celebrated baths have been renovated, new buildings erected and all appliances for safety at hand. Bro. J. P. Wonderlich, the proprietor, with his past experience and accommodation will make this one of the chief resorts for pleasure seekers and invalids. We are assured that these baths will have that strict decorum and improved regulations which will make it a pleasure for the best classes of our citizens to enjoy them.

THE house of Ray & Smith, 513 Montgomery street, general commission agents and brokers, are just taking a leading position in their line of business. Bro. T. W. Ray is the efficient Recorder of Triumph Lodge, and is always at his post.

THE San Francisco *Traders' Directory*, a tri-weekly, is published by Goldstein & Cook. It is now over one year old and growing in favor with the business men of this city. Bro. Goldstein is to be congratulated on his success in this enterprise.

TO THE READERS OF THE PACIFIC STATES WATCHMAN.—I have now a full stock of Builders Materials, Carpenter's Tools, Brushes, Fine Cutlery, Parlor Rifles, Air Guns, etc at my wholesale and retail Hardware Store, 28 New Montgomery Street, under the Palace Hotel, which are offered at lowest prices in this market. It is no trouble to show my goods, as they are all new and selected especially for the trade. FRANK P. LATSON, proprietor, formerly with the late H. Rosekrans.

News from Illinois.

The Lodge increase in Illinois the last term was 20 Lodges, there being 174 Lodges represented in the Grand Lodge session. Nineteen hundred new beneficiary certificates have been issued. The net gain during the year has been 1,757 members.

The report of Grand Master Workman Morris stated that he had approved warrants for $90,000 on the beneficiary fund of the Order, $730 refunding of representation tax, and $7,540.40 from the general fund. This latter includes the warrants paid for the last session of the Grand Lodge. A total of $98 275.40.

Some of the proposed changes in the Grand and Subordinate Lodge Constitutions were very important, and received the careful attention of the body. The vote of the Lodge upon the subject of temperance was quite emphatic. An amendment forbidding the holding of Lodges in places where liquors are kept or drank passed by an almost unanimous vote.

Carter H. Harrison, Mayor of Chicago, spoke in eulogistic terms of the objects of the organization. In the course of his remarks he warned the Order to beware of those who might seek to enter the body for the purpose of promoting their own political ends. "Keep politics out of your oganization," he said, "as you bar out a pestilence."

Roderick Rose, Mayor of the city of Davenport, Iowa, and Supreme Master of the A. O. U. W., of the United States, and R. S. Towle, P. G. W., of Iowa, were received and introduced to the members of the Grand Lodge by Past Grand Master Workman Morris and McLean.

Past Grand Master Workman William G. Morris, E. M. Sanford and Alexander McLean, were duly elected Representatives to the Supreme Lodge of the Order, which meets in Detroit in June, 1881.

The committee on legislation reported in favor of the appointment annually of a Grand Medical Examiner for the State, which report was adopted. Subsequently the appointment, which had been referred to the Grand Master Workman, Grand Recorder and Trustees, was given to Dr. Million, of Springfield.

The financial committee presented the report of their examination of the books of the officers of the Grand Lodge, from which it was shown that the Order had received from its membership during the past year the sum of $110,534.46, which had been disbursed as follows: In payment of death losses, $92,000; paid as a contribution to the Supreme Lodge for yellow fever losses, $2,772.75, and for the general expenses of the Order in the State, $8,749.75. The committee reported that there had been returned to all the Lodges the balance due them from representation tax paid.

The committee's estimates of expenses for the coming year is as follows:

Expenses of next Grand Lodge	$5,500
Salaries	1,900
Representation tax Supreme Lodge	730
Total	$8,830

It estimated the revenue for the same period as follows:

Per capita tax	$8,170
From beneficial certificates	1,000
Total	$9,170

It recommended the fixing of the per capita tax at $1, payable 50 cents semi-annually, and compliment the retiring Grand Recorder, H. H. Palmer.

The next session of the Grand Lodge will be held at Quincy, Ill.

A LIFE insurance policy for £1,000 ($5,000) issued in December, 1795, was recently paid in England. To give the heirs that amount of money cost the insured, taking interest and compound interest into account, £7,950, or $39,750, the aggregate premium payments being £1,483 or $7,415, or $2,415 in excess of the policy. Compare this to the cost of a beneficiary certificate in the A. O. U. W. If we take the average annual cost at say $20, for that length of time, we find that it would cost $1,700 to secure $2,000 to the family.

THOSE who desire to get acquainted with ancient Irish literature will find in the *Philo-Celt* a good medium. It is a monthly magazine, price $1 a year, published at Boston, Mass.

Our Agents.

A Gigantic Artificial Moon.

The colossal representation of the moon, which has been on exhibition at Steinway hall, in this city, during the past week, does not appear to have attracted anything like the attention it deserves. On a half globe, 16 ft. in diameter, the mountains, plains and other characteristics of the lunar surface visible from the earth are shown in relief, with shadings and colorings faithfully representing the moon as seen through a powerful telescope. It is by far the largest, most elaborate and expensive portrait of the moon ever made; and, seeing that it was constructed for and under the immediate direction of one of the most eminent of living selenographers, Dr. Schmidt, now director of the observatory at Athens, Greece, we may safely accept it as a faithful portrait. It certainly gives at a glance a clearer and more comprehensive idea of the physiography of the moon than could be got by much study with any other means short of a telescope of great power. When gradually lighted from one side by a powerful lime light, the varying phases of the moon, from new to full, are shown with impressive vividness.

The shadows of the mountain ranges, the black depths of the crater pits, the changing light upon the broad plains, and other lunar phenomena pass rapidly before the eye, enabling one to obtain in a few hours, indeed in a few moments, a more comprehensive knowledge of the lunar surface than can ever be had of the earth's surface until some enthusiastic geographer constructs in relief a terrestrial globe on a scale of corresponding magnitude.

The "moon" has been purchased and brought to this country for exhibition by Mr. E. Riverston, and it is to be hoped that it will ultimately find a permanent abiding place in some of our public institutions. Meanwhile students of astronomy and all persons taking an interest in science will find the exhibition well worthy of attention.—*Scientific American.*

IN business, in home life, in social intercourse, in politics, there is a success worth striving for, which is the attainment of the immediate object in view; but there is something much higher, far more valuable, far nobler. It is the purity of character, the elevation of the purpose, the fidelity to principle, and perseverance of effort which are of themselves the real success of life, and shine through all the clouds of temporary failures.

SOME men are always trying to begin at the top, unmindful of the fact that it is all folly to shingle the house until after the cellar has been dug.

ARE THEY NOT ARTISTS?—A correspondent of the Germantown *Telegraph*, after alluding to the grand paintings, superior sculptures, etc., results of the genius of our highest artists, asks: "Are there not others, also, whom we may call artists? When," continues the writer, "I stand among a lot of common stone masons and see one man walk around among the stones, picking one out here and there, dressing one here and there, just as though he were playing, and then suddenly begin to set them up as fast as he can handle them and the mortar, making a handsome wall, I call him an artist. If we look at a man hewing a log straight and smooth, alike in thickness the whole length, and not leaving a mark of the juggling axe, he too seems to me is entitled to the above name. Or a man, who cannot even write his name, bracing himself aside of a huge tree, and sending his axe into it with the precision of a rifle shot, making every stroke tell, and never missing the mark, and when cut in one side changes hands on the axe and cut the other, and throw the tree just where he wishes it to fall—he, too, is not devoid of artistic skill. And many a common blacksmith, who will forge out a piece of iron or steel as round as if it had passed through the turner's hands, or as square as if ran through the planing machine—I count him among the artists. Yet none of these men are ever classed with those of the higher arts."

FEED THE BIRDS.—Little children, do you ever feed the birds? If not, try it some morning, and you will be surprised how much innocent pleasure can be gathered for yourselves and "that blessed baby" who alternately tyrannizes and beatifies every well-regulated family. Softly open the door where they are wont to gather, and strew crumbs for them, and then watch the result. At first watch slyly, till they understand the arrangement, then you may boldly come to the window and watch their guileless airs of bravado, and, the while, into your dear, childish hearts will sink lessons of tenderness and mercy for all God's helpless creatures.

THERE is no contending against necessity, and we should be very tender how we censure those that submit to it. It is one thing to be at liberty to do what you will, and another thing to be tied up to do what you must.

Insurance.

THE
NEW ENGLAND MUTUAL
Life Insurance Company,
OF BOSTON,
All Policies in this Company are Governed by the Massachusetts Non-Forfeiture Law.
The only Company on this Coast Governed by this Law.
This Company was incorporated A. D., 1835, and has accumulated Assets of
$15,000,000.
THIS COMPANY HAS PAID OVER
$150,000 on this Coast
for Policies that had Lapsed from a Few Days to nearly Five Years.
In the above cases the full amount of the Insurance was paid less the overdue premium. Had these policies been in any other company doing business on this Coast, they would have been forfeited.

Mount Shasta.

The engraving on this page shows Mt. Shasta from a point of view different from that held by most who look upon it.

The noblest mountain in the United States over all hangs the eternal winter. Standing close to the mountain's base, the human eye and mind fails to grasp the immensity of the mountain. But as one from a distance looks back upon it, he discovers how magnificent is the hight. For days will the mountain fold the mist about its crest like a veil, and remain hidden from mortal sight, and then suddenly, as if in deference to a rising or setting sun, will roll back the vapors, and the watcher in the valley below will behold gems of topaz and of ruby made of sunbeams set in the diadem of white, and toward the trying to comprehend how and why the mighty mass was upreared. It is a glory in itself. It seizes the clouds with icy arms and compresses them until their contents are dropped upon the thirsty fields below; from its base the Sacramento starts on its way to the ocean; despite its frowns, it is a merciful agent to mankind, and on the minds of those who see it in all its power and splendor, a picture is painted which will last as long as the gift to admire anything magnificent is left.

MT. SHASTA—SUMMIT 14,440 FEET ABOVE THE SEA, AS SEEN FROM THE OREGON AND CALIFORNIA STAGE ROAD.

is Shasta. It is said that Whitney is higher, but Whitney has for its base the Sierra Nevadas, and the peaks around it dwarf its own tremendous hight. But Shasta rises from the plain a single mountain, and while all the year around the lambs gambol at its base, its crown is the eternal snow. In the hot summer days, as the farmers at Shasta's base gather their crops, they can see where the wild wind heaps the snow drifts about his crest. The mountain is one of winter's stations, and from his forts of snow upon its top he never withdraws his garrison. There are the bastions of ice, the frosty towers; there his old bugler, the wind, is daily sounding the advance and the retreat of the storm. The mountain holds all latitudes and all seasons at the same time in its grasp. Flowers bloom at its base, further up the forest trees wave their ample arms; further still the brown of autumn is upon the mountain slopes, and sentinel mountain from a hundred miles around men will turn their eyes in admiration. Thus it frowns and smiles alternately through the years; it hails the incoming and outgoing centuries, changeless amid the mutations of ages; forever austere, forever cold and pure. Of all American mountains it has the most sovereign look; it leans on no other hight; it associates with no other mountain; it builds its own pedestal in the valley and never doffs its icy crown. The savage, in the long ago, with awe and trembling, strained his eyes to the hight, and his clouded imagination pictured it as the throne of a deity, whence issued the snow, the frost and the wild wind from their brewing place on the mountain's top. The white man with equal awe strains his eyes upward to where the sunlight paints with purple and gold the mimic glaciers of the butte, and is not much wiser than was the untutored savage in

---

BRO. J. DAVIS, M. W. of Magnolia, No. 41, resigned on Monday evening, May 9th. The Foreman, Bro. Wm. E. Cody, will fill the position the balance of the term. Magnolia is in a very prosperous condition, having work on each night. Their roll list shows 168 Workmen, and a prominent feature in this Lodge is that its membership is largely made up of young men. Bro. John Tyler was elected Foreman. The J. W. degree was conferred on three in a very impressive and dignified manner. A committee of three was appointed, consisting of Bros. Caleb Brind, D. D. G. M. W., G. Goldsmith and M. Warwashuer, to make preparations to celebrate their third anniversary, which will take place in July. We may expect a worthy celebration in keeping with this Lodge. Under head "Good of the Order," interesting speeches were made by visitors and members, and general jollification had over the new officers and their prospective celebration.

The Difference.

We had an item in our last issue, stating that a Lodge in Maryland paid a premium to those who proposed candidates. We do not think that plan would work well in California, at least it would not in the Lodge to which the writer belongs. The members generally out here take a pride in the Order, and do what they can to further its principles. They feel that in the prosperity of the Order and in the good that will accrue to those who are dependent upon them will be a sufficient recompense for any trouble they may be put to in behalf of its principles. A little of the same feelings in the jurisdiction of Maryland would no doubt prove of benefit, and the intelligent efforts of the *Protector*, in behalf of that State to be set apart as a separate jurisdiction, would result in immediate action. If the members there are so luke-warm that they have to be bought in order to stir themselves to action, it would be better that they remain under the present condition of affairs for awhile, or until they have become more thoroughly imbued with the principles of the Order and the benefits it confers. *Verbum sap.*

BRO. F. W. WOLFF, of Enterprise Lodge, No. 17, San Jose, has gone East to look after his business interests. As a sample of our California Workmen, we can recommend him to the regard and care of our brethren in the Eastern States.

Home Miscellany.

Our State.

Our State, the grandest of them all
On which kind heaven with outstretch'd hands
Has made her richest blessings fall
And crown'd her queen of other lands.

Unequaled in her springs of health,
Her towering mountains, bleak and cold;
Her fruitful vales, her grain and wealth,
Her rivers rich, in sands of gold.

Her sons, whose active, fertile brains,
Have wonders wrought in art and trade;
Like speed of wind across the plains,
Run palace cars on railroads laid.

Her daughters, too, we'll not forget—
Perennial flowers, all blooming fair—
With eyes of blue and eyes of jet,
With blushing cheeks and silken hair.

Heaven bless our golden sunset land,
The fairest spot beneath the sun,
Where men of thought and purpose grand
A State have built—a victory won.

A victory for the laboring poor,
A home for stalwart men who toil;
Where health and plenty ever more
Will bless the men who till the soil.

—*H. Winchester in Lower Lake Bulletin.*

Dr. Jex's Predicament.

It was the funniest thing that I ever saw in my life. Cruikshank would have gloried in it. I wish I had him here to illustrate that scene with the spirited vigor that only his dancing pencil gives.

It was in Kentucky that it happened—that pleasant land of blue-grass, and tobacco, and fine stock, and white-teethed girls. Mabel, my sister, had married Dick Hucklestone, and they had begun life in great contentment and a little three-roomed house scarcely big enough to hold the bridal presents. But they were happy, hearty, healthy. They had two cows, ice-cream every day, a charming baby and Uncle Brimmer. Who shall say their cup was not full? Indeed, they thought it full before Uncle Brimmer added himself thereto—a very ponderous rose leaf. He was one of our old family servants, who fondly believed that Miss Mabel and her young husband would never be able to get on without him. He walked all the way from Mississippi to Kentucky, with his things tied up in a meal sack, and presented himself before Mabel, announced affably that he had come to "stay on."

"But I haven't any place for you, Uncle Brimmer," said Mabel, divided between the hospitality and embarrassment.

"Lor', honey, you kin jes' tuck me aroun' anywhar. I don't take up no room."

Mabel looked thoughtfully upon the big, brown-gray whiskered old negro, whose proportions were those of a Hercules, and shook her head. "You are not a Tom Thumb, Uncle Brimmer."

"No, ma'am," said he submissively, "but I've got his sperit. Couldn't I sleep in de kitchen, honey?" he went on, with insinuating sweetness.

"No, indeed," cried our young housekeeper; "I put my foot down on anybody sleeping in the kitchen."

Aunt Patsey, the cook, stood by balancing a pan of flour on her head, one fat hand on her hip. I suspected her of a personal interest in the matter, and indeed, she afterwards acknowledged that she thought Uncle Brimmer's coming would prove a "blessin' to her feet." Those feet of hers had been saved many steps, through the service of her ten-year-old daughter Nanky Palmira Kate—called Nanky Pal for short. But of late, Nanky's services had been called into requisition as a nurse, and Aunt Patsey, who was fat and scant o' breath, thought she had too much to do; and so she viewed with evident delight the stalwart proportions of our good-natured giant from the South.

"Dar's de lof', Miss Mable," she suggested.

"It's too small, and is cluttered up with things already."

"Oh, sho, chile, dar ain't nothin' in dat lof' 'cep' de taters, an' de apples, an' some strings o' terbacker, an' some ods an' ends o' de children's and Lucy Crittenden's pups. Lor' dar ain't nothin' ter speak of in de lof'."

"He can't get in at the window," said Mabel, shifting her ground.

"Lemme try," said Uncle Brimmer.

The kitchen was a small log cabin some distance from the house—"in good hollerin' reach," to quote Aunt Patsey. Above was a low room or loft, crowded with the miscellaneous articles enumerated. The only way of getting into it was from the outside. A ladder against the side of the cabin admitting one, through a little window, no larger, I am sure, than that of a railway coach, into this storehouse of treasures. Nanky Pal, who was as slim as a snake, was usually selected to fetch and carry through the small aperture. But Uncle Brimmer?

"I'm pretty sho I kin do it," he said, squinting up one eye, as he took off his coat and prepared to try.

We stood in the doorway as he cautiously went up to the ladder; and, after an exciting moment he pushed himself through the window, and turning, smiled triumphantly.

This settled the matter. A cot bed was procured for Uncle Brimmer, and he soon became the mainstay of the family. Cheerfully avoiding all the work possible; indifferently as an ostrich eating all he could find in cupboards or highways; grimly playing hobgoblin for baby; gaily twangling his banjo on moonlight nights—memory recalls thee with a smile, Uncle Brimmer! I can close my eyes now, and recall him, big, shapeless, indistinct in the semi-darkness, as he sat under the mulberry-tree, singing:

"Wish I wuss in Tennessee
A-settin' in my cheer,
Jug of whisky by my side,
An' arms aroun' my dear!

This was his favorite. Who shall doubt that it expressed to him all the poetry, romance, passion, of life?

After a time Uncle Brimmer fell ill, and we sent for a doctor.

Dr. Trattles Jex was the medical man of our county. He lived in Middleburn, seven miles away, and he came over trotting on a great bay horse, with a pair of saddle-bags hanging like Gilpin's bottles, one on each side. He looked as diminutive as a monkey perched on the tall horse's back; and indeed, he was "a wee bit pawky body," as was said of Tommy Moore. But bless me! he was as pompous and self-important as though he had found the place to stand on, and could move the world with his little lever. A red handkerchief carefully pinned across his chest showed that he had lungs and a mother. His boots were polished to the last degree. His pink and beardless face betrayed his youth; and his voice—ah, his voice! What a treasure it would have been could we have let it out to masqueraders! Whether it was just changing from that of youth to that of a man, or whether, like reading and writing, "it came by nature," I can't tell. One instant it was deep and bass, and the next squeaking and soprano. No even tenor about that voice.

He held out his hand, with "good morning, Mrs. Hucklestone. I hope the baby has not had an atttck?"

I popped into the dining-room to giggle, but little well-bred Mabel did not even smile.

"Oh, no," she cried, "it is Uncle Brimmer."

The doctor offered to see him at once. Mabel got up to lead the way. Up to this moment I warrant it had not struck her as anything out of the way that she must invite Dr. Jex to climb a ladder and crawl through a window to get at his patient. But as she looked at him speechless, spotless, gloved, scented and curled, then at the ladder leaning against the wall in a disreputable, rickety sort of way, a sense of incongruity seemed borne in on her soul. To add to her distresses and my hilarity, we saw that Uncle Brimmer had hung out some mysterious under-rigging that he wore. Long, red and ragged, it "flaunted in the breeze" as picturesquely as an American flag on a Fourth of July.

"I am afraid doctor, it will be a little awkward," faltered Mabel; "Uncle Brimmer is up there," and she waved her lily hand.

"An' you'll have to climb de ladder," put in Nanky Pal, with a disrespectful chuckle.

I thought the little doctor gasped; but he recovered himself gallantly, and said:

"As a boy I have climbed trees, and think I can ascend a ladder as a man," and he smiled heroically.

We watched him. He was encumbered by the saddle-bags, but he managed very well, and had nearly reached the top, when suddenly Uncle Brimmer's head and shoulders protruded, giving him the look of a snail half out of his shell.

"Here's my pulse, doctor," he cried, blandly, extending his bare arm. "Tain't no place for you up here. An' here's my tongue," then out went his tongue for Dr. Jex's inspection.

The doctor settled himself on a rung of the ladder, quite willing to be met half way. Professional inquiries began, when

"A deep sound struck like a rising knell."

"Good gracious!" exclaimed Mabel; "what is that?"

Nanky Pal sprang up, with distended eyes, almost letting the baby fall.

Again.

"Nearer, clearer, deadlier than before."

"Sakes alive! Miss Mabel," cried Nanky, "ole Mr. Simmon's bull's done broke loose!" She was right. A moment more, and in rushed the splendid, angry beast, bellowing, pawing the ground, shaking his evil lowered head as if the devil were contradicting him. Dr. Jex turned a scared face. My lord bull caught sight of the fluttering red rags, and charged the side of the house. And I give my word, the next instant the ladder was knocked from under the doctor's feet, and he was clinging frantically round the neck of Uncle Brimmer.

Fearful moment.

"Pull him in Uncle Brimmer—pull him in," shrieked Mabel, dancing about.

"I can't honey—I can't," gasped the choking giant; "I'm stuck."

"Hold me up," cried the doctor, "send for help."

Uncle Brimmer seized him by the arm-pits. The saddle-bags went clattering down, and about the head of Master Bull a cloud of quinine, calomel, Dover's and divers other powders and pills, broke in blinding confusion.

"Aunt Patsey, go for Mr. Hucklestone at once," called Mabel.

Aunt Patsey looked cautiously out from the kitchen door. "Yer don't ketch me in de yard wid ole Simmon's bull," she said, with charming independence.

"Then I shall send Nanky Pal."

"If Nanky Pal goes outen dat house I'll break every bone in her body."

Then Mabel began to beg: "Aunt Patsey, let her go, please. I'll give you a whole bagful of quilt pieces, and my ruby rep polanaise that you begged me for yesterday."

Aunt Patsey's head came out a little further. "An' what else?"

"And a ruffled pillow-sham," said Mabel, almost in tears, "and some white sugar, and I'll make you a bat—and that's all. Now."

"I reckon dat's about as much as de chile is wuth," said the philosophic mother. "Let her go."

"Fly! fly!" cried Mabel.

"I ain't skeered," said Nanky. "I ain't dat sort. Mammy ain't, nuther. She was jes' waitin' ter see how much you'd give."

Nanky's bare legs scudded swiftly across the yard. The bull took no notice of her. He was still stamping and bellowing under that window. Uncle Brimmer and the Doctor clung together, and only a convulsive kick now and then testified to the little man's agony.

"Suppose Uncle Brimmer should let go?" I suggested, in a hollow whisper.

"Oh, hush!" cried Mabel. "The doctor's blood would be on our heads."

"Or the bull's horns."

It was not far to the tobacco field, and in an incredibly short time brother John came riding in, followed by half a dozen stout negroes. With some delightful play that gave one quite an idea of a Spanish bull fight, his lordship was captured, and our little doctor was assisted to the house.

Gone was the glory of Dr. Trattles Jex. His coat was torn, his knees grimy, his hands scratched, and he looked—yes—as if he had been crying.

"Can you ever forgive us?" said Mabel piteously. She hovered about him like a little mother. She made him drink two glasses of wine; she mended his coat; she asked him if he would not like to kiss the baby. And finally a wan smile shone in the countenance of Dr. Jex. For me, I felt my face purpling, and leaving him to Mabel, I fled with brother John to the smoke house, where we—roared.

Uncle Brimmer got well, and went in to see the doctor. He returned with a new cravat, a cane, and several small articles of attire, from which we inferred that in those trying moments when he supported the suspended doctor, that little gentleman had offered many inducements for him to hold fast. When questioned, he responded chiefly with a cavernous and mysterious smile, only saying:

"Master Dr. Jex is a gentleman; starch in or starch out, he's de gentleman straight."

And brother John, who is somewhat acquainted with slang, said, with a great laugh, "Well, old man, you had a bully chance to judge, so you must be right."—*Sherwood Bonner.*

Husbands and Wives.—A good husband makes a good wife. Some men can neither do without wives, nor with them; they are wretched alone in what is called single blessedness, and they make their homes miserable when they get married; they are like Tompkin's dog, which could not bear to be loose, and howled when he was tied up. Happy bachelors are likely to be happy husbands, and a happy husband is the happiest of men. A well-matched couple carry a joyful life between them, as the two spies carried the cluster of Eschol. They are a brace of birds of paradise. They multiply their joys by sharing them, and lessen their troubles by dividing them. This is fine arithmetic. The wagon of care rolls lightly along as they pull together, and when it drags a little heavily, or there is a hitch anywhere, they love each other all the more, and so lighten the labor.—*John Ploughman.*

Beauty and style are not the surest passports to respectability—some of the noblest specimens of womanhood the world has ever seen have presented the plainest and most unprepossessing appearance. A woman's worth is to be estimated by her real goodness of heart, and the purity and sweetness of her character, and such a woman, with a kindly disposition and a well-balanced mind and temper, is lovely and attractive. Be her face ever so plain and her form ever so homely, she makes the best of wives and the truest of mothers. She has a higher purpose in life than the beautiful, yet vain and supercilious woman, who has no higher ambition than to flaunt her finery in the streets, or to gratify her inordinate vanity by attracting flattery and praise from a society whose compliments are as hollow as they are insincere.

There is one way of attaining what we may term, if not utter, at least mortal happiness. It is this—a sincere and unrelaxing activity for the happiness of others. In that one maxim is concentrated whatever is noble in morality, sublime in religion, or answerable in truth. In that pursuit we have all scope for whatever is excellent in our hearts, and none for the petty passions to which our nature is heir. Thus engaged, whatever be our errors, there will be nobility, not weakness, in our remorse; whatever our failures, virtue, not selfishness, in our regrets; and in success vanity itself will become holy and triumph eternal.

A good woman knows the power she has of shaping the lives of her children, and she endeavors to use that power wisely and well. She teaches her boys and girls that they must be brave in doing their duty, truthful in speech and action, honest and honorable, kind, cheerful and unselfish. By her own example she enforces and illustrates what she teaches.

The Parts of Time.

I know what a weary time you young mothers have watching and running after those troublesome babies from morning till night. And how it aggravates you for some sympathizing older mother to say with a long drawn sigh and countenance:

"Ah, you are having your good times now and you don't know it!"

If these are good times, you think, as you snatch Fred out of the ash pan, and have just set down for an instant and then run across the room just in time to rescue another toddler from the bucket of water he has managed to upset all over himself, you just wonder what the evil times will be.

Dear young mother, looking back over the past 20 years I will just tell you that you are seeing your hard times now. These weary days and sleepless nights are not the "good times" you will have when the dear children are older and more helpful, and begin to pay you back for all the toil and trouble you have bestowed upon them. Well trained children are a pride and a comfort when they begin to grow companionable; when you can sit down and talk over plans with your daughter, and when your boy comes in to "tell over to mother" his projects for the future. Time will come when you sigh to feel that the sweet years of childhood are slipping by. You almost cry out:

"Old man with the hour-glass, halt! halt! I pray,
Don't you see you are taking my children away,
My beautiful babies so bonny and bright!
Where have you carried them far out of sight?
Oh, dimpled their cheeks were and sunny their hair,
But I can't find them, I've searched everywhere."

You will look up by-and-by almost in surprise, and ask:

"Tell me, oh youth, so straight and tall,
So glad with eager thought,
Have you seen of late a bouncing boy
Brimful of merry sport?
Somehow I loved this bouncing boy
Because he was my own;
I had him here a year ago—
And don't know where he's flown."

"My boy," who so lately was taxing arm and brain just like your little toddlekin, voted for Garfield last year. It won't be long neither until yours votes for somebody. Keep them near your heart in all your ups and downs of life and you shall not lose your reward. There is a loyalty about a good boy's love for his mother that pays her a hundred fold. And I speak from experience, dear married sister. If any one claims my warmest sympathy it is the tired young mother with her little ones still about her feet. They are comforts, but they are a heavy tax also on her life power. But the parts of time run swift and the living mother will "see good days and rejoice in them all" further on.—*Aunt Olive in Farm and Fireside.*

A Full Cup.—When the saintly Payson was dying, he exclaimed, "I long to hand a full cup of happiness to every human being." This was the language of a heart thoroughly purged of all selfish affection and filled with the spirit of that love, which led our adorable Jesus to give his life for human redemption. If every Christian would go out daily among men, filled with such longing for human happiness, what marvelous changes would soon be wrought in human society! The selfish element would be eliminated from the dealings of the Christian business man. Not justice merely, but benevolence, would enter into his every-day trade. The same spirit would rule his home and church life. He would become an incarnation of good will toward all, and would so preach the Gospel by his deeds that man would see his good works, and glorify his Heavenly Father. The spirit of Payson is worthy of every man's imitation. Happy he who can truthfully say, "I long to hand a cup of happiness to every human being."—*Zion's Herald.*

The idle levy a very heavy tax upon the industrious when by frivolous visitations they rob them of their time. Such persons beg their daily happiness from door to door, as beggars their bread, and, like them, sometimes meet with a rebuff. A mere gossip ought not to wonder if we evince signs that we are tired of him, seeing that we are indebted for the honor of his visit solely to the circumstance of his being tired of himself. He sits at home until he has accumulated an intolerable load of *ennui*, when he sallies forth to distribute it amongst all his acquaintance.

Refined homes are the end of civilization. All the work of the world—railway-constructing, navigating, digging, manufacturing, inventing, teaching, writing and fighting—is done first of all, to secure each family in the possession of its own hearth, and, secondly, to surround as many hearths as possible with grace and culture and beauty. The work of all races for five thousand years is represented in the difference between a wigwam and a lady's parlor. It has no better result to show.

The sweetest and most signal revenge to inflict upon enemies, who seek to belittle our labors or underestimate our abilities, is to do everything well, to lead irreproachable lives, to earn popular confidence and respect, to eschew all but laudable undertakings, to succeed in every act and labor. Success is the most effectual reproach to envy, malice and unfriendliness.

Heart-work is better than head-work; and it is a better temper to be fervent in charity than in disputes.

For our Boys and Girls.

Our Puzzle Box.

Numerical Enigma.

I am composed of twenty letters.
My 8, 6, 9 is to hire.
My 4, 18, 7, 3 is to trade.
My 15, 13, 14 is a beast's lair.
My 1, 5, 13 is a sensation we often experience in presence of the grand and sublime.
My 1, 17, 20 is a pointed tool.
My 12, 6, 2, 19 is to instruct.
My 10, 11, 9 is an article worn upon the head.
My 16 is found in Switzerland
My whole is the name of one of Shakespear's plays.

JENNIE.

Letter Changes.

1. Change the initial of to ponder deeply and obtain a weight; change again, and form a Spanish nobleman.
2. Change the central of to permit and form a small piece of land.
3. Change the final of angry and form the human race; change again and I am a rug; again, and I am one of the twelve months of the year; again, and I am a chart.

O. G.

Problem.

A woman bought a quantity of eggs for twenty-five cents per dozen. Had she received another egg for the price she paid for what she bought, the price per dozen would have been reduced one cent. How many did she buy?

CEPHA.

Hidden Towns and Cities.

1. Dids't e'er see a sable elephant?
2. As he pronounced the fearful ban, Gordon trembled.
3. The Dove returned to the ark.
4. Is this for sale, Martha?

DICK N. S.

Transpositions.

1. Transpose terror and form a traveling fee.
2. Transpose a month of the year and form a tropical fruit.
3. Transpose manner of walking and form a subterranean passage.
4. Transpose a measured step and form a garment.
5. Transpose a South American animal and form a fruit.
6. Transpose a native constable of India and form enclosed.

The Play and How They Played It.

I always had a great admiration for authors and actors, especially the former, and am very fond of scribbling myself. One of my first literary efforts took the form of a play, to be acted out by the young people of our valley. Our valley is rather small, and contains only a few young people. We decided to meet together, and have some one read the parts aloud to us while we acted.

The eventful evening of the rehearsal came at last, and we all met, anticipating a good time. First came dressing. The queen was the principal character among the girls, and as we had no silken robes in which to wrap her, we took the next best thing; in this case a colored tablecloth. Next, we darkened her eyebrows, crowned her with a gold (paper) crown, and she was ready. The maids, fairies, etc., did not dress up much, as this was only a rehearsal.

All being now complete, we marched out into the parlor, where the boys were waiting for us. The king's upper lip was ornamented with an immense moustache, and he wore a crown similar to the queen's. The rest of the boys were guards, and they had ornamented (?) their faces with streaks of black.

The acting now began, amidst much laughter. It proceeded well enough until the scene in which the queen had to faint into the arms of her maids. The queen fainted, but the maids, instead of bearing her sorrowfully away, dropped her on the floor and held their sides with laughter. Every one joined in, and laughed until the tears ran down their faces, and so the play was given up, and we spent the rest of the evening talking, laughing and singing. My cherished play was a failure, but *I* think that it was more the fault of the actors than of the authoress.—*A Girl, in Rural Press.*

A CHILD'S dress made of flint glass and trimmed with lace made of the same material will soon be exhibited in a show window in Pittsburg. It is now at one of the trimming establishments, and is nearly completed. The dress glistens like the finest satin, and is marvelously beautiful. The fabric from which it is being fashioned was spun and woven at the glass factory of Messrs. Atterbury & Co., Pittsburg.

"MABEL, why, you dear little girl," exclaimed her grandpa, seeing his little grand-daughter with her head tied up, "have you got the headache?" "No," she answered, sweetly, "I'se dot a spit turl."

"IN what condition was the patriarch Job at the end of his life?" asked a Brooklyn Sunday school teacher of a quiet-looking boy at the foot of the class. "Dead," calmly replied the boy.

Humorous.

Chips.

A YOUNG lady resembles ammunition, because powder is needed before the ball.

WHY does not 1881 resemble a pair of lovers on a sofa? Because there is 1 at each end.

IF you have a desire to see a national and patriotic kiss, just watch E Pluri-bus unum.

A MAN out West was offered a plate of macaroni, but declined it, declaring that they "couldn't play off any biled pipe stems on him."

WHEN the telegraph companies are compelled to run their wires under ground, the worms will learn to read by sound so as to know when fishing is good.

"How like its father," said the nurse on the christening of a baby whose father was over 70. "Very like," said a satirical lady, "bald and not a tooth in its head."

ONE of the members for Wicklow assured his audience in the Lower House recently that "as long as Ireland was silent under her wrongs England was deaf to her cries."

TEACHER in American high school: Are *pro* and *con* synonymous or opposite terms?" Scholar: "Opposite." Teacher: "Give an example." Scholar: "Progress and Congress."

AN aged negro the other day was showing the scars of the wounds inflicted by the lash when he was a slave. "What a picture!" exclaimed a looker-on. "Yes," responded the colored brother, "dat's the work ob de old masters."

HE was too solemn a preacher; he didn't suit in Nevada. The chairman of the farewell committee expressed it well. Said he: "Now you can git, pard; we ain't agin religion out here, and it riles us to see a fellow spilin' it. Git."

A STRANGER passing a graveyard, and seeing a hearse standing near by, asked who was dead. The sexton informed him. "What complaint?" asked the inquisitive one. Said the old man: "There is no complaint, everybody is satisfied."

THEY had been at the masquerade, where she had recognized him at once. "Was it the loud beating of my heart, my darling, that told you I was near?" Murmured he. "Oh, no," she replied, "I recognized your crooked legs."

A LADY complaining to Sidney Smith that she could not sleep, he said: "I have published two volumes of sermons; take them up to bed with you. I recommended them once to Blanco White, and before he got to the third page he was fast asleep."

Household Hints.

JULIET CORSON'S WAY WITH POTATOES.—Lives there a cook with a soul so dead as not to be willing to expend all the powers of fire, water and salt to produce mealy potatoes? If so, the writing of her epitaph would be a cheerful task. And if cold ones are left they can rehabilitate themselves in favor by appearing chopped, moistened with white sauce or cream, and either fried in butter or baked quickly, with a covering of bread crumbs. Steam fried, that is sliced raw, put into a covered pan over the fire, with butter and seasoning, and kept covered until tender, with only enough stirring to prevent burning, they are capital. To fry them Lyonnaise style they are cooked in their jackets to keep them whole, sliced about a quarter of an inch thick, browned in butter, with a little sliced onion, sprinkled with chopped parsley, pepper and salt, and served hot. Larded, they have bits of fat ham, or bacon inserted in them, and are baked tender. Note well that the more expeditiously a baked potato is cooked and eaten the better it will be.

STEAK PUDDING.—Make a crust with fine flour, well-chopped suet and warm water, adding a pinch of salt. Place it round a basin, cut up into this some steak in thick short pieces, flavoring each layer with pepper and salt, and, if you like, some small cut onions; add also a little mace. A few pieces of kidney can be put in; on the top two small strips of bacon can be added and a couple of spoonfuls of sauce or catsup. Close this up with a piece of the same crust that is round the dish and place the basin in a steamer. The pudding must not be boiled, but steamed during a sufficient time, according to size, say one or two hours. When turned out on the dish open the top a little and put in a small piece of butter, when a fine gravy will pour over the dish.

FLOATING ISLAND —Make a boiled custard of the yelks of six eggs, a large quart of milk, sugar to sweeten and a pinch of salt. The yelks must be well beaten and strained before adding to the milk. Flavor the custard and while boiling hot pour into a dish and spread the whipped whites smoothly over the top. Cover tightly to cook the whites. When cold, sift powdered sugar over the top, and you may, if you wish, strew over grated cocoa-nut, or bits of jelly or jam.

PLUM PUDDING.—One pound of suet, chopped fine; one lb. of English currants; one lb. of raisins; one and a half lbs. of flour; cloves, cinnamon and nutmeg, one-half teaspoonful each. One large tablespoonful salt. Mix all well together, then add two cups sugar, one cup molasses, seven eggs and a half pint sweet milk. To be made over night, then put in a cloth and boil four hours. To be eaten with sweet sauce.

Health Column.

Sneezing.

"God bless you!" is the common expression of Europeans when you sneeze in their presence; sneezing having been considered in ancient times the result of a demoniac possession, to avert the evil influence they invoke a blessing. But the true philosophy of a sneeze is set forth in an article in the *Popular Science Monthly* for April under the heading "What is a Cold?" The whole of it is worth reading, but we have only room to transcribe what relates to sneezing.

"Sneezing in catarrh is a method nature adopts to stimulate the prostrate nervous center, and thus enable it to reassert its proper control over the blood supply to the part; indeed, it will be found that the effects of being exposed to a draught of cold air are often completely destroyed by a succession of sneezes. Of course, nature does not always immediately succeed in these efforts; but, when she does not, the shock from which the nervous center suffers gradually passes away, and the blood-vessels again come under the control of the little nerves which regulate their caliber, and so the catarrh disappears in a few hours, or at most in a few days. It sometiomes happens that the shock from the cold air acting upon the nervous center is of such severity that the consequent inflammation is intense enough to check the secretion of mucus altogether, and in consequence the mucous membrane is dry as well as inflamed, and the suffering very much intensified."

FEAR ON DISEASE.—It is said that while the plague was raging in Buenos Ayres the grave-diggers bore charmed lives. Of the 300 men so employed, not one died of the disease. It has often been noticed that during the prevalence of pestilential diseases physicians, undertakers, nurses and grave-diggers, whose business compelled constant liability to infection, have usually escaped in a far greater ratio than their numbers would warrant. The "charm" of this immunity from the prevailing scourge is very simple. They are not scared. They are positive to the disease, and repel its attacks. Fear is a great ally of death. Whoever is afraid of disease is in a negative condition, and really invites its approach. And thus it is the world over. The brave die but once, while cowards die many times. Much unnecessary alarm exists in every community in regard to many diseases. We are, it is true, all liable to sickness and death. But if we are all sober, cleanly and brave of heart, we need have no fear of disease of body or mind.

TOBACCO DISEASE.—A writer in Boyce's *Anvil* testifies as follows respecting tobacco as a cause of disease: "For eleven years my right hand was sorely afflicted with a most loathsome disease. Its first appearance was shortly after my *debut* as a telegraph operator, and consisted of four or five very small, watery pimples. They increased in number, however, till they could hardly be counted, and each day became more and more troublesome. Instead of a thin, watery fluid, they now began to exude a thick, offensive matter, and the physicians called it an aggravated case of salt rheum. My hand and wrist became one mass of sores and scabs. I spent some $300 doctoring with physicians and patent medicines, yet nothing seemed to give much relief; but in three months after tobacco was stopped, the disease began to disappear, and to-day there is not a particle of it to be seen about me."

IN searching for a vegetable remedy, Dr. L. D. Buckley suggests, in the New York *Medical Journal*, the gelsemium, the yellow (false) jessamine, the beautiful climbing evergreen which produces the large, very fragrant yellow flowers, from the relief it affords as a nervous sedative to the skin, might be useful. He has experimented with it very successfully, and after prescribing it for two or three years, mainly on adults suffering from eczema, he feels prepared to advise it as a means for the relief of itching in certain cases. He has used the tincture of the drug only, giving it in 10-drop doses to begin with, and, when no relief was obtained, repeating the remedy in 12 or 15-drop doses at intervals of half an hour, until results were obtained or until a dram or so had been taken in two hours.

A NEW PORK PARASITE.—A Berlin microscopist has recently discovered a new parasite in pork, which is described as "a small leech-like worm" which has not been heretofore known. The worms are found crawling about among the muscular fibers, sometimes moving very actively. A German microscopical journal of recent date contains a full description of the worms with illustrations. Nothwithstanding, pork and beans still holds it place as a standard article of diet among the masses, and ham and sausage are in as great demand as ever. It is evident that the pork-loving world have become reconciled to a "diet of worms." We prefer to *eschew* the scavenger; let those who will, *chew* him.

A BEAUTIFUL COMPLIMENT TO THE PHYSICIAN. I dare not place any gift, however beautiful, or any success, however brilliant, above the talent or the skill which can relieve a single pang, and the self-devotion which lays them at the feet of the humblest fellow creature.—*Oliver Wendell Holmes.*

Worth Knowing.

SALTING MEAT.—Salted meat is far less nourishing than fresh, and far less wholesome. We will endeavor to explain why. The preservation of meat by means of salt has been practiced from time immemorial, and is one of the simplest methods for this purpose. It depends for its efficiency upon the dessication or drying of the tissues, as the salt used for this purpose enters slowly into solution, deriving the moisture it requires for this purpose from the fluids of the flesh. Hence it is that when dry salt is strewed upon fresh lean meat, it gradually disappears in the form of a liquid brine. As the flesh loses its natural juice, the fibers contract and the meat lessens in bulk. The action of the salt, if a large quantity is applied, penetrates deeply, and as much as one-third of the natural juice of the meat is often forced out of it. The preservation of meat by means of salt, therefore, may be explained to depend upon the separation of water, upon the exclusion of air, and upon the saturation with salt of the juices remaining in the meat. But meat, though preserved in this manner against putrefaction, suffers a notable loss of its normal nutritive properties, inasmuch as the brine which gradually forms about it, contains probably one-third or one-half of the nutritive substances (albumen, kreatin, phosphoric acid, potash, etc.,) of the flesh, which are extracted along with the juices. These are the very substances which are more completely extracted by digestion with water, as in making beef tea or broth; and in proportion as these constituents are extracted, they diminish the nutritive properties of the meat. The change in the constitution of the meat by salting has been shown by Leibig to be greater than that produced by cooking, and the loss of nutritive value considerably greater; for in cooking, the nutritive albumen, etc., is simply coagulated in the fibers and retained, while in salting, the extracted substances enter the brine and are lost. Not only does salting greatly diminish the nutritive value of meat, but those who are compelled to subsist upon it almost exclusively for any length of time, are generally afflicted with scurvy, a fact which proves its unwholesomeness, and which doubtless stands in close relation with the loss of the nutritive elements, as vegetable substances which are capable of supplying what the meat has lost, are found to be the best preventative of, and the best remedy against, the disease.—*Manufacturer and Builder.*

LIQUID WOOD.—We are informed, says the *Northwestern Lumberman*, that sawdust can be converted into "liquid wood" and afterward into a flexible and almost indestructible mass, which, when incorporated with animal matter, rolled and dried, can be used for the most delicate impressions, as well as for the formation of solid and durable articles. To accomplish this, the method pursued is to immerse the dust of any kind of wood in diluted sulphuric acid sufficiently strong to affect the fibers for some days, the finer parts being passed through a sieve, well stirred, and allowed to settle. The liquid is drained from the sediment and the latter mixed with a proportionate quantity of animal matter, similar to that used for glue; the mass is then rolled, packed in molds and allowed to dry.

CEMENT FOR RUBBER.—Powdered shellac is softened in ten times its weight of strong water of ammonia, whereby a transparent mass is obtained, which becomes fluid after keeping some little time without the use of hot water. In three or four weeks the mixture is perfectly liquid, and when applied it will be found to soften the rubber. As soon as the ammonia evaporates the rubber hardens again—it is said quite firmly—and thus becomes impervious both to gases and to liquids. For cementing sheet rubber, or rubber material in any shape, to metal, glass and other smooth surfaces, the cement is highly recommended.

PARAFFIN as a preservative of wood has lately been highly recommended, especially with the view of preserving it against the destructive influences of dampness, acids and alkalies. For this purpose, it is suggested to immerse the well-dried wood in a solution of the paraffin in petroleum ether (benzine) or carbon disulphide. The wood absorbs a large quantity of the material, and the evaporation of the solvent leaves the paraffin behind in the pores of the wood. In employing this recipe, care should be taken to guard against the possibility of the ignition or explosion of the materials. A good preventive of combustion would be a thorough coating with a silicate paint.

CHEAP PAINT.—Three hundred parts washed and sieved white sand, 40 parts of precipitated chalk, 50 parts of resin, and four parts of linseed oil are mixed and boiled in an iron kettle, and then one part of oxide of copper and one part of sulphuric acid are added. This mass is applied with an ordinary paint brush while warm. If too thick, it is diluted with linseed oil. This paint dries rapidly and gets very hard, but protects woodwork excellently.

PETROLEUM is an excellent preservative of exposed wood work and tools. It penetrates the pores and repays its cost many times over. It is good for all farm buildings, gates, tools and rustic work, besides having the merit of cheapness.

Fraternal.

I. O. O. F.

THE 29th annual session of the R. W. Grand Lodge of California commenced in this city at Dashaway hall on Tuesday, May 10th. The following Grand officers were present: Ezra Pearson, G. M.; D. Louderback, D. G. M.; Leon D. Freer, G. W.; W. B. Lyon, G. S.; H. B. Brooks, G. T.; W. W. Morrow, G. Rep.; Rev. A. F. Hitchcock, G. Chap.; F. W. Bell, G. Mar.; E. J. Clark, G. Con.; Geo. D. Murray, G. Guar.; E. Dunker., G. Herald. Trustees—Lewis Soher, J. A. McClelland, John Hanson.

The Committee on Credentials presented their report and 167 representatives were introduced and 17 visiting Past Grands, and the degree of Grand Lodge was conferred on them by Leon D. Freer, Grand Warden.

A congratulatory telegram containing fraternal greetings was sent to the Grand Lodge of Ohio.

The following are the Standing Committees: Credentials—H. Hoeber, W. Pierce, E. Glover. Finance—A. W. Scott, R. K. Weston, Fred. Fillmore, H. Mitchell, C. L. Neale. Correspondence—J. H. Applegate, I. S. Halsey, A. R. Lord. Appeals—F. P. Dann, G. L. Johnson, W. W. Kellogg, C. H. Randall, E. W. Blaney. Petitions—J. A. Lotz, S. Isaacs, W. A. Spalding, C. L. Durbin, J. W. Smith. Laws of Subordinates—C. C. Terrill, Geo. T. Shaw, J. H. Peters, J. B. Leaman, W. E. Lutz. State of the Order—H. T. Dorrance, D. M. Burns, J. Ellsworth, C. B. Stone, Ed. M. Martin. Legislation—A. Block, J. E. Benton, D. W. Welty, W. W. Cross, C. W. Dannals. Mileage—J. Glasson, A. Mautner, L. Van Dorin, F. N. Spencer, R. S. Green. Printing—W. B. Lyon, F. R. Morton, F. W. Potter.

W. F. Slater, P. G. M. of Ohio, was introduced, and welcomed to a seat by Grand Master Pearson.

The reports of the Grand officers were then read, from which the following concerning the status of the Order is taken: There are 271 Lodges; members, January 1, 1881, 21,468; increase for the year, 122; brothers relieved, 2,565; number of sick week benefits paid, 15,543. Total paid for relief and charity, $172,898.24. Paid for expenses, $150,409.31. Total receipts, $456,812.07. Average receipt per member, $21.28. Assets, $1,821,742.60. Average assets per member, $89.43. Average age of members, 41 years. Died during the year, 276.

Grand Master Pearson has made a good working officer, having traveled thousands of miles at great sacrifice of time and labor. Visitations have been made to many isolated localities, the brethren encouraged and the Order benefited. An increase of 122 has been made, notwithstanding a loss from various causes of 1,805 during the term.

The report of the Grand Treasurer showed the total receipts for the general fund to amount to $13,563.83, and disbursements amounting to $10,690.67, leaving a balance on hand of $2,873.16. The Odd Fellows' College and Home Fund amounts to $1,940.21.

During the past year one subordinate Lodge, one Degree Lodge and three Rebekah Degree Lodges were instituted. One Rebekah Degree Lodge was resuscitated and two Rebekah Degree Lodges surrendered their charters.

The report of the Grand Representatives concerning the meeting of the Sovereign Grand Lodge held at Toronto, Canada, last fall, shows that the Grand Sire, John B. Harmon, of California, reported that in 1879 there were 50 Grand Lodges, 7,067 subordinate Lodges, 39 Grand Encampments, 1,342 subordinate Encampments, 34,834 initiations, 440,783 Lodge members, 79,511 Encampment members, and that the total revenue was $4,391,215.35, and the amount paid out for relief was $1,714,805.02. Since 1830 this branch of the Order has paid out for relief of members $29,206,835.56, and has received $77,984,169.72.

A petition was presented from the General Relief Committee, of San Francisco, representing that the Lodges of this city have been put to great expense by reason of taking charge of sick and destitute brothers from a distance, who are not in good standing, and ask that the Grand Lodge take such steps as would ensure the raising of a permanent fund by a per capita tax upon the membership of the State, not to exceed one cent per capita, said fund to be under the control of the General Relief Committee, of San Francisco, and said Committee to report at each session of the Grand Lodge, or to the Grand Master, the disposition of said funds. The Committee on Legislation, to whom was referred this petition, subsequently reported adversely on it.

The Committee on Petitions reported in favor of granting charters to the following: Unity Degree Lodge, No. 8, at Eureka, Humboldt county; Novarro Rebekah Degree Lodge, No. 61, at Snelling, Merced county; Paradise Rebekah Degree Lodge, No. 62, at Watsonville, Santa Cruz county; Excelsior Rebekah Degree Lodge, No. 63, at Sutter Creek, Amadôr county. Also recommending that duplicate charters be granted to Placer Lodge, No. 38, Sutter Lodge, No. 100, and Madison Lodge, No. 287, their charters having been destroyed by fire; and recommending that the action of the Grand Master in resuscitating the Millville Rebekah Degree Lodge, No. 3, be approved and a duplicate charter issued.

The Committee on State of the Order, to which was referred certain parts of the Grand Master's report, recommended the confirmation of his appointments and the approval of the commissions issued. With respect to the Grand Master's visitations, they say: "We most heartily commend the good judgment of the Grand Master, manifested in his visitations during the past year. It will be noticed that his visitations in a great degree have extended to Lodges remote from centers of population, difficult of access, small in number, and struggling for existence. From many reports we learn that his visits have resulted in great good to many such Lodges. We commend his zeal and fidelity in the discharge of this important part of his duties."

The following appeal cases were decided: Wm. C. Pentner vs. Cosumnes Lodge, No. 63, dismissed; George H. Vaugh vs. Fresno Lodge, No. 186, sustained; Henry Letroadec vs. Franco-American Lodge, No. 207, sustained.

Representative Polack introduced a resolution, which was tabled, to the effect that it is expedient that an endowment feature be established in this jurisdiction.

A report from the Committee on Appeals, approving of the decision of the Grand Master in Newfield vs. Garcia Lodge, was laid on the table.

W. S. Johnson, G. Rep. of Rhode Island, was introduced and welcomed to a seat by the Grand Master.

The appeal of C. Heinz vs. Germania Lodge was sustained after a thorough discussion.

The action of Sonoma Lodge, No. 28, in refunding the initiatory fee and dismissing a person without card or certificate whom they had initiated without knowledge that he had formerly been a member of the Order and had been suspended for non-payment of dues, was sustained. The individual was, however, granted a dismissal card.

Representative Ellsworth, of the Committee on State of the Order, presented the following report, which was laid on the table: Your Committee on State of the Order beg leave to report on the questions submitted by Centennial Lodge, No. 247, found on page 7 of the first day's proceedings, as follows: As to the first part of the first question, "Has the Noble Grand a right to appoint an initiatory member as Right Supporter?" we answer, yes. As to the remaining portion of the first question, we answer that the Right Supporter being an initiatory member, while occupying the Noble Grand's chair temporarily, has the right to decide points of order, to entertain motions, to put questions and declare the result. To the second question we answer that the Noble Grand has the right to vacate his chair for the purpose of addressing the Lodge, and that it is lawful for him to take part in debate, whether requested by the Lodge or not, provided he vacates the chair, unless prohibited by the by-laws or rules of order of his Lodge.

The Committee on Finance, to whom was referred the report of the Sacramento Relief Committee, having in charge the Richmond Fund, recommended that the usual appropriation of $350 be made by the Grand Lodge for the support of M. L. Richmond. The Finance Committee submitted a report, showing the financial condition of the R. W. Grand Lodge at present. The resources amount to $9,998.16, the liabilities to $9,968.38, and the receipts and disbursements respectively $15,710.45 and $15,014.67.

The O. F. Literary and Social Club exemplified the floor work of the three degrees on Thursday evening, May 12th.

The resolution in reference to Sacramento Lodge paying benefits to one of its members who is in the Insane Asylum, was indefinitely postponed.

The following telegram was received from the Grand Lodge of Ohio: "The representatives of the 45,000 Odd Fellows now in Ohio, in Grand Lodge assembled, accept the fraternal greeting of our brethren on the Golden Shore, and extend the hand of fellowship to be in Cincinnati, the Queen city of the West, at the meeting of the Sovereign Grand Lodge in September next."

Grand Representative Morrow introduced as a visitor Mortimer Lynn, Past Grand of Fremont Lodge, No. 15, of Boston.

The election of officers resulted as follows: Davis Louderback, Grand Master; Leon D. Freer, Deputy Grand Master; D. M. Burns, Grand Warden; W. B. Lyon, Grand Secretary; H. B. Brooks, Grand Treasurer; Grove L. Johnson, Grand Representative; John Hanson, Dr. L. Soher, J. A. McClelland, Grand Trustees; C. O. Barton, N. Booth, C. A. Sumner, P. Sander, M. M. Estee, A. B. Walker, D. W. Welty, Trustees of Odd Fellows' College and Home.

After discussion on the mileage and per diem question and many propositions submitted, the old system was retained, and all changes were voted down. The question of an endowment feature in the Order was referred to a special committee, to report at the next session. The committee consists of Representatives Terrill, Rogers, Case, Lloyd and Welty.

Representatives to future sessions are required to bring their own regalia.

It was deemed inexpedient to allow Lodges to incorporate.

Duplicate charters were granted to Placer Lodge, No 38; Sutter, 100, and Madison Lodge, No. 287.

An amendment was adopted to the Constitution of Subordinates, which allows said Lodges to use the benefits due to insane brethren in such manner as the Lodge may deem for the benefit and advantage of such insane brethren.

The Committee on Honored Dead presented a report to the effect that 50 members of the Grand Lodge had died during the past year, two of whom—A. J. Lucas, Past Grand Representative, and C. C. Hayden, Past Grand Master—stood forth pre-eminent. They recommended that the names of the honored dead, given in the Grand Master's report, be inscribed upon the memorial page of the journal. The report was adopted.

It was ordered that a new Digest of the laws of the Order be prepared.

The following appeals were dismissed: Jacob Trausne vs. Mountain View Lodge, No. 244; Duncan McBride vs. Redwood Lodge, No. 281; S. C. Nathan vs. California Lodge, No. 1.

In the case of T. B. Robinson vs. Templar Lodge, No. 17, the Lodge was directed to open the case, as per the instructions of the Sovereign Lodge.

The appeals of J. C. Holland and A. J. Davis were dismissed, and that of A. C. Waitt, Jr., vs. Oakland Lodge, No. 118, was sustained.

Appeal of Rebecca Gerbes vs. California Lodge, No. 1, was dismissed, and an appeal taken to the Sovereign Grand Lodge.

Tomales Lodge was changed from District No. 11 and placed in No. 25.

Central, No. 229, and Monroe, No. 289, were changed from District No. 35 and placed in a new district to be known as No. 88.

All of the decisions of the Grand Master during the recess were approved.

The charges for the three degrees hereafter will be $25, the Lodges to apportion the same as they may determine.

The estimated receipts for the ensuing year are $11,316.96; expenditures, $9,660. The per capita tax is fixed at 35 cents.

An amendment to the Rules of Order was made, so that "the previous question can be called for by two members."

The appeal of C. Heinz vs. Germania Lodge, 188, was sustained, and an appeal taken to the S. G. L.

All propositions to levy a general tax for the benefit of the San Francisco Relief Committee were lost.

The Committee on Credentials reports over 500 present at the session, and that the G. L. degree had been conferred on 277.

Welcome Lodge, of Igo, Shasta county, was authorized to apply to the Lodges of the State for assistance.

A committee was authorized to memorialize the Lodges and solicit subscriptions for the "Porter Monument Fund."

Resolutions of thanks were passed to the city Lodges for use of Regalia, and to the O. F. Literary and Social Club for its exemplification of the work, and the formation of similar clubs, at other points was recommended.

Rebekah Lodges are not permitted to use the funeral ceremony of the subordinate Lodge.

An initiatory member, when occupying the N. G.'s chair, by virtue of his office as R. S., can decide points of order, etc.

It was ordered that a uniform code of by-laws for subordinates be prepared.

An elegant P. G. M.'s jewel was presented to Ezra Pearson, P. G. M., on behalf of the Grand Lodge, by W. W. Cross, and received in a brief but pertinent speech by the recipient.

A surprise to Grand Secretary Lyon, in the shape of a splendid P. G. R.'s jewel and regalia, was presented in an able manner by C. H. Randall, G. R., to which the Grand Secretary made a fitting response.

A historical cane, the wood from Mount Vernon, cut in 1846, and mounted in gold by General J. Winchester at that time, was presented, on behalf of David Meeker (to whom it had descended), to the Grand Lodge by W. F. Norcross of the *New Age*. The cane was once the property of Alexander V. Fraser, who was originally commissioned to establish the Order on the Pacific coast.

The G. M. appointed the following officers, who were also installed: Rev. A. F. Hitchcock, G. Chaplain; C. H. Clough, G. Marshal; Daniel Burns, G. Conductor; J. M. Benson, G. Guardian.

Masonic.

IN England there are nearly 2,000 Lodges upon the Grand Lodge roll.

AT one of Her Majesty's recent levees a Mason wore Masonic jewels, and he was severely rebuked therefor by the Grand Lodge of England.

THE noted Anthony Comstock, of Suppression of Vice fame, has been rejected by a Masonic Lodge to which he recently applied for membership.

THE first mention of a Chapter of R. A. M. in our country is at Philadelphia in 1758, then, as everywhere, a part of the Lodge work—"the Master's Part," as it was technically called. The next body of which we have mention is St. Andrew's Royal Arch Lodge, organized at Boston in 1769, in which the officers were designated as in a Craft Lodge, except that the first officer is styled "Royal Arch Master." Its sessions were suspended from 1773 to 1789, owing to the Revolutionary war, and it is a curious fact that when its meetings were resumed, the record shows that its first three officers were called as now, H. P., K., and S. The degrees of Mark Master, which had also existed in England and America as a separate Lodge, was introduced into St. Andrew's Lodge, and in 1794 it seems to have assumed the status of an independent Chapter, and took the name of St. Andrew's R. A. Chapter.—*N. Y. Era.*

THE 12th anniversary of Golden Gate Chapter, Order of Eastern Star, was celebrated at B'nai B'rith building, in Covenant hall, on Tuesday evening, May 10th, by a grand ball. The hall was finely dressed for the occasion with the usual drapery and evergreens, and over the stage, Golden Gate Chapter, No. 1, O. E. S., 12th anniversary. The hall was well filled, as also the galleries, by a select and fashionable company. The grand march at 9 o'clock presented quite an animated appearance. An order of dances, numbering 15, with an intermission for supper, brought the happy hours to a close late in the evening.

Officers of 1881.—Georgia Washburn, Mary S. Munns, Helen A. Shaeffer, Annie E. Noble, Jennie McCormick, Elsie Hobe, Adell Ewell, J. W. Porter, Sarah Samuels, Jennie McLeod, Emily R. Eastman, Mary E. Pendleton, Carrie M. Edwards, Henry Savage.

The committees having this pleasant reunion in charge were very industrious and attentive, and made this, their twelfth anniversary, a complete and gratifying success. We herewith give them:

Executive Committee.—Mrs. G. Washburn, Mrs. Louis F. Holtz, Mrs. George Douglass, Mrs. A. L. Mann, Mrs. J. W. Shaeffer, Mrs. M. E. Pendleton, Mrs. Sol. Kohlman, W. H. Porter, Geo. J. Hobe, A. L. Starbird, Asa R. Wells, Jas. L. Homer, David Edwards, Luther J. Ewell.

Floor Manager.—Louis F. Holtz.

Floor Committee.—F. W. G. Moebus, Sol. Kohlman, William Jones, John Kelley, A. L. Mann, Henry Blythe, H. C. Roth, D. W. Richards.

Reception Committee.—Mrs. D. C. Anderson, Mrs. Chas. Elliott, Mrs. Chas. Smith, Mrs. M. S. Munns, Mrs. Emily R. Eastman, Mrs. David Edwards, Mrs. Jennie McLeod, Mrs. Henry Fisher, Miss Jennie McCormick, Miss Elsie Hobe, Miss Sarah Samuels, Miss Jessie Boyd, John F. Snow, Jerome Spaulding, D. C. Anderson, John W. Shaeffer, Thomas Griffiths, I. N. Higgins, Henry Savage, Jer. Browning, Louis Enricht, Geo. H. Little, Fred. Miller, Frank M. Stone.

Knights of Pythias.

CONNECTICUT reports a net gain of 63 members during last year.

VIRGINIA shows a net gain over 1879 of upwards of 250 members.

NEW YORK has increased its membership since January 1, 1881, by 200.

IOWA has 36 Lodges, with an aggregate membership of 1,763 members—a gain of 253 since last year.

INDIANA did not lose a single Lodge from its roster during 1880, and every Lodge closed the year 1880 in that jurisdiction with a net gain.

THE Grand Jurisdiction of North Carolina is prosperous, the membership having largely increased, and the finances being in good shape.

NEW JERSEY reports a decided increase in membership, and both the Grand and subordinate Lodges have never been in better condition than at present.

THERE are 14 subordinate Lodges, with a total membership of 854 in the Grand jurisdiction of Minnesota. A gain of 140 members is reported in the jurisdiction for the year 1880

THE following is a statement of the membership of the Endowment Rank to March 31st: first class, 11,638; second class, 15,764; third class, 122; both classes, 8,988. The following benefits were paid during the month of March: First class, 8, ($8,000); second class, 13, ($26,000); total amount paid in first and second classes to date, $649,517.

UNITY LODGE, No. 61, was instituted at the Mission on Friday evening, May 6th, by Grand Chancellor John Harney, assisted by Past Chancellors F. B. May, D. Aaron, N. L. Chace, C. C. Gilmore, A. L. Heiman, Frank Mitchell, F. A. McGuire and several Grand Lodge officers. The following were elected officers of the new Lodge: F. W. Harris, P. C.; George Powell, C. C.; T. A. E. Brady, V. C.; Charles Houghton, Prelate; Charles Justi, M. of E.; A. Morrison, M. of F.; George D'Arcy, K. of R. and S.; J. H. Seipp, M. at A.; C. W. Kiernan, G.; F. W. Norman, O. G.; Attendants, Harry Levy, B. F. Weis, C. A. Anderfuren and C. W. Decker.

MYRTLE LODGE, No. 16, gave a grand reception on Tuesday evening, April 26th. The hall was crowded to repletion. The ladies were especially remembered by each one being the recipient of a handsome bouquet. The programme is as follows, each performer being well received, and securing enthusiastic encores: Opening remarks, "A Knightly Welcome," C. W. Nevin, C. C.; vocal quartette, male voices, Arion Quartette; recitation, Fred B. Laton; violin solo, "Il Pirate," T. J. Duffy; vocal solo, "Heart! Whence Thy Joy and sorrow?" Miss Lena Hoffman; vocal quartette, male voices, Arion Quartette; piano duet, "Il Trovatore," Miss Lena and C. S. Hoffman; remarks. "Good of the Order," John H. Harney, G. C.; vocal duet, "When Stars are in the Quiet Skies," Mrs. J. H. Crocker and Chas. E. Baker; recitation, "The Whiskers," A. Hoffman; song, "Something Sweet to Think Of," Will H. Voorhees; Chinese impersonations, J. Gorf; vocal duet, "Master and Pupil," Miss Lena and A. Hoffman.

ONE of the most successful and enjoyable picnics that has yet been given this season took place on Monday, May 9th, at Belmont, under the auspices of the various Lodges of the

Knights of Pythias, of San Francisco, and Alameda counties. Three special trains were chartered and left the railroad depot, corner of Fourth and Townsend streets, at 8:20, 8:55 and 10:30 A. M., all crowded to their utmost capacity with the Knights and their families and friends. The uniformed Knights started from the Knights of Pythias Hall, on Market street, above Fifth, and paraded through the streets, headed by the Second Regiment band, until they reached the depot, where they embarked on the first train. John H. Harney, the orator of the day, made a masterly oration and was followed by George W. Peckham, in an original poem, at the conclusion of which both gentlemen were presented with an elegant basket of flowers by Miss Florence May Marden, daughter of Capt. R. A. Marden, of San Quentin. At 12:30 the games for prizes were commenced. Great credit is due to the different committees for the enjoyment of the large number who were present, the greater part remaining until the last train, which arrived in this city at 8:15 P. M.

Knights of Honor.

THE *Knights of Honor Guardian* has discovered by some unknown means that there is a movement being made among the members of the Supreme Lodge to obtain, on the part of several individuals, the salaried offices of that body, and that "these individuals are now playing into each other's hands to obtain their own selfish ends."

A WRITER in the K. of H. *Advocate* writes strongly in favor of brakemen and switchmen on railroads paying an increased rate for admission to the Order. He says that insurance companies class these occupations as "extra hazardous," and they are practically shut out from joining them, owing to the high premiums. It seems that only about 25% of the brakemen of freight trains die a natural death, the average life being about 10 years.

THE consolidation of Franklin Lodge, K. of H., with Occidental Lodge, K. of H., by the surrender of the charter of Franklin, was the occasion for a grand banquet at the Palace restaurant, opposite the Baldwin. There were three tables extending the length of the dining-room set off in fine style, and well filled with cold meats, salads, ornamental cakes, and served with hot coffee and chocolate. This room is paneled all around with mirrors, with a fine fountain playing in the front; and with its fine appointments and equipage, is one of the grandest dining-rooms in this city. The guests, numbering over 100, arrived at 10½ o'clock, and took possession of the attractive table. After dispatching the good things, Past Dictator, G. Winehill, passed the cigars. The feast of reason was opened by a short but eloquent address by the Grand Dictator, Chas. E. Travers, followed by Bros. Mahoney, of the K. of H. *Reporter*, Behre, Martin, Franklin, and others, in short, fraternal speeches. It was a very pleasant reunion, the best feeling prevailing from the time this reunion was first conceived until the close of the banquet.

THE following questions and answers are taken from the K. of H. *Reporter:*

Ques. Should Lodge jurisdictions be determined by air lines, or usually traveled routes? *Ans.* We do not understand what is meant by this question. Law I, Sec. 3, reads: "No candidate shall be received in any Lodge of the K. of H. but the one in the place where he resides, without the consent of said Lodge," etc. The word "place" in this law has always been construed to mean the city, town or municipal district into which the counties of a State may be subdivided. Now, if there is a Lodge in the place where a candidate resides, the consent of that Lodge must be obtained before he can be admitted to a Lodge located in another place. If there is no Lodge in the place where a candidate resides, there is nothing in the laws forbidding his admission into any Lodge of the Order to which he may choose to apply. Air lines and traveled routes have nothing to do with the case. The law is so plain and simple that an explanation of it seems hardly necessary, yet questions similar to the above are sent in every month.

Ques. A member enters our Lodge room in a state of intoxication, and swears that he don't care for the Dictator. Can the Lodge suspend or expel him without a trial? *Ans.* No. The Dictator himself, or at the request of any member, must bring such a case before the Lodge and have it immediately referred to a committee, who must investigate and report charges if there are just grounds therefor, when a trial follows in the manner prescribed in Art. XI, sections 2 and following of subordinate constitution. See Art. X, Sec. 3, and Art. XI, Sec. II, Sub. Const.

Ques. Must an application for reinstatement be sent to the State Medical Examiner? The case is this: A member suspended at one meeting applies for reinstatement at the next; we think that the examination of local examiner sufficient. *Ans.* The present Supreme Dictator has, by a recent ruling, decided that the certificate of the Lodge examiner is sufficient in such cases. See also note after Sec. 174, Matthias' Digest.

TENNESSEE had 130 Lodges and 6,369 members December 31st, 1880. During the year 1,259 were initiated and 78 admitted by card; 270 were suspended and 113 reinstated; 128 withdrew, 11 were expelled, and 67 died. In Memphis, with a membership of over 1,000, there were nine deaths, against 27 in the previous year.

A CORRESPONDENT suggests as a reason why the Supreme Lodge ought to put the fee for the degrees back to $10, the following: It costs $100 for charter, and in case of a new Lodge, where there are only 10 or 12 petitioners, each has to pay at least $10; whereas, if they waited till the Lodge was organized they might then be admitted for $5. A Deputy writes that it is difficult in small towns to get charter members on this account. There is a remedy for this in the Lodge's hands. It may make the fee for the degrees $10 after it is organized, though we think it would be better for the Order to put it back to $10 in all cases as the minimum fee.—*Reporter.*

American Legion of Honor.

COUNCILS of the A. L. of H. have been formed in 33 States and in Ontario, Canada.

THE following was sent to Darius Wilson, Supreme Commander, by Columbia Council of this city. It explains itself: At a regular meeting of Columbia Council, No. 335, held March 26th, it was on motion ordered, "That this Council protest, over the signatures of its Commander and Secretary, and under its seal, to the Supreme Commander of our Order against the creation of a Grand Council, A. L. of H., in this State." In accordance with said order, we, the undersigned, the Commander and Secretary of Columbia Council, No. 335, A. L. of H., of San Francisco, California, in behalf of said Columbia Council, hereby most respectfully and earnestly protest to you, Supreme Commander, against the creation of a Grand Council in this State. And we do very confidently hope you will be pleased to interpose the authority in you vested by law (in its spirit if not in its letter) to save the Order in this State from the many disadvantages we must necessarily labor under pecuniarily in meeting the great expense, incidental and accidental, attending the organization and maintenance of such Grand Council; to save the Supreme General Fund from a serious diminution of revenue, and from a corresponding increase in the demand upon it for the payment of mileage and per diem of representatives. All of which is, Supreme Commander, respectfully and earnestly submitted in behalf of Columbia Council, No. 335, by

Yours very fraternally,
ED. W. HEWITT, Commander.
W. R. WATSON, Secretary.

THE following is the financial statement of Chas. K. Darling, Supreme Treasurer, dated Boston, April 1st:

GENERAL FUND.

Balance on hand last report	$13,145 47
Received from Supreme Secretary	7,024 89

Order of Chosen Friends.

FROM the preparations being made for the picnic, given in honor of the anniversary of the Order, a good time will no doubt result.

ON Tuesday, May 17th, a Grand Council will be organized. Laurel Hall, Shiels' building, has been tendered, free of charge, to the Grand body.

THE call for assessment No. 6 to the Supreme Treasury and for Councils to collect No. 7 bears date May 8, and will fall due June 7, or the next regular meeting thereafter. The call covers four two thousand dollar losses.

AN entertainment and ball will be given at Union Hall on the 18th instant by Chrystal Council, No. 4, O. C. F., in honor of the arrival of Rev. Thomas G. Beharrell, Supreme Councilor of the Order in the United States. On this occasion the honored guest will address the public and likewise the New Grand Council of the Pacific coast.

SOME who are loyal and brave say that they would not buy badges for a Council from the Supreme Council; that the Supreme Council has no right to sell them. Perhaps not, but if not, we would be pleased to publish the reason, so that every Council may know. However, this does not apply to but few, if any, outside of Indianapolis, and here we will say, California has been the most prompt in this line of any State.—*Banner.*

FROM the Executive Committee doings in the *Banner* we take the following: It having been understood that some of the Councils had admitted to social membership persons who had not undergone a medical examination, it was decided that all applicants for membership in the Order must be examined by the Medical Examiner, except where the party is debarred from beneficiary membership by the Supreme Medical Examiner's circular, or by a decision of the Supreme Council, and that all members who have been admitted without a medical examination must have the same made within 30 days or be suspended from the Order.

I. O. G. T.

ON Tuesday evening, the 24th of May, Castroville Lodge of Good Templars will celebrate the fourth anniversary of its organization by a musical and literary entertainment at Union Church. The programme will embrace a lecture by Dr. M. D. Merrick, State Lecturer of the Good Templars, and vocal and instrumental music by local talent.

THE 21st regular session of the Sutter and Yuba District Lodge, I. O. G. T., was held at Franklin school-house, Sutter county, recently. The Marysville *Appeal* says: There are 13 Lodges in this jurisdiction, seven in Yuba, and six in Sutter county, with a total membership of 600. Three of these Lodges, viz., Wheatland, Mountain Guard and Harmony were organized this year. The Lodges represented, have an aggregate membership of 360, and were entitled to 32 delegates, of whom 28 were present at the meeting. The Wheatland delegation, consisting of five members, was represented by Mrs. Murdy, who was the only delegate present entitled to vote for absentees. She deserves honor for her zeal. The Brownsville delegation also deserves high praise for its exertions in attending the meeting, for delegates must pay their own expenses wherever they go, whether to Grand or District Lodge. It is a pleasant commentary that Good Templars' conventions are the best attended of any held. H. S. Graves, the D. D. G. W. C. T., should be mentioned in this connection as a Good Templar who is ever ready to aid with his purse the cause of temperance. He is a trustee of the Good Templars' Home for Orphans, and as an officer, both of the Grand Lodge and the District Lodge, he is called upon to spend a large amount of money annually, which he does cheerfully. Wm. Crowhurst, one of the four Grand Lecturers of the Order, who lecture night after night to crowded houses in different parts of the State, was present during the session and contributed by his knowledge and eloquence to make this the most successful District Lodge meeting ever held hereabout. The Lodge opened at 10:30 A. M, H. S. Graves presiding; all of the officers were at their stations excepting two. The usual order of business for the morning session was transacted and the Lodge adjourned to partake of a bountiful repast. The spread was excellent and reflected much credit upon the ladies of June Lodge, No. 321. Each delegate made a report of the condition of his Lodge, and these reports, together with those read by District Secretary C. Covilland, showed that the temperance sentiment is far from being on the wane in this part of the State. Marysville Lodge contains many good workers, but it is far behind the other Lodges; it has nearly 70 members, but this is small for so large a place as Marysville. It was decided that Marysville should be stirred up, and that Mr. Crowhurst was the man to do it. He will inaugurate a temperance revival here some time during the summer. E. K. Hill made an eloquent address, and his well-timed suggestions did much to aid the work of the meeting. By a unanimous vote it was decided that the next session be held at Brownsville Friday, September 30th, at 10 o'clock A. M. Wm. Crowhurst, Grand Lecturer, was then called upon by a rising vote and addressed the meeting, taking up the remainder of the session. He dwelt upon the duties of delegates to District Lodges, and suggested that they come prepared to fully represent the manner in which their Lodges are working, the influence they are having on the community, and the result of their work generally. He advised the delegations to organize, and divide their labors. After an able exposition of the aims and instruments of District Lodges the lecturer proceeded to speak of the temperance work generally. One of the primary teachings of the churches and most benevolent societies is temperance, at least if their rituals are worthy of credence. All societies of whatever kind should and will aid us in this work. The private work of the Order was next exemplified, after which the session was brought to a close a half past five o'clock P. M. Delegates and visitors were again invited to partake of a sumptuous feast of ice cream and other delicacies. Thus ended the most harmonious, pleasant and instructive District Lodge meeting ever held in that jurisdiction.

OFTENTIMES the dress proclaims the man. A stylish cut, and perfect, of the best material, can be found at the tailoring parlors of B. Friedlander, 431 and 605 Montgomery street. Bro. D. J. Levy, the celebrated cutter, presides over the cutting and fitting of all garments at these mammoth stores. Samples, with price and rules for self-measurement, sent to any address, and satisfaction guaranteed in all cases.

BRO. A. A. CROSETT, formerly of the firm of Carmany & Crosett, has opened a new store at 110 Kearny. He exhibits a fine line of men's furnishing goods of latest styles and newest patterns. Call and examine his goods and prices before purchasing elsewhere.

An Elevating Visitor.

WATCHMAN PUBLISHING CO.:—Enclosed please find $2 postal order for another year's subscription to your ever welcome paper, the PACIFIC STATES WATCHMAN. Far away from any Lodge, it is the only dear and elevating visitor I have at present to strengthen my faith in our noble Order. God speed your noble work.

Fraternally yours, HENRY MELDER.
Spokane Falls, W. T., April 30, 1881.

A NEW DIPLOMA FOR WORKMEN.—Bro. C. H. M. Curry, M. W. of Yerba Buena, No. 14, with the assistance of our local artist, Bro. W. Vallance Gray, has produced the most complete, chaste and artistic diploma for Workmen that has yet been issued. The picture is original in design and faithful in detail in representing the benevolent and protective features of our Order. Grouped around the main body are correct delineations of the Lodge room, home circle, shield, sun-burst and other appropriate pictures with the words interspersed: "Purity, Education, Elevation of Mankind, Charity, Hope, Fraternity, Fidelity, Love, Protection, A. O. U. W.," our [monogram and other devices in close and studied detail. Our California artist, Bro. W. Vallance [Gray, as a matter of pride and work of love has given hard study and effort for a long time to produce a picture worthy of this great organization. The enterprising publisher, Bro. C. H. M. Curry; artist and designer, Bro. W. Vallance Gray; printers, A. L. Bancroft & Co., are deserving the highest praise in bringing out this new diploma. It will be not only a State pride but a souvenir for Workmen that this jurisdiction may be proud of. These new diplomas will be ready for delivery in June.

J. MEREDITH DAVIES, P. M. W. and General Agent of the Chicago & North Western railway, can be seen at the Lick house. We are pleased to learn that several of the brother Workmen of Santa Rosa and Vallejo have placed themselves under his charge in receiving their tickets for a visit East. Bro. Davies has concluded to make California his future home, and to extend his acquaintance among this great organization. If any of our Lodges desire a ready talker and eloquent speaker at their celebrations, they would do well to give him a call, as he is always ready to respond to their invitations.

BRO. P. ABRAHAMSON, P. M. W., and for several terms Receiver of Unity Lodge, No. 27, is one of our leading dealers in stoves, copper, tin and hardware. The columns of the WATCHMAN have been graced with his advertisement from the commencement, and to his large and extensive business in city and county, we believe, it has been a valuable assistance. He keeps a full line of stoves, and is always provided with the "New Rival," that has a reputation second to none as a family stove. Any one wishing anything in his line would do well to call on our genial and stalwart brother, No. 939 Market street.

IN this age of advancement there is no more marked improvement than in the sewing machine. The latest improved and the best sewing machine at a moderate price is the New Eldridge, at No. 26 New Montgomery street, under the Palace Hotel. The New Eldridge uses a double-thread lock-stitch and shuttle, simple in construction and easy running. The cabinet finish are models of taste and fine workmanship. Bro. Bodley is the agent, and always takes pleasure in showing the excellence of this marvel of a sewing machine. Any person desiring of purchasing would do well to call and see him.

THE third annual meeting of the Pacific Coast Press Association will be held in this city, commencing at 11 A. M., on Tuesday, June 7th, at Washington hall, No. 35 Eddy street, which has been kindly tendered by the grand and subordinate camps of the P. O. S. of A. All bona fide editors and publishers of the coast are eligible to membership, and a cordial invitation is given to such to be present at above date.

Our organization is made up largely from the active and leading business men of this city. Any one reviewing our advertisers can take in the character of our brethren. In this connection we refer to one of the leading clothing houses in this city, Bro. E. Shrier, proprietor, corner Bush and Montgomery.

THE mammoth establishment of Bro. G. Baum, 871 Market street, is one of the largest in the city. It is well worth a visit to any one wishing to purchase furniture, carpets, oilcloth, curtains, etc. A full stock of all varieties always on hand, and in full stock.

FOR a regular line of choice meats see the stalls of Bro. John Coughlin at the Grand Arcade on Sixth street, between Folsom and Howard. Goods are delivered free to any part of the city.

SMOKERS can always find the finest brands of imported, domestic and Key West cigars, by calling at Bro. J. B. Sutton's stand, southeast corner Pine and Kearny.

THE *Golden Year* is the title of a new paper devoted to the A. O. U. W., and general literature. The first number is a credit to the publishers. It is published in Philadelphia.

A Summer Camping Trip in California.

[Written by HORACE J. SMITH.]

Six months of dry weather tempts Californians to make extended camping tours; a mode of travel which has the charm of novelty, exhilaration and healthfulness. The private carriage gives so much of delight and freedom, that it is a wonder that all travelers with money, even those with a little money, do not journey in that way, for thus are combined all the elements which go to make one light-hearted and healthy.

A journey by stage robs travel of its finest pleasures; as one cannot select their company, nor their times of going, nor stop at will. On the railroad the scene is but a swift and vanishing dream, that grows unreal while looking at it; and the details are so evanescent and transitory, and so illusive, that they are recalled only with painful effort. The panorama, to the tourist by wagon, moves slowly, so that its features have time to be fixed and permanently photographed on the mental retina.

The Route.

Our trip was up the coast from Santa Barbara to the Yosemite, thence to San Francisco, and back again to our starting point. The route adopted carried us over seven mountain ranges and their complementary valleys, including, of course the great San Josquin; and led us up into the Sierra Nevada. We started as soon as danger from rain was over—this year about the first of sixth month—when the fresh green of nature and the profusion of flowers was an ever new delight. The road for the first day lay along the narrow strip bounded by the ocean on the south and the foothills of the Santa Ynez (Saint Agnes) range on the north, thus combining a charming variety of contrasted views. What gives its peculiar character to the Coast Range scenery is the delicate and beautiful curving of their masses by the aqueous erosion of the soft material of which they are composed, and which is made conspicuous by the general absence of forest and shrubbery vegetation, except in the canyons. This scenery is rarely more than picturesque, but always novel to those coming from the East; while the peculiar atmosphere invests it with an indescribable charm.

The First Night.

We camped the first night where a canyon debouches on the ocean; a lively stream rippled along beside us, and the Pacific gently laved the sands a few rods away. Grand, gnarled old sycamores, and older live oaks, waved around our heads, as we gathered around the blazing camp fire; and when we laid down for the first time to sleep upon mother earth, the flicker of the fire light on our tent, the murmur of the creek, the plashing of the ocean and the sweet music of the wind in the trees formed a combination delicious in its weird novelty. The new camper enjoys the sensation of doing so queer a thing as tenting, and wonders how easy the bed is, and, whilst wondering, falls fast asleep. But soon the sun shines through the slim canvas, and he or she who had lain down last night, thoroughly but healthfully tired, rises as thoroughly rested this morning. A hasty toilet serves all purposes, and each one of the party falls to their prearranged duties. One folds up the blankets, another takes down the tents, while the men feed the horses, and the cook gets the breakfast; which latter consists of oatmeal, eggs, slapjacks, bacon, and perhaps game. All this is served upon a table that folds up, and slips under the bottom of the wagon, and tin plates and mugs replace the china of home. At the close of the meal, lunch is prepared, tents, bedding and baggage put aboard the wagons, and by eight o'clock we are on the road. The first five miles are made on a walk, during which a morning hymn is sung. Story telling, reading, comments on the scenery, stopping for flowers and specimens of rocks, hurried getting out of guns to shoot the game that so temptingly crosses our path, the exchange of places by some of those in the wagon with the horsebackers, speed on the hours; when some one breaks out, "Oh, I'm *so* hungry." This calls forth a unanimous shout at the idea of wanting anything to eat so soon in the day; but when the lunch is brought out, every one falls to with a will, and each day an earnest protest is made that more lunch must be put up. After lunch the two or three on the back seat, having no care of the team, fall into a quiet mood, which results in their finding themselves in "Sleepy Hollow" for an hour or two. As the time for reaching our appointed camp draws nigh, the restless ones begin to interrogate the passers-by (if there happen to be any), "How far to ——?" and the conflicting and delusive answers cause a good deal of merriment.

Arrived at last at camp—we only undertake to make 25 or 30 miles per day—all turn to and unpack, and as soon as the best place for the tents is selected, they are pitched. Then some one goes out to forage for milk and other comestibles. Our cook skirmishes around for kindling, while one of the men cuts the heavy wood. Soon the dinner of stew and potatoes is ready, and served with *hunger-sauce*, everything is appetizing; so that we eat until each turns in surprise at the gormandizing capacity of the others. Sometimes the camp ground proves untenable. At Nipoma two snakes glided by us, each over five feet long. On the San Luis mountains the driver killed a rattlesnake just after getting into camp, and at Merced, the children amused themselves by drowning tarantulas out of their nests. When a dozen had been captured at our very tent door, we concluded that it was time to move. It was found covenient several times to take an empty house in the little towns we passed through, as when in such places, we had amusing experiences of children peeking around to see the elephant or other curiosities that travelling shows bring with them. The evening was usually enlivened with a roaring fire, when campers in our vicinity would perhaps come over and join us in merry-making.

Notes Along the Coast.

But to resume our trip. At Gaviota, 40 miles from Santa Barbara, the Santa Ynez and the ocean had drawn so closely together as to forbid a further passage between them; but a mountain stream here conveniently pierces the range, and the road, traversing the pass thus made, is crowded between the precipitous rocks on either side. The narrow defile, the lofty cliffs, and the rushing torrent, which every winter carries immense boulders down its bed and tears the road and leaves it rugged, constitute a scene almost sublime. Gaining the summit of the range, one looks down on a charming pocket or little valley devoted to the plow, whose waving crops formed a most pleasing contrast to the pastoral strip along the sea. A little gorge enters this valley, and over its summit falls a stream a distance of 120 ft, making a picturesque miniature Yosemite, and we lingered lovingly in the dark ravine of Nojaqui almost all of one Lord's day. Crossing a few more spurs we dropped into the main valley of the Santa Ynez, whose mesa is crowned with one of the old Mission churches.

After leaving the valley and Mission of Santa Ynez (Saint Agnes), we passed through a well-wooded pastoral country, where the conditions are unfavorable to tillage, as in so many portions of the the State, and "walk-away crops" necessarily go hand in hand with sparse populations.

Such numerous and extensive interspaces of mountains or unirrigable land, which must be devoted to pastoral life, must always give a special character to the rest of the population of the State. Long intervening distance between communities, combined with long, dry seasons and cheap horses, invite to excursions by wagon and horseback, and thus it is that nature imbues Californians with nomadic traits. She has other seductive conditions by which to instill nomadism into the citizens of the Pacific slope; by placing bonanzas in secluded nooks, on the tops of the ranges, even above the snow line, she tempts the young and energetic to lonely and adventurous wandering all over her mountains. Again, by having in a most niggardly way denied the boon of timber trees to southern California, she has made its citizens largely dependent upon Oregon for their lumber.

The housing of the people is influenced by the climatic conditions, for, where it is never cold nor hot, the house is not the essential thing that it is where great extremes prevail; and the *home* is in the open air rather than indoors. Thus nature is a foe to the domesticity that pertains to a winter fireside and a rainy region, and roaming habits replace permanence.

We found, after rising out of the Santa Yuez valley, some arable lands interspersed among the pastoral valleys; and passing on we crossed the Santa Maria mountains. In the valley of the latter saintess, the river was dry, and the sandy, rocky bed seemed at least a mile wide; but the tedium of the trip across it was relieved by the weird look of the bluffs by which it was surrounded.

Arrived at San Luis Obispo, we found a country seat nestled among the mountains, but connected by a narrow-gauge railroad with an ocean port, at which there is a whale fishery. Monsters have been caught there, and one 84 ft. long was stranded on the shore.

From the town of San (Saint) Luis the Bishop (Obispo) we came to El Paso de Robles (the Pass of the Oaks), where are hot and cold springs and baths of sulphur and other mineral waters, and where many miracles of healing are said to have been performed by the early Padres. Such springs abound throughout the State, and the medicinal virtues of each have earnest advocates. Perhaps the *vis medicatrix* of nature, when aided by rest, fresh air and good company, is the most powerful agent.

Coming down from the high uplands of the San Luis Obispo region, we reached the Salinas plains, which open out into Monterey bay. Across this plain, as also through the mountain passes and in certain localities, strong winds blow daily; and these sometimes increase to a storm of sand and even pebbles fearful to encounter. The wind was so cold and fierce as we crossed these Salinas plains, that at 3 o'clock in the afternoon in June we were glad to espy a house in the distance, under the lea of which we were fain to drive up for shelter while we got out our blankets. Again, as we approached the Livermore pass, the wind was so furious that the face of the driver was actually cut and bled from being struck by the sharp sand flying in the air, while the rest of the company were glad to shelter themselves in the bottom of the wagon. But the effects of these winds is to make the interior valleys habitable which would otherwise prove too sultry for human endurance; the prevailing direction being from the west, carrying the fresh cool ocean atmosphere landward.

The Turn Eastward.

Leaving these sad windy plains, we rose up over the San Juan mountains, and on the crest looked back to bid the sea good-bye and then down into the charming Santa Clara valley, one of the finest in the State. This valley opens out into the San Francisco bay and lies between the Coast and Contra Costa ranges. It is thickly settled and thoroughly cultivated, and is the residence of very many wealthy people.

Proceeding up the Santa Clara as far as Gilroy, we turned squarely to the east, and crossed the Contra Costa mountains by the Pacheco pass, which some of our party were disappointed to find was not a narrow defile, such as the Greeks defended at Thermopylæ, but only an extensive depression in the range. The road to the top was one of easy grade, and on the summit we obtained an extended view of the San Joaquin valley and of the Sierra Nevada, which hems it in on the east. As agriculture is a greater source of wealth to California now than gold mining, some account of wheat culture is here in order. We rode for many days through continuous wheat fields, all unfenced, unmanured and unirrigated, which had been put in in the most economical manner that such a wholesale process can suggest. One day we camped next Mr. Funk, at Grayson, and watched his Leviathan harvester at work. Twenty horses in two lines were hitched one-half each side of the ponderous pole which extended behind, to propel the colossal machine. The end of the pole in the rear was supported on a castor wheel, and a man on a high seat on the pole guided the huge engine by a tiller. In front was a cutting-bar snipping off only the heads of the grain and making a swath 16 to 20 ft. wide. The hight of the cut was regulated by a man on the platform in front attending a large lever, and the heads fell on to an endless apron which carried them to an elevator, which in turn lifted them to a mammoth thresher, mounted on the platform of the machine. Another man attended the thresher, which ran out its debris on the cut stubble, and delivered its threshed grain into a fan, also carried on the platform. This fan also had an attendant, who swiftly supplied it with empty sacks, sewed up the full ones, and then dumped these overboard into the ocean of a grain field through which they were traveling. Thus 40 acres were cut, threshed, cleaned and sacked per day by only four men and 20 horses! Wagons following in the wake of the saurian monster, gathering up the precious freight and hauled it to the riverside for embarkation. Mr. Funk said he was only a one-horse ranchero, and yet he drove his machine two and a half miles through his grain in one straight stretch without turning. The harvester was attended by a kitchen on wheels, 30 ft. long and 10 ft. wide, walled and roofed with canvas, so that the men had no need to return for their meals to the ranch house.

Of fruit we saw a great deal in Alameda county, where we were, though entire strangers, most kindly received by Judge Russell, of Haywards, as we were indeed all along our route. He has a 30-acre currant ranch, and this fruit (as also the cherries of this region) is perhaps the largest and finest in the world.

We had been warned in leaving Santa Barbara that there were numerous lions in our path; but it had been especially impressed upon us that we should have a terrible time in crossing the San Josquio, as it overflows its banks when the snow melts in the Sierras, and makes a swamp of the plain through which it runs, extending many miles on either side. As we neared the river we had reports of the wide extent of country submerged, and found our safety was to follow the stage. Putting our baggage on the seats of our wagon and three of our ladies in the stage, we followed it as our pilot through the lake. For 14 miles we traveled through the water, which was sometimes only fetlock deep, and sometimes up to wagon bed; and in some of the sloughs there was a dangerously swift current. The driver even had to have the road indicated by poles part of the way; and we had the comforting assurance during a portion of the day, that if we deviated only a foot from the hidden causeway over which we were supposed to be driving, we should mire down in eight feet of water. Once on this causeway the mules fell down and it was an arduous task to get them up again. We had a 40 mile drive that day, and with a heavy load, soft roads and tired animals, it was an exacting work to keep the horses steady.

But all difficulties were soon surmounted and we reached our desired haven—Merced—and entered on the new task of going up into the mountains in search of the Happy valley.

Ascending to the Valley.

At Merced, our party of nine, including two drivers and a cook, was enlarged by the arrival of our friends from the East, who with their driver just doubled our numbers. Our train consisted of a four-horse baggage wagon, three two-horse wagons, and four saddle horses—a caravan of quite imposing proportion. The drive up steep hills, five and ten miles long, the narrow shelf or ledge which constitutes the road which winds so closely into and around spurs as to keep one of our nervous gentlemen in constant agony looking out for "the man coming around the turn just ahead," and the still more dangerous drive down the steep grades, has often been so vividly described as to enable the reader to realize the situation. But who shall portray the Yosemite? Who can wield a pen or brush so as to convey in its fullness the sublimity of hight and massiveness of this great natural wonder?

Top of Half Dome. Cathedral Peak. Vernal Fall. Mt. Broderick, or Cap of Liberty.

SCENE IN THE YOSEMITE—THE CANYON OF THE MERCED AND THE VERNAL FALL.

The Yosemite empties west out of Sierra Nevada into the San Joaquin valley, and is coursed by the Merced river. A rapid descent on the Coulterville trail of about 3,000 ft., lets one down to the floor of the valley, which is a nearly level area about six miles in length and from half a mile to a mile in breadth, sunk almost a mile in perpendicular depth below the general level of the adjacent region. It may be likened to a gigantic trough, hollowed in the mountains, nearly at right angles to their regular trend. This trough is quite irregular, having several angles and recesses, let back, as it were, into its sides, and at its upper end it turns sharply and soon divides into three branches, through either of which we may (going up a series of gigantic steps, as it were) ascend to the general level of the Sierra. The great hight of the almost vertical walls of the valley, especially as compared with the width of it, and the very small amount of debris at the base of these gigantic cliffs, give the trough a U shape, rather than the V shape of other California valleys.

The Features of the Scenes.

Having entered the valley at its western or lower end by either of the three wagon roads, one is soon face to face with the gigantic El Capitan, a rock standing out from the north side of the valley, so imposing in its stupendous bulk as to seem as if hewn from the mountains, squarely cut and lofty, on purpose to constitute the type of eternal massiveness. On the other side of the valley we have the Bridal Veil fall, unquestionably one of the most beautiful objects in the Yosemite. This fall, though divided into two cascades, one of 630 ft. and the other of 300 ft., has the effect of a continuous leap of 900 ft. vertical hight, its base being concealed by the trees which surrounded it. At 4 o'clock in the afternoon the sun shines on it and a shifting rainbow is seen, now rising, now falling, now swaying to the right and now to left, now irridescent, now evanescent, as the leaping water shifts and sways about under the influence of the passing wind. Proceeding up the valley, we find on the same (south) side, a prominent and massive pile of granite, sculptured by nature so as to suggest its name of "Cathedral Rock." Just beyond are isolated columns of granite, at least 500 ft. high, standing out from, but connected at the base with, the walls of the valley; and these graceful pinnacles, graved by the winds and æons, well deserved to be called "The Spires." In fact the whole side of the valley along this part of it is fantastically but exquisitely carved out into forms of gigantic proportions, which, anywhere else, except in the Yosemite, would be considered objects of the greatest interest.

On the north side again, beyond El Capitan, is a triple group of rocks, rising in steps one behind the other, and known as the "Three Brothers," and from the summit of the highest, "Eagle Peak," there is a superb view of the valley and its surroundings. As you step on the crest and your eye glances over the vast field of wonder, before and beneath you, an overwhelming feeling of awe and bewilderment pervades the mind, for you look down perpendicularly almost 4,000 ft., and look up again to see mountain peaks quite 5,000 ft. above you. Just below is a large stream surging on to make the mightiest leap recorded; it shoots down at lightning speed 2,600 ft. and you realize, at least in some degree, the immense hight of the Yosemite falls. This cascade, if not the most stupendous feature of the Yosemite, is at least the most attractive of the valley. All the accessories of this fall are of a character worthy of and commensurated with its immense vertical hight, so that everything is added which can augment the impression which the descent of so large a mass of water from such a hight could not fail, by itself, to produce. This fall though only 30 ft. wide at the start, widens, out, so great is the mass of descending water, probably to 300 ft.; and like Bridal Veil, gains in its headlong descent; a vibrating motion peculiar to themselves, with an effect indescribably grand.

Beyond the Yosemite falls are the Royal Arches, under which we camped on a sandy meadow amidst pine trees, which, though large, were dwarfed by the surroundings. East of this again is the "Washington Column," a rounded columnar rock; and surmounting this and the Arches is the "North Dome," the latter made up of concentric plates of granite. Here is where the valley forks, the left-hand branch containing the beautiful pool called "Mirror Lake," above which rises the "Half Dome," whose face next the lake is absolutely vertical for 1,500 ft. The right-hand fork, or Illilouette, is but rarely visited, as it is rough and difficult to climb; but the central canyon carries the main stream or Merced river, which descends 2,000 ft. in two miles, making, besides innumerable cascades, two grand falls. The lower is the Vernal fall, a perpendicular sheet, with a descent estimated at 475 ft., which is seen to great advantage from the base. Here, however, the visitor is on a narrow, steeply-sloping mountain ledge just over the raging torrent. The rocks are always wet with spray and consequently very slippery. Some of our ladies coming upon the fall unprepared were blinded by the water, and terrified by their apparent danger.

A remarkable parapet of granite, just breast high, at the top of the cliff over which the water flows, looks as if made on purpose to afford the visitor a secure position from which to enjoy the scene. Above the Vernal falls is a succession of cascades and rapids of great beauty, and beyond these again is the grand Nevada falls, environed by majestic scenery. The "Cap of Liberty," on the north side of the river, is a stupendous mass of rock, rising 2,000 ft. above its base, all the more imposing because isolated and nearly perpendicular on all sides.

This short sketch of the salient and most striking points in the walls of the Yosemite, every portion of which is sublime, necessarily omits others, which, though of great beauty, cannot be even so much as mentioned for want of space.

One word as to the supposed cause creating this unique valley; the most natural explanation is that suggested by Prof. Whitney, viz: That the bottom sunk down to an unknown depth, and the vast mass of detritus which must have fallen from the walls, has gone to fill up the abyss opened by the subsidence. The atmosphere of the valley is exhilarating, tonic and delicious; the memory of the scene, a joy forever. The Yosemite is a Government park, given to the State of California in trust, "on condition that the premises shall be held for public use, resort and recreation;" but I regret to say that this commonwealth has ill fulfilled the trust she accepted, by neglecting to provide money to keep the roads, etc., in decent traveling condition.

The Sequoias.

On our return we stopped in the Mariposa group of big trees, which, though about 16 miles from the Yosemite, is included in the Congressional grant to California. Though these trees extend 120 miles north and south along the Sierras, they are mostly gathered in eight or nine distinct groups or groves. They are the largest and most interesting tree in America, and certainly the grandest and most impressive productions of the vegetable kingdom.

The genus, named in honor of Sequoia, an Indian chief of the Cherokees, who invented an alphabet and written language for his tribe before the whites had heard anything of it, will always keep his memory green.

There are several fossil species of the *Sequoia*, one being found in Greenland, but the *S. gigantea* is exclusively limited to the Sierras, on which it extends vertically 2,000 ft., while its twin brother, the redwood, *S. sempervirens*, is strictly a seaboard tree, and confined to the Coast Ranges of California and Oregon. The tallest specimen of the big tree is 325 ft. high, and the one of the greatest diameter was 27 ft. through; and the age of the oldest one whose rings have been counted was 1,300 years. The cones are about two and a half inches in length and about two inches in diameter. The seeds are much sought for, are widely distributed and readily vegetate, so that millions of plants, it is said, are now growing. Though so large a tree, yet it must yield the palm to the *Eucalyptus amygdalena* of Australia, of which one specimen reaches the enormous elevation of 480 ft., thus overtopping the tallest *Sequoia* by 155 ft.

The following itinerary of the route to Yosemite will prove of interest to those proposing to make the trip, and I give the distance from point to point.

From Santa Barbara to Gaviota	40 miles
To Ballards	18 "
" Central City	24 "
" San Luis Obispo	30 "
" Pasa Lobles	30 "
" Pleito Ranch	32 "
" Low's Mountain	30 "
" Soledad	43 "
" Natividad	25 "
" Gilroy	28 "
" Bell's Station	20 "
Cross Contra Costa Mts. via Pacheco Pass.	
" Los Banos	30 "
Cross San Joaquin river at Dickensen's Ferry.	
" Merced	40 "
" Snellings	16 "
" Coulterville about	30 "
" Brown's Ranch "	25 "
" Big Meadows "	25 "
" Black's Hotel "	8 "

A Return in 1881.

Our last year's trip as outlined above was so satisfactory that we start again by May 15th, with 3 wagons, 14 people, 2 (combined) cooks and drivers, 6 saddle horses, to camp, to the Yosemite, to spend two months in the valley. Can't you come in and camp with us? I propose to hold two weekly camps fires, Wednesday and Sunday, for visitors. If you know any "saw-bones" looking for a job, send him in to spend his summer in the valley. His presence will create a crop of patients.

THE HUMAN EAR.—Imagine two harps in a room, with the same number of strings, and each string perfectly attuned to a corresponding string in the other. Touch a string in one and the corresponding string in the other will give out the same sound. Try another string and the corresponding tone will be sounded. So with all the strings. So with any combination of the strings. It would not matter how you played the one harp, the other would respond. No doubt the response would be weaker. That is what one would expect; but the response, as regards pitch and quality, would be almost perfect. Now substitute for one harp a human ear, and the conditions would, according to theory, be the same, except that the responsive mechanism of the ear is much smaller than that of the responsive harp. In the ear there are minute cords, rods, or something, in such a state of tension as to be tuned to tones of various pitch; sound a tone, its corresponding rod or chord in the ear will respond, perhaps feebly, but still with energy sufficient to excite the nerve filament connected with it; the result is a nervous current to the brain, and a sensation of a tone of a particular pitch.

SIX companies of the San Francisco militia are to be mustered out on account of lack of funds.

Fishing in Lake Tahoe.

Almost every one who lives at, or visits Lake Tahoe wants, not only to go a-fishing, but to *catch* a fish. Many and various are the results of these adventures. Every time a boat ride was planned, the tackle was made ready and stowed away, but many trips were taken before we stopped to row slow enough for the trolling line. We had received the necessary instructions from fishermen who really had caught fish, how to put the poor little minnow on the hook for bait, and how to keep moving the arm that held the line, so as to know when a finny victim was impaled.

The day came at last when we had rounded Observatory point, and floated out into the calm blue bay, where the water was from 40 to 60 ft. deep. How patient we tried to be, yet how very anxious we really were, can only be known by those who have waited for fish to bite. After a time the much desired pull came to the line. One came to my heart, also. With what a will I did pull it in; I could see the spots so plain, long enough before it could have been in sight. Just imagine, if you can, the chagrin, when my trout proved to be a pine limb covered with slimy moss from the bottom. I shall never forget the shouts of laughter that came from that delighted man at the oars, but as the laugh has not always been on one side it is all right.

My next venture brought up a most curious specimen of stone, 15 inches long, 9 inches wide and ½ inch thick; it must have been standing on the edge, for deep water gastropods were on each side. There was a tiny hole, through which the hook fastened. As such a specimen was entirely new I was more pleased than as though it had been the much-wished-for fish. The very next time trying brought a live trout with actual spots to the surface, when, in some unaccountable way, it became disengaged and went out of sight. Then came a fine silver trout that weighed about 6 lbs.; it did some real pulling. When I knew it was a big one, I did not dare run the risk of taking it in myself, but gave the honor and responsibility to "Vade Mecum," and was very glad to see spots on a live fish in the boat. Fishermen have a line round on the outside the boat to which live fish are fastened, to be put in a car or pond at home; so the nice fish had a toggle put in its mouth, with a string that came through the lower jaw—cruel thing—by which it was to be tied to the rope, outside the boat, when it was already "Vade Mecum" lifted it over the side, the moment it touched the water it gave a sudden jerk, away, it went, toggle, string and trout. We have never seen it since. If anyone catches it, it is my fish; I can prove it by the stick in its mouth. It was now my turn to laugh, but I didn't. I've heard of "buck ague" and I *know* that little boat trembled with a strong man's excitement, as I never felt it shake in a gale. To say disappointed, is near as I can reach the feeling, but it doesn't express it. I think *that* worse than drawing up a *pine limb*.

Perseverance surely wins, for our next casting out brought a trout weighing 8 lbs., and was 2 ft. 4 inches in length. We ate it, and it was good. I have heard of trout weighing much more, but these are the largest I have known.

The nicest fish I have eaten is a white fish. The largest one caught weighed half a pound, and was truly delicious. The suckers are quite a different fish from any I ever saw in Eastern waters, and in such vast numbers, at times in summer. I like them as well as trout; flesh firm and sweet, and no trouble with small bones if you know how to dress them, but they do not bite a hook. I saw a party of tourists fishing, and gave the usual salute, "what luck?" The reply was: "lots of fish but they won't bite; have been here trying a long time." We rowed nearer, and there were suckers by barrels full. We have had only two, two-pounders; these were speared, but have seen wagon loads at two points visited.

All little fish are called minnows by the fishermen. One kind, three inches long when grown, have red sides—so have suckers—and taste much like fresh sardines. It takes 17 to satisfy a hungry person. We salted a kit of trout; they were the best salt fish we have ever used.

Gracie asked: "Why is it that fishermen catch so many fish, and the visitors none?" I don't know why one has to try so long; but I know we tried many times before we caught a fish. I have seen many baskets and strings of fine trout caught by fortunate visitors, also some who caught none.

We have traveled quite a little, and think that Lake Tahoe is the one charming spot of earth. Climate in summer most delightful—no excessive heat, and occasional thunder storms that have been very enjoyable. The scenery is indescribably beautiful; of snow-covered mountains, shady vales, forests and streams. Water pure and of kind and quantity to suit—lake, spring, hot and mineral waters; pleasant homes for visitors all round the lake; steamers, sail-boats and row-boats are to be had, and competent men to go with them. At some of the resorts the row-boats are free to all visitors, and a great attraction. Every bay or beach is full of interest, especially Emerald and Carnelian bays. Some of the Carnelian stones are very pretty. Gorgeous snow plants, three varieties of lilies, and many curious plants; each little plat of ground seeming to have its own flora.—*M. E. O. W., Castle Keep.*

Life.

"Oh! such is human life at best—
The cradle, the bridal, the green earth's breast."

This is an author's definition of that great mystery, human life. With the dawn of the mind's maturity comes the great question, "What is life?" This mighty problem constantly presents itself to every reflecting mind.

The years of human life are usually divided into childhood, manhood and old age. Childhood has been called, doubtless correctly, the happiest period in life. 'Tis then that the heart is fresh and glad, the countenance radiant with smiles, and every feeling is of confidence in and love toward others. 'Tis then that joy's opening buds and the flowers of affection make glad the soul. Yet this must change. Childhood, with all its beauty, must give place to manhood, with its realities, trials and disappointments.

As our joys grow less and less, and black-robed Sorrow, borne upon the wings of each passing year, comes and takes from us some bright hope which we had fondly believed would end in glad fruition, we are forced, in grief, to ask, "What is life?" It is well if, as old age, with its trembling limbs, dimmed eyes, wounded affections and buried hopes, comes, ere the narrow bed within the green earth's breast is reached, the mighty problem has been correctly solved.

Many are the replies which have been made to this momentous question. Life has been most aptly compared to a shining cup, in which, nearly equally mixed, are found ingredients both bitter and sweet; some as bitter as wormwood, others as delicious as nectar; and daily, even hourly do we see the truthfulness of this comparison. In each life is mingled joy and woe. Into each life come some moments which seem as bright as the plumage of some tropical bird, where every tint of beauty blends. Then come others of Egyptian darkness, when Hope has flown and Joy unfurled her wings and left the sorrowing spirit alone—moments in which only with the eye of faith can the fainting soul catch even a glimpse of a loving Father's hand.

"Yea, hope and despondency, pleasure and pain,
Are mingled together in sunshine and rain;
And the smile and the tear, and the song and the dirge,
Still follow each other like surge upon surge."

Life is likened to an arch, which, as we stand upon the base and gaze upward and attempt to look over, all seems a constant scene of beauty; but which, like the fabled fortune at the end of the rainbow, ever recedes. It has been most appropriately compared to a dream, ever changing and fleeting—"as sad as earth, as sweet as heaven." Life has also been compared to a mighty river, ever bearing us on its bosom to an unknown land.

These are but few of the replies which have been made to the mighty question, "What is life?" While all are beautiful and in some lights true, there is still another and deeper answer which is the only true reply that would come, though we should meditate upon it until our eyes grew dim and our hair hoary from age. It is the only true reply that would come though we should think of it till from the quivering heart strings death should snatch the thread of thought.

Life! O mystery of mysteries! what are thou? Listen! Methinks I hear the glad tones of myriads who have reached the glittering shore, as they send their answer to the utmost ends of the earth—*life is duty; life means duty.* Ah! there is the true reply. At every step in life some duty is ever waiting to engage our attention. Then how useless as well as sinful it is for us to sit idly dreaming, allowing our precious moments to pass unmarked by duties done. Yet, how many of us disdain the duties daily presented to us, ever hoping for the coming of some great duty, which shall at once distinguish us and satisfy our restless consciences, forgetting the most important fact that little duties which we are pleased to call trifles, make up the sum of life, and when some gilded monument of our own building totters and falls to the ground, sit grieving o'er the wreck, neglecting to gather up the fragments, and build again as the hand of duty, not of pleasure, directs. How often we forget that in the discharge of duty is found the sweetest pleasure earth affords. While fame will vanish with the changing mood of a fickle populace and wealth often brings with it increased care, the consciousness of duty bravely, lovingly done is ever a source of peace; and though bowed beneath a weight of sorrow and pain, we at last shall feel that our Father's hand rules the angry storm.—*Julia M. Goodlet, San Bernardino.*

PROGRESSIVE INSTINCT(?)—A singular circumstance is reported from a hot, dry valley in New South Wales. Last year the drouth there was of long duration, and the denizens of the apiaries suffered much from it. This year the bees have made provision against a similar emergency. They have filled a large number of the external cells in every hive with pure water instead of honey. It is thought that the instinct of the creatures leads them to anticipate a hot summer.

A FRENCH chemist has discovered a way to produce thunder storms. A long hair on the coat collar, of a different color from what it should be, will produce thunder storms, though the Frenchman has probably got a different method.

PACIFIC STATES WATCHMAN.

A. O. U. W. Home Paper.

Issued on the 1st and 15th of each month.
At No. 202 Sansome Street, San Francisco, Cal.

Subscription (in Advance), $2 a Year.

Favorable to Advertisers.

By consolidating the large subscription lists of the *Pacific Workman* with the Pacific States Watchman our advertisers gain an unusually great advantage. We doubt if any one weekly newspaper has ever been circulated to as many different readers on this coast, as have been served heretofore by the *Workman* and Watchman together. Certainly, no other periodical is now patronized by a better class of industrial, professional and business men. In fact, our subscription list (like the A. O. U. W., still increasing), embraces many of the foremost business and representative men throughout the towns and cities of the coast.

We have pride in making our paper "clean and handsome," and first class in all respects—to the benefit of both our readers and advertisers.

ADVERTISING RATES.

One Square (¼ inch), per issue	$ .75
One Square per month	1,25
Two Squares, per issue	1.50
Two Squares per month	2.50
Obituary notices and resolutions (with 25 copies post-paid for friends of deceased) per sq. (¼ inch)	50

☞For reading notices, extraordinary display, special advertising and choice places permanently, extra rates will be charged. Reasonable reduction will be made for large and long-continued advertisements. No extra rates for the space occupied by engravings.

OFFICIAL RECOMMENDATION.

[*Resolutions adopted by Grand Lodge of Cal., Feb. 3, 1881*]

Whereas, the Pacific States Watchman, the pioneer A. O. U W. advocate on this coast, without official aid, has long rendered able and valuable services for the good of our glorious organization, we earnestly recommend that our Lodges and the brethren individually patronize the Watchman as liberally as circumstances will justify.

Entered at San Francisco P. O. as second-class matter.

San Francisco, - May 15, 1881.

"Bread Cast upon the Waters Returned after Many Days."—Bro. Jas. E. McGuire, (now deceased), of Yerba Buena Lodge, No. 14, was taken sick some 12 months ago and received from his Lodge sick benefits during all his last sickness. He being in moderate circumstances, the generous brethren of Yerba Buena paid him additional sums of money, paying traveling expenses to different portions of the State and sending him East, where he died. Relying entirely on the donations of his Lodge for his care and support, he was well provided for and given a good burial; in addition the Lodge presented the lady who nursed him in his last sickness, the sum of $100 as a gift. In return the Grand Lodge of the State of California has paid to Yerba Buena Lodge the sum of $2,000 in answer to the beneficiary certificate given to their late brother. As the balance sheet now stands the brethren have $1,500, as a net profit and an enviable name for their noble, generous and workmanlike conduct to one of their brethren. At their meeting on the 13th inst., the amount of $2,000 was placed to the credit of the sick fund.

Bro. Kaufman Green, M. W., Higuera Lodge, No. 194, (the new Lodge lately formed at San Luis Obispo) paid a fraternal visit to Yerba Buena Lodge on May 13th. He reports 34 M. W. and 5 J. W., and several applicants. Our Order is in great favor in this part of our jurisdiction. Our enthusiastic Bro. believes he will report 100 members at the next Grand Lodge.

We acknowledge the receipt of an invitation to the first anniversary party of Memorial Lodge, No. 174, to be given at Covenant hall, B'nai B'rith building, on Friday evening, June 10th, 1881. The committee in charge are Bros. C. S. Hoffman, P. M. W.; H. Schaffner, Rec.; C. W. Nevin, P. M. W.; C. E. Gerlach, Fin., and Linkendey, O. W. The tickets are printed in fine style and "positively not transferable."

As a matter of history in this great organization, the widow of Bro. Thomas W. Cunningham received the $2,000 pledged in her beneficiary certificate just two weeks from the day he was buried.

We had the pleasure of meeting Bro. J. C. Horr of Washington Lodge, No. 9, Washington Territory. He reports our Order in a very flourishing condition, new Lodges being formed in all the principal towns and cities.

The Relief Call.

So far as we are aware our Lodges are responding to the Relief Call issued by authority of the Supreme Lodge with an alacrity and absence of grumbling that strengthens our faith in the brotherhood, if that were possible. We expect that, as usual, California will set an example to older jurisdictions that they would do themselves no discredit to imitate. The true Workman does not stop to consider whether a law is the best that could be devised to meet the case in hand. He knows that the wisdom or folly of a law can best be determined by its faithful execution, and then is ready to take action in regard to it, if action be needed, with a full understanding of what he is about. It is idle to presume that any law is or can be absolutely perfect in the sense that it will work only good and no shade of evil in any individual case. If the grand result is very good we should be satisfied. If otherwise, then such remedies should be applied as experience and good sense would seem to be required.

As the Relief Law is new in its practical workings to the Order, going into operation now for the first time, a few words of explanation may be of assistance to some of our Lodges. If a Lodge does its work by assessment, the following is the course to pursue under the Call:

First—Levy an assessment of 25 cts. on each M. W. in good standing, who was such on the 1st day of May inst.

Second—Pay out of this assessment as soon as collected 10 cts. for each M. W. as above.

Third—Levy a like assessment of 25 cts. for June, July and August—four in all. These will put into the treasury of the Lodge one dollar for each M. W., less 10 cts. remitted out on the Call.

Fourth—Levy an assessment Oct. 1st (see Call) for 10 cts., and the Lodge will have in the Relief Fund the amount contemplated by law.

Fifth—On each candidate received into the Order after this date, assess not less than 25 cts. per month, till he shall have paid into the Relief Fund $1. This should in no case be neglected, for receipts from this source henceforth will probably be amply sufficient to keep the Fund full without any further additions or assessments for the purpose, unless some terrible calamity should befall the Order.

By reference to the law it will be seen that Lodges may levy assessments of greater amount than 25 cts. per month. In such case there would of course be fewer assessments. Or, a Lodge may make up its Relief Fund by drawing the same from its General Fund. But whatever way it may be done, there should be in the Treasury one dollar for each M. W., so that on any future Call the Fund will be ready to draw upon without waiting in any instance to collect from the members. One of the best points about the A. O. U. W. system is, that by it death losses can be more promptly paid than by any other. Those for whom the aid of the Relief Law is invoked should be no exception to the rule.

The Relief Law contemplates that moneys paid for the assistance of any jurisdiction shall be in the nature of a loan, to be returned to the contributing jurisdictions. As a rule, we believe little will ever be returned. Indiana has need of 24 assessments this year. She will probably have at least her full quota (20) next year, and the next and the next. If so, under the law, she will return nothing at all. Indeed, she may need further assistance instead. In our humble opinion, the law would have been better if no provision had been made for returning any moneys paid to an overburdened jurisdiction. Jurisdictions should be put upon the same basis under the operation of the Relief Law that individual subordinate Lodges are under the operation of the Beneficiary Law. With a just maximum death rate for each jurisdiction, time would make all things even, just as it does between subordinate Lodges. And yet we have no desire to find fault with the law as it is, especially as practical experience has not proven its quality. Besides, we know that this particular feature of the law is the one that especially commends it to the support of a great portion of the brotherhood, and without which it could not have been enacted by the Supreme Lodge.

The *National Bulletin* is authority for the statement that Oregon and Washington Territory will not be set apart as a separate jurisdiction until after the meeting of the Supreme Lodge, in June.

Work for the Supreme Lodge.

We have before alluded to the important work that will come before the Supreme Lodge at its coming session, and the wisdom of that body will be put to the test in determining the numerous weighty matters that will engage its attention.

We regard the Supreme Lodge as an indispensable factor of our organization. We need a supreme legislative body, and a court of last resort. Without such qualities vested in some body like the Supreme Lodge, a great national organization would be impossible, to say nothing of a universal brotherhood embracing the civilized world, for which we have dreamed and hoped and labored. So whatever may strengthen and popularize the Supreme Lodge, we believe, will strengthen and popularize the Order, and we would have the members of that body fully imbued with this idea, and govern all their actions accordingly.

The A. O. U. W. being a fraternal society, its whole strength and hope for existence resting upon its altar, it follows as a corollary that whatever relates to this feature of the Order should occupy the first place in the deliberations of the Supreme body. And right here we will presume to make some suggestions: Early in the session let a committee on ritual and secret work be constituted, charged with the duty of reporting for consideration a Supreme Lodge Degree, a Grand Lodge Degree, a critical revision of the Subordinate Lodge Ritual, and of the unwritten work, and a revised ritual with secret work for the Degree of Honor. Some good work was begun in this direction at the last session, but more remains yet to do, and if this be not done at the coming session the whole Order will have a right to complain. At the time of creating the beforementioned committee, another should be made to revise our Burial Service and give us Dedication Ceremonial, to the end that a Workman's efforts should result in a structure above reproach, and not a botched job. Whatever is worth doing at all, is worth doing well; and in so important a work as ours the smallest detail should be reckoned of great importance.

There are three other matters which we think should receive the early attention of the Supreme Lodge. Our system of representation in the Supreme Lodge should be changed, so as to accord more nearly with the principles of justice. Then a provision should be enacted, making any change in the constitution of the Supreme Lodge contingent upon the endorsement of two-thirds of the Grand Lodges. Last, but not least, in importance of the three, is the matter of making provision for extending the Order into foreign countries. The light of our altars should not be hid away under a bushel. If our Order is good for us, it would be good for other peoples. Let it be no longer denied, then. The Supreme Lodge should be allowed to charter other bodies in foreign countries with concurrent powers within their specified jurisdictions, except that the right to control the secret work, written and unwritten, should be reserved, and it should be stipulated that the Beneficiary Departments of all should be totally separate and distinct, the one from the other. The reason for this is so palpable that explanation seems unnecessary. With such an amendment to our Supreme Lodge constitution, not many years would elapse till the A. O. U. W. would be known in every land where the light of civilization illuminates the human mind and warms the human soul.

Other grave matters will claim the attention of the Supreme Lodge, but we believe they will be wisely disposed of, as they are of a practical business character, and such as business men know how to deal with; but the more important fraternal matters above first presented we fear, from such evidence as the past has given us, are in danger of neglect.

The *Golden Year* is in favor of popularizing the Order by having the place of meeting open to all the members in good standing; having the Grand Lodge Degree one of honor only; the Grand Lodge sessions in the M. W. degree, and have the room open to the membership.

We have been informed by the M. W. of Point of Timber Lodge, No. 92, that the Lodge is progressing steadily. Initiations are being frequently made, and on the 14th inst. two candidates received the M. W. degree.

Grand Recorder's Department.

Headquarters of Grand Lodge, A. O. U. W., Rooms 40 and 41, St. Ann's Building, corner of Eddy and Powell, San Francisco. H. G. Pratt, G. R.

Wm. C. Flint, Esq., 216 Sansome street, San Francisco is Chairman of Committee on Laws and Supervision. All By-Laws, or amendments to same, should be sent directly to him.

Stereotyping our Constitutions has made some delay necessary in issuing the revised Constitution. I hope to have them ready for delivery in a few days, however.

There seems a general increase in our Lodges all over the State, so that though but few new ones are being organized the aggregate gain is about the same as for a year past.

The Grand Master has more calls for visiting and speaking to the gatherings of the Order than he is able to answer to, but his efforts are untiring and will no doubt be appreciated by the brotherhood.

If your Lodge lose a member from any cause, make it a rule to fill his place as quickly as possible with a good man. This plan adopted and strictly adhered to will always insure a prosperous Lodge, and if generally done a low death-rate will be the certain result.

Some of our Lodge officers complain that a remittance report should be required with each remittance of funds, but, in the absence of such report, it is impossible for this office to keep correct accounts, and besides we have no voucher for the correctness of our cash entries, and the Finance Committee, very properly I think, insist that such vouchers should be on file to check from. Brethren, in a business of the magnitude of ours, it is of the first importance that our financial matters be as carefully and accurately conducted as those of a bank.

Frequently by-laws, etc., are sent to the Committee on Laws and Supervision, bearing no official evidence of their source, or whether properly or otherwise acted upon by the Lodges from which they purport to come; and the committee desire me to call the attention of the Lodges to this important matter. In all cases the passage of by-laws by a Lodge should be certified to under seal, and such certificate attached to the paper when sent out to the committee.

From Grand Master Workman.

Relief Call.

Office G. M. W., A. O. U. W. of Cal.,
525 Montgomery St., S. F., May 6th.

To the Subordinate Lodges of California—Dear Brothers: Our sister jurisdiction of Indiana has been called upon to pay more than 20 assessments during the year; in fact, 25 assessments have been necessary in that State, and under the Relief Law of the Supreme Lodge said jurisdiction has applied to the Supreme Relief Board to pay a deficit of $8,000.

The Supreme officers have notified the G. M. Ws. of all jurisdictions to request the Lodges of said jurisdictions to forward their pro rata, which will be ten cents for each Master Workman degree member in good standing, on May 1, 1881.

In compliance with above request, and in conformity with the relief law of the Order, I therefore request that you will forward to the Grand Recorder of this State on or before the first day of June, an amount equivalent to ten cents for each Master Workman degree member of your Lodge, for the purpose of paying California's pro rata of Relief Call No. 1, of the Supreme Lodge.

You are hereby authorized to levy an assessment of 25 cents per member, and collect it the same as beneficiary assessments, or you may set apart the amount from your general fund as you deem proper.

Ten cents of this assessment is to be sent to the Grand Recorder, and the other 15 cents is to be retained in your treasuries as a special relief fund. For the law upon this subject, see Article XIV, Supplement to G. L. Constitution,

The same penalties attach to the failure to pay this assessment at the proper time, as do to the failure to pay beneficiary assessments.

I deem it only necessary to call your attention formally to the matter, feeling assured that you will forward the amount immediately to the Grand Recorder. Fraternally yours,

Wm. H. Barnes, G. M. W.

Bay Leaf, No. 7, the new Degree of Honor Lodge recently instituted at Walnut Creek, Contra Costa county, will be visited by Sister Babcock, W. S. of H. of Silver Star, No. 2, and other members of that Lodge on Tuesday, May 17th. Let the brethren turn out and extend a royal welcome.

The Beginning and the End.

In conversation with a respected brother from the Eastern States recently, he informed us that secret societies having for their object the payment to the heirs of deceased members a stipulated sum of money were being organized at the rate of one a day. This is what we would call spreading good seed with a vengeance. The successful manner in which the A. O. U. W. and some other leading and good societies have been carried on, would seem to make ambitious men covet the desire to send their names down to posterity as the originators of other similar movements. It would seem also to the unprejudiced observer that a pecuniary object is also a prime factor in movements of this kind. They would like to place themselves at the head of such institutions, in order that they might thereby be enabled to gain a livelihood in an easier way than by other means. Now this might be all right if nobody was to suffer. But unfortunately there always has been, and there always will be people who will permit themselves to be led beyond the bounds of prudence in matters where they think they or theirs will be benefited.

It is no criterion to judge by, that because one or a few societies are successful, a multitude may be. The originators may think so. In fact the organizers of all enterprises patterned after the original model have a sublime confidence in the perfection of their work. But experience has proven that all these roseate dreams of superior excellence did not stand the test of practice.

Our readers will remember the savings banks of some few years ago which paid a high rate of interest. People were taken with this. They thought they could realize this higher interest, and at the same time the principal would be entirely safe. Of course things went on swimmingly for awhile, but a day of reckoning came, and these baubles that lured honest but unthinking people to deposit their funds with them, suddenly collapsed. They had departed from those strict business principles which govern all such concerns, and the result was their utter failure, bringing sorrow and ruin to many a worthy family. Their glittering prospectuses proved a delusion and a snare.

Now fraternal societies founded on a business basis that depart from well established rules are bound to come to an inglorious end. The seductive means employed for the purpose of bringing in recruits, will not stand by them when the hour of trial comes. It has not done so in previous cases, and surely will not in future ones.

The average man cannot possibly hold membership in half a dozen societies, and do his duty to each and all of them. He must certainly deprive his family of many home enjoyments. He must absent himself from the fireside on many occasions. If anything should happen him financially, the question of his membership in so many of these Orders presents itself to him, and he is forced to drop some of them. Thus he has not only lost the money he has heretofore paid, but he has also deprived his family of many things which they actually needed for their creature comforts.

When a new Order of the kind under consideration is started, the first thing that the organizers do upon going into new territory is to inquire who are the leading men in the already well-established societies. Then they go among these and commence their proselyting. They think, and with good reason, that because these men appreciate the benefits which fraternal beneficial Orders confer, their initial work will be performed so much easier. Thus the field is circumscribed. Men listen to their glowing pictures of what a grand thing this new institution is, and without thinking much of what the future will bring forth, become a member. If these new candidates for public favor would only go into the outside world for their material, there would not perhaps be so much cause for complaint, but instead of that they go among those who are already members of other Orders and by specious facts and figures seek to swell their ranks.

Now we would like to impress upon the members of the A. O. U. W. the necessity of caution in this matter. Some of them can only safely hold membership in one society; others may do so in two or three. Let them not jeopardize their interests in these by becoming members of half a dozen or more. For surely the time will come when the question will arise, which must be dropped. The beginning may seem bright and unclouded, but the end will be dark, dreary and desolating.

Occupation.—A. H. Briggs, M. D., State Medical Examiner of New York, has issued instructions to Medical Examiners of subordinate Lodges in that jurisdiction. He calls attention to the large number of deaths from chronic and hereditary diseases, and gives some excellent advice and instructions to the examiners. Upon the question of occupation, he says: The Ancient Order of United Workmen has always been liberal in the admission of candidates to membership, regardless of the occupation in which the applicant is engaged to gain his daily bread. Common sailors, railroad men, such as locomotive engineers and firemen, brakemen employed on freight trains, and switchmen, as well as others employed in what are classed as extra hazardous occupations, have been admitted on equal terms with all. This, in my opinion is right, for we could not carry out the grand ideas of the founders of our noble Order if we excluded this class of persons from membership. And I believe that the records will show that our death rate has not been materially increased by the presence of this class of members. But it will be proper in the examination of a candidate, to take his occupation as well as his habits into consideration, and let it weigh in the scale against him in making your decision, should there be the least doubt in regard to his physical soundness. Persons engaged in the production, use or manufacture of highly explosive or combustible substances, manufacturers of white lead, and polishers of cutlery, as well as painters who have had painter's colic more than once, should be rejected.

There is still room in the A. O. U. W. for a great many more of the best sons of California. There is no limit to the carrying capacity of the staunch ship that has successfully battled the storms of over 12 years. With every sail set, bearing aloft the flag of Protection, the Order appeals to every good and true man to be a passenger. Those who have thought that the system was not a correct one—that we would be engulfed by some mighty storm that would ruthlessly destroy every vestige of the stately craft, can see now that they were at fault. Experience—that school we must all pass through to learn wisdom—has proven that the organization which had such an humble beginning was just what the times demanded. Then let the good, the wise and the healthful join hands with the already vast array of men who have banded together to protect their families from want, privation and care. The cause is just, the aim noble, and careless, indeed, must be the man who will neglect the opportunity.

Well, my friend, that is a fine family you have—splendid boys and girls. I suppose you take great pride in them? It would give you pain if at any future time they should be left to their own resources, or to the care of an unfeeling or unsympathetic world. By the way, do you belong to the Ancient Order of United Workmen? What, No! And you say you are proud of your family. Love them with a heartfelt devotion, and seek in every way to minister to their wants. Now suppose you should suddenly be called away by death, in what condition would your family be left? Comparatively unprotected, I must say. Well, if you are not the strangest man I ever saw—in fact a very bundle of absurdities. Stop this foolishness immediately. Prove to your family that you love them—that you will protect them to the best of your ability by joining an Order that insures to them a $2,000 legacy for a merely nominal sum. You will feel happier and be a better and truer man in every respect, and it will prove a sweet solace to your last moments on earth.

Kansas has applied to be set apart as a separate beneficiary jurisdiction. This result has been attained by the wise and energetic action of the Grand officers.

Thanks to J. M. McNair, Grand Recorder of Pennsylvania, for a copy of the annual proceedings of the Grand Lodge of that State.

Monterey Lodge, No. 98, will celebrate its second anniversary by a ball, on Monday, May 23d.

The next session of the Supreme Lodge will be held on the first Tuesday in June, in Detroit.

Relief Call No. 1.

In our issue of April 15th we stated that Indiana had had her allotted 20 assessments and that under the Relief Law she had applied for relief. In that issue we gave the Relief Law in full. The following is the official call from the Supreme Lodge Relief Board:

Office of Supreme Master Workman, A. O. U. W., Davenport, Iowa, April 15.

To the Ancient Order United Workmen:

Whereas, at a meeting of the Supreme Lodge Relief Board held at Cincinnati, O., on March 29, 1881, to consider the application of the separate Grand Jurisdiction of Indiana, for relief under the provisions of Art. IX. of the Beneficiary Laws of the Order, it was made to appear to the satisfaction of said Board, that the said jurisdiction had sustained such loss by death among its membership, as to require upwards of twenty (20) assessments (the maximum number fixed for said jurisdiction) during their past fiscal year, viz: from January 1, 1880, to January 1, 1881—now therefore, the undersigned Relief Board do hereby certify to the correctness of the following statement of facts as ascertained by a personal examination of the records in the office of the Grand Recorder of Indiana, viz:

That during the fiscal year ending January 1, 1881, there had been twenty-five (25) assessments levied and collected, from which the following losses were paid:

No. 34, Bro. Fred Koch, of Terre Haute Lodge, No. 2, Terre Haute, Ind., who died Nov. 22, 1879; aged 29 years. Cause of death, hemorrhage of the lungs. He became a member of the Order July 22, 1877. No. of beneficiary certificate, 1,449.

No. 35, Bro. Chas. Boenicke, of Friendship Lodge, No. 66, of Terre Haute, Ind., who died on the 20th day of December, 1879; aged, 47 years. Cause of death, pneumonia. He became a member of the Order October 30, 1878. No. of beneficiary certificate, 2,745.

No 36, Bro. Killian Reidy, of Humboldt Lodge, No. 49, Evansville, Ind., who died January 6, 1880; aged 32 years. Cause of death, nephritis and hepatitis (both acute). He became a member of the Order, June 28, 1878. No. of beneficiary certificate, 2,213.

No. 37, Bro. Thos. N. Pattison, of Crescent Lodge, No. 72, of Indianapolis, Ind., who died the third day of February, 1880; aged 44 years. Cause of death, typhoid fever. He became a member of the Order March 13, 1879. No. of beneficiary certificate, 3,169.

No. 38, Bro. Henry Hyer, of Lone Star Lodge, No. 56, Evansville, who died January 29, 1880; age 35 years; cause of death, typhoid pneumonia. He became a member of the Order, Sept. 10, 1879. No. of beneficiary certificate, 3,609.

No. 39, Bro. Albert A. Henshaw, of Saline City Lodge, No. 46, Saline City, who died February 1, 1880; age 27 years; cause of death, lung fever. He became a member of the Order May 4, 1878. No. of beneficiary certificate, 2,120.

No. 40, Bro. Andrew S. Martin, of Francis Lodge, No. 60, Terre Haute, who died February 5, 1880; aged 47 years; cause of death, tubercular consumption. He became a member of the Order, Nov. 5, 1878. No. of beneficiary certificate, 2,798.

No. 41, Bro. Frank P. Parvin, of Haddon Lodge, No. 71, Carlisle, who died February 19, 1880; age 34 years; cause of death, phthisis pulmonalis. He became a member of the Order January 21, 1879. No. of beneficiary certificate, 3,001.

No. 42, Bro. Zelman E. Reed, of Brazil Lodge, No. 5, Brazil, who died February 21, 1880; age 26 years; cause of death, fracture of the skull. He became a member of the Order August 4, 1873. No. of beneficiary certificate, 2,654.

No. 43, Bro. Adam Dingledine, of Hope Lodge, No. 23, New Albany, who died March 10, 1880; aged 49 years; cause of death, traumatic septicaemia. He became a member of the Order March 27, 1877. No. of beneficiary certificate, 911.

No. 44, Bro. William M. Wiles, of Confidence Lodge, No. 47, Indianapolis, who died March 19, 1880; age 45 years; cause of death, organic disease of the stomach. He became a member of the Order July 26, 1878. No. of beneficiary certificate, 2,492.

No. 45, Bro. Martin Grace, of Wabash Lodge, No. 1, Terre Haute, who died April 11, 1880; aged 55 years; cause of death, congestion. He became a member of the Order August 16, 1873. No. of beneficiary certificate, 1, 472.

No. 46, Bro. Nathanial Field, Jr., of Anchor Lodge, No. 39, Jeffersonville, who died April 9, 1880; aged 41 years; cause of death, inflammation of the stomach. He became a member of the Order March 17, 1879. No. of beneficiary certificate, 3 264.

No. 47, Bro. Wm. H. Hilbert, of Francis Lodge, No. 60, Terre Haute, who died April 19, 1880; age 38 years; cause of death, railroad accident. He became a member of the Order June 17, 1879. No. of beneficiary certificate, 3,372.

No. 48, Bro. Nelson Gifford, of College City Lodge, No. 9, Greencastle, who died April 30, 1880; age 50 years; cause of death, suicide. He became a member of the Order November 22, 1873. No. of beneficiary certificate, 8.

No. 49, Bro. Charles E. Hofacker, of Union Lodge, No. 6, Indianapolis, who died April 30, 1880; aged 50 years; cause of death, suicide by hanging. He became a member of the Order February 27, 1878. No. of beneficiary certificate, 1,936.

No. 50, Bro. William M. Hensel, of Friendship Lodge, No. 66, Terre Haute, who died May 5, 1880; aged 41 years; cause of death, malignant disease of the bowels with tuberculosis of the lungs. He became a member of the Order December 13, 1877. No. of beneficiary certificate, 1,784.

No. 51, Bro. Jacob Miller, of Friendship Lodge, No. 66, Terra Haute, who died April 18, 1880; aged, 29 years; cause of death, killed by circular saw in Pittsburg, Pa. He became a member of the Order October 30, 1878. No. of beneficiary certificate, 2,783.

No. 52, Bro. Gabril Kaiser, of Union Lodge, No. 6, Indianapolis, who died May 16th; aged 44 years; cause of death, pistol shot through the heart. He became a member of the Order December 19, 1877. No. of beneficiary certificate, 1,802.

No. 53, Bro. Samuel R. Sears, of Francis Lodge, No. 60, Terre Haute, who died June 3, 1880; aged 32 years; cause of death, phlegmonous erysipelas. He became a member of the Order Oct. 22, 1878. No. of beneficiary certificate, 2,701.

No. 54, Bro. William Q. Insley, of Prairie City Lodge, No. 3, Terre Haute, who died June 21, 1880; age, 43 years; cause of death, phthisis pulmonalis. He became a member of the Order June 25, 1877. Number of beneficiary certificate, 1,414.

No. 55, Bro. William Frank Gibson, of Harrison Lodge, No. 50, Terre Haute, who died July 5, 1880; age, 32 years; cause of death, drowning in Minnesota. He became a member of the Order July 6, 1878; No. of beneficiary certificate, 2,258.

No. 56, Bro. John K. Durkan, of Vigo Lodge, No. 27, Terre Haute, who died July 26, 1880; age, 38 years; cause of death, congestion of the stomach. He became a member of the Order May 29, 1877. No. of beneficiary certificate, 1,298.

No. 57, Bro. Louis Schweitzer, of Fulton Lodge, No. 30, Shelbyville, who died August 22, 1880; age, 49 years; cause of death, drowning. He became a member of the Order Nov. 6, 1878. No. of beneficiary certificate, 2,804.

No. 58, Bro. William H. Colescott, Fulton Lodge, No. 30, Shelbyville, who died Sept. 24, 1880; age, 51 years; cause of death, apoplexy of the heart. He became a member of the Order March 30, 1877. No. of beneficiary certificate, 886.

No. 59, Bro. Henry C. Jerauld, of Patoka Lodge, No. 75, Patoka, who died November 9, 1880; age, 38 years; cause of death, diabetes. He became a member of the Order March 26, 1879. No. of beneficiary certificate, 3,222.

No. 60, Bro. Joseph M. Craig, of Unity Lodge, No. 77, Petersburg, who died November 12, 1880; age 31 years; cause of death, quick consumption. He became a member of the Order August 9, 1879. No. of beneficiary certificate, 3,536.

After the settlement of the foregoing, there still remained the following death-losses unpaid, requiring the sum of eight thousand dollars ($8,000) to provide for which this call is issued:

No. 1, Bro. Michael Ragan, of Coledge City Lodge, No. 9, Greencastle, Ind., who died on the 22d day of November, 1880, of typhoid fever; aged 38 years. Joined the Order March 9, 1876.

No. 2, Bro. Louis Hay, of Terre Haute Lodge, Ind., who died on the 8th day of December, 1880, of catarrh of the stomach; aged 32 years. Joined the Order February 22, 1873.

No. 3, Bro. Byron B. Eaton, of Eagle Lodge, No. 10, Indianapolis, Ind., who died on the 4th day of May, 1880, of catarrh of the stomach; aged 36 years. Joined the Order April 10, 1877.

(Note.—Payment of this death-loss was delayed awaiting the action of the Grand Lodge of Indiana—and was by that body ordered paid.)

No. 4, Bro. Thomas Sneath, of Rockville Lodge, No. 21, Rockville, Ind., who died on the 26th day of December, 1880, of dropsy; aged 40 years. Joined the Order February 8, 1877.

In pursuance of Section 6, Article IX "Beneficiary Laws, applicable to the whole Order providing relief to over-burdened jurisdictions," adopted by the Supreme Lodge, A. O. U. W., at its session held in Boston, Mass., March 1880, the Supreme Lodge Relief Board do hereby call upon the various Grand Master Workmen and upon the Master Workmen, presiding over the various Subordinate Lodges under the immediate jurisdiction of the Supreme Lodge, for their proportion of the Relief Fund, viz.: One-tenth, or ten cents for each Master Workman Degree member.

The Relief Law contemplates that when the Relief Board makes a call, the respective authorities shall at once proceed to raise the Relief Fund of one dollar ($1.00) for each Master Workman Degree member, by making assessments of 25 cents upon each Master Workman per month for four consecutive months, in the same manner as in ordinary assessments.

Subordinate Lodges may, however, at their discretion, raise the Relief Fund by appropriations from their General Fund, or by assessments greater than 25 cents, provided such assessments shall not exceed three dollars ($3) in any one year.

The first assessment under the Relief Law is hereby directed to be made on the first day of May, 1881, and from the proceeds thereof the amount called for by the Relief Board, viz.: 10 cents, shall be forwarded to the Supreme Recorder, not later than the first day of June, 1881.

Subordinate Lodges will forward calls upon

the Relief Fund through the same channel and in the same manner as beneficiary moneys are forwarded.

The Grand Recorder of each Grand jurisdiction will make report to the Supreme Recorder, not later than the 20th of each month in which a relief call is made, giving the name, number, location, and the amount paid by each subordinate Lodge, in the jurisdiction, and will forward with said report, by draft or post office money order, payable to the order of the Supreme Receiver, the amount due as shown by the report.

He shall also report all subordinate Lodges that have failed to forward their proportion of the Relief Fund as per the call made.

The deficiency of 10 cents, caused by the call now made on the Relief Fund, shall be replaced (unless otherwise provided for) by an assessment made on the first day of October, 1881. Each subordinate Lodge in the Order is required to have on hand or in process of collection a Relief Fund equal to one dollar ($1) for each Master Workman Degree member, to be kept by it as a separate Fund, apart from all other Funds, to the end that when a call is made by the Relief Board, the amount called for can be forwarded at once, without the delay of collecting it.

The Relief Board earnestly requests a careful study of the provisions of the Relief Law, and the above regulations adopted by the Relief Board, to the end that all the requirements thereof may be fully complied with. Respectfully submitted in C. H. & P.,

RODERICK ROSE, S. M. W., Chairman.
M. W. SACKETT, S. Rdr., Secretary.
S. S. DAVIS, S. Rec.
WM. M. BENNETT, Chm'n F. Com.
H. N. BERRY, Chm'n Com. L. and S.
Supreme Lodge Relief Board.

Smoking in General, and in Lodges of A. O. U. W. in Particular.

EDITORS WATCHMAN: — Your smoker is essentially a very selfish person. The nuisance created by the indulgence of any other habit may be avoided by those that dislike it, but from the fumes and fogs of the smoker there is no escape while you breathe. You can retire from the company of the drunkard, you can avoid the spittle of the tobacco-chewer; you need not open your nostrils to the snuff-taker, and you can shut your ears to the blackguard; but you can't escape the smoker's smoke. Whether you like it or not, so long as you breathe, you must take it in also.

Forty years ago it was considered an outrage for any man to smoke in the presence of ladies. No man claiming the least gentility would violate that rule of courtesy. In the south, the land of chivalry, where woman was treated with the reverence due a queen, and idolized as a pet, no gentleman would smoke in the presence of ladies, even with their permission. This generation has gotten bravely over all such notions of courtesy. Chivalric considerations for the comfort and feelings of others have a very faint existence, and your genteel smoker, with the perfection of *sang froid* and indifference, in any crowd, coolly proceeds to scratch his lucifer across his leg, and first treating bystanders to the fumes of brimstone, supplements the same by puffing in the faces of men and women alike his filthy smoke from his filthy mouth and nose. In cars, in churches—everywhere we have to take it in.

Thus smoking appears to brutalize its votaries more than any other habit, and we see men who appear to be gentlemen in everything else, who would not wilfully disoblige or annoy their neighbors, yet in the indulgence of this habit they seem to lose all sense of the proprieties, and become perfectly oblivious to their surroundings. They would smoke even in the presence of Deity, if that were possible. For their own selfish gratification, they taint every breath of God's pure air.

Who are the brutal among the nations? The Indian is a smoker; he treats his women worse than his dogs. The Dutchman smokes his pipe, and harnesses his wife to the plow alongside of his cow. The Turk smokes continually and says woman has no soul. These are the examples to show its brutalizing tendencies.

Now, there are men and women who can't stand smoke; who hate it; who have a constitutional antipathy to the fumes of tobacco which no amount of usage can overcome; who are made sick by it, and they can't help it. This is their misfortuce, no doubt. The writer of this has been a victim of tobacco smoke all his days; he has been kept out of company by it, and cannot go where his fellow men congregate of evenings without a headache, sick stomach and a sleepless night afterward. No amount of practice can make him used to it; custom cannot make it any the less annoying and intolerable.

Now the question is, Has such a man as much right to join the A. O. U. W. as a man that smokes? If he has (and I think he has), then has he not a right to be protected while his duty to the Order keeps him in the Lodge-room?

Let those who have taken upon themselves the grand obligations of fellowship that bind the Order, answer if justice, truth and fellowship would not seem to suggest that no man should, while in the Lodge-room, persist in the indulgence of a habit which he knows is a torture to the brother sitting next to him.

The thing is a simple proposition. Outside of a Lodge-room, at all other places, if a man does not like smoke, he has the option to retire; but in the Lodge-room he has no option—he must endure.

The smoker says to him, in effect: "I know my smoke is offensive to you, but you ought not to be so delicate. This is a free country, and I can smoke if I choose."

Will any honorable smoker deny that such sentiments are the expression of the purest selfishness, totally adverse to every tenet of true fellowship? You give such a man simply a choice to stand your smoke or quit the Order. Is that any matter to treat with levity? Is it not a matter of grave moment that you will deprive your fellow man of all his enjoyment in Lodge meetings, because you will not do without your smoke for the period of two hours, during Lodge hours? Is it right?—is it reasonable?—is it according to the spirit of the Ancient Order of United Workmen? I think not. COM.

A Labor Bureau.

EDITORS WATCHMAN:—As the permanency of our Order is an established fact, our membership being already numerically great, and the circle of our influence constantly enlarging, bidding fair to become foremost in the land, the amount of good it is accomplishing is highly gratifying to all classes of people. But is it not capable of enlarging its sphere of usefulness in other directions and in ways as yet untried? Kindred societies have their "Homes" for the indigent and the orphan, the benefits of which are of incalculable value, and worthy of the benevolent Orders who found and maintain them. But it is not the establishing of these institutions that I would now recommend or enjoin upon the brotherhood. I am one of many in the beloved circle who are of the opinion that the establishment of a "Labor Bureau" in San Francisco, in the interests of the Order of United Workmen, would be of more practical utility to the employer as well as to applicants for employment, than any other one feature that could be added to so perfect an organization for good.

What amount of good would it not accomplish, and at so trifling an expense to each member of the Order. In this jurisdiction there are at present not less than 12,000 active Workmen, with every reasonable prospect of rapid increase in membership in the future as in the past. There is not a member of the Order, it seems to me, but must feel interested in the establishment of such a bureau, and look with favor upon the project, for none knows how soon great practical benefits he may derive therefrom. Then let a *per capita* tax be levied for its maintenance, the expense of which would fall lightly upon each member. Let it be exclusively a "Workman's Bureau," that the employer and those seeking employment may be brought together, conducive to the interests of all parties, and no tax or assessment will be paid with greater alacrity and with more beneficial results.

In the interests of the good of the Order, I should like to hear expressions of opinion from others on the subject, and hope the next session of the Grand Lodge may take action favorable to the project. C. H. K.

Alta, Cal., April 26, 1881.

To the A. O. U. W. of the United States.

Bro. A. M. Walker, a member of Waverley Lodge, No. 57, of Monongahela City, Washington county, Pa, left his office on the morning of April 9th; went to Pittsburg, and remained until April 10th, went to Oakdale, and left there on the 13th, by Panhandle road, for Pittsburg. Since then we are able to find no trace of him whatever. We have reasons to fear that personal harm or mental trouble has overtaken him.

Capt. A. M. Walker was about 40 years of age, 6 ft. tall, light complexion, sandy mustache, chin whiskers, quite bald on back part of head, had a military bearing; had a plain gold ring on little finger of left hand, and for a watch charm wore a plain gold cross, on a twisted gold chain. He had been poisoned in his eyes, which were inflamed, and when he left wore a brown silk handkerchief over right eye. He wore a black soft felt hat, a light brown suit, had an overcoat and gum coat; no baggage. Was a member of Masonic and Odd Fellows Fraternities, and of the Grand Army of the Republic.

Please make diligent inquiry in your place, and if possible secure publication of the above description in your local papers, which is important, if widely published.

S. D. CULBERTSON,
JAS. G. SLOAN,
LOUIS W. MCDONAL,
Committee.

Waverley Lodge, No. 57, A. O. U. W., Monongahela City, Pa.

THE A. O. U. W. has been established in West Virginia ten years, and they have not yet attained the dignity of a Grand Lodge. The brethren of Maryland desire to have West Virginia join hands with them. Perhaps this would prove satisfactory to both jurisdictions and result in the speedy formation of a separate jurisdiction.

California Jaunts and Resorts.

Many of our readers may remember Black's charming story of the "Adventures of a Phaeton," in which the author takes his hero and heroine through the length and breadth of England, and describes in a very pleasant way the scenery they saw on the road. The dimensions of the State of California preclude the possibility of a trip which will include the whole scope of the State, unless more than one summer should be consumed. But, as there is no finer country in the world for summer excursions and camping out than this, a jaunt over a portion of it will suffice for most persons. One can, moreover, choose the kind of scenery he prefers, and, to a great extent, the climate also. The moist, cool atmosphere of the coast, the warmer and drier air of the mountains, or the heat of the valley, present a variety difficult to find elsewhere in the same area.

In summer we do not need, in our excursions, to count on rainy days. It never rains here during what is known as the "dry season." One can sleep in the open air or in tents for six or seven months in the year without inconvenience.

Tourists are somewhat apt to think that after they have seen Yosemite, Lake Tahoe, the Geysers, the Big Trees and a few more of the "sights" of the State they have seen it all. But there are many beautiful spots in California which lie off the route of travel, which are worthy of a visit. The number of "Springs," and other health resorts, has increased greatly of late; and there are now numerous camping grounds, where those who prefer camping out to hotel life will find all the necessary conveniences.

Going south from San Francisco on the peninsula there is a pleasant road from San Mateo over the hills, by Crystal springs, to Spanishtown and Purissima creek, noted for the finest trout in the State, as they are perfectly pure, the creek falling over the cliffs into the ocean. Further on is San Gregorio creek, with its lagoon famous for fishing. There is a hotel here. Then we come to Pescadero, a coast town much frequented in summer and noted for its "pebble beach." The Pescadero and Butano creeks near by afford fine sport for the angler. Beyond that is Scott's valley, and then Santa Cruz, the well-known watering place. Between Purissima and Santa Cruz there are numerous creeks other than those mentioned, with plenty of fine hunting and fishing. Camping grounds will be found all along at many points.

Another trip, starting from the city, is to go by the railroad by way of San Mateo, Redwood City, Menlo Park, etc., to Santa Clara and San Jose, the beautiful towns in the Santa Clara valley. From the first, one may branch off to the foothills of the Santa Cruz mountains, where he will find Blackberry farm, Congress springs, and Los Gatos. From San Jose one may go to the famous Almaden quicksilver mines, and in the opposite direction, a beautiful ride is out to Alum rock, on Penitencia creek, and from there up to the summit of Mt. Hamilton, where the Lick observatory is being built. From San Jose, the S. P. R. R. carries its passengers down the valley past Gilroy (from where one may go to the Gilroy hot springs), through the San Juan pass into the Pajaro valley, and across to the noted watering-place of Monterey, where the railroad company has erected a magnificent hotel. There is the beautiful Bay of Monterey with its splendid beach running around from Monterey to Santa Cruz. At various points on the line of the beach are hotels, camping grounds, and various accommodations for tourists and campers. Aptos and Soquel are the most prominent points.

Back of Santa Cruz the range of mountains of that name offers a splendid opportunity for camping, fishing and hunting, and there are numerous public resorts and springs, such as Magnetic springs, Wrights' and others. The climate in the vicinity in summer is beautiful, and the mountains usually filled with campers.

Following on down the coast, we strike back through the Salinas valley to Soledad, and from here may visit the Paraiso springs, seven miles distant. Then continuing on down the valley again we meet the plateau on which is Paso Robles springs, a noted health resort. Then further on we arrive at San Luis Obispo, an old Spanish town surrounded by grain fields and sheep and cattle ranges. Between there and Santa Barbara these ranges prevail. Santa Barbara is on the coast and is usually reached by steamer and not by the route we have mentioned, which is the way one would have to go by wagon.

To see the coast and its towns below Monterey, the best way to do is to take one of the Pacific Coast Steamship's Co.'s steamers and go as far as San Diego and back. In this way Santa Barbara may be visited conveniently. You can also stop at Los Angeles, and by lying over a trip, visit Santa Monica, the orange groves of Los Angeles, and vineyards of Anaheim.

Back from the coast is the charming city of Los Angeles, with its lovely environment. Beyond is San Gabriel valley, with the the famous Sierra Madre Villa, popular far and near. By rail eastward one reaches the valley of the Santa Ana, and sees Riverside, a horticultural jewel, with the Glenwood cottages in the midst of orange groves. Beyond is the beautiful San Bernardino valley with the lovely Crafton retreat at its head, the Arrowhead springs, with their medicinal waters and enchanting traditions, and Waterman's hot springs, which have wide fame but are not now open except for transient visitation.

Returning to the coast one may take the steamer and see San Diego with its magnificent harbor and splendid climate. Returning, as the steamer comes up it passes through the Santa Barbara channel, between the islands and mainland, and coasting along up, finally enters the historic portal of California—the widely-famed Golden Gate.

Starting again from San Francisco, as a center, going north along the coast, we visit Saucelito and San Rafael, and back of them Mt. Tamalpias, and borne by the North Pacific coast narrow-gauge road we pass through a beautiful country, up along the shores of Tomales bay, passing on the way Paper-mill creek, Taylorville, and many beautiful camping spots; then on through the redwood timber to Duncan's Mills and the Russian river, famous for its beautiful scenery.

Then again, by a route ending at the same place one may go by the S. F. & N. P. R. R., to Donahue, Petaluma, Santa Rosa (where you leave for Mark West springs), to Healdsburg, on the Russian river. From here Litton springs, Skaggs' springs, the world-famous Geysers, etc., may be visited.

A beautiful trip is up through the fine vineyards of the Napa valley, where are hosts of summer resorts. In this county many pleasant summering places are established in the neighborhood of Napa City, St. Helena, Calistoga, Kellogg and other places. Among the well-known resorts are the Napa Soda springs, Litton springs, Nook farm, Sulphur springs at Calistoga, Etna springs near Pope valley, Sulphur Springs ranch near Knoxville, and Petrified Forest.

Entering Lake county from the west, the Highland springs, reached via the Blue lakes by stage from the railroad station at Cloverdale. Entering the county from the south, by stage from Calistoga, the traveler passes Mt. St. Helena, and can take a magnificent view from the summit by tarrying at the Mt. Toll House, and take a short horse-back ride. Anderson springs, Harbin springs, Glenbrook, Adams' springs, Seigler springs, Howard springs, Soda Bay, on Clear lake, Sulphur banks and Borax lake, Mound cottage, Bartlett springs are among the notable attractions of Lake county. Lake county seems admirably and wonderfully adapted for a universal tourists' field, and is some day destined to attain a world-wide reputation.

Shasta county from the well watered bottom lands of the upper Sacramento valley up to the refreshing Strawberry valley at the base of Mt. Shasta, some 70 miles or more, is a pathway full of joy to the hardy tourists who delight in rugged walks of nature. The United States fish hatching establishment on McCloud river and Soda springs, clear fishing brooks and rivers, good fishing, etc., are here met with.

In Contra Costa county, the view from the summit of Mt. Diablo, in a clear day, is grand and wonderful in the number of cities and towns embraced in the vast extent of populated territory brought within the scope of the tourist's vision. At Byron, in this county, are hot sulphur springs which are lately becoming quite noted. The Piedmont springs in Alameda county, back of Oakland; the bay baths at Alameda; the sulphur springs in Colusa county, the White Sulphur springs near Vallejo, in Solano county; Webber lake, Donner lake and hosts of other attractions might be mentioned.

The whole range of the Sierras, which extends the length of the State, abounds in magnificent scenery. It would take more than a page of our space simply to mention the points of interest. At different points in the range and the foothills hydraulic and quartz mining are carried on extensively, and those who have never seen the former should visit at least one gravel mine while in California.

It is of course impossible, in a brief article to enumerate all the pleasure and health resorts of California or all the thousand and one places where people go to amuse themselves in the summer months. We shall in future issues of this journal take occasion to mention other than those spoken of here. Every little canyon and glen, every mountain valley, every nook has its picturesque points, known to a chosen few. Here and there are places more widely famed. The vineyard regions of one section, the orange orchards of another, the wheat fields of another, possess charms to allure people of different temperaments. Others again prefer the solitudes of the hills, where the unbroken forests reign supreme, where they can retire for a time from the busier scenes of life.

A GOOD PLACE TO BE INSURED.—Mr. Burdette, in a lecture at Hartford, said: "This is Hartford—you can get insured here in any way and for anything you wish—mutual, endowment, tontine, accident, intentional, nomadic, differential, protoplastic, Baptist, Old School, Presbyterian, Congregational, Bob Ingersoll, Renaissance, Gothic, Byzantine, greenback, composite, Corinthian, Scotch cheviot, gossamer, seamless, new Wheeler & Wilson, barbed wire, liver pad, and hard finish. It is the central and distributing point for the entire insurance business of America. No insurance company is genuine unless 'Hartford' is blown on the bottle."

The Philosophy of Camping Out.

An extended experience in living out o' doors, in a variety of climate, tempts me to jot down a few thoughts on this subject for the benefit of those who may be about to undertake it for the first time. I trust that I shall be forgiven if a naturalist's habit of classification, compel me to arrange the tribe of campers under these subdivisions.

1. The campers who go out for a prolonged picnic, who are "bound to have a rollicking good time," and whose route may be traced from San Francisco bay to Yosemite or Mt. Shasta by debris of bottles and tin cans.

2. The health-seeking camper, whose necessities confine him within certain limits, who needs shelter by night, a good bed, regular supplies of nourishing food, and some cheerful human society.

3. The camper *per se*, who takes to the wilderness, the glens and forests as naturally as a duck to water; one in whose company the flavors of all sweet and natural things are enjoyed without a taint of coarseness or earthiness.

These varieties shade off into each other by imperceptible gradations. I have known even a stalwart politician to become speechless for half an hour after the majesty of white-robed Shasta had descended upon him.

But the born camper is as rare among townsmen as the Phœnix among birds. Mr. Emerson knew *one:*

"Many haps fall in the field,
Seldom seen by wishful eyes,
But all her shows did nature yield
To please and win this pilgrim wise.
He saw the partridge drum in the woods;
He heard the woodcock's evening hymn;
He found the tawny thrush's broods,
And the sly hawk did wait for him."

Three still living men and two women deserve a place with Henry Thoreau in Nature's Pantheon. Helen Hunt Jackson is known to fame; the other is stealing the secrets of the Sierra plants, year by year, in her modest home in one of our northern counties.

The elect of nature need no guide books, or advice; they never lose their way. "God could not be unkind to me if he should try," said Thoreau. Let us sit down with the other classes, and have a good square talk about camping, its benefits, its discomforts, and about some of the most desirable camping grounds.

Civilization, *i. e.*, making civil, is too often taken to mean a multiplication of the conveniences of life, instead of that refining of the spiritual being, and enlargement of human sympathy which makes it more and more possible to have a true society upon the earth. Therefore, there is always a tendency to overload one's life with its outward *impedimentia*, to the damage of the higher life. A constant recurrence to nature is the best corrective of this tendency.

Novalis, one of the sweetest and purest of philosophers, said "What is Nature? An index or plan of our spirit." And again, "Nature is an Æolian harp, a musical instrument, whose tones are keys to higher strings in us."

Going into the wilderness is a necessity for some, and going much and often into the open country, taking in the largest draughts of pure air and pure sunshine, is an incalculable benefit to all. Much as I enjoy the stillness and repose of a New England Sabbath, I never can find it in my heart to deny the hard-working man who has no other day to spend with his family, the privilege of taking them to the nearest spot where they can sit under the trees. I do not see how life in cities can be other than degenerative in its tendency without the freest and most open communication with the country, and the amplest provision of parks and gardens. But even these are insufficient. So great is the pressure of time upon our modern life that at least once a year we must get where we can hear only the heart throbs of the Great Mother as we lie in her bosom. We should cut quite loose from postoffices and newspapers,—from friends nearly always,—that our rest may be as still and deep as that of a mountain lake. Thoreau spoke of "inhabiting his body with inexpressible satisfaction;" and one of the greatest, but not *the* greatest benefit of camping out, is that the simple act of living becomes not only sweet but sufficient, as it is to a child.

Camping parties are almost always too large, and to carelessly selected. A foreign body is as fatal to the repose of a camp as a thorn is to that of the flesh. I have often known the comfort of a happily chosen company to be marred by the introduction of a friend of somebody's friend, an Eastern visitor perhaps, of whose peculiarities nothing was known before hand. No one ought to be hurt by the refusal of a camping party to admit a stranger to its intimacy, and unless you are sure of each and every one of a proposed company, keep out of it, as you would avoid an unhappy marriage.

If there is a place where delicacy, tact and good breeding are indispensable it is a camp in the woods. The temperamental discords which make half the wear and tear of ordinary living, are often intensified by the removal of ordinary restraints. I have been afraid to accept very tempting invitations lest my manners should not prove equal to the situation.

Given, eight or ten congenial persons, disposed to spend a month together in some of the delightful retreats in which California abounds, what is indispensible as to outfit? Such a party should have a preliminary meeting and agree to a nicety upon what *is* indispensible to them. No outsider can determine such a question. Most ladies will say first of all, *a tent.* Yes, by all means, but not for sleeping in. One or two small tents fitted up as dressing-rooms, are very essential. During a three-months walk in 1873, in which my youngest son and myself accompanied Dr. Kellogg, Mr. Muir and the artist Keith, to the sources of the Tuolumne and Merced rivers, I never slept under a covering or upon a softer couch than evergreen boughs, but I carried in my pack two wide curtains of bright chintz, which could be buttoned together and drawn up at the top with a strong cord. When after a days journey on foot, we made camp, it was the work of a moment to cut a pole with my hatchet, fasten my tent at the top by the strings, draw it out at the bottom to a convenient distance, peg it down through some loops made for the purpose, and my dressing-room was complete. Meanwhile water was boiling for our tea, and a tin cup full of hot, followed by a dash of cold water, and a vigorous application of a rough towel made tired muscles and feet as good as new.

One must, of course, have blankets and plenty of them, and warm, padded dressing-gowns are comfortable for open-air sleeping; pillows and mattrasses are unnecessary. Some burlap ticks may be taken along, to be filled with sweet hay, or dried fern; an extra bundle of hay at the head makes the best pillow. These beds should always be hung across a log and sunned during the day, and the bed-room floor ought also to be exposed to full sunshine. It is a great pity to lose the "sweet influences of the Pleiades" at night; and I believe much of the benefit of camping out is lost by crowding into a closed tent.

The question of food is a much more difficult one than that of dress or shelter. How to live in wild nature as completely and *neatly* as the birds and squirrels is the problem with the camp housekeeper. I camped one summer in the Green mountains, and two weeks after leaving our lovely reteat, took some city friends to see "The Bowl," as artists have since named it. They could not be made to believe that six persons had lived there for weeks. There was not an egg-shell, a bone or rag, not even a scrap of paper, to mark our occupancy. We had thrown our hemlock beds into the stream, that they might not mar the beauty of the knoll where our glorious evening entertainments were enjoyed. Our kitchen was an upturned pine stump, so it was easy to hide the hearth when its fires were extinguished.

In an æsthetic camp the kitchen and dining-room should be at a considerable distance from the "residing," and if practicable right on the bank of a stream. The invalid's camp should not be so divided, for the sounds of the frying pan, and the glow of the coals are just the stimulants for a lagging appetite.

I have always manufactured my own meat biscuits, in preparing for life in the wilds. Equal parts of the best mutton and the best beef I can find in the market are thoroughly steamed until ready to fall to pieces. This is chopped fine, fat and lean together, mixed with sifted graham flour; beaten eggs are added to hold the mass well together, with salt to suit the taste. This is made into thin wafers or biscuits, and baked slowly, or rather dried until hard, then packed in round tin cans. The biscuits are soaked when soup is wanted; they are nibbled on a long march; they are always available.

Three standard camp dishes are baked beans, miner's fashion; pot roasts, ditto; and pot pies, whenever the gentlemen of the party bring in rabbits or quails. In case venison steaks, birds or fish can be obtained, the expert camp cook will not spoil them by frying, but will string or spit them over the coals.

Light bread making is seldom attempted in camp, unless there chances to be a lady in the party who came the "plains across" to California. It is better to take a supply of hard bread and crackers, and depend for the rest upon graham biscuits and johnny cakes baked in the fire glow.

The Boss coffee pot is a very necessary part of camp equipage. I think it is well for each member of a camping party to have their own tea and coffee, in addition to the general store. There are times when camp hunger can hardly be appeased, and it is a trial to wait for the regular meal.

Bacon must never be overlooked in a camp out-fit, and yet there are places where one would prefer not to be reminded of the pig, through his own urgent necessities. The excellent canned meats which are now so cheap, diminish the consumption of bacon and salt pork, but the latter are always needed for cooking fish and game. In the Eastern cities dried potato can be obtained, and when cooked could not be distinguished from the mashed potato of our tables. This is the only vegetable which can well be taken to the remoter camps. Dried fruits are better than canned, and we have them in such abundance and variety that the camp dessert may always be delicate and wholesome. A short-cake baked in the frying pan before the fire, split open, buttered and sugared, then lined with raspberry jam is a very comforting dish for the camp. Never attempt to provide a great variety for one meal. One or two simple dishes, well cooked, gives greater satisfaction, if not too often repeated.

A can of oysters cooked nicely in their own juice, with plenty of butter, then served between slices of toast, has made a delightful surprise after a hard day's tramp in the woods, and a most satisfactory supper, without more substantial additions.

I have hardly left room to speak of the camping places. They crowd each other in my mind. From the upper Sacramento, so pure and musical, to the pine-crowned summits of Bernardino, one can hardly go amiss, if led by the spirit into the wilderness. I often think that California was made for the elect to go camping in, and that all the vignerons and citronens and "common carriers" of these their wares are interlopers and invaders.

Nature is rich here, full of help and healing, if we respect the conditions under which she can work. The health-seeker finds in these southern counties not only climate, but

"Secrets of dominion set
Unstinted for his choice,
Such mysteries unuttered yet
Awaiting a voice,"

that he unconsciously falls into the great patience of nature, and is healed. For the young, the robust, the fresh recruits to the increasing army of campers, we say, "Go to the nearest lovely solitude this year; go farther next year, and so expand the circle of your knowledge, north, south, east, till in your fiftieth camp you begin, as I do, to live these blessed experiences over again in memory."—*Jeanne C. Carr.*

A SCENE IN THE TROPICS.

In the Tropics.

The engraving on this page gives a glimpse of a tropical scene—a piece of moist low land covered with the luxuriant vegetation which flourishes beneath a torrid sky. Such spots are common the world around, if the traveler keeps within the "lines." They entrance the beholder, and win his praise until in the sultry air he feels his strength and purpose weakening, and then he longs again for the invigoration of the temperate zone. Tropical scenes make fine pictures and rich material for poets, but for life with noble purposes and notable accomplishments they are not adapted.

A New Chinese Alphabet.—Bishop Eligio Cosi, at Chang-Tong, in China, has invented an alphabet of 33 letters, by which, it is said, all the sounds of the Chinese language can be represented. The characters used by the Chinese number 30,000.

Our Scenery as One of Our Resources.

It is hard to bring magnificent scenes to measurement by the industrial standard. At first thought it would seem to be a profanation of nature, as estimating the painter's masterpieces by the square-yard is an insult to art. And yet this is something of an industrial age, and the suggestion that there is business in a thing, means more to many people than a hint of the presence of the loftiest sentiment or the deepest emotion. It is sometimes of advantage to a writer that there is such a vein in men's minds, for those of us who are denied the power to picture beauty or frame tributes to sublimity find our pencils moving very freely to the jingle of the coin. Therefore, with due respect to the poetry which others can voice in praise of California scenery, we would mention its value as one of the material resources of our State, which may be made to contribute far more than it does to the prosperity of our people.

It is conceded by those who have traveled that California has varied scenery of sea coast and plain, and hill and mountain, which no similar area on the globe can surpass. It is also true that these gems are arrayed in a setting of genial climates as peerless as themselves. In the vernacular of the showman, the State has peculiar "attractions," and people come from the uttermost parts of the world to see them. The result is that California has achieved an enviable position in art and literature; other results are that all visitors bring money which ministers to the success of our various productive enterprises, and many of them, won by the beauties of earth and air which they sought from afar, make the State their future abode, and bring their capital and their energy to aid in the development of our resources. In any way in which it may be viewed, California scenery is of inestimable value to her name and fame, and as an agency in industrial development, should not be overlooked.

We all know that Switzerland, Bavaria, Savoy, portions of Austria and France and other countries, derive a large part of their revenues from the expenditures of tourists. France, it is urged by some, could never have paid the enormous war indemnity to Prussia but for the steady tide of tourists pouring into her gates and dispensing their wealth upon all classes of producers. California can surpass all these European countries in embodiments of the sublime and the beautiful. The Alps, with all their glaciers and wonderful hights, have no such vertical walls or magic waterfalls as Yosemite. They have no El Capitan that would require 30 Palace Hotel buildings, one above the other, to form the corner wall. They have no South Dome, upon whose vertical edge one can sit and his limbs will hang over a precipice of 5,000 ft. And these are but items in the great list of wonders in the valley. Beyond the confines northward and southward to the ends of the State there are other scenes which entrance the beholder and dwell in his speech to the end of his life.

It is eminently fitting that the State should have a care for the perpetuation of its natural inheritance, and should prepare for continual benefits from its unceasing and increasing charm for tourists. That our scenery is each year yielding us returns can be seen by the report of the Yosemite Valley Commissioners, and what is learned from the record of the valley is to a certain extent applicable to all our greater scenes. J. M. Hutchings, the able guardian of the valley, and whose voice and pen first introduced its grandeur to the world, in his report last December, shows that 25,518 persons had visited the valley during 16 years. These persons spend during their stay in the State, and irrespective of railroad fares, etc., an average of $600 each, which being distributed among the smaller industries of the State has produced much comfort to many of our people. It may be fairly expected that the opening of new railroads from the East to this coast and the increased travel which will result, will make our valley resource still more valuable.

It is wise therefore that the State of California into whose charge the valley has been given, should take measures to fit the region for the fullest enjoyment of tourists. There will be $25,000 expended for the improvement of the valley, the purchase of trails, etc. This sum judiciously expended as we expect it will be, will add greatly to the attractiveness of the valley.

The Cat as a Pest Distributor.—The domestic cat is again charged with spreading disease, this time by the physicians of a district in Sullivan county, this State, where small-pox is epidemic. In several cases the proof is pretty strong that house cats carried the pest, and owners of cats have been warned to keep them from roaming about.—*Exchange.*

We are all sculptors and painters; our material is our own flesh and blood and bones. Any nobleness begins at once to refine a man's features, any meanness or sensuality to imbrute them.

Decisions of Clay W. Taylor, P. G. M. W.

We will continue to print from time to time some of the decisions in appeal cases, which were rendered by Bro. Taylor during his term as Grand Master of this State:

Case of Edward Reynolds, Deceased.

On the 21st of July last I received a communication from Oakland Lodge, No. 2, asking my decision on the following facts: On June 25th, Brother Edward Reynolds of said Lodge, who resided at Jackson, Amador county, was suspended from the Beneficiary Fund, for not having paid Grand Godge assessments Nos. 7 and 8. On the 7th of July, he forwarded to Brother W. P. Richmond, who was the Financier of said Lodge at the date of his suspension, a postal money order for the amount of his assessments. The latter was received by the Recorder of the Lodge, July 8th, who opened it, and finding the money order, took it to the meeting of the Lodge on the night of July 9th, expecting to meet Brother Richmond, the late Financier, and procure his indorsement of the order and then turn it over to the then Financier. Brother Richmond, having retired from office of Financier, was not present, and nothing was done in the matter at that meeting.

The Recorder reported a list of suspended members to the Grand Recorder, but having the money order of Brother Reynolds in his possession, omitted to report his Beneficiary Certificate suspended. Subsequently the Recorder met Brother Richmond, late Financier, and procured his indorsement of the order, drew the money upon it, and at the next meeting of the Lodge, July 16th, paid it over to the Financier. Between July 9th and July 16th, Brother Reynolds died, and upon these facts the Lodge asked the question: If Brother Reynolds should be declared reinstated on the 16th of July, although he was then dead? To this query I answered, No. A brother who is dead can not be reinstated as of a date subsequent to that of his death.

In view of all of the facts and circumstances of this case, I am, however, of the opinion that Brother Edward Reynolds during his life-time complied with the requirements of our law in regard to the payment of delinquent Grand Lodge assessments, and should have been declared reinstated on the evening of July 9th. That he was not then reinstated was through no fault on his part.

Upon the principle of true fraternity, and that equity will consider as done that which ought to have been done, I directed the Lodge to enter upon its records the reinstatement of Brother Reynolds as of the date of July 9, 1880, and subsequently directed the Grand Recorder to pay the Beneficiary Certificate.

In August last the following question was asked by our Grand Recorder, Brother H. G. Pratt:

In case a Brother is suspended for non-payment of Grand Lodge assessments, can he under Section 10 of Article XIII, of Grand Lodge constitution, be reinstated upon payment of the assessments for non-payment of which he was suspended, or must he also pay in addition any other Grand Lodge assessment which may have been levied in the meantime?

I answered that in my opinion, under said article and section, he must pay all *pending* assessments before he could be legally reinstated.

Subsequently I addressed a communication to S. M. W., Roderick Rose, embodying the query in a hypothetical case, and in due time received his decision in language as follows:

"In the case presented, the brother's beneficiary certificate was suspended for being in arrears on two Grand Lodge assessments; he was not in arrears on the third assesment, and consequently could not be suspended on it. Now, since he could not have been suspended on the third assessment, I think reinstatement could not legally be withheld from him, and that he ought to have been reinstated on payment and receipt of the two assessments, and notified that another assessment was claimed of him which had been levied since giving him notice, and that it must be paid within the prescribed time, and if the brother failed to pay it, in due time he could have been suspended a second time. While the brother's certificate was suspended, still he belonged to our great family, and I am disposed to construe the law charitably toward him."

While I cheerfully acquiesced in the decision of our S. M. W., I must confess that, like one convinced against his will, I am still of the opinion that the provisions of our constitution do not warrant the conclusion arrived at.

Case of a Member Convicted of Felony.

During the month of July last, a Lodge reported to me the fact that one of its members had been convicted of a felony, involving moral turpitude, for which he was then serving a term in the State prison. At a meeting of the Lodge, it was decided by nearly a unanimous vote that he ought to be expelled, one brother only declining to vote. It was then ordered that he be expelled. The M. W. very correctly ruled that the brother could not be expelled without trial, and notwithstanding all present save one had voted to expel, none were willing to prefer charges, and the Recorder of the Lodge was instructed to communicate the facts to me. Previous to his arrest and conviction the brother had borne an excellent reputation in the community and occupied a position of honor and trust; in consequence, much sympathy existed in the Lodge for the family of the unfortunate brother, who were, by his act, left without a protector and in reduced circumstances; and, at a subsequent meeting of the Lodge, the matter having been freely discussed among the brethren, no one was yet willing to prefer charges, and several of the brethren signified their intention to pay the dues and assessments of the convicted brother, and thereby maintain his good standing in the Lodge.

These facts being presented to me, while I could but admire the spirit which prompted the brethren to the performance of deeds of charity, it was very apparant that their zeal to assist the family of the unfortunate brother had caused them to forget that they were equally bound to protect the fraternity, and the attention of the Lodge was thereupon called to the humiliating position of a fraternity one of whose members in good standing was confined in a penitentiary. I am now able to report that in due time better councils prevailed, charges were duly preferred, the brothertried and expelled.

What we Owe the Press.

The members of beneficial Orders do not attach that importance to their press that other do. They do not seem to be aware that it is chiefly to the press that they owe the success they have achieved, and 99 members in every 100 manifest their indifference, if not contempt, for the papers of their Order by not subscribing for them. Truly it is a hard task to work—as the faithful journalist must work—for such people. Were the publishers of all our A. O. U. W., Knights of Honor and other society papers to quit their labors in behalf of our system of self-insurance, with none to take their places, it would be discovered very quickly to what extent success and prosperity were dependent upon them. We apprehend that until some such untoward event occurs, they are doomed to hope in vain for that recognition and remuneration they so well deserve. The *Bulletin* would gladly say "farewell, vain world, and a long farewell to all of your fraternal societies of whatever kind," but it knows that its labors are not yet finished. And yet it is grovelling to even a callous nature to do all this work for nothing, and then be accused of mercenary motives by creatures who never lifted a hand, nor given a nickle to the cause.—*National Bulletin.*

Railroad System of Mexico.—The St. Louis *Republican* publishes, on what it claims to be good authority, some important facts in regard to railroad construction in Mexico. It appears that the Mexican government has granted very liberal subsidies to a narrow-gauge railroad to be built, which will be a continuation of the Denver and Rio Grande road, to the city of Mexico, and from thence westward to the Pacific ocean, at or near Manzanillo. The work is to be commenced immediately at the city of Mexico, and to be pushed with all reasonable dispatch both north and west. The road, when completed, will be about 2,000 miles long, and will be known as the Mexican Central. The *Republican* also has information from a high official of the Denver and Rio Grande company that that road will be completed to Laredo within two years. The line is now finished to Santa Cruz, N. M., and being vigorously pushed southward. An incompleted road from Corpus Christi, Texas, at the mouth of the Rio Grande to Laredo has been purchased by the Denver and Rio Grande company, and a 40-mile gap in it will be finished as speedily as the grading and track laying can be accomplished. When this work is done it will afford connection between Laredo and Galveston, New Orleans, other Gulf ports, and be a great aid in the transportation of supplies of iron, etc., to the contractors on the Mexican line proper.

Earache.—A remedy for this dreadful torture is recommended by a correspondent of the London *Lancet*, as follows: "In the course of practice you will often be called upon to attend a case of earache. This means, pathologically speaking, acute inflammation of the membrana tympani. Now, in such a case you may quickly subdue the inflammation, relieve the patient from the excruciating pain he is suffering, and save him, perhaps, from subsequent confirmed deafness. The treatment from which such a very desirable result may be obtained is similar to that which you will find so beneficial in analogous cases of eye disease; viz.: leeches behind the ear, hydrarg c. creta and belladonna powders, with warm fomentations."

The *Voice*, the official organ of the Music Teachers' National Association, edited by Edgar S. Werner, Albany, N. Y., is a monthly devoted to voice culture—musical and elocutionary—with special attention to stuttering, stammering and other defects of speech. Its contributors include leading specialists of the voice in America and in Europe. $1.00 per year; single copy, 10 cents.

The habit of entertaining disparaging or prejudiced views is so general, and so easily contracted, that it should be a constant prayer with all of us that we may be kept from forming it, and our most determined efforts should be directed to this end.

Let youth, the morning of your days, be cheered with the light and joy of religion, and though life may be somewhat a cloudy day, its progress will be pleasant, and its close delightful as a summer evening.—*Cushing.*

Aims, Objects and Regulations of the Ancient Order of United Workmen.

The Ancient Order of United Workmen is a general organization for the mutual benefit of its members and their families. It embraces in its membership of every vocation, profession and occupation—employers and employees—workers of all classes, whether their labor be mental or physical. It has no connection with any religious sect, political party, or organization for affecting the prices of labor or commodities, but is designed to promote fraternity, mental and social improvement, and mutual assistance.

BENEFICIARY FUND.

The most distinctive feature of the Order is what is designated as the Beneficiary Fund—a carefully-devised, well-guarded, economical and beneficial system, by means of which the sum of

TWO THOUSAND DOLLARS

Is secured to each member's family, or such person or persons as he may choose to designate. During the several years since the Order has been established this sum has been promptly paid in full in each case of death, to the persons entitled to receive it, within a few weeks, and without any litigation or troublesome formalities. A careful examination of the working of the system will satisfy any intelligent person that such will continue to be the case.

HOW ASSESSMENTS ARE PAID.

Each person who becomes a member of the Order pays to the Receiver of his Lodge one dollar for the Beneficiary Fund. Every Lodge has on hand, at the beginning of the month, ready for a call, one dollar of Beneficiary Fund for each member. When a death occurs, if there is a sufficient amount of the Fund in the Supreme Lodge to meet the required payment of $2,000, no call is made upon the Subordinate Lodges, but if there is not a sufficient surplus from the last assessment, then the Lodges are notified at the first of the month to forward their portion of the Fund on hand ($1 for each member), and an assessment is made to replace the amount forwarded. By this means the Beneficiary Fund of the Lodge is again replenished, ready for a call at the first of the next month, if it should be made. Assessments are only made on the members at the first meeting night in each month, and a written and printed notice is sent to each member, bearing date of such meeting night. Twenty days time is given from that date to meet the payment. Thus the payments are made at such intervals, and are called for in such manner that they may be easily provided for and met without inconvenience even by persons of small income.

HOW MUCH DOES IT COST?

In the first year of the working of the Supreme Lodge (1873-4), the number of assessments made upon the members of the Lodges directly under its jurisdiction, was 20; second year, 14; third year, 15; fourth year, 15; fifth year, 14; sixth year, 16. The average cost to each member, therefore, has been $15.66 per year; or, leaving out the first year, the average has been $14.80, being a little more than four cents per day as the cost of a completely-secured guarantee of $2,000, to be paid on the death of a member. Can any man who is in circumstances to avail himself of this system be justifiable in neglecting to give to his family the security which it affords? Does not prudence and affection dictate that he should secure for them the protection thus offered? A number of States, having over 2,000 members in each, collect and disburse the Beneficiary Fund separately through their Grand Lodges, instead of through the Supreme Lodge. In these, the cost per year has been, in some cases less and in others greater than that given above, but the average has been about the same.

California was set apart as a separate Beneficiary Jurisdiction in July, 1878, and at the end of July, 1879, had levied and collected ten assessments for deaths occurring in the State, and for the months of August and September three more, making a total for 14 months of 13 assessments, or an average of a little less than 93 cents a month for each member.

ADVANTAGES OF THE SYSTEM.

The A. O. U. W. Beneficial system is simple, easily understood, economical in its workings, and in all its details comes under the direct observation and care of the members who meet weekly in their Lodges, where the business is transacted, and where they enjoy the advantages of social and fraternal intercourse, and of mental improvement. These Lodges are governed by officers regularly elected by the members—the financial affairs are under the proper guards and restrictions, and a careful system of checks prevents fraud or betrayal of trust.

PROTECTION AT NET COST.

All money paid on assessments for the Beneficiary Fund goes to the payment of death benefits without reduction even for expenses, these being provided for out of a General Fund raised in each Lodge. This fund is made up from initiation fees (usually about $10 for each member, with sometimes an advanced rate, according to age), and weekly dues of not less than 25 cents per month. The advantage which each member derives from the social, fraternal and educational features of the Order, and the good which is accomplished by it in these respects, afford a more than ample return for the sum he pays into the General Fund, which meets all the expenses of the Order, leaving the entire Beneficiary Fund intact for the beneficent purpose for which it is intended. There are no commissions, fees or salaries to be paid out of it, but the entire amount paid in goes to the widows, orphans and other heirs of deceased brethren. Thus the Beneficiary system may be fairly said to be carried on absolutely without any working expenses, and, at the same time, to be more closely under the observation of those interested in it, and more carefully guarded than any other method adopted for similar purposes.

REQUIREMENTS FOR ADMISSION.

A medical examination is required under such rules as are generally adopted by life insurance companies The character of the applicant must also be investigated, and the Lodge pass upon his application by ballot. Persons between the ages of 21 and 50 only are admitted.

BENEFITS OF SICK OR DISABLED MEMBERS.

The payment of weekly sick benefits to members is a matter left to the control of each Subordinate Lodge. Some provide in their By-Laws for such benefits—others do not. If sick benefits are to be paid, the initiation fees and weekly dues are fixed at an amount sufficient to cover the expense—each Lodge having the power to fix the fees and dues at such sums (not below $10 for initiation and degrees, and $2 for Beneficiary Fund and certificate, and 25 cents per month for dues) as may be determined upon.

GENERAL FEATURES OF THE ORDER.

The A. O. U. W. is a secret Order, having two degrees, with appropriate initiation ceremonies. These are simple, but impressive. The teachings are calculated to strengthen the character and elevate the moral principles of the members.

The Order is composed of Subordinate Lodges, Grand Lodges and a Supreme Lodge. Subordinate Lodges in States or Territories where no Grand Lodge has been established, are under the immediate jurisdiction of and report to the Supreme Lodge, until a Grand Lodge is established.

When a Grand Lodge has over 2,000 members under its jurisdiction, it can be set apart as a separate Beneficiary district if desired. In this case the members are assessed for the deaths which occur within such district or jurisdiction, and the Grand Lodge collects the assessments and pays the death benefits under the laws and regulations adopted by the Supreme Lodge. The Grand Lodges of Pennsylvania, New York, Illinois, Iowa, Missouri, Minnesota, Tennessee, Indiana, Michigan, California and Wisconsin, have been thus set apart as to the Beneficiary Fund. In all other respects they remain integral parts of the Order.

PROGRESS OF THE ORDER.

The A. O. U. W. was started in Pennsylvania in 1868, but was not sufficiently established to pay the $2,000 benefit until 1873, from which time up to the 1st of January, 1879, the Grand Lodge of that State alone has paid over $400,000 of Beneficiary Fund.

The Supreme Lodge, up to March, 1879, had paid out $438,056.90 on deaths of members of Lodges under its immediate jurisdiction. The amount p id by the Order during the year 1879, was $639,979.90, making an aggregate of over

ONE AND ONE HALF MILLION OF DOLLARS

Already paid to the widows or heirs of deceased members of the Order.

The membership reported on the first of March, 1879, was 62,993, with Grand Lodges established in the State of Pennsylvania, Ohio, Kentucky, Indiana, Iowa, New York, Illinois, Missouri, Minnesota, Wisconsin, Tennessee, Michigan, California, Georgia, Kansas, Ontario (Canada), Oregon and Washington Territories, Mass a chusetts, and Subordinate Lodges in a number of other States. In all these States the Order is steadily and rapidly growing. With the increase already since the above date, it is safe to say that before the close of the year 1881 it will number over 100,000 members.

The Order was founded by a few earnest, honest men, for fraternal and beneficent purposes. Its sphere of usefulness has been enlarged, and it has been faithfully conducted as its founders designed it to be—not to subserve the selfish interest of a few, but for the mutual benefit of all. Thoughtful and prudent men join it because they can thus provide, without present embarrassment, for the contingencies arising from the uncertainties of life, and at the same time aid each other in mutual improvement and the elevation of humanity.

FORMATION OF NEW LODGES.

Any ten or more persons having the prescribed qualifications and complying with the requirements of the Order, may become organized and receive a charter for a Subordinate Lodge. If residing in a State, District or Territory under the immediate jurisdiction of the Supreme Lodge, application should be made to the Supreme Recorder or a Deputy S. M. W. for information as to the course to be pursued. If residing in a State in which a Grand Lodge has been established, the application should be made to the Grand Recorder of such Grand Lodge. In the formation of a new Lodge the proper officer has power to grant a dispensation to reduce the fees of charter members to $5 for the degrees, but the other fees remain the same as for old members, and this privilege may be extended for a period of 30 days. The cost of supplies, and institution fee of Deputy to a Lodge is $100, to be paid at time of institution. Fifty dollars go to the Grand Lodge. At the minimum fee for degrees it takes just what 20 members pay into the Lodge to meet the cost of institution. There is in addition the cost of a medical examination for each member.

THE ORDER IN CALIFORNIA.

The Order was introduced into this State by Horace G. Pratt, Deputy S. M. W., who organized California Lodge, No. 1, in West Oakland, Aug. 21, 1875. He also organized Nos. 2, 3, 6 and 7 in Oakland; Nos. 4, 8 and 9 in San Francisco; No. 5 in Alameda; No. 10 in Berkeley, and finally the Grand Lodge of California on Nov. 13, 1877. There were then but 355 members in the Jurisdiction. On Jan. 1, 1879, the membership had swollen to 4,263, which was increased to 6,286 on Aug. 1, 1879. These figures include only M. W. degree members in good standing at the dates given. The pecuniary interest involved in the Order in California alone, is over $22,000,000, and this at a yearly cost to the membership of less than the taxes on so much value of property if it had been given them free. The widows and orphans are our beneficiaries. We snatch them from the jaws of poverty and make them more comfortable and independent pecuniarily, than the average citizen of this or any other country. Is it any wonder then that the success of the Order is without parallel in the history of fraternal organizations.

Further information cheerfully given by applying to H. G. Pratt, Grand Recorder, S. F., Cal.

A. O. U. W. Directory.

Cards inserted in this list at the rate of 25 cents per month payable semi-annually in advance. If errors or omissions are noticed, please write the office direct.

CALIFORNIA.

3—SILVER SPRAY. Mrs. E. McLeod.	San Francisco. 32 O'Farrell St.	2d & 4th Mondays Miss L. McNear.
4—IVY. Mrs. D. Markel.	Oakland, 12th & Franklin sts	1st & 3d Wed. J. R. Stumock.
5—DIAMOND. Mrs. R. M. Shackleford.	Hollister. San Benito.	Friday. Mrs. W.F.Ellis
6—MAGNOLIA. Mrs. Dr. J. S. Potts.	Champion Hall. San Jose.	1st & 3d Tuesday. Mrs. A P. Murgotten.
7—BAY LEAF. Mrs. H. S. Shuey.	Walnut Creek. Contra Costa.	1st & 3d Tuesdays. Miss May Lawless.

Officers and members of the A. O. U. W. receiving a complimentary number of the Watchman with this notice marked are invited to examine its merits for their support, as we expect our agent to call and present personally further information concerning our enterprise for the future. Should our agent fail to call soon in some instances, we shall be glad to have our friends favor the office directly with their response. Persons receiving duplicate copies are requested to circulate them to the advantage of our cause and the publishers.

Bro. Joseph Giusti's Oyster, Chop, and Chowder House, 105 California Market, for ladies and gentlemen, is the place to get an oyster cocktail, or a meal fit for a king. His customers always feel happy after partaking of his good cheer. His parlors are open night and day.

New Patents.—Dewey & Co.s' Scientific Press Patent Agency has received official notice of the issue of the following patents to Pacfic coast inventors, for the week ending April 19, 1881:

240,354, whip, J. W. Allen, Canyon City, Or.; 240,303, press, L. A. Coming, San Jose, Cal.; 9,679, hanging doors, C. N. Earl, Los Angeles, Cal., (re-issue); 240,242, bellows, J. Fletcher, S. F.; 240,261, destroying phylloxera, E. H, Lindemann, S. F.; 240 329, hoisting machine brake, E. O'Neill, S. F.; 240,330, lifting jack, A. H. Parks, Bloomfield, Cal.

April 26, 1881: 240,572, padlock, P. H. Baker, S. F.; 240,655, cleaning sewers, P. Burke, Virginia City, Nev.; 240,697, producing artificial cold, J. F. Gesner, San Rafael, Cal.; 240,723, spreader, W. F. Jeans, Woodland, Cal.; 240,752, guide for penmen, E. Nunan, S. F.; 240,756, valve motion, E. O'Neill, S. F.; 240,558, plow, E. Squires, Beaverton, Or.; 240,567, gate, J. & A. Wright, Rhonerville, Cal.

Preparing Floor for Dancing.—If planed well, paper the floor with sand paper, then wax it with beeswax and turpentine. To prepare it, melt in an iron pot two or three pounds of common yellow wax; when melted, take the pot of the fire and allow the wax to cool a little, then add one pint of turpentine for each pound of wax, well mix and wash the boards with the mixture, using a large paint brush; the wax must now be well worked in the boards by friction. The surplus wax may be wiped off with a stiff cloth; beeswax and turpentine, with friction, is the best plan extant; in fact, at the present day is still in vogue in many of the chateaux in the south of France.

A gentleman who had lost his dog on the street the other day was very much astonished at being vigorously "histed" by the burly butcher, in front of whose shop he had been whistling and snapping his fingers for about 10 minutes. The steak stretcher explained that he was tired of having his sausages made fun of.

Prophecy.

What is Going to Happen in 1880-87.

The following extraordinary prophecy originally appeared in the tri-weekly *Gleaner*, published in Kingston, Jamaica, in September, 1879. It was written by Professor C. A. Grimmer, and is published by request:

The Planets.

It is pretty well understood that the perihelia of the four great planets—Jupiter, Uranus, Neptune and Saturn—will be coincident in 1880. Astrology to-day is ridiculed by many so-called scientists. After 1880 astrology will be taught by many who reject it now. Bacon says "the world opposes what it does not understand." In the case of astrology this is pre-eminently so. I have no desire to discuss the verity or falsity of astrology; I simply state the effects which the approaching perihelion will produce according to astrological deduction. The effects which this conjunction will produce are momentous. From 1880 to 1887 will be one universal carnival of death. No place on earth will be entirely free from the plague. The Pacific coast will not suffer anything in comparison with any other portion of the globe. The coincidence of these planets in perihelion will always produce epidemic and destructive diseases. Three of these planets are malifics, and Jupiter, although a benefic, produces evil through association; or, technically, by conjunction with the others. Disease will appear, the nature of which will baffle the skill of the most eminent physicians. Every drop of water on the earth, in the earth, and above the earth will be more or less poisonous. The atmosphere will be foul with noisome odors, and there will be few constitutions able to resist the coming scourge; therefore, prepare, ye that are constitutionally weak, intemperate, or gluttonous, for "man's last home, the grave." From the far east the pestilential storm will sweep, and its last struggle will end in the far west. In 542 and 1665 three of the planets, two of which were malifics (Mars and Saturn) were in perihelion, and Jupiter, though a benefic, brought evil through association. Now 542 and 1665 were the worst plague eras of which the world has any record. From 542 to 546 it has been estimated that from 75,000,000 to 120,000,000 victims suffered death by the plague ("Gibbon's History," vol. 3, chap. 14; also "Cousin's History of Rome," vol. 2, page 178).

Mars and Saturn.

In 1780, Mars and Saturn were in perihelion, and in the sign Virgo, and 52,000 out of 75,000 inhabitants died in the city of Marseilles in less than five weeks. In 544, 10,000 died each day in Constantinople. Alexandria (Egypt) lost in 542, 50,000, and in 543, 80,000 by the plague. But as bad as were those times, they will only approximate the horrors of seven years many of us are doomed never to witness. All the weak and intemperate are sure to die. There is no escape from the inexorable plague fiend. Fortunate, indeed, are those whose blood is pure, and free from taint and weakness, for they alone will survive the wreck of the human family. The intemperate and weak will join hands and go down to their graves in tens of thousands. Ancient races will be blotted from the face of the earth. Asia will be nearly depopulated, and the islands that border Asia will suffer frightfully from the scourge. The countries that join the northwestern portion of Asia will suffer the ravages of the plague. Russia will be the first European nation that will suffer. Unless correct sanitary measures are taken before 1880, the plague will be found devastating cities on the Atlantic coast of America. America will lose 15,000,000 of her inhabitants if the sewers of her cities are as imperfect in 1880 as they are to-day.

What to Expect.

The perihelia will bring other inflictions upon the inhabitants of the earth, over which mankind can exert no restraining influence. There will come storms and tidal waves that will swamp whole cities; earthquakes that will swallow mountains and towns, and tornadoes that will sweep hundreds of villages from the face of the earth; mountains will tremble, totter and fall into sulphurous chasms; the geography of the earth will be changed by volcanic action; mountains will toss their rocky heads up through the choicest valleys; valleys will appear where mountains stood; skillful mariners will be lost in the ocean, owing to the extraordinary variations of the compass; navigators will grow pale with alarm at the capricious deflections of the needle; volcanoes that have been dormant for centuries will awaken to belch forth their lava with more violence than when in their pristine vigor; rainfalls will deluge valleys and mountain streams will enlarge their beds and become mighty torrents; fires will start spontaneously and devastate whole forests; great fires will occur in many cities, and some will be totally destroyed; there will be remarkable displays of electricity frightful to witness; wild beasts will leave their natural haunts and crowd into populous cities, timid and harmless; suffocating fumes of sulphur will escape from the earth, to the great dread of many; an unprecedented number of ships will be shattered in fragments by running on mighty rocks and small islands that are not down on the navigator's charts; islands will appear and disappear without any apparent cause; the navigator's charts will prove almost a detriment instead of an aid, owing to the sudden changes of ocean currents, temperature and surroundings; the birds of the air, the beasts of the field, and even the fish of the sea, will be diseased; billions of fish will die and be cast upon the seashore, to fester in the sun and impregnate the atmosphere with their foul emanations. No fish nor animal food should be eaten from 1880 to 1885, for the flesh of nearly all the animal kingdom and the finny tribes that inhabit the rivers, streams, lakes and ocean, will be diseased, and therefore those who partake of the flesh shall poison their blood and be taken away shortly after.

Famine and Farmers.

The poison that enters the system by eating diseased meats is just as deadly as to be inoculated with the plague. Farmers will be so stricken with fear that they will cease to till their farms, and gaunt famine will step in to make human misery more wretched; fanaticism will spring up in many places, and bloodshed will result therefrom; murderers and robbers will ply their hellish work with impunity, for there will be little or no law; everybody will be absorbed with the trying task of keeping alive; people will be buried in deep trenches, uncoffined; the judge will be stricken from the bench, the pleader at the bar, and the merchant and the customer will be seized with the fatal malady while trading; death will come slow and lingering in some cases, but in most it will be swift and terrible. In seaboard towns thousands will be buried in the bays and harbors, the law to the contrary notwithstanding.

Countries Deserted.

In many countries vast districts will be deserted, and even in Europe some portions will appear so near that condition as to appall the traveler. One may walk whole days over hundreds of farms without seeing a living thing. On all the large tracts of land that were once so animated with animal life, not a vestige will be seen. The houses on the deserted farms will show signs of disarrangement and negligence that plainly tell of the hurried departure of the owners to the populous cities. Let a traveler pursue his way till he comes to the small villages, many of which will not contain a single living thing. Let him look into the houses; let him pass through the doors that stand ajar and witness the sickening spectacle of whole families dead. Let him still wander, if he yet have courage, through the country stricken with the black death, and in the fields, on the hill-sides and in the dark canyons of the mountains, and he will see every phase of this terrible malady, till the culminating point of death is reached—the end of all attacked with this incurable disease.

The country people will flee to the crowded cities for aid, but unless they are rich the physician will give them little if any attention. The poor will die by tens of thousands, without a ministering hand to soothe their dying agonies The doctors will be in universal demand, and extortionate in charge for their services. Bear in mind, no medicine or doctor can give you any more aid than you can yourself. The disease cannot be cured; but unless your system is too weak or impure, copious draughts of warm water and a vegetable diet will prevent the disease poisoning the blood in the process of digestion. Animal food will poison those who continue the use of it. Fine cotton or sponge dipped in the spirits of camphor and kept in the nostrils and frequently changed will prevent the blood from being poisoned through the organs of respiration. Many people will think that the total destruction of animal life will occur during this era of plague. After the black death there will be two years of fire, which will rage with fury in all parts of the world from 1885 to 1887. The fires will be the means of annihilating every germ of disease. In fact, every city in which the plague appears should be burned to the ground. This will destroy the scourge. Nothing but fire can do it.

Those who Live Throughout it.

Those who pass through those terrible years of woe will have great capacity for the enjoyment of the earth. The earth will yield twice as much as formerly. All the animal kingdom will be more prolific and life more prolonged. The average duration of life is said to be 33 years now; after the year 1887 it will be just twice as long, or 66 years. The reason of this remarkable prolongation of life is owing to the healthy electricity or magnetism that will surround this globe. From 1880 to 1887 the electricity of the earth will be deadly, owing to the malific influence of Saturn and Uranus upon our atmosphere. During the black death, the most wonderful celestial phenomena will be seen. For weeks the sun will appear as red as blood, and terrible convulsions will appear in that great body. The sun will discharge oceans of flaming hydrogen gases, that will roll in tumultuous billows hundreds of thousands of miles from its center. The moon's action upon the tides will be spasmodic and irregular. Tremendous showers of meteors will fall to the earth, and remain in an incandescent state for hours. Dense black clouds will veil the sun for days, and the moon will not shed as bright or as steady a light as before those dreadful days. The whole heavens and earth will tremble at the awfully continuous reports of thunder—being frequently for hours; blinding flashes of lightning will illume the black sky; people will scream with horror at the fantastic shapes the lightning will assume; thousands will go insane with the fear of the celestial phenomena; all modes of egress from the cities will be stopped, on the prairies, in the mountains and valleys, and their occupants will die in them of disease and starvation; steamships and sailing crafts will rot on the oceans with their dead human freight, drifting where the winds and waves may drive them.

Good Time After 1887.

Stout will be the hearts that will not dispair in those dreadful times. Fanatics will arise and cry out that the hand of God is against mankind, and religious frenzy will be rampant in all the large cities; so-called prophets will incite their followers to deeds of blood and rapine, but they will not hold sway long; insanity from religious causes will predominate in those times; the mortality in cities where sewerage is defective will be appalling; everything that is ate or drank should be boiled well before being used; no cooked food or water should be partaken of if allowed to be exposed to the air for even a quarter of an hour; food must be eaten as soon after being cooked as possible; every kind of animal food should be eliminated from the table; even fish and game should not be used; milk, butter, eggs, fat and oils (excepting vegetable oils) should be prohibited; vegetables, grains and fruits that are produced in each country should be used. The electric condition of everything on earth will be changed; therefore the products of the soil in our immediate vicinity are the best to keep the human system in a positive state. When the human organism is in a positive condition, it is practically impossible to contract disease. All persons in a negative state to their surroundings will be the first to fall victims to the scourge. The flesh-eater and the alcoholic imbiber will go hand in hand together to the grave, for the blood will become impure and inflamed, and therefore will be in a negative state, and necessarily unable to combat disease. Bear in mind, no part of the world will be exempt from the ravages of the plague. The frigid zones of the Esquimaux will be invaded by the demon of death, and desolation will be as apparent there in that frozen land as in the sun-scorched sands of Africa. It will penetrate alike the jungles of India, and the civilized homes of America. The Mongolian race will suffer most, for it is without doubt the most ancient. Races are like empires—they have their rise, decline and fall.

Poor China.

China will be depopulated, or nearly so, and when the plague breaks out in 1881 in their country, hordes of Asiatics will crowd their ships and flee their country, to spread the loathsome horror over every land they turn to. Every island in the Pacific will be swarming with Mongolians, and they will at last reach the Pacific States, and then America must suffer a destruction of life without a parallel in the annals of her history. I say that the inhabitants of the plague-stricken districts will reach there unless more vigilance is used with preventive measures to keep them back. I am not actuated by any feeling of prejudice against any particular race, but the voice of the hosts of heaven should be harkened unto, and, if by a mathematical scheme we can deduce certain facts portentous to the Caucasian race, they should be given and followed. In mortality the East India country will be next in order of magnitude to China, Africa next, Europe next and America next. The Atlantic State will suffer more than the Pacific, South America more than North America, and California will be the last and least sufferer of this most malignant plague era this world has ever known. The plague is not only what the perihelia brings us, but it will be accompanied by war, discord, civil strife, floods, inundations; and in seven-tenths of the world, drouth; and, unless extraordinary provision is made to quell great uprisings, anarchy, with all its horrors, will reign from 1880 to 1888.

The Star of Bethlehem.

In 1887 the "Star of Bethlehem" will be once more seen in "Cassiopeia's Chair," and it will be accompanied by a total eclipse of the sun and moon. The star only makes its appearance every 315 years. It will appear and illumine the heavens, and exceed in brilliancy even Jupiter when in opposition to the sun, and therefore, nearer to the earth and brightest. The marvelous brilliancy of the "Star of Bethlehem" in 1887 will surpass any of its previous visitations. It will be seen even at noonday, shining with a quick, flashing light the entire year, after which it will gradually decrease in brightness and finally disappear, not to return to our heavens till 2202, or 315 years after 1887. This star first attracted the attention of modern astronomers in the year 1575. It was then called a new star. It was no new star, however, for this was the star that shone so brightly 4 B. C., and was the star that illumined the heavens at the nativity of Christ. It has reappeared every 315 years since, and every educated astrologer is certain that it will reappear in August, 1887. The appearance of this star, accompanied as it will be by solar and lunar eclipses, together with the baleful influence that follows the positions that Mars and Saturn will occupy, will cause a universal war and portentous floods and fearful shipwrecks. North America will be involved in civil strife, and a reign of terror will prevail in the Atlantic States, unless a Napoleon rises to quell it. There will be a war of classes; the rich will array themselves against the poor, and *vice versa*, everywhere.

TO SEE those we love a source of happiness to others, is a pure joy.

Railside Horticulture.

The Central and Southern Pacific railways have done a good thing for the State by their system of tree planting beside their tracks. We have been pleased also to see here and there a switch-tender so imbued with the love of the beautiful that he has embowered his little cabin with a fine growth of vines and surrounded it with miniature flower beds. There is also a disposition in some towns to beautify the surroundings of the railway stations. The Dwight-way station, in Berkeley, is enclosed in a pretty little park, arranged under the auspices of the Berkeley Neighborhood Improvement Society. There is room for much more good work of this kind all over the State, for many stations are unsightly places; as inhospitable and bare as neglect can make them. This is exceedingly unfortunate, for many reasons, and should be changed. First impressions are very strong with many persons and if one is met at the station, when descending from the car steps, with a view of desolation and unthrift, it may take many miles of flower gardens afterward to win a good opinion of the town. If the stations were made over into little oases of shrubs and trees the effect would be quite different. Each village and town should have a pride in a work of this kind. It would be comparatively easy if the people would interest themselves in it. We are of the opinion that the railway company would furnish most of the trees and shrubs, and then all that the people need do is to see that they are kept in condition fit for growth. There is no telling how wide reaching the influence of such improvements might be. It is quite possible that the picnic character of the surroundings would impel the station loafers to indulge in an occasional clean shirt, and the agent might tread the platform with polished boots. Even such great changes as these are quite within the possibilities.

Railside and station horticulture is not at all a new idea. It is practiced quite generally in the older States and abroad. The New York *Tribune* recently noted facts in this connection, stating that there are some pleasing examples of railway gardening in Maine. In Pennsylvania many of the station areas are brightened by the smiling beauty of flowers and the graces of foliage. In Europe, where there are more people with less to do, and where the shorter lines of roadways of all sorts can be kept on that account, in garden trim, it is common to see at every little country station, however lonely and retired, beds of bright flowers edging the walls and shining in the windows. All stations are inclosed there; the gates being opened from the gatekeeper's lodge for every passing vehicle. Here, each planted area has necessarily its own fence, all around being entirely open. The cuttings near Paris are planted all over the slopes with American locusts.

As we have hinted before, California has already some good examples of what we would make prominent. There are also some beautiful spots along the dreary overland route through Nevada. We would have a thousand times as much of it. Which town in California will have the prettiest station? It is time now to plan and next fall to plant.

The Easiest Way in Housekeeping.

A little book just published, entitled "The Easiest Way in Housekeeping," by Helen Campbell, late Superintendent of the Raleigh, N. C., Cooking school, is calculated to be of much benefit to housekeepers. Our wife, who is something of an expert in cook books, endorses it, and we cannot pay the book a higher tribute than to say so. Mrs. Campbell's own success in her cooking schools is good evidence that she has taken hold of this matter at the right end and in the right manner. Her little manual will make its way into hundreds of families, where the more elaborate and expensive books can hardly penetrate, or, if they do, are found to be calculated for the multifarious facilities of city markets, and the higher range of luxury in living.

It can be used to advantage by mothers for the pleasant and useful training of their daughters in the science of housekeeping and healthkeeping; or in classes formed for instruction (for which purpose there are tables of topics for lessons and examination; or at home, in bed-room and parlor and kitchen, as a compact, trustworthy, and readily available guide. The essentials are in all cases treated first and most carefully, but the delicacies and graces and adornments of house and table find their full place, while sick-room cookery has a chapter to itself. The many recipes for breakfast and tea dishes, and relishful modes of utilizing fragments, etc., are another most valuable feature for our wasteful American kitchens to heed.

The "Household Hints," the proportioned "Weights and Measures," the "Time Tables" for cooking meats, fish, and vegetables, the "List of Utensils," "Hints to Teachers," "Tables of Lessons," "Questions for Examination," "List of Authorities," and Index of Topics are all admirable and useful. The title of the book would seem to indicate some "royal road," but the good sense and clearness of its ideas show Mrs. Campbell's theory to be that "The Easiest Way" is the *best* way, and she certainly points it out.

A Farmer's Wife in Olden Time.

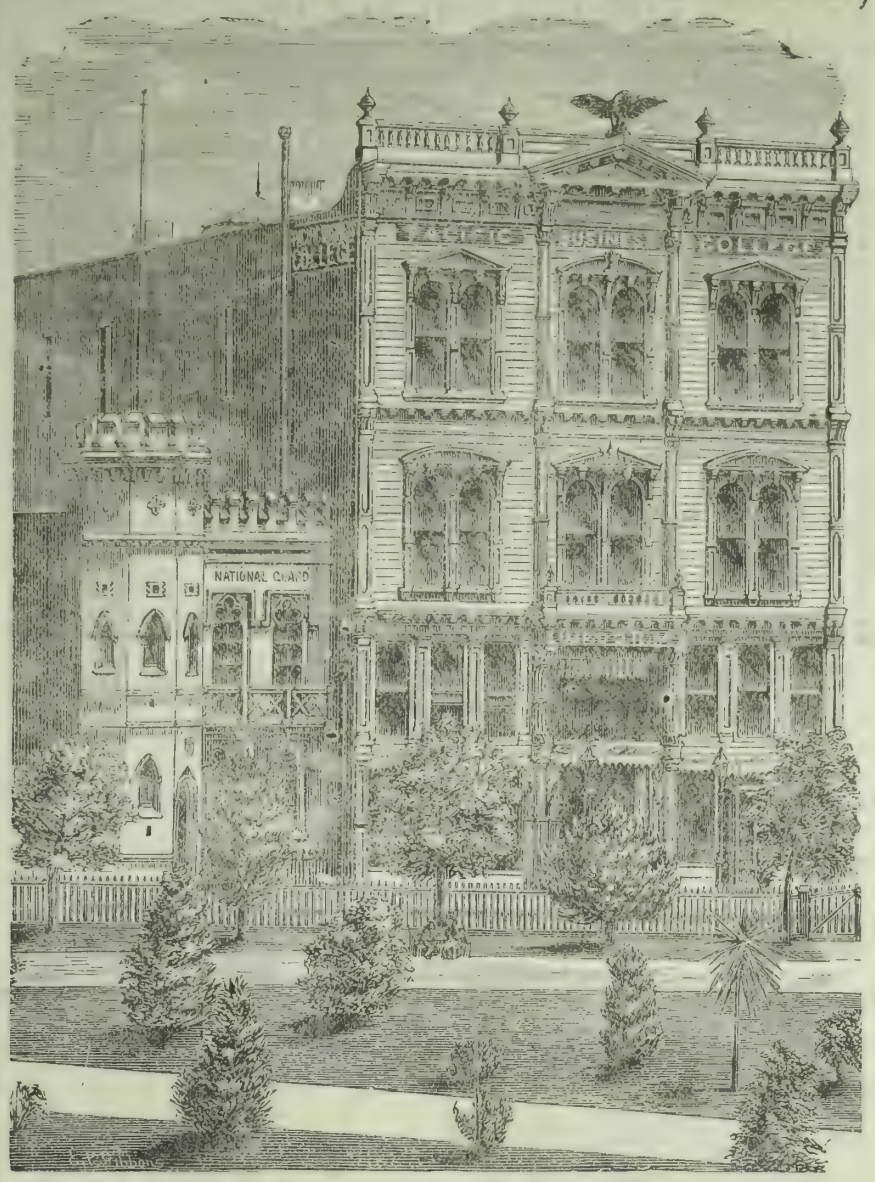
A correspondent of the *Western Rural* takes a sketch of a farmer's wife from a book written 250 years ago. The correspondent says: "I tell you, my over-worked sisters, it kind of comforted me just to see that the 'gude man's' wife in those days, even if she had maids under her, couldn't have had a much easier time than we. Just see now what was required of her, and may it give us courage and patience faithfully to fulfill our daily round of duties as farmer's wives."

The following is the old sketch: "I do not find the place of a housewife to be of less care than the office of her husband, understood always that she is acquitted of field matters, inasmuch as she is tied to those of the house and base court, the horse excepted, as he is tied to the business of the field. Likewise, she is to look into the things necessary about kine, calves, hogs, pigs, pigeons, geese, ducks, peacocks, hens and other sorts of beasts, as well for the feeding of them as for the milking of them; the making of butter and cheese, and the keeping of lard, to dress the laboring men their victuals withal; yea, farther, she has the charge of the oven and cellar; the handling of hemp and also the making of webs; of looking to the clipping of sheep, of keeping their fleeces; of the combing and spinning of wool to make cloth to clothe the family; of ordering the kitchen garden, and keeping the fruits, herbs, roots and seeds, and, moreover, of watching and attending to the bees. It is true that the buying and selling of cattle belongeth to her husband, as also the hiring and paying of servants: but the surplus to be employed and laid out in small matters, linen, clothes for the household and furniture—that of a certainty belongeth to her.

"She must be such an one as must be subservient unto God and to her husband; given to store up, to lay up, and to lock up; faithful, peaceable, not loving to stir from home; mild to such as are under her when there is need; sharp and severe when occasion requires; not contentious or full of words, toying or tattling, nor drowsy headed. Let her always have her eye on the maids; first at work, last from it, first up and last in bed; not suffering the least trifle to be purloined; not grumbling at any time for any service done to the lord of the farm, knowing that the value of a crumb of bread denied unto him may lose the quantity of a whole loaf afterward.

"Let her not trouble her brain with the reports and speeches of others, but acquaint her husband with them in good sort and manner. Let her not suffer her daughters to gad abroad on the Sabbath, except they be in such company as is faithful; compelling her sons to be foremost at work, show them the example of their father, that this may be a double spur unto the men-servants; not suffering unchaste words, oath or blasphemy to be uttered in her house, and causing tale-bearers to be silent, not troubling themselves with other folk's matters.

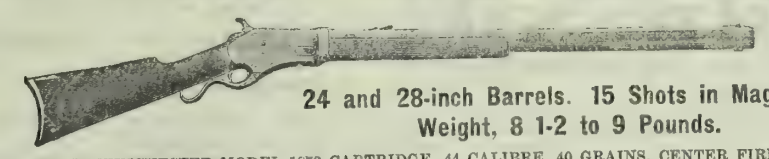
"Let her keep close up her stubble and the lopping of trees for the oven; not suffering the stalks of beans, peas, thistles, the refuse of pressed articles and other unprofitable herbs to be lost, but burning them in winter for their ashes, which will afford provision for her lye tub. Let her give good account of the eggs and young ones, as well of birds as of other beasts; let her be skillful in natural physics for the benefit of her own folk and others when they fall out to be ill, and so in like manner in things good for kine, swine or fowls; for to have a physician alway, unless the case be urgent, is not for the profit of the house. Let her keep all of them of her house in friendly good-will, not suffering them to bear malice one with another; let her form her bread so as that no one be suffered to use it otherwise than in temperate sort, and reserve the dross of the grapes she presseth for the servants' drink, that so the wine may serve for her husband."



To the Readers of the Pacific States Watchman. — I have now a full stock of Builders Materials, Carpenter's Tools, Brushes, Fine Cutlery, Parlor Rifles, Air Guns, etc at my wholesale and retail Hardware Store, 28 New Montgomery Street, under the Palace Hotel, which are offered at lowest prices in this market. It is no trouble to show my goods, as they are all new and selected especially for the trade. Frank P. Latson, proprietor, formerly with the late H. Rosekrans.

Do Not Delay.—Send us your subscriptions promptly Don't let any break occur in your subscriptions to the Watchman. Every live Workman needs every number of the paper, and we need his assistance to print as valuable a journal as we strive to for the special benefit of its patrons and the general good of the Fraternity. Send the cash direct, or, if more convenient, hand it in with your dues to the Financier and we will allow him for trouble and expense of remitting.

The Recorders of all Subordinate Lodges are requested to correspond and act as agents in securing subscriptions for the Watchman. We will pay liberal rates for services rendered. Remember, Brothers, that you can accomplish mutual benefit to the Order and ourselves.



By Telephone.—Subscribers, advertisers and other patrons of this office can address orders, or make appointments with the proprietors or agents by telephone, as we are connected with the central system in San Francisco.

Dreaming.

It was in the spring of 1849, with rifle in hand, I joined our company at Council Bluffs, with a parting blessing from my father and a farewell kiss from my affectionate mother and sister. We bade adieu to loved ones and crossed the Missouri river and plunged into the "wilds of America," then unknown and untraversed by the white man, little dreaming the hero I was to be. Day after day passed, and nothing occurred to mar our journey; everything gave signs that we were leaving civilization and the smoke and din of Council Bluffs far behind. On either side were the Indian trails worn knee deep in the soil that had been trodden for years and years by thousands of the red warriors. We were now nearing Fort Laramie. The plains were dotted over with deer and antelope, while in the distance could be seen the buffalo by the thousands.

It was on the morning of the 4th of July, 10 young hearts, with high hopes, went forth to kill our first buffalo. Mounted upon our noble steeds, we struck off north to the sand hills, while our train rolled westward. After an hour's hard ride we came upon the monsters of the desert, and the chase commenced. Being mounted upon a heavy mule, I was soon left behind far in the distance. With the recklessness of a mad man, I spurred on my mule. The sweat was rushing from every pore; his nostrils were extended; he was covered with foam, while he trembled in every limb.

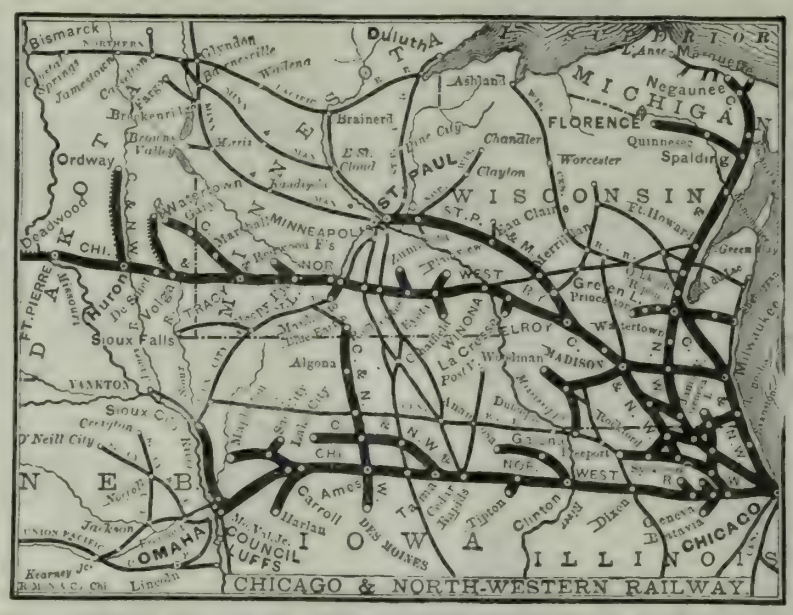
I had come to a deep sink hole. Though the water was stagnant he drank as if it had been the purest mountain stream. I mounted and trudged on until I found that I was lost; yes, lost in a desert of sand hills. The sun was sinking low in the western horizon. I was now in a luxuriant growth of mountain grass.

I had alighted to let my mule graze, when up jumped a little buffalo calf. I fired, and he fell at my feet. I was preparing to dress it when I heard a sound like distant thunder. I turned only to behold a herd of buffalo, a thousand or more, bearing down upon me. They had been drawn hither by the scent of the warm blood. I sprung to my mule, but too late. He was struck mid-side by a huge monster. My gun and hat were thrown fully 20 feet from me. The mule and buffalo fell in a ravine at least four feet deep. My mule was killed instantly. To save myself, with the bound of an antelope, I sprung upon the buffalo's back, clutching my hands in his long shaggy mane. With the speed of lightning we flew from the herd; my hat and gun were left far behind.

It soon became dark. Over hill and through vale we sped on. The night hawk was frightened from his roost. Not a sound was to be heard except the howling of the wolves that were following upon our trail. I tried to compose myself and realize my situation. There I was, seated upon a buffalo, flying I knew not where, perhaps hundreds of miles from my companions, for I knew that we must be going at the rate of ten miles an hour. My limbs were swollen. I endeavored to extricate myself from the animal. All, all was in vain; my hands were as tight as if they had been riveted. Still on we went; the gray streaks of morning were just visible when I saw lights ahead, flashes as of lightning and loud reports as of several rifles, and the noble beast who had carried me hundreds of miles staggered and fell.

My captors proved to be a band of the Pawnee Indians on a scouting party, intent upon robbing the emigrants. They bathed my swollen limbs and cared for me as a brother. In a few days I was able to mount a pony, and they were on the march. One morning, just before day, I was aroused from my slumber; my hands were tied behind my back. I saw they were preparing to attack a train of emigrants. I was left with two Indians in charge of the ponies. Soon a stray ball pierced my side. For a time all was blank. When I came to myself I was in the care of emigrants on the route for California. With good medical aid and tender care I was soon restored to good health. In due time we arrived in the golden mines. The very first day I turned over a large flat stone, and a sight that met my eyes! There lay the precious metal for which I had risked my life. I raised my eyes to heaven and thanked the Giver of all good gifts for the preservation of my life and the prospect of a speedy return to my loved ones. The next day I was on the road home, and just six weeks from the time I left, again I stood in the door with well-filled pockets of the shining ore gathered 3,000 miles from my native State.

Just then I awoke, and lo and behold, I was in the beautiful village of Vacaville or "Cowtown."—*Jim Stoaks.*



SUBMARINE PHOTOGRAPHY.—Improvements are said to have been made in submarine photographic apparatus, by means of which views have been taken near Glasgow, at a depth of ten fathoms underneath the water. One of these views, taken in the bay of that city, shows distinctly a sandy bottom, with a large number of boulders covered with seaweed, and an old anchor; also, in the shade, three mooring cables, belonging to small yachts.

A COUNTRYMAN from New Hampshire, who had never heard of a bicycle, came to Boston, and when he beheld a youth whirling along upon one of those airy vehicles, he broke out into soliloquy thus: "Golly, ain't that queer? Who'd ever 'spect to see a man ridin' a hoop-skirt."

SECURE PATENTS

Through Dewey & Co.'s **Scientific Press** Patent Agency.

OUR U. S. AND FOREIGN PATENT AGENCY presents many and important advantages as a Home Agency over all others, by reason of long establishment, great experience, thorough system, intimate acquaintance with the subjects of inventions in our own community, and our most extensive law and reference library containing official American and foreign reports, files of scientific and mechanical publications, etc. All worthy inventions patented through our Agency will have the benefit of an illustration or a description in the MINING AND SCIENTIFIC PRESS. We transact every branch of Patent business, and obtain Patents in all countries which grant protection to inventors. The large majority of U. S. and Foreign Patents issued to inventors on the Pacific Coast have been obtained through our Agency. We can give the best and most *reliable* advice as to the patentability of new inventions. Our prices are as low as any first-class agencies in the Eastern States, while our advantages for Pacific Coast inventors are far superior. Advice and Circulars free. DEWEY & CO., PATENT AGENTS.

Official Recommendations.

From Grand Master Workman Wm. H. Jordan's Annual Address, 1880.]

During the past year I have received large assistance in my work from the PACIFIC STATES WATCHMAN and *Workman* [consolidated with the WATCHMAN.—EDS.], and common courtesy would require that in this communication I should recognize the aid thus received by favorably commending these journals to the consideration of our brotherhood. The value of assistance in communicating information to the membership and introducing our cause to the people of the State, it would be difficult to compute. On all occasions when I have desired the use of their columns for official communication they have been tendered me without cost, either to myself or this Grand Lodge, and I would suggest that as a recognition of these services you authorize the Grand Master and Grand Recorder, in future, to publish such of their official communications as they may desire in the columns of these periodicals, paying therefor a reasonable compensation. This should be done without creating any official organ or assuming any responsibility for other matter than that appearing over the signature of the Grand officers.

[From Grand Master Workman Clay W. Taylor's Annual Address, 1881.]

IT is meet and proper that the untiring and never-ceasing efforts of the PACIFIC STATES WATCHMAN should not be overlooked or forgotten. Its proprietors have spared no time or expense in their devotion to the welfare of our fraternity, and the WATCHMAN is to-day one of the best fraternal journals in the land advocating the interests of the A. O. U. W. Its leading articles are copied in every journal connected with our Order, and for its faithful devotion to our interests, it merits, and should receive, our cordial support.

[From Grand Master Workman Wm. H. Barnes, 1881.]

WITH a full knowledge of the ability and enterprise of the conductors of the PACIFIC STATES WATCHMAN, with a realization of its value and usefulness, not only to our Order at large, but to individual members, I unhesitatingly recommend it to the practical and unanimous patronage of our Order in California.

Ourselves.

Those connected with the publication of the WATCHMAN feel proud of the many kind words and the cordial support which the members of the A. O. U. W. have extended to it. It has always been the endeavor to so conduct it as to merit the confidence and respect of the brotherhood. That we have succeeded in our efforts is evident by the freely expressed words of praise and the financial support tendered by the brethren.

It is our highest aim to make the WATCHMAN worthy of the great Order of which it is the representative. Its course shall ever be onward and upward, and we hesitate not to guarantee a due return to all who will assist in extending its usefulness. It is necessary that a live journal should be issued in the Order's interests. Ours is an Order that should be prominently brought before the public, its history chronicled, and the many items of events occurring in the Lodges set forth. To more fully do this we invite correspondence from all brothers as to matters happening in their Lodges, and of subjects of benefit to the Order.

In the organization of new Lodges, we will furnish Deputies with back copies containing the "Aims and Objects of the Order." They can thus be saved considerable trouble in explaining to new members what the Order is organized for. Then the paper well be likely to be distributed among their friends, other persons will be attracted to the Order, and the result will be an increased membership in the Lodge.

We also occasionally send sample copies to brothers whom we think would like to read the paper, and would also like to know what the Order is doing. To all such, if they do not feel at liberty of subscribing, we would be pleased to have them give the paper to other brothers, or outsiders who would likely become members of the Order.

Where we have no authorized agent, and any brother would like to act as such, we will give liberal inducements for his time and trouble. All communications should be addressed to the WATCHMAN Publishing Co., 202 Sansome St., San Francisco, Cal.

BROTHER WORKMEN, enquire who takes the WATCHMAN in your Lodge, and then try and get others to subscribe.

WORKMEN receiving sample copies are invited to examine the WATCHMAN, and subscribe for it.

Horned Toads.

We give on this page an engraving of a native Californian, who can be met with in the middle and southern part of the State. We have at our office several living specimens, which appear to be thriving well.

In the volume on zoology in Lieut. Wheeler's "Surveys West of the 100th Meridian," it is stated that they found the *Phrynosoma*, or "horned toad," very numerous. There are 11 distinct species of this interesting little reptile, according to Prof. Cope. The one shown in the engraving is the form found in California and Arizona—*Phrynosoma cornuta*.

In its general aspect it somewhat resembles a frog, and is called a horned toad, though really a nearer kindred to the lizard tribe. In fact, it is a true lizard, and is in no respect a batrachian. The genus, which is North American, is characterized by a more or less oval body, flattened and covered with tuberculated scales, the head having sharp spines or knobs.

In confinement the reptile is sluggish, but it is said to be active in pursuit of insect prey in a wild state. It passes the winter in a state of lethargy in holes dug by gophers and other rodents, coming out in April generally. Those specimens which we have burrow under the soft earth in their box, covering themselves entirely up. They are very abundant on the Fresno plains. Those interested in the natural history of the reptile can find detailed descriptions in Stanbury's "Expedition to Great Salt Lake," and Vol. II. of the "Mexican Boundary Survey."

THE CALIFORNIA HORNED TOAD.

DEATH OF MRS. LINDLEY.—The many friends of Dr. Walter Lindley, of Los Angeles, will hear with regret of the death of his wife, who died in that city on Friday, May 6th. The lady has endured a very distressing illness for the past eight months. She was the daughter of Rev. W. W. Puett, a pioneer member of the Indiana M. E. Conference, and had just reached her 26th year. Formerly, she was a student of the Minneapolis Female Seminary, and a member of the Beethoven Society of that institution. Mrs. Lindley was an amiable and exemplary wife and mother, a good neighbor, and an ornament to society wherever she resided. She thoughtfully laid judicious plans for the care of her little children soon to be motherless in the world, and requested her former pastor, Rev. M. M. Bovard, to conduct her funeral services. During her six years residence in Los Angeles she became greatly beloved and esteemed by a large circle of friends, who were attracted to her by the beauty and sweetness of her character, and her fine social qualities. This was specially noticeable by the attentions she received during her long illness, in which she daily received flowers and other tokens of affection from her neighbors. The deceased leaves a husband and two daughters to mourn that loss which cannot be restored. A few moments before her death she received a letter from her aged father, containing a father's blessing on his child, and then passed into the open vision of the spirit world where there are no more graves, neither shall there be any more death. Rest, weary and loving heart. Rest in peace and joy and everlasting glory.

DR. F. M. BIBER, physician of Camptonville Lodge, No. 122, paid a visit to Harmony Lodge, No. 9, on May 7th. He reports his Lodge in a very flourishing condition. Our esteemed brother was quite anxious to return, as he received notice that there were several applicants waiting to be examined for admission. We are pleased to learn that our friend is fortunate enough to hold large interests in the celebrated Forest Queen gold mine.

A. O. U. W. PICNIC.—From what we can learn from the individual members of the Relief Committee, the annual A. O. U. W. picnic will be held at Fairfax some time in June. Favorable rates and conveniences have been offered by the N. P. C. R. R., and we think the arrangements that will be made will be quite satisfactory.

Rice's Mills, care of Adams Springs, via Glenbrook, Cal.
Anderson Springs, Lake county, Cal.

THE proceedings of the Grand Lodge of Kansas are at hand, forwarded by E. M. Forde, Grand Recorder. It is a neat specimen of the printer's art, of 134 pages, the matter being well arranged.

A RECEPTION will be tendered to Wm. H. Barnes, G. M. W., by Colusa Lodge, No. 66, at Colusa Theater, Tuesday evening, May 17th. The WATCHMAN acknowledges the receipt of an invitation.

IN Memorial, 174, we met Bro. J. T. Rogers, Grand Overseer. He reports great interest in his section, Ukiah; hardly a night but there is some work to do.

Workmen Guarantee Fund Association.

INCORPORATED JANUARY 22d, 1880.

W. H. JORDAN, - - - - - PRESIDENT.
Past Grand Master A. O. U. W. of California.

ADMISSION FEE, $3.00. ANNUAL DUES, $2.00.

ENDORSED and has the BEST WISHES of the SUPREME MASTER WORKMAN OF THE UNITED STATES, as per letter on file.

ENDORSED and Recommended by Past Grand Master Clay W. Taylor, in the following letter;

OFFICE OF GRAND MASTER WORKMAN, A. O. U. W. OF CALIFORNIA,
SHASTA, CALIFORNIA, October 2d, 1880.

To the Officers and Members of the Workmen Guarantee Fund Association:

It affords me pleasure to say that the aims and objects of the "Workmen Guarantee Fund Association" meet with my most hearty approval and endorsement. As an auxiliary to the A. O. U. W of California, it is calculated to do great good, and I commend it to the favorable consideration of the members of our noble fraternity. Yours, fraternally,
CLAY W. TAYLOR, G. M. W. of California.

ENDORSED and Recommended by H. G. Pratt, Grand Recorder, one of the Directors of the Association.

ENDORSED and Recommended by C. H. Haile, Grand Receiver, also, one of the Directors of the Association.

ENDORSED and Recommended by Jordan, Brewer and Taylor, the Supreme Representatives of California to the Supreme Lodge of the United States, who are Officers and Members of the Association.

ENDORSED and Recommended by 128 Past Master Workmen who are Members of the Association and Representing 91 Lodges throughout the State.

ENDORSED by the Membership of nearly 900 of the most Influential and prominent members of the A. O. U. W. in Cal.

The principal object of this Association is to afford an additional protection of $1,000 to the families of deceased members of the Ancient Order of United Workmen, at the lowest possible cost. To become a member the applicant must be a Master Workman Degree member of the A. O. U. W., in good and regular standing in his Lodge. The admission fee includes the first assessment of one dollar, as provided by the Constitution, and which assessment is placed to the credit of the Guarantee Fund and cannot be diverted for any other purpose than the payment of death losses. This fund is kept guarded, and disbursed on the same principle as the Beneficiary Fund of the Ancient Order of United Workmen. Five dollars (which includes admission fee and dues for one year) must accompany the application, and if forwarded by Express or Post Office order, all expenses for such transmission must be paid by the applicant.

No Director of this Association receives any remunerafion for services rendered. There is no sinking fund, consequently the members have the benefit of every dollar received. There are no Lodge dues to pay or Lodge meetings to attend; there is no re-medical examination to be made only in exceptional cases, when, in the judgment of the Executive Committee, it is necessary.

The Directors are men of well known business integrity, and are among the most prominent members of the Order, each being a Past Master Workmen. The average costs of this additional protection, including assessments, will be about $8.00 per year, or less than 20 cents a week.

The sum for which this $1,000 can be secured, and the assurance that every obligation will be promptly and faithfully discharged, is the inducement offered to every member of the A. O. U. W. in good standing to apply at once for admission.

OFFICERS.

PRESIDENT, - - WM. H. JORDAN. | SECRETARY, - - - E. M. READING.
VICE-PRESIDENT, - - - P. VEASEY. | TREASURER, - - - R. H. ORTON.

Chairman of the Executive Committee: W. W. HANSCOM.
Chairman of the Finance Committee: J. H. HARNEY.

For further information address or apply to

The Future Life.

Years ago, in the days of Bishop Butler, very much stress was laid upon the analogies in nature, illustrating and supporting the idea of a future life, and the treatises then written were models of intellectual power and patient research. A great impression was produced, not only upon uneducated, but educated minds. Since that period science has progressed with giant strides, and at every step has so largely added to the list of striking analogies or incidental proofs, that the illustrations of early date seem few in number and dwarfed in proportion and force. The idea of an unseen immaterial existence involves also the idea of unseen activities and correspondences in the rayless realm. The most stolid of such cannot fail to be impressed with the beautiful analogies which recent scientific discovery affords.

Do we not every day converse with unseen friends a long distance away? Do we not recognize their familiar voices in homes separated from us by rivers, woods and mountains? These voices come out of the darkness, guided by a frail wire which science provides as a pathway. Even the curtain of night is drawn about us, the voices are heard, and we have not the shadow of a doubt of their integrity and identity. And further, have we not analogies of sight which startle us by their significance? Is it not true that when abroad we are open to the view of unseen observers long distances from us, and our every act and movement known? The excellence of optical instruments is such that we have seen the motion of lips of persons in conversation while sitting on a house balcony three miles distant, the observed, of course, wholly unconscious of being seen by anyone.

If our friends in this life, dead to us (hidden as they are by the shroud of space), can be seen, and we can hear their voices, their shouts of laughter, the words of the hymns they sing, the cries of the little ones in the mother's arms, is it very absurd to anticipate a time when those dead to us by the dissolution of the body may, by some unknown telephony, send to us voices from a realm close at hand, but hidden from mortal vision? We have no proofs to offer that this realm of the departed of this home of the soul is c ose at hand, but it is certainly more reasonable to adopt this hypothesis than the popular one of a material world or place somewhere afar off in the depths of space. One view seems possible, the other absurd.—*Boston Journal of Chemistry.*

The Isthmus Canal Project in 1521.—Anyone who thinks the idea of a canal connecting the Atlantic and Pacific a new one is mistaken. As long ago as 1521, a Portuguese navigator, Antonia Galvao, proposed to Charles the Fifth to make an interoceanic communication by the Panama route, and in 1780 Nelson proposed a canal through Nicaragua. Von Humboldt took it up in 1804. The first work actually done was in 1841 by Henry de Puydt, who moved a colony to Honduras to dig a canal. This colony went the way of so many that had preceded it. A few years later Garilla and Courtinez were sent out by Guizot to study the matter, and pronounced the undertaking an impossibility. About the same year Louis Napoleon was solicited by the Nicaraguan government to lend his name to the undertaking, and did actually make an appeal to the public in a pamphlet entitled "Le Canal de Nicaragua." Thus it is that that the isthmus has received a pretty fair pavement of good intentions.

Changes in the Relative Elevation of Land and Sea.—The impression that the northeastern coast of the American continent is slowly rising, and Prof. Shaler's estimate of the rate of emergence in progress as being over a foot, and perhaps as much as three ft. in a century, has been recently denied by Mr. Henry Mitchel, who states, in the Coast Survey Report for 1877, that the salt marshes are still, as they were in the time of the early explorers, at ordinary high-water level, and that the rocks upon our coast, long notorious as dangerous to navigation, have not risen since they were first discovered. In his statements ancient maps and documents are cited, and the conditions of the various rocks are considered in detail. He claims that no tilth in either direction has taken place in the Gulf of Maine. But eastward of longitude 64° 13', and especially in Newfoundland, great changes present themselves in the comparison of charts, the depths appearing to be at some points less and at other points greater now than formerly.

Growth of Trees.—As the result of observations, and from the testimony of reliable men, the following is about the average growth in 12 years of the leading desirable varieties of hard wood when planted in belts or groves and cultivated: White maple, 1 foot in diameter and 30 ft. high; ash, leaf maple or box elder, 1 foot in diameter and 20 ft. high; white willow, 1½ ft. in diameter and 40 ft. high; yellow willow, 1½ ft, in diameter and 35 ft. high; Lombardy poplar, 10 inches in diameter and 40 ft. high; blue and white ash, 10 inches in diameter and 25 ft. high; black walnut and butternut, 10 inches in diameter and 20 ft. high.

The luck of the wife-beaters seems to have turned. A Jersey man tried to kick his wife, fell, and doubly fractured his own leg.

The Mechanics' Institute Exhibition.

The Board of Managers of the sixteenth industrial exhibition of the Mechanics' Institute, which will open on Tuesday, August 2d, have issued the following rules and regulations, which we publish for the benefit of people at a distance who intend to exhibit:

The pavilion will be open for the reception of goods on Monday, July 22d. The exhibition will be open to the public on Tuesday, August 2d, at 7 o'clock P. M.

Applications for space should be made as soon as possible, and not later than July 25th, stating character of exhibit, amount and kind of space required—wall, table or floor. Blanks will be furnished for this purpose. All articles must be in place not later than August 6th.

Space allotted and not taken possession of by August 6th, may be assigned to others. The hight of exhibits, on the main floor, must not exceed six feet for opaque objects, nor ten feet for glass or signs. On the partitions, outside walls, and other parts of the building, where light nor view will be obstructed, all the hight desired can be taken.

If glass cases are to be used, state their size, hight and particulars of the exhibit. This is important on account of light.

In Machinery Hall no rule can be given.

The shaft is two and fifteen-sixteenth inches in diameter, has sufficient 30-inch pulleys for all requirements, and makes about 110 revolutions per minute.

The Art Galleries are lighted by sky-lights, with an unobstructed wall space from ceiling to floor.

All persons presenting articles for exhibition must have them registered by the Receiving Clerk, who will give a receipt for the same, which receipt must be presented when the articles are withdrawn at the close of the exhibition.

Articles intended for sale may be labeled accordingly, but cannot be removed until the close of the exhibition, except by written permission of the managers.

No charge of any kind will be made to exhibitors for space. Steam and water will also be furnished free in reasonable quantities.

Every facility possible will be given to exhibit working machinery to the best advantage.

The name of every article must be attached by the exhibitor to it.

Perishable articles will be received or may be removed at any time during the exhibition, with the consent of the managers.

The most effectual means will be taken, through the agency of the police and otherwise, to guard and protect the property on exhibition; and it will be the purpose of the managers that all articles shall be returned to the owners without loss or injury. Still, all articles deposited will be at the risk of the owners.

Space will be awarded as early as practicable (after the application has been received), consistent with the proper arrangement of the goods.

All articles arriving too early will be stored free of cost to the exhibitor, and the manager will have them duly placed in proper position for exhibition. No freight charges will be paid by the managers.

The Board reserves the right to exclude from the exhibition all things they deem objectionable, as nostrums, articles of an explosive, inflammable, dangerous or offensive character.

EGYPTIAN ANTIQUITIES—IMPORTANT DISCOVERY.—The *Egyptian Gazette* says: "At the last meeting of the Egyptian Institute, on the 4th inst., a letter was read from Brugsch Pasha describing the recent discovery at Sakkara of some inscriptions in two ruined pyramids. It is well known that the means for identifying the royal personages for whom pyramids were built are extremely scanty, but the hieroglyphics in question preserve the names of Papy, of the sixth dynasty, and of his son Merenra. They include also the private name of Merenra, which it seems was Horemsaf, but there is a slight doubt as to the correctness of this reading. The ruins have little of the pyramidal shape left, having been opened and destroyed at a remote period. Although they figure on the maps, both of Perring and Lepsius, neither of those explorers seem to have thought them worth examining. Funeral inscriptions of the time of the pyramid builders have not previously been found, and these, which are so far unique, are of the highest interest in the history of the religion. A mummy, believed to be that of the younger king, was taken out, and, we hear, was safely brought to Boolak, the only mummy of a king of the pyramid period yet discovered, with the single exception of that of Mycerinus, which is in the British Museum. We hope shortly to be able to offer some further details of this remarkable archæological event."

OUR MOON AND ONE OF JUPITER'S SATELLITES. One of the most interesting chapters in Laplace's "Mecanique Celeste" is the one which describes tendencies to synchronism, among Jupiter's satellites, similar to those which are well known to watchmakers, in timekeepers which are suspended near each other. Some recent investigations in photodynamics have led to the discovery of the following additional harmonies, which serve to connect Callisto, Jupiter's outer satellite, with the earth as well as with Jupiter. They are due to the fact that Callisto represents the center of gravity of earth and Jupiter when they are in conjunction.

PATRICK came to the Morgue to claim a lost relative. "Has he any peculiarity by which he can be recognized?" asked the guardian. "Yes; he is dumb."

Chico, 58.

The picnic held at Chico under the auspices of 58, at Bidwell's grove, on April 30th, was, as usual, a notable affair. The Marysville *Appeal* gives the following account of the proceedings: At 20 minutes past 8 o'clock Saturday, April 30th, three well filled passenger coaches left Marysville for Chico, with about 150 members of the United Order of Workmen, their families and friends, to join with Chico Lodge, No. 58, in their annual picnic. At Wheatland there were not enough tickets sold to order a car, so that no representatation from that place was present. The morning was cool and pleasant and everything bore promise of a pleasant day. At Lomo station the train was side-tracked to let the south-bound Oregon Express pass, and the train hands amused themselves by driving out six or seven urchins, who had taken passage on the trucks of the cars. At Live Oak, a car was nearly filled, and the train next stopped at Biggs, having rushed through Gridley at the rate of 40 miles an hour, and leaving a long line of dust behind. At Biggs were added two crowded cars, and at Nelson station there were twenty passengers, which completed the complement of the six coaches engaged. Chico was reached ten minutes after ten o'clock with about 300 passengers on the train, and after a few minutes stop at the depot, continued to Gen. Bidwell's beautiful picnic grounds, about one-half mile above. At the entrance to the ground the Chico Cornet band was stationed, and played a lively welcoming air as the train stopped. Upon passing into the grounds a banner suspended over the gateway, attracted the attention of all. It bore the following letters and sentence: "A. O. U. W., Welcome to All." The grove was found to be in the best possible condition, and it certainly is one of the finest to be found in northern California. Until 12 o'clock carriages and vehicles continued to pour in from Chico and the surrounding country, and it was carefully estimated by competent judges that between 12 and 2 o'clock there were at least 3,000 people on the grounds. The literary exercises of the day began at 10:30, and lasted more than one hour. The exercises opened with the "Heliotrope Schottische," by the Chico band. President of the day, J. F. Watkins, delivered the opening address, heartily welcoming all visitors, and closed by introducing the Chaplain, Rev. J. W. Atkinson, who offered a short appropriate prayer. A serenade "I'll Never be Unkind," was given by the band. Grand Master W. H. Barnes, when introduced as the orator of the day, was heartily applauded, and was eagerly listened to for half an hour. He alluded to the principles of the Order, and paid a high tribute to Masonry and Odd Fellowship. He briefly related the history of the United Order of Workmen from the time of its commencement in Pennsylvania to the present; appealed to wives, daughters and sisters to have their husbands and brothers join the Workmen, comparing the A. O. U. W. with insurance companies, showing the benefits and saving of money by joining the United Workmen. The orator closed with a poem relating to the merits of the Order, and picturing it to yet be one of the grandest Orders known. "Spit Fire Galop" was played by the band. Dr. Davis, a member of Chico Lodge, No. 58, in a good speech on behalf of the Lodge, presented to General Bidwell a beautiful barometer, appropriately engraved, for his liberality in granting the Lodge the free use of his grove for the past three years for annual picnics. The General was taken completely by surprise, but made a very fitting reply, thanking the Lodge for their kind remembrance of him, and assured them that in the future the grove should always be at the service of the A. O. U. W. The band then played the "Novelty Quick-step." President Watkins read a telegram from P. G. M., Clay W. Taylor, from Shasta, stating that it was impossible for him to be present and wishing all a pleasant time. The President then announced the close of the literary exercises, and declared that the grounds were open to all. The next hour and a half was spent in eating. Every person upon the ground was provided for, and there was an abundance of food left. Dancing commenced at 2 P. M., and was kept up until the train started on its return trip. The large dancing platform was continually crowded. The music was furnished by the Cressy band and was excellent, the merry dancers being loth to cease when the hour to take the cars for home arrived. At 2:30 P. M. the prizes offered for the different games were competed for under the management of an efficient committee. There were seven races, and for each one there were a large number of contestants. The races created much merriment and the many handsome prizes were proudly borne away by the winners. Swings were erected in different parts of the grove and were occupied by the ladies and children nearly the entire day. Two picked nines engaged in a game of baseball, which was witnessed by a large number of spectators. At 5:20 P. M. the cars left the grounds and after passing the passenger train at Nelson's station, nothing further of note happened until 7:20, when all arrived safely at home. One or two of the "boys" were left in Chico. Altogether the excursion and picnic was a complete success, and the committee are deserving of praise for their energy and enterprise. Every one who attended declared the picnic a grand success, and the Workmen in the future may always count on a ready assent of the people to attend their May-day excursions.

Reading, 72.

EDITORS WATCHMAN: — Reading was made merry on May 2nd by a picnic and festival given under the auspices of Reading Lodge, No. 72, A. O. U. W. We had a big eat, good music, numerous games, etc., to delight, amuse and edify our guests, which were numerous. The towns of Anderson, Millville and Shasta were fully represented. I noted our P. G. M. W., Clay W. Taylor, present among the many. From the expressed countenances of the multitude we deemed the social feature of our picnic and festival a marked success, and when our committee handed in their final report, accompanied by a number of twenties in excess of prizes awarded and all other expenditures, we all felt our picnic and festival had been a success beyond our most sanguine expectations—socially, financially and otherwise. We have a fine Lodge, whose marked impression is drawing more of the choice material to its fold. Yours fraternally, D. A. SLOAN, Recorder, 72, Reading, May 9, 1881.

A correspondent of the Shasta *Courier* writes that he left that town on Monday morning, May 2d, with the intention of attending the A. O. U. W. picnic given by No. 72, and upon arriving at Reading found the Hook and Ladder Co. ready to march, which they did at 10:30 A. M., taking their truck with them, to the residence of Hon. C. C. Bush, where it was handsomely and tastefully decorated with the most beautiful flowers that could be obtained. President of the day, R. G. Dunn, assisted by the sober and sedate Capt. C. E. Berry, again directed the procession to march and it proceeded to the residence of R. G. Dunn, where Miss Jessie Dunn, a six-year-old beauty, richly and tastefully dressed, was placed in her seat as the acknowledged Fire Queen of the day. The arrangements of the H. & L. Co. now being completed, they proceeded to the school-house, where the larger procession was formed, and marched through the principal streets of the town to the picnic ground. The Reading brass band headed the procession, and furnished good music here and in fact all through the day, and added much to the interest of the occasion by enlivening the hearts of the people with their soul-inspiring music. Following the band came the H. & L. Co. under Capt. C. C. Bush's command, girls from 5 to 13 years of age in fancy costumes followed, and then boys from 5 to 13 years of age in fancy costumes. Girls from 15 to 100 years old in costume, followed by the members of the A. O. U. W. in regalia, after which came large numbers of visitors from the neighboring towns. Reaching the picnic ground, the committee of seven, consisting of F. Michaelson, E. Sweeney, Aaron Bell, J. M. B. Jones, R. Pipley, T. Mullen and ——— proceeded to select a May Queen, all unanimously choosing Miss Maria Swain, a young lady of 12 or 13 years, whose election gave satisfaction to all, and who filled the position worthily and well. Following this, the same committee proceeded to select four maids of honor, choosing Edith Farrell, Nettie Derby, Blanche Berry and May Camp. Then E. G. Anderson, in a brief, but nicely arranged speech, proceeded to crown Miss Swain as May Queen. Fennie Chappell, in behalf of the queen, responded in a very happy, graceful and pleasing manner. The Glee Club consisting of Mrs. C. C. Bush, Mrs. Gilbert, Mrs. A. Parker, Miss W. Gilbert, Dr. Miller, and J. M. Gleaves and J. N. Cooper in a fine manner, sang an appropriate piece. After this the judges proceeded to award the prizes to the girls between 3 and 14 years of age for the best sustained characters, when Miss Annie Richards carried off the prize for enacting the part of the milkmaid to perfection. In the matter of girls from 14 to 100 years, Miss Libbie Eaton acted as Gipsy Queen, and won the prize. About 30 small boys from 5 to 14 years of age competed for the prize offered for those who best enacted their parts; Syl Berry got away with the laurels by enacting the part of a Highlander so perfectly, that it was hard for some to believe that he was not a veritable Scotchman. The heavy work of the day is next in order, and that it might be as light as possible, everybody was invited to partake of a lunch, wherein was everything to tempt and tickle the palate of man, furnished to such an extent that everybody and their friends retired from the scene feeling refreshed in the inner man. Capt. C. P. Berry now called the Calithumpians to prepare for their part of the exercises, and soon they made their appearance under the direction of Capt. George Redner. After roll call by the King they proceeded to dance around a living May Pole (Willie Groves on stilts) when the oration was given by the Hon. Bottomly Snorter, Senator from Jackass Flat, which oration enlightened and delighted the people very much. Fred Michaelson, Aaron Bell and Ed. Sweeney having been chosen to inspect the guard and award the prize for the best sustained character, John Craddock, in behalf of the committee, presented it to Master Eddie Swasey, who enacted the part of Printer's Devil to such perfection that he was styled "a little devil" by many present. Considerable merriment was created by the rope-pulling contest, when Miss Libbie Eaton and Miss Meda Johnson, assisted by 11 boys from 6 to 14 years of age, succeeded in pulling Miss Winnie Gilbert and Miss Katie Kelly, assisted by a like number of boys on the first trial, while on the second trial the victory was given the other party. A base-ball contest then ensued between the Reading Riversides and the Anderson Knicks. About 5 P. M. the H. & L. Co. returned to town with their truck, and Judge Bush made one of his happy, pleasant speeches that Dr. Conklin responded to in his usual bland and entertaining way. The festivities were brought to a close by a dance in the evening at Fireman's hall. From the above report it will be seen that a royal good time was had.

Rocklin, 196.

Wm. H. Barnes, G. M. W., assisted by E. J. Gregory, G. O., and George D. Kellogg, D. D. G. M., instituted Rocklin Lodge, No. 196, at Rocklin, on Monday evening, May 2d, with 48 charter members, and installed the following charter officers: W. F. Schultze, P. M. W.; John Sweeney, M. W.; A. H. Curtis, F.; G. W. Rowland, O.; A. R. Frame, Recorder; J. Levison, Fin.; M. Lavanson, Receiver; J. Davis, G.; G. Ramsey, L. W.; J. Glindkamp, O. W. Large delegations were present from Lincoln, Placer, Covenant and Mountain Lodges, and the new Lodge started into life under most favorable auspices. After the ceremonies were concluded, the hall was visited by the lady members of the families of the brethren. A banquet was served in a neighboring hall, and an hour or two spent in music and converse. The new Lodge has an excellent membership.

Petaluma, 29.

A few weeks ago this Lodge celebrated its anniversary, and from the report in the *Argus* we take the following: Petaluma theater was filled with the friends of the Petaluma Lodge of the A. O. U. W. to celebrate their third anniversary. The Committee of Arrangements had made all necessary preparations, and a most enjoyable time was had by all. After an overture by the Apollo Orchestra, W. B. Haskell stepped to the front of the stage and made a well-timed and appropriate speech as an introduction to the programme of the evening. After the close of his remarks Prof. C. Hinrichs gave a piano solo, which was received with rapturous applause. Mrs. Elliott Jewell favored the audience with a vocal solo, which was of a very fine order, an encore being called for. Next on the programme was an instrumental duet by Prof. Urmy and Mrs. Hanes, which was finely rendered. The vocal solo of J. J. Buckius was such as to call forth an encore. After the musical part of the programme the speaker of the evening, W. H. Barnes, was introduced, and proceeded in his usual happy manner to address the assembage. Mr. Barnes ability as a speaker is too well known on this coast to need comment, and as for a description of his speech, we have not room to give it. Suffice it to say, the speaker gave a history of the A. O. U. W., from its infancy to the present time, giving many good reasons why it should be upheld in our midst. He spoke in high terms of the growth of the Order in California during the past few years, and from statistics given, we should judge that the Ancient Order of United Workmen will ere long hold a position that will rank second only to Masonry and Odd Fellowship. After the conclusion of his remarks, Mr. Barnes favored the audience with a few songs, which were vociferously applauded, and nothing short of an encore would satisfy the assemblage. After the exercises the hall was cleared and dancing indulged in by all so inclined. A supper was served at the American hotel, which most all present attended. Taken as a whole, the members of Petaluma Lodge are to be congratulated on the success of this, their first, celebration.

Yosemite, 171.

The business manager of the WATCHMAN, Bro. A. T. Dewey, reports the Lodge as very pleasantly located, the members being composed of the live men of the vicinity. Fresno is situated in the midst of what will, in time, be one of the best parts of the State, and with its growth and prosperity the Lodge will be a partaker. This Lodge had a grand celebration on Thursday evening, April 28th. The brethren turned out in full force and there were delegations from Wahtoga, Hanford and other Lodges. The Fresno *Republican* says that at Metropolitan hall, a full house listened to music by the band, a choir, and G. M. W. Barnes, of San Francisco. A recitation by Miss Amanda Donahoe, was given in excellent style, and the address by the Grand Master, Bro. Barnes, was such an address as only he can deliver. Pathetic, humorous, grave, witty, eloquent and jovial, he so blended the different streams of thought as to hold the attention of every person from the rostrum to the sidewalk. At the close of the oration the members of the Order, with their ladies, found their way to a rich and bountiful collation spread in Fanning's new building. One hundred and fifty people here made merry over as fine a spread as any person could desire. The food had all been cooked by the ladies of the Order, and served by the brethren. Toasts were responded to by Bros. Barnes, Kelley, Dixon and Tupper, the former responding to "Our mothers, wives, sisters, daughters and sweet-hearts." When the last course had been served, Bro. Barnes sat down to the organ and sang for half an hour, as only Barnes knows how. At 11:30 the happy throng dispersed with wishes for many returns of Yosemite Lodge.

Ivy Visits Keystone.

On Tuesday, May 2d, the ladies of Ivy, No. 4, D. of H., surprised the brethren of Keystone, 64, by a visit. They were received in a speech of welcome by J. C. Plunket, M. W. of 64. There were present Wm. Winnie, M. W. of Pacific, 7; J. J. Jones, of Oak Leaf, 35.; Mrs. N. G. Babcock, W. S. of H. of Silver Star, 2, and Mrs. F. A. Morrill, Sister Sec'y of the same Lodge; also Mrs. D. Markel, W. S. of H. of Ivy, 4, and others. Addresses were made and a very pleasant time had. After the flow of intellectual thoughts, refreshments were announced, and the entire party adjourned to enjoy the things prepared for them. It was the expression that the visit will result in good to Keystone. There is unusual interest being manifested in the Degree of Honor. We think this is right, and feel that the Order will be materially strengthened by the full development of the principle which lies in this degree. It was certainly a pleasant sight on this occasion to see the brothers and sisters mingle together, and listen to the really choice remarks made by them. Perhaps at the coming session of the Supreme Lodge this degree will receive the attention it merits.

San Francisco Lodge Locals.

Aurora, 8.

On Tuesday evening, May 10th, Aurora Lodge, No. 8, D. of H., was instituted by Wm. H. Barnes, G. M. W., at Charity Hall, Shiels' building, with the following list of officers: Mrs. Geo. W. Dixon, P. W. S. of H.; Mrs. Chas. D. Dunn, W. S. of H.; Mrs. Edw. Holland, S. of H.; Mrs. F. W. Rossbach, S. of C.; Mrs. C. S. Laumeister, S. Sec'y; Mrs. A. H. Cummins, S. Treas.; Mrs. E. L. Doud, S. Usher; Mr. E. P. Fish, I. W.; Mr. S. F. Freeman, O. W. The name selected by this Lodge is to be typical of its future usefulness. It is the desire of its members to gather in social and fraternal embrace those who are qualified to join. It is the wish of the brothers and sisters that the name they have selected—Aurora—shall be emblematical of their meetings, and as the dawn of the coming day is heralded by the light which Aurora sheds, so will this Lodge illumine the way of the A. O. U. W. by bringing together in social converse those who enlist under its banners. The Lodge starts out with fair prospects of success. Our Grand Master, in splendid voice and manner, gave the secret work, and after the Lodge was instituted some timely hints on the relation which the A. O. U. W. bears to woman were given with good effect. Bro. Cummins, as usual, entertained the Lodge with excellent sayings. Refreshments were distributed to the assembled sisters and brothers, acquaintances were made, and everything passed off in harmony and good feeling. A committee was appointed to prepare a programme for the next meeting. The Lodge will meet on the first Tuesday of the month. As soon as the newly elected lady officers get accustomed to their chairs, good work will no doubt result. Mrs. Chas. D. Dunn, W. S. of H., as presiding officer, handles the mallet vigorously, and gave evidence of future usefulness in her new position.

Bay View, 159, South S. F.

Bay View Lodge, No. 159, assisted by the "Originals of '81" (a new literary club) gave a very fine musical and literary entertainment on Friday evening, April 29th, in Myrtle Hall, South S. F. On this evening the Lodge was opened early and the business dispatched quickly. The doors were thrown open to the public at 8 o'clock, and the hall was soon filled (nothing but standing room left) with a fashionable audience of ladies and gentlemen, and young people. The programme was commenced by an overture on the piano, by Mr. Geo. S. Burnett, followed by B. F. Ellis, P. M. W., in a short and appropriate address; solo and encore, "Genevieve," Mr. Geo. S. Burnett; duo pianoforte, "Fra Diavolo," the Misses Pipers, a very creditable performance and received a hearty applause; solo and encore, Prof. Rhodes; song, Mr. A. D. Cooley, Miss Kelley, accompanist; recitation, "The Perplexed House Keeper," Miss Kittie Varney, a little girl of 10 years in costume, whose quaint and entertaining manner gave her an enthusiastic re-call; song, "By the Sad Sea Waves," Miss Nora Stevens, a very fine effort that was appreciated by her hearers; duo pianoforte, "Dames de Seville," Miss Alma Kelley and Miss C. C. Ellis, an artistic performance that was heartily encored; quartette, "Give Me My Own Native Isle," Messrs. Geo. W. Lawless, Chas. Morel, Chas. Parrish and A. Illidge, at the conclusion they were heartily encored and answered quite satisfactorily; recitation, Miss Minora Ellis, who was listened to with rapt attention, as she, with her subject, played on the feelings of her audience; song, "The Warrior Bold," Wm. Pollard; instrumental duett, Mr. C. W. Welby, P. M. W., dulcimer, Miss Ella Riel, piano, a very pleasing and entertaining performance that was heartily encored; song, "Some Day You'll Come to Me Again," Prof. Rhodes, the Professor was very entertaining, and answered a very enthusiastic encore; concluded by an instrumental duett, by Prof. Rhodes, piano, and C. W. Welby, P. M. W., dulcimer. This entertainment proved so successful and enjoyable that the brethren resolved to continue them quite often in the future.

Hercules, 53.

We note a large attendance at their meeting on the 13th inst. The M. W. degree was conferred on three, after which a large amount of business was attended to in detail, among which was to provide for the Call of the Relief Fund; passing resolutions of respect to the late Brother, Thomas W. Cunningham, and that they be published in the WATCHMAN. Notice was given that the next meeting would be their social or entertainment, and no work done on that night.

ECLIPSE CHAMPAGNE EXTRA DRY

CHAMPAGNE.

Three reasons why our Champagnes should be used in preference to all others:
I. They are from FORTY to SIXTY per cent. cheaper than imported Wines. II. They are NOT fortified with Spirits as all Foreign Champagnes when put up for export, but are absolutely pure and par excellence the sparkling juice of the grape. III. They are not IMITATION Champagnes charged with gas, but are made by the natural process, fermentation in the bottle, and precisely the same as those made in the Champagne District of France.

Pictures by Telegraph.

It certainly is a fact that, by a recent invention, pictures of all kinds can now be sent by telegraph. Colors can not be transmitted, but all pictures which result from combinations of light and shade, such as photographs, steel engravings, wood-cut prints, India ink sketches, pen sketches and crayon pictures are reproduced in five minutes, at a distance of 100 miles, with astonishing accuracy. Checks have been so faithfully copied by this process that the copy has been honored at the bank without a question. New York newspapers have been reproduced in Philadelphia entire—the image being sent by telegraph, and every faintest dot and blemish brought out on paper. We should be glad to tell the readers of the *Queen* exactly how this is done, but it is by a chemical process so complicated as to defy explanation in ordinary terms. *Nature* (the recognized authority in science in England), comes as near as possible, perhaps, when it says:

"In the transmitter the image was focused on a revolving cylinder, to which a selenium cell is attached. At the other end of the wire a platinum point presses against the surface of sensitive paper prepared by passing it through a strong solution of equal parts of iodide of potassium and water. The arrangement is such that the selenium cell, by intercepting the current, causes a white spot to appear on the receiver corresponding in shape and size to the picture focused on the transmitting cylinder. The experiments are as yet crude, but full of promise." This is not quite intelligent to the average reader, because the facts of the case call for scientific terms, and cannot be expressed in popular phraseology. But the important fact is that the pictures are sent; that photographs are admirably reproduced at a distance; and that, if the promise of the invention is fulfilled, a New York paper will soon be reprinted in Chicago on the very day, and perhaps the very hour, of issue. So much that is incredible has been made a fact during the last half century that he must be a bold man who ventures to place a boundary to the possible achievements of scientific ingenuity in this wonderful age.—*N. Y. American Queen.*

INCREASE OF RISK FROM LIGHTNING.—The progress of civilization brings with it ever growing dangers. Herr Von Bezold inferred already in 1869, from observations taken in Bavaria, that there was an increase from year to year in the number of buildings struck by lightning. There seemed to be also an increase in the number of thunderstorms, and this was assigned as the cause. A little later, observations (by others) in Saxony and Schleswig-Holstein also showed an increase in the number of houses struck, but no comparison was made with the number of thunderstorms. Herr Holtz has lately made a fuller inquiry on the basis of data from all parts of Germany, and from Austria and Switzerland. In his brochure on the subject he publishes two tables, one to show the increase or decrease of thunderstorms since 1854, since 1862, and since 1870 in the different regions; the other the increase or decrease of lightning risk estimated from comparison of the number of lightning strokes on houses with the entire number of houses. It appears, then, that, while any increase in the number of thunderstorms is extremely small, and there is in some cases even a decrease, the lightning risk shows a very large increase, and in no case a decrease. Thus the increase of risks from lightning must be regarded as not due, unless in very slight measure, to meteorological influences. This appears more distinctly in that the increase of lightning risk is proportionally greater as the compared years are further apart; but it is not so with the increase of thunderstorms (which, *e. g.*, is less since 1854 than 1862). To explain the increased risk by telluric changes, Herr Holtz supposes the clearance of forest land has to do with it, perhaps, also, the increase of railways, both of these bringing thunderstorms more to towns and villages. Another probable cause is the increased use of metal in house construction.

A DISTINGUISHED gentleman, whose nose and chin were both very long and who had lost his teeth, whereby the nose and chin were brought near together, was told: "I am afraid your nose and chin will fight ere long; they approach each other very menacingly." "I am afraid of it myself," said the gentleman, "for a great many words have passed between them already."

A GARDEN IN CHILE.—Mrs. Brassey, in one of her books, tells about a garden which she visited in Chile. It surrounded the house and was improved to the greatest extent. Every little knoll or point from which anything could be seen had a fantastic little summer-house upon it. Seats were everywhere, some built around the trunks of trees half-way up to their tops, and reached by a little stairway running around the trunk, while each seat had a little roof which was thatched and looked like a wigwam; others over the trees, the traveler says, though she does not say exactly how these are arranged; and still others under the trees. Every sort of an odd or pretty grotto, or fountain, with statues in nooks and corners, and ferneries everywhere, made this garden a wonder to the visitor. Plants from all parts of the world were grown there, and the work of a hundred men was required to keep it in order. This place belongs to a lady, who owns extensive coal mines, and spends a great part of her large income on the garden.

THE Utes declare that they will cause no trouble unless an attempt is made to remove them from their homes.

COOKING CLASSES.—A New York correspondent writes: It is fast getting to be the fashion for ladies to learn to cook, and before long the kitchen will have ceased to be the unknown country which satire has represented it to be the divinities of the drawing-room. Miss Juliet Carson's cooking classes are well attended by the belles of Fifth avenue and Murray hill. Philadelphia has a cooking club, combining in its membership ladies of the most select circles, who pride themselves on being able to dish up a savory dinner for 22 persons at a cost less than 20 cents a head. Austrian ladies actually make it a practice to go into the kitchens of princes or wealthy bankers, where there is a *chef* of renown, to learn from personal observations the mystery of his skill. The time may come when a man may get almost as good a dinner at home, at not much more than twice the cost, as he can now at his club. Then we shall probably hear of fewer divorces. The Greeks were wise in putting the seat of the affections in the stomach.

METAL sheathing was first applied to ships in 1553.

Insurance.

THE
NEW ENGLAND MUTUAL
Life Insurance Company,
OF BOSTON,
All Policies in this Company are Governed by the Massachusetts Non-Forfeiture Law.
The only Company on this Coast Governed by this Law.

EXPOSITION UNIVERSELLE INTERNATIONALE, de 1878.

CHAMPS-DE-MARS, PARIS, 8TH NOV., 1878.

Commissariat General, Etats Unis d'Amerique:—I have examined the official list of awards at the Universal Exposition, as published by the French Authorities, and find that only one Grand prize was awarded for Sewing Machines; that was given to the Wheeler & Wilson Company of New York.

The Grand Gold Medal and Diploma were delivered to me at the Palais de l'Industrie, October 21, and by me at once given to the representative of that Company at the Exposition.

(Signed,) R. C. McCORMICK, Com. General.

"Of all the Machines we tested, the Wheeler & Wilson New Machine was the most completely successful, failing in nothing that was given it." FRED. A. PAGET.

(One of the Centennial Judges of Sewing Machines. From his report to the English Government.

THE WHEELER & WILSON No. 8 SEWING MACHINE stands to-day as the embodiment and refinement of over a quarter of a century's persistent and persevering improvements, and as a specimen of American ingenuity and skill in the adaptation of means to ends is unrivalled.

Don't buy a Sewing Machine until you have seen the No. 8. Send for descriptive price list. AGENTS WANTED EVERYWHERE.

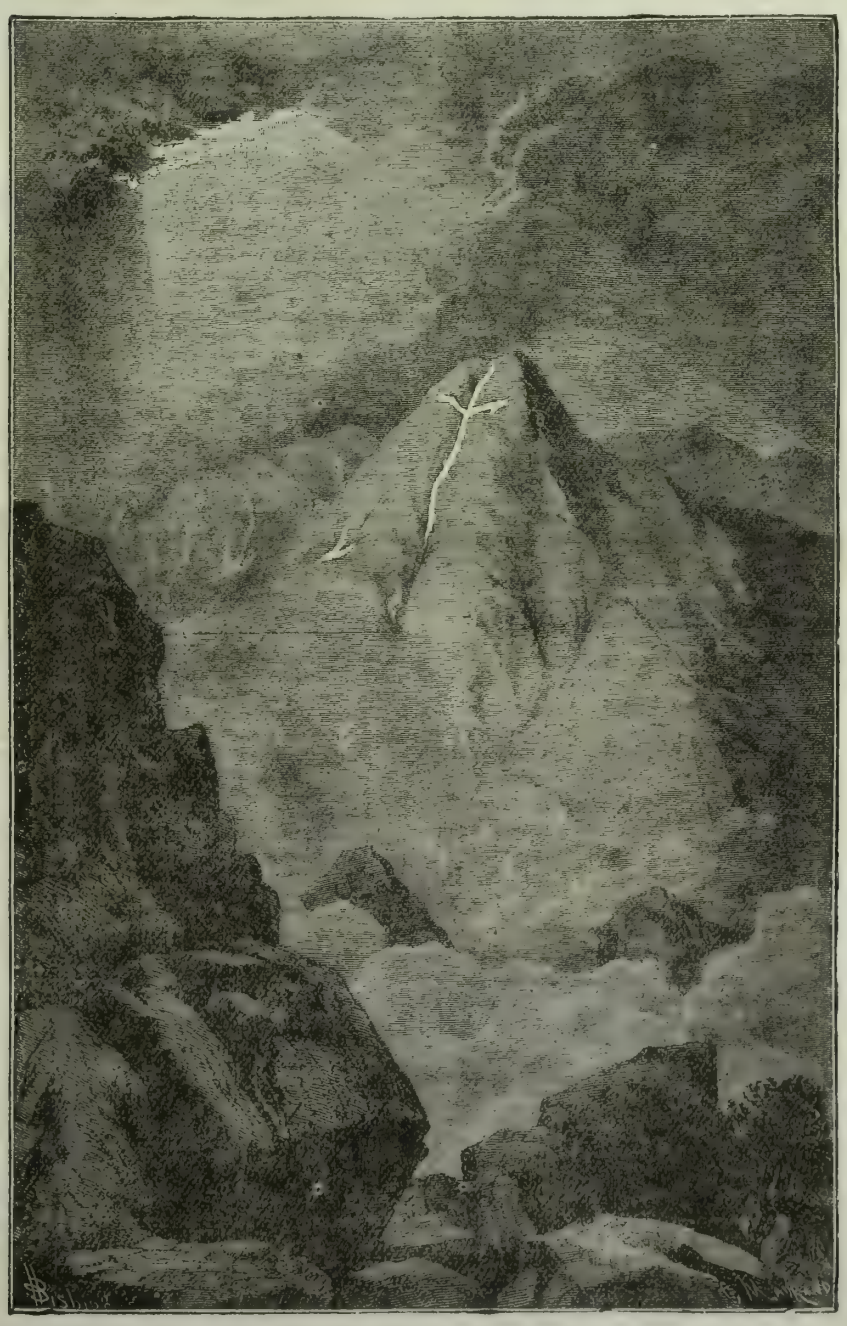
A Notable Mountain in Colorado.

In the Geographical and Geological Survey of Colorado, by Prof. Hayden, are descriptions and engravings of many noteworthy scenes. The most wonderful region described is that from Elk mountain to Middle park. The Professor writes: The trip down the Eagle river was made principally for the discovery of some way of access to the mountain of the Holy Cross. The party were obliged to descend the river about two miles, and then climb the steep mountain side over a network of fallen timber. The obstructions to travel were very great; they often labored for a day or two to find some path to approach the mountain peak, and were obliged to cut their way through the fallen timber, and finally succeeded in getting within about five miles of the base of the peak.

The main mass of the peak, like the whole of the Sawatch range, is composed of granite gneiss. The summit of the Holy Cross is covered with fragments of banded gneiss. The amphitheaters on all sides have been gradually excavated, and the more or less vertical sides show the intermediate steps very clearly.



The characteristic feature of the mountain of the Holy Cross, as shown in the engraving, is the vertical face, nearly 3,000 ft. on the side, with a cross of snow, which may be seen at a distance of 50 or 80 miles, from other mountain peaks. This is formed by a vertical fissure about 1,500 ft. high, with a sort of horizontal steps, produced by the breaking down of the side of the mountain, on which the snow is lodged and remains more or less all the year.

Late in the summer the cross is very much diminished in size by the melting of the snow which has accumulated in the fissures. A beautiful green lake lies at the base of the peak, almost up to the timber line, which forms a reservoir for the waters from the melting snows of the high peaks. From this, one of the main branches of the Roches Moutonnes creek flows down the mountain side, forming several charming cascades on its way. The worn out rocks or "sheep-backs," in the valley of the creek, display most remarkable examples of the curious workings on the surface of the gneiss produced by the separation of the different constituents of the rocks. Many of the rocks look as if they were covered with a confused mass of hieroglyphics. These peculiar workings in the structure of gneiss are not uncommon, but they are shown on such a scale in this locality as to attract attention.

As indicated in our last, the Relief Committee has appointed Tuesday, June 21st, and Fairfax as the place for the annual picnic. The preliminaries have been fully arranged, and we have no doubt it will be quite satisfactory. The tickets, including passage for the round trip and admission, have been placed at 50 cents, children 25 cents. The several committees are now busily engaged in making the programme for the day's sport, and, no doubt, this picnic will excel all others yet held and be the event of the season.

GOLD HILL LODGE, No. 2, Nevada, has 132 M. W., with a number of applications pending.

EVERY Workman has an interest of $2,000 in this organization. What would be said of the partners of a large mercantile concern who would entrust all their affairs to their clerks? and these having no further interest than perhaps the drawing of their salaries, must necessarily allow things to go as the waves of fortune may direct. They would be stated as lacking in business enterprise, and that it would serve them right if they should fail. Now, Workmen having this interest in our organization, should see to it that they do something for the conservation of its principles. This can be done legitimately by stating to their neighbors what the Order is organized for and its aims and objects. They will thus be doing humbly their share for the perpetuation of the Order's principles, and at the same time rendering more sure their pecuniary interest in the organization. Let those Workmen who do nothing but pay their assessments (and sometimes they not even do that, but get others to do it for them) be up and to work, for their true interests in the Order require it of them.

THE MOUNTAIN OF THE HOLY CROSS.

A BENEFICIARY certificate in the A. O. U. W. will always prove a solace to the holder. When the day's work is finished, and one retires to his home, there to enjoy the meeting with his wife and little ones, it will be pleasant to think that you have done your duty to them to the best of your ability. One glance around the fireside, one thought of the reverses which occur in the world, should cause every head of a family to come within the folds of this successful beneficiary organization. A little sacrifice of self-indulgence on the part of most men would insure to their families this desirable result. It will bring peace and happiness to you and you will carry through life the proud consciousness of having done your duty.

THE Supreme Recorder's summary for the month of March shows the total membership of the Order to be 96,640. The largest jurisdictions are: New York, 15,173; Pennsylvania, 12,400; California, 11,500.

Lodge Ethics.

There are always a few brothers in every Lodge who do the most of the talking. No matter what subject comes up, they are ready to give their opinion on it. If it was not for them many of our Lodge meetings would prove very uninteresting affairs. They carry the Lodge on their shoulders, and put vim and energy into the proceedings. Then there are some who would rather listen to the good things said than take any active part in the proceedings. There must be listeners as well as talkers, and it is said that a good listener is a very refreshing individual. Both these classses occupy a useful place in the Lodge-room, the one as a counterpoise to the other. If they should both break out in a sudden flow of words, the outcome would be startling and not altogether desirable.

But there is another class—new members—who are not altogether sure of their powers, or of their ability to state precisely what they think. It is here that the Master Workman can be of much service. He should, in a kindly way, ask the brother if he has any opinion to offer on the subject under discussion. Then let the brother state what he thinks as tersely as possible. He need not make a long rambling speech, but his remarks should be to the point. If a dozen words will convey his meaning, it will be sufficient, and he may rest assured that the thinkers in the Lodge will respect and honor him. In the course of time, if the subject is important, and he becomes more sure of himself and better acquainted with his surroundings, he can speak longer. He should always try to keep within the bounds of the subject under discussion. It is not right nor proper for any member to inflict upon his brothers a wordy harangue that has no pith or system about it. Besides it may prove ruinous to whatever aspirations he may have for advancement in the Order. They will reason that if a man can talk so vapidly, he surely will be an incompetent officer, or will be given to ways that would prove detrimental to the Lodge.

Often a brother is heard speaking in a Lodge—perhaps he may be a stranger—and he can compress so much solid wisdom in a five-minutes' speech that it is a pure delight to listen to him. There is no flying away from the matter he is discussing. On the contrary, he keeps within bounds, and when he has said all he intended he stops, and the Lodge secretly votes him a good speaker.

There is an absolute equality in the Lodge-room. One brother has as much right to be heard as another. But in the exercise of this right he should not try the patience of his fellow members. Brothers who are good thinkers, but seldom allow their thoughts to outflow, should try and overcome their want of confidence, and when the Master calls upon them for their opinion, let them give it to the best of their ability. Often they will say something of more importance than seems to themselves. Practice, combined with energy and a disposition to succeed, are the mainsprings that will make such members useful in their Lodge and to the Order. Show your light.

TWO assessments in the Supreme Lodge jurisdiction for May. The deaths were in the following States: Ohio, 2; Kentucky, 4; Mississippi, 1; Massachusetts, 1; Texas, 1; Maryland, 1. This makes a total of ten deaths to be paid for.

Home Miscellany.

Who Sets the Fashions?

Who sets the fashions, I'd like to know,
For the little people beneath the snow?
And are they working a weary while,
To dress themselves in the latest style?

There's Mrs. Primrose, who used to be
The very picture of modesty.
Plain were her dresses, but now she goes
With crimps and fringes and furbelows.

And even Miss Buttercup puts on airs
Because the color in vogue she wears;
And as for Dandelion, dear me!
A vainer creature you ne'er will see.

When Mrs. Poppy—that dreadful flirt—
Was younger, she wore but one plain skirt;
But now I notice, with great surprise,
She's several patterns of largest size.

The Fuchsia sisters—those lovely belles—
Improve their styles as the mode compels;
And though everybody is loud in their praise,
They ne'er depart from their modest ways.

And the Pansy family must have found
Queen Elizabeth's wardrobe underground,
For in velvets and satins of every shade
Throughout the seasop they're all arrayed.

Pinks and daisies and all the flowers
Change their fashions as we change ours;
And those who knew them in olden days
Are mystified by their modern ways.

Who sets the fashions, I'd like to know,
For the little people beneath the snow?
And are they busy a weary while
Dressing themselves in the latest style?

—*Josephine Pollard.*

Cheerful Economics.

Was Tom Dorchester ever known to do anything with calculation? When his letter came home announcing his hasty marriage, and stating that he should bring his bride to show them "by the last of this week," they laughed and cried together, just as they had always laughed and cried over rash, generous, noble Tom.

They had scarcely possessed themselves of the fact of the letter when Hope came across the garden path, humming a little tune, let herself in at the porch door and stood before them, her white hood on and her crochet work in one hand.

"Why, what's the meaning of all these wet smiles?" she asked in surprise, as their damp eyes looked up at her and waved a welcome.

They gave her Tom's letter. Nobody's voice was steady enough to read it aloud.

"Just like Tom!" she laughed as she folded it.

"But what can we do in this short time?" burst out Charity, unburdening her perplexities. "Our guest-room is perfectly disreputable. We were intending, you know, Hope, to paper and refit it when mother's illness—"

"Yes, I know," Hope rejoined gently, with a glance at the invalid in her easy chair.

"And what sort of impression will it make on a city girl and a stranger during her bridal trip?" continued Charity in a tragic tone.

"Oh! don't despair so soon," remonstrated Hope with a mysterious air.

"We know your arts at decoration, dear child, said Faith, "and with flowers and vines you could make the room a bower, no doubt; but it is too late in the season for them, and even the autumn leaves are gone."

Hope still looked knowing.

"At any rate, let us go up-stairs and survey it all over," she persisted, leading the way.

It was a long, low chamber across the whole front of the house, and had a pleasant outlook from sunny windows. In some places the wall paper was stained and defaced undeniably; the shades were faded; there was none but the indespensable furniture; it looked like a room shut up and forgotten.

"I see very small encouragement there," said Charity, with a shiver.

"And you know, Hope," added Faith, "that mother's long sickness has drained our purse so low we cannot possibly afford the outlay of new furnishings, even if there is time."

"For all that," declared Hope stoutly, merely give me the authority to do just what I like in this room and to command your help where I need it, and I promise you sha'n't be ashamed of the place when your dainty bride comes into it."

Hope cajoled them all; they promised. How busy they all were after that through the short, dark days, the last of the year! Already the room was clean as it could be. The carpet, Hope decided, would do, because there were some bright rugs in other parts of the house which would conceal it a good deal. She borrowed a little stove that had an open grate. "Because," she said, "nothing has in it such expressiveness of welcome as a blaze." She took down the shades, extemporized curtains of the Turkey red left over from the last tableaux in which she had figured, and arranged over them lambrequins of the gray Clematis down which she had gathered and hung in the attic since early fall. It only needed looping to form the right outline, tying together, and filling in dexterously.

The stained top of the dark old-fashioned bureau was covered with red Canton flannel, and the fringe which finished it put on with brass-headed nails, had been the result of a rummage through a friend's bag of odds and ends. The stiff chairs covered with black haircloth were whisked out of sight. Great-grandmother's straight-backed rocking chair and a couch outlawed this dozen years came down from the attic. The rocking chair had a new red cushion and curtain bows of red ribbon; the couch was decked out in a lavish display of gay, though cheap chintz, and stuffed and pillowed till it made you sleepy to look at it. A low sewing-chair, whose cane seat had broken away so that it was discarded as useless, next engaged Hope's energies. Deftly inserting a piece of cane from another broken seat, she threaded both seat and back in and out with red alpaca braid. The ends were fastened securely underneath, and the intersecting braids formed a sort of diamond-shape block. "Now for a dressing-table!" said Hope. The village carpenter made, at her order, a large, rounded pine shelf, fastened in place on the wall at the hight a dressing-table should be by a strong, rude bracket of the same wood. Hope covered the shelf with common blue cambric, a curtain of the same falling from the edge; then she covered this in turn with coarse white muslin, puffed and frilled according to her fancy.

In one corner she arranged a rustic bracket. The carpenter fitted the three-cornered shelf to its place, and upon that she glued sheets of green-gray lichen. She cut from stout brown paper the shape of the bracket lambrequin she wished, then, using the same glue, covered it also with lichens, and when thoroughly dry, tacked it in place along the edge of her bracket-shelf. A great vase of red alderberries stood on this gray bracket, like fire on an altar, and for the three-legged, old-fashioned light-stand she made a basket of wood moss. For this she first bent pliable wire into the shape desired, then wound her mosses on, tying them with thread, and selecting those which grow in thin masses, easily scaled off from the bosk they have chosen.

"But what about the stains on the wall?" asked Faith meekly, subdued with admiration of Hope's exploits. "You shall see," said Hope, as, filling her moss basket with Mitchella vines and winter ferns, she set it in place and brought in a bunch of laurel. With swift fingers she shaped from stiff brown paper the letters of a motto, "Room in Heart and Home," and Faith and Charity helped her cover these letters with small laurel leaves, sewed on with black thread. How cheerful this motto looked when tacked up, and how well it disguised the stained chimney piece! A bough of bitter-sweet, skillfully disposed, covered another defect, and pressed leaves, mixed with the Maiden hair ferns gathered last June, were quite sufficient for all the stains that remained, as they wandered, with a graceful lack of apparent design, about the discolored wall paper.

On the chimney-piece was a rather unhappy-looking shelf, but its failings were smothered with chintz as the faults of the couch had been, and brass candlesticks, with tall tapers ready to light were ranged there. Hope insisted on presenting one or two simple water-color pictures done by herself—a scarlet vine on an old wall and a stalk of chandelier lilies. * * *

When the shy, pretty little bride was ushered into this room, and looked from the dancing light of the fire to the deep green letters of welcome, from the softly-burning tapers to the quaint pieces of old china which Hope had found stored away and insisted on putting into use or on arranging for ornament, she cried: "O, Tom! I never saw anything so pretty as this, and I never was made so welcome in all my life!"

Scrap Books.

My friends, when you kindle a fire with your daily paper, do you ever think what an amount of thought and labor are destroyed forever? Our papers are an epitome of the running history and biography of the age. What a pity so much really valuable matter must be wasted!

Thinking in this way several years since, I fell into the habit of cutting slips and saving them. Before the papers were consigned to the waste pile, I would look them over and save any note or scrap which I thought might be of value, consigning them, for the time being, to an unused drawer.

Sometimes there comes a day, there does in everybody's life, when one feels not sick, but unfit for work, when to keep quiet is a necessity. Then is the time to sort and arrange one's cuttings. I have obtained in this way several biographies of noted men and women, one large volume of interesting facts in history, a book of scientific notes, a cook book, and a valuable reference book on agriculture. Just think how much has been said within a short time about Carlyle and George Eliot! How many facts and incidents have been floating around which will never be published in the lives of these characters! I would not give up my Abraham Lincoln scrap-book for all the books that have been published about him.

For instance, what a pleasant fact to preserve: That one of the highest monuments in London is Lincoln tower, erected by equal contributions from citizens of Great Britain and America at a cost of $35,000, as a "memorial of Abraham Lincoln and the abolition of slavery, and a token of international brotherhood." I have hundreds of such incidents and notes which my boy will delight to read. Try the plan, mothers, and if your children are old enough let them aid you in this history building. It will so pleasantly help them to fix the facts in their memories. But since there is also so much in the daily papers which is only fit to be burned and the sooner the better, the pastime might prove unprofitable, except under the guidance of an older mind.—*Anonyma.*

A Glance at the Country.

"God made the country, but man made the town," has been frequently quoted by lovers of rural pleasures, and is not considered inappropriate even by persons who prefer city life. Indeed, the most enthusiastic admirers of the country are those whose lives are inevitably bound to the offices and stores of a metropolis, who fancy if they were emancipated from the thraldom of money-getting, life would be one long summer day among the green fields "away from the haunts of busy men." For few city people think of the country except as being clothed in the garb of spring or summer, while the bleakness and dreariness of winter are unthought of, though inseparable from farm life. They have a poetical idea of the word as a synonym for purity, peace, plenty and pleasure. Country folks, knowing nothing about the wickedness of the city, are moral and religious. Flowers, fruit, fresh eggs, butter and cream always abound. Then, one may always go riding or driving, for are there not plenty of horses on a ranch? Everything seems delightful to the uninitiated, and the idea is amusing to those of us who know the unromantic side, is not surprising.

When San Franciscans leave the city in summer it is to visit some pleasure resort or friends in the country. In the latter case, friends or relatives being apprized of the intended visit, make many little plans for the entertainment of their city guests. They meet them at the station with the best team the ranch affords. The best country fare is provided, for it is the season of early fruits and vegetables and spring chickens. Picnics, fishing and berrying excursions, rides and drives are the order of the day, while every lake, pond or waterfall within 10 miles is visited. After a week or two of such dissipation the visitors depart, charmed with everything pertaining to the country, from the lovely scenery to the pigs and chickens, fondly hoping in the beautiful golden "some time" to dwell amid such delightful surroundings.—*Norma.*

Respect the Laborer.

"She isn't anybody; she works for a living."

Such were the words spoken by a handsome, accomplished and well-dressed lady. The subject of her remark was a young girl, neatly but cheaply attired, who passed by the postoffice where the lady and her companion were standing. I was waiting to get our mail and could not help but hear what she said, and it was said in such a scornful tone: "She isn't anybody; she works for a living."

Now, I say all honor to the girl who can make her own living. It shows she can depend on herself and every time she wants a cent she doesn't have to go to "father" for it. And I say *shame* upon the man or woman who slights a person simply because he or she may have to "work for a living." What could they do for a living if they were poor? Would they steal, or would they sit down and starve? Those are the only courses I can think of.

No, I say again, as I said before, all honor to the girl who can earn her own living. People who think otherwise are narrow-minded and ignorant. Let the one who thinks it is a disgrace to work, and shuns the society of those who do, put herself in their place, for some time she may be poor; for we all know that "riches have wings." Then what good would your pride be to you? And then, perhaps, you might be glad to "work for a living."

To the girl who works out I say, never be ashamed to own it, for you know, "Toiling hands alone are builders." And if some of our stylish ladies were not so afraid of soiling their white hands in dish-water, but would go into the kitchen and do their own work, instead of sitting in the parlor thrumming on the piano or lying on the sofa reading a trashy novel, we would hear of less failures in business.—*May Stranow, Rio Vista.*

A Hudson citizen said to the young man who visited his daughter that he couldn't afford to have so much wood burned in the parlor stove evenings; the young man must come less often or quit earlier, or furnish his own wood. Next day two cords of nice hard wood were purchased by the young man and piled in the citizen's yard, with a big sign over the pile reading, "for use nights only." That young man means business.

She was a Boston girl. She was visiting her Whitehall country cousins. While walking out, several butterflies passed her. "Oh, dear me, what charming little birds. They are perfectly exquisite." "They are not birds, my dear," replied her country cousin, "they are butterflies." "Oh, you don't say so. Then these are the deah little creatures that fly from flower to flower and gather the sweet yellow butter that we use? They are too lovely for anything."

It is funny, but a soft-palmed woman can pass a hot plate to her neighbor at the table with a smile as sweet as distilled honey, while a man, with a hand as horny as a crocodile's back, will drop it to the floor and howl around like a Sioux Indian at a scalp dance.

When you hear a mother calling to her son to "come here and shut the shutter," and hear him respond: "It is shut, mother, and I can't shut it any shutter," do you ever pause to analyze the delicate beauties of our language?

Home Discipline.

What a mistake good people make when they maintain, within the home circle, the rigid rule and decorum which becomes irksome, even during a committee meeting; when parents and children assemble at the table in solemn silence and finish the meal within the prescribed minutes, and the late arrival at the breakfast table is scowled at, reprimanded and remarked upon by mother and father, aunt and uncle, until the more punctual juniors come to regard him as the black sheep.

O, horrid home! where the little boys are never seen without their school books, or the little girl without a towel to hem; where Ma no more dares to buy a rattle for the baby, without mentioning the expenditure to Pa, than anybody dares to throw open the parlor window, or tuck up the curtain, or even at the table to have more of this dish or less of that.

The small boy who hates fat is not accommodated, as Jack Sprat's wife was, by anybody; the tall girl who naturally likes pudding has her triangular wedge and no more; while the eldest son, outgrowing his liking for that dish, is reproved for leaving a piece on his plate.

Order and good housekeeping are charming, but the good order of a person and the regular supply of rations necessary in a workhouse are not suitable for a home. Home is no home unless, as far as reason will allow, the tastes and wishes of the youngest child are consulted; unless there is freedom of word and action, speech and love, and good will without measure.

When I was a child, home was the place where the wicked ceased from troubling, and the weary were at rest. Everything was always forgiven there. There was no awful rod behind the door; no domestic dungeon under the roof. I do not think I grew up a worse woman because I was not whipped or put to bed without my supper for dressing the bed-post in grandmother's best lace caps, or making paper dolls against orders in the front parlor—because life was not made a burden to me by forcing fat into my unwilling mouth and sugar candy was forbidden as though it was poison.

I could shed tears over the wretched, homeless children of the house where discipline, as strict as that of the army, is maintained, though their fare is costly and the dress perfect, and their future prospects as to an inheritance final. They are more to be pitied than the children of any poor man, who cluster about their parents' knee without any fear of chiding; who are encouraged to tell their troubles and kindly led away from follies. Who will not, in later days, remember "Pa" as the old gentleman who flogged them, but think of his kindness, and "Ma" as the old lady who kept the keys of the pantry and boxed their ears when a favor was asked. But they will always think of them with that respect and reverence due by a child to its parents.—*Mrs. E. L. Wright, Monterey.*

Home Thoughts.

After Sereno had read to us the full account of the assassination of the Czar the other evening Grandma said, with such a satisfied air, as she sat rocking and knitting, "How thankful we ought to be that *we* live in a land where such dreadful things never happen." But our little son, whose first lessons in history are still fresh in his mind, spoke up: "Why, Grandmamma, don't you remember how they shot poor Abraham Lincoln?" Yes, there it is; the old "mote and beam" way of looking at things! I well remember in my own young days, with what indescribable horror the accounts of the French revolution and Spanish inquisition filled me. But they seemed after all to have occurred in far off lands, in days long past. Little did I imagine that horrors of cruelty, more aggravating in their nature, were to be practised upon thousands of my own countrymen.

That my own near friends and loved ones were to be tortured to slow death by ways more cruel than more *barbarous* nations had ever conceived. That more than 13,000 of my fellow countrymen, in one prison pen, were to go down to death by ways to make the stoutest heart sicken at the relation to this day. But we are always like the garrulous old neighbor who used to come to my mother's kitchen for fragments. After freely commenting on all the sins and short-comings of everybody in the neighborhood, she invariably wound up with, "Well, it takes all kinds of people to make a world! I am glad I ain't one of them." It is so purely human to imagine that just we ourselves are not "one of them."

Can we, looking back no farther than the year '77 to the riotings and destruction of the "labor war," the scenes of bloodshed in various places in railroad wars, the violence suffered by the Indians, the menacing sand-lot harangues, when citizens with reason feared for their own safety—can we recollect these things and not realize that according to our light and privileges we are among the greatest of national sinners?

What we need is less bashfulness and more real patriotism, less self-confidence and greater individual responsibility in carrying out our nation's laws. The Radicalism, Nihilism, Socialism, Communism, or whatever name the spirit may take abroad, may have a meaning and a mission in the development of governments, with which we have little to do. What we want, is to fortify for ourselves with such a love of country and its laws as shall prove security for us at all times and in all emergencies.—*Anonyma.*

For our Boys and Girls.

Our Puzzle Box.

My first is in whip, but not in lash;
My second is in bread, but not in bash;
My third is in creep, but not in walk;
My fourth is in chat, but not in talk;
My fifth is in work, but not in play;
My sixth is in cheat, but not in pay;
My seventh is in hide, but not in seek;
My eighth is in month, but not in week;
My ninth is in mug, but not in ewer;
My tenth is in shirk, but not in doer;
My whole is prematurely sagacious. O. G.

Transpositions.

1. Transpose a number and form actual substances after deducting waste.
2. Transpose a luminary and form to pilfer.
3. Transpose to travel rapidly, and form a vase
4. Transpose to fatigue, and form a ceremony.
5. Transpose a cavity and form the point.
6. Transpose an excrescence and form novel.

JENNIE.

Syllable Puzzle.

1. To puzzle and a passage
2. A nickname and to permit.
3. A vegetable, masculines, a consonant and a personal pronoun.
4. A bolt, a large body of water, degraded, not far away and an affirmation.
5. A personal pronoun and a large cord.
6. To squeeze, a pronoun and an indentation.

ALBION.

Word Square.

1. Frank.
2. To remove the skin.
3. A large lake
4. To require urgently. DICK N. S.

Hidden Towns and Cities.

1. It is a cold day.
2. Conway never retrogrades.
3. The bat has flown.
4. Put shellac on; I always do.
5. My house is for sale, Mr. Black. DICK N. S.

Answers to Last Puzzles.

NUMERICAL ENIGMA.—"As You Like It."
LETTER CHANGES.—1. Con, ton, don. 2. Let, lot. 3. Mad, man, mat, May, map.
PROBLEM.—Two dozen.
HIDDEN TOWNS AND CITIES.—1. Lee. 2. Bangor. 3. Dover. 4. Salem.
TRANSPOSITIONS.—1. Fear, fare. 2. May, yam. 3. Mien mine. 4. Pace, cape. 5. Ape, pea. 6. Peon, open.

Boys Wanted.

Boys of spirit, boys of will,
Boys of muscle, brain and power,
Fit to cope with anything,
These are wanted every hour.

Not the weak and whining drones
Who all troubles magnify;
Not the watchword of "I can't,"
But the nobler one, "I'll try!"

Do whate'er you have to do
With a true and earnest zeal;
Bend your sinews to the task,
"Put your shoulders to the wheel."

Though your duty may be hard,
Look not on it as an ill;
If it be an honest task,
Do it with an honest will.

In the workshop, on the farm,
At the desk, where'ere you be,
From your future efforts, boys,
Comes a nation's destiny.

The Queen Turkey.

When a little girl I became interested in a plain hen turkey with brownish feathers and subdued looks. She had stolen her nest, as we say, when a hen takes a notion to be private about her affairs. To my great delight, she came off with twelve young turkeys, every one of which she raised. She received considerable help from the inmates of the farm house in supporting her large family, all of which proved to be male turkeys.

Like a good judicious mother, she was equal to the occasion, and never allowed her sons undue liberties. Unlike some human mothers, who are always apologizing for lack of authority by saying "Boys will be boys," she kept an eye on her brood, and trained them properly. Again, like a human parent, she could not always remain at home, and when her family were fully grown, and trustworthy, as she believed, she hied away to her former nest to deposit to its safe keeping other eggs.

She slipped away so quietly, for some time she was not missed. At last the news seemed to be telegraphed from one to another that "the queen mother was gone," when there arose such an outcry, each young aspirant strutting and gobbling furiously, as though disputing for the ascendancy in authority. Presently I saw her crossing the garden, with dignity in her step and decision in her eye. Fearlessly, she walked in among them, cuffing and pecking them right and left, till each one smoothed out his rumpled feathers and assumed a meek and obedient demeanor. Cautiously, and seemingly unobserved, again she withdrew to her retreat, when the clamor of insubordination again arose.

This time she was truly indignant, and hastening to the spot, with unusual severity, and unsparing authority, she dealt them blows, accompanied with a kind of scolding noise, which soon quelled the insurrection. The angry red-faced gobblers much larger than herself, retired to contemplate and cool off; while she deliberately and in full view returned to her chosen nest to remain undisturbed, and always after retained her right as queen.

Humorous.

Chips.

A DISAGREEABLE old chap says that in the boarding houses those who have the loudest dinner bells have the weakest meals.

Some people's bad habits resemble the periodical headache of the Frenchman who declared that it came on regularly once a month, and lasted about six weeks.

SCENE in a college—Professor: "Who will see Mr. B. before next Monday?" Lady student (hesitating and blushing): "I shall see him Sunday night, probably."

WON'T some chemist invent a face powder that does not contain lead and tastes good? Our young men are all dying of lead poisoning, and kissing is going out of fashion.

A WOMAN in Maine, attempting to talk through the telephone for the first time, exclaimed: "How do you do?" and then dropped into a chair, protesting that she "couldn't say another word; she felt as if she had been talking to a ghost!"

WHY should a red cow give white milk? was the subject for discussion in a suburban agricultural club. After an hour's debate the secretary of the meeting was instructed to milk the cow, and bring in a decision according to the merits of the milk. It was blue.

A PEDAGOGUE told one of his scholars, a son of the Emerald Isle, to spell hostility. "H-o-r-s-e, horse," commenced Pat. "Not horse-tility," said the teacher; "but hoss-tility." "Sure," said Pat, "an' didn't ye tell me, only the other day, not to say hoss? Faith! it's wan thing wid ye one day, and anither the nixt."

"How many regular boarders have you, madam?" asked a census taker of a landlady. "Well, really I can't say as any of them is too regular. They stay out." "I mean, madam, how many steady boarders have you?" "Well, really, out of 19 there's not more'n two that I'd call steady."

THE other day Speaker Sharpe, of the New York Assembly, ordered "the gentleman in the gallery" to "take off his hat during prayer." The members laughed, and the Speaker discovered that he had been addressing his command to a young woman in a Derby hat.

Household Hints.

Omelet Souffle.

1. From five eggs reserve the whites of three. Beat the remaining whites and yolks together, and mix with them a gill of cream. Into a frying pan put a piece of butter the size of a walnut. When it is brown pour in the beaten eggs and let them cook as fast as they can without burning. When nearly done spread the reserved whites beaten to a stiff froth over, and put the frying pan into a hot oven for a moment until the whites are just stiffened. Pour upon a platter and serve.

2. Beat the yolks of three eggs with three tablespoonfuls of pulverized sugar; add a little lemon or vanilla; then beat the whites of six eggs to a stiff froth. Put the yolks in a deep bowl, turn the whites on them, and with a spoon, giving it a rotary motion, cut the two, mixing them carefully together. Turn this on a tin or earthen baking dish with sides two or three inches high and slightly buttered. Smooth over the top, sprinkle over sugar, and put into a moderate oven. If it must be turned or moved in the oven, do it as gently as possible. When risen well and of a fine yellow color it is done. Serve immediately or it will fall.

3. Beat the whites of three eggs, add a tablespoonful of marmalade cut fine, or little pieces of fresh peaches; mix with powdered sugar. Bake on a buttered dish in a quick oven.

STEWED LIVER.—Brown two pieces of bacon in a saucepan, add a finely cut onion, pepper, corns and mace; simmer for a quarter of an hour; add liver cut in slices, washed and dried; simmer again for 20 minutes or half an hour till done. Make bread dumplings with it. Take bread-crumbs, with a little flour mixed with an egg and a very little baking powder, first flavoring with nutmeg, a handful of finely chopped parsely, a little chopped lemon and some suet; amalgamate with water or milk as you like. Now brown the dumplings in butter or lard, and then just let them steam through for ten minutes with the gravy. When served, this makes an inexpensive tasty dish.

STRAWBERRY SHORTCAKE.—Mrs. H. M. Conant, of Santa Cruz, sends us the following: Prepare a dough the same as for soda biscuit, except stir a very thick batter instead of making a stiff dough; spread one inch thick on a well buttered tin; when baked, remove the brown crust on the top with a very sharp knife, butter and pile up the berries with sugar and a little cream, have ready a meringue of the white of eggs beaten to a stiff froth with pulverized sugar, at the rate of an even tablespoon to each egg, spread over the berries and set in the oven to brown.

TOMATO SOUP.—Put two-thirds of a two-pound can of tomatoes on the stove and let it boil. Put one tea-spoonful soda into the tomatoes; after it is done foaming put the tomatoes into two quarts of boiling milk, season with salt, pepper and a liberal lump of good butter.

Health Column.

The Organ of Voice.

The larynx is the organ of voice, and is placed at the upper part of the air passage. It is situated between the trachea below and the base of the tongue above, and forms that visible projection in the middle part of the neck known as *Adam's-apple*. Its form is that of a triangular box—narrow below and broad above. It is composed of nine different cartilages, bound together by ligaments and moved by numerous muscles. Below the larynx stretches the windpipe, passing down into the lungs and subdividing like the branches of a tree into the right and left bronchi.

The laryngoscope enables us to look down into the larynx and watch its many movements. The image we see in the mirror differs materially from anything else we meet with in our anatomical studies. The epiglottis occupies the highest part of the laryngeal image. Its free border may be watched, alternately rising and falling during the examination. It presents a scroll-like form, and in the middle we see the under surface turned up like a lip. The vocal cords are the next most prominent objects in the image. They stretch from the front to the back of the larynx and are to be seen as two smooth, white bands, standing out in remarkable contrast to the surrounding red structures, alternately approaching and receding from each other as the patient breathes. These two moving bands once seen will never be forgotten. Right here permit the remark that Laryngology has done many wonderful things in detecting and remedying the defects and diseases of the human voice. Light has been thrown into dark places; slight changes have been readily diagnosed; tumors, ulcerations and abrasions are seen at a glance, and thus every appliance of science is brought to the aid of the most beautiful and fascinating specialty in the whole domain of medicine and surgery. As the statue of Memnon is said to have grown vocal when touched by the first beams of the morning sun, even so has the voice of the dumb broken forth into songs of thanksgiving when set free by the skillful hand of our God-given art!

As the skin covers the body on the outside, so the mucous membrane lines it in the inside, and under certain circumstances they become readily transformed into each other. "This is only a single instance of the marvelous handiwork of Nature, and one may well stand in awe and in wonder when he contemplates the Divine wisdom which has fashioned such an exquisitely fitting garment, woven without seam, adapted by a hundred variations to every office it has to fulfill, covering the body outside and lining it inside, winding at every turn through the intricate labyrinth and inclosing within its folds the strange machinery of life." We not only trace the finger of God upon the stone tables of the earth, the letters and the law of its everlasting form, but we see it in every line and movement of this wonderful human frame of ours!—*Sanitary News.*

CURE FOR COLD-FEET SLEEPLESSNESS.—The British *Medical Journal* says this is the plan to adopt with cold feet: They should be dipped in cold water for a brief period; often just immerse them, and no more, is sufficient; and then they should be rubbed with a pair of flesh-gloves, or a rough Turkish towel, till they glow, immediately before getting into bed. After this a hot-water bottle will be successful enough in maintaining the temperature of the feet, though without this preliminary it is impotent to do so. Disagreeable as the plan at first sight may appear, it is efficient; and those who have once fairly tried it continue it, and find that they have put an end to their bad nights and cold feet. Pills, potions, lozenges, "night-caps," all narcotics, fail to enable the sufferer to sleep successfully. Get rid of cold feet, and then sleep will come of itself.

KEROSENE AND SALT FOR DIPHTHERIA.—A correspondent of the New York *Sun* says: In 1862, on a plantation in South Alabama, where there was great difficulty in securing good medical advice, I saw a whole plantation of blacks, as well as the white members of a large family, successfully treated for diphtheria with kerosene and salt, used thus: Every patient was given a lump of rock salt about the size of a boy's marble, and instructed to keep it in his or her mouth, swallowing the salty saliva. At the same time the throat was rubbed with kerosene oil, and a flannel saturated with kerosene kept around the neck until the symptoms were abated or entirely gone. If necessary, mild cathartics were given. Not a case was lost, and there were fully 150 in all on the plantation."

TREATMENT OF FETID PERSPIRATION OF THE FEET.—A correspondent of the New York *Medical Record* writes: "As a recipe for fetid perspiration of the feet seems to be in order, and as I do not remember seeing mentioned one that never failed in my hands, I herewith send it: A 1% watery solution of permanganate of potassa. Bathe the feet in it night and morning, oftener if necessary, even to every hour, letting the feet dry after each bath without wiping. A stronger solution may at times be necessary; generally a weaker one will answer. The stronger the solution the greater the discoloration of the feet, but, as it is temporary, patients prefer it to the fetid moisture."

Worth Knowing.

COMPRESSED MOTHER-OF-PEARL.—M. Duvochel has invented a compressed kind of nacre or pearl made of the pulverized shell of the halotis, solidified with gelatine. Thus prepared it will serve for inlaying or mounting in cabinet work, cartonnage, tableture, and other industries, and the manufacture of fans, buttons, etc. This product can be figured, stamped, molded by pressure, poured out in the liquid state, and, in fact, takes every kind of form desired. It can be dyed in any color, polished and varnished by the processes used for tortoise-shell, mother-of-pearl, and other analogous substances. To render the shells thin and friable, they are submitted to a strong heat, which separates them into thin scales; these are then pressed in the cylinders of a flattening roller, and afterwards pounded in a mortar. It is then sifted to get rid of the dust, and the powder is treated with gelatine, and shaped into any form required.

SECURING GLASS IN SKYLIGHTS AND ROOFS.—A recent English patent shows what seems to us a very convenient and reliable way of fastening sheets of glass in skylight frames of either wood or iron. In the case of a wooden rafter a piece of sheet lead is cut three and one-half times the width of the rafter, laid across the rafter, projecting equally on either side, and nailed at intervals. The lead is then doubled back over the heads of the nails to the center of the rafter on either side and turned up at a right angle. The glass is then laid and the lead turned down over the face of the glass so that when finished the lead covers the glass the same width of the rafter. If T iron is used for a rafter the lead is doubled under the edge of the T instead of nailed, as in the case of wood, and in all other respects handled just the same as with wood.

WOOL EXTRACTING.—For separating woo from cotton from mixed goods (wool extracting), M. Paul Poulin, of Paris, has patented the employment of the two following solutions in which the goods are immersed: First, chloride of calcium at 20° Be., 4 volumes; water, 3 volumes. The chloride of calcium at 20° Be. is itself prepared by dissolving in a mixture of 1 volume of muriatic acid at 22° Be., and 2 volumes of water, enough chalk to saturate it; or, second, solution of 1 lb. of salt and 1 lb. muriatic acid in ½ gal. of water. The solution is kept boiling by means of steam for 30 or 40 minutes; then cooled and poured on the goods under pressure. The rags are washed and dried, the residue is pure wool.

TO DISTINGUISH AMBER.—Some of the ways of distinguisning amber from copal are thus given in *La Nature:* "Copal is yellow, of a more or less deep tint, but uniform throughout, and has yellow points like sulphur on its surface. Amber in a fragment of 12 centimeters in length will show a variation in shade. Amber when rubbed will yield a strong aromatic odor; its imitations will not. Amber may be bent after being smeared with tallow and heated; the imitations will not bend. Amber may be cut, sawed, rasped or polished, but cannot be cemented or soldered like copal. The density of amber is 1.09 to 1.11; that of copal is 1.04."

DYEING BLACK.—Four ounces copperas and one ounce logwood extract to each pound of goods; dissolve the copperas in water sufficient to cover the goods; wet them in clean water before putting them in copperas water, to prevent spotting; boil them in the copperas water about 20 minutes; take them out, rinse in clear water first, then wash in soap-suds till it seems soft as before it was put in the copperas water; then put into the logwood dye and let it boil about 20 minutes; take out and let it dry; wash before it dries, or after, as is most convenient; it will neither crock, fade, nor grow rusty.

TO RESTORE BLACK MERINO.—Soak the goods in strong soft-soap suds two hours, then, having dissolved one ounce of extract logwood (which is the amount required for one dress) in a bowl of warm water, add sufficient warm—not hot—water to cover the goods, which are to be taken from the suds without wringing. Allow the goods to stand in the logwood water over night; in the morning rinse in several waters without wringing; in the last water add one pint of sweet milk, which stiffens the goods a little; iron while quite damp. It will not crock, and looks like new.

REMOVING STAINS FROM MARBLE.—To remove stains from statuary marble, take equal parts of fresh oil of vitrol and lemon juice; shake up these substances very thoroughly in a bottle; wet the spots with the mixture, and in a few minutes afterward rub with a soft linen cloth, and the spots will be found to have entirely disappeared.

VARNISH ON METAL SURFACES.—To make alcoholic lacquers or varnishes adhere more completely to polished metal surfaces, one part boracic acid should be added to 200 parts of varnish. This composition will adhere so firmly and become so completely glazed as to be removed only with difficulty. Be careful not to add too much of the boracic acid, as it injures the gloss in that case.

Fraternal.

Masonic.

New York has an active membership of about 70,000.

There are 275 R. A. Chapters and 16,078 Royal Arch Masons in the State of New York.

The Prince of Wales, Grand Master of England, recently instituted a Lodge at Perlermer, in that country.

After the Revolutionary war, Royal Arch Chapters sprung up in various parts of this country, so that about the close of the century a movement was made to organize Grand Chapters in several jurisdictions. The Grand Chapter of Connecticut was organized in 1796; that of Pennsylvania in the same year; and that of Massachusetts in 1798.

The first meeting of delegates out of which arose the General Grand Chapter of Royal Arch Masons, was held at Boston, October 24, 1797. This convention adjourned to meet at Hartford in January, 1798, and there organized the Grand Chapter of the Northern States of America. On the 9th of January, 1799, an adjourned meeting was held which resolved to change its name to that of "General Grand Royal Arch Chapter of the Northern States of America," but on January 9, 1806, the present style was adopted, viz.: "The General Grand Chapter of R. A. M. for the U. S. of America." The sessions were first made septennial, and New York was fixed as the place of the first convocation, September, 1812. But it failed to meet at the appointed time, and a convocation was held in New York city, June 6, 1816, at which important measures were taken for the regularity and permanence of the organization.—*N. Y. Era.*

The *Corner Stone* gives these reasons why the Grand Lodge of the State of New York should not celebrate its 100th anniversary in June next:

1. A provincial Grand Lodge was formed in the province of New York prior to the year 1739, and existed continuously until the occupation of the city of New York by the British army in the year 1786.

2. Six Lodges on the roll of this Grand Lodge emanated directly from said provincial Grand Lodge.

3. The provincial Grand Lodge of 1781 did not meet under said warrant until December 5, 1782.

4. The last mentioned Grand Lodge did not affiliate with the Masons of the province of New York.

5. The Masons forming said Grand Lodge were invaders and were not residents of the province of New York.

6. The said Masons abandoned the Grand Lodge and retired with the British army upon the evacuation of the city of New York during the year 1783.

7. The Masons of the province of New York took possession of their former properties, and established an independent Grand Lodge under the Grand Mastership of Robert R. Livingston, June, 1784.

8. We know of no Lodge in existence which derives its authority from the (Ancient's) Provincial Grand Lodge of 1781-3.

9. We know of no Lodge in existence that has not derived its existence directly through the original Provincial Grand Lodge of 1787, or the Independent Grand Lodge of 1784.

I. O. O. F.

A Lodge in Illinois paid sick benefits to a member for 25 consecutive years.

Arizona has four Lodges, located at Prescott, Phœnix, Tucson and Pinal City.

Wm. Garrett, of Burlington, Iowa, has filled the office of Grand Secretary of that jurisdiction for 29 years.

Ex-Grand Secretary, John G. Driscol, of Rhode Island, was in office continuously for 28 years. August of 1881 would have completed his 28th year of service. Grand Secretary Nason, of Illinois, is just one year ahead of Bro. Driscol, and is the oldest Grand Secretary in office in this country.

One of the most affecting features of the celebration of Odd Fellows' day on the 26th, was at the banquet in the evening at Infantry Hall. After the sentiments had been responded to, Sidney Dean, P. G. M., arose, and with some well chosen remarks, linked the orders of Odd Fellows and Masons by placing the right hand of Dr. Lester Hill, G. M. of I. O. O. F., and Hon. Edward L. Freeman, the G. M. of F. and A. M., together. They had a cordial grasp, as Mr. Dean said: "I thus link Odd Fellowship with Masonry in the hands of fraternal love." The incident was very impressive, and called forth a storm of pronounced applause.—*Providence Transcript.*

Clark Churchill writes as follows from Prescott, Arizona, to the *New Age:* The extent of our territorial limits is beyond all comprehension of persons residing abroad. Tucson is nearly 300 miles from Prescott, Tombstone some 80 miles farther away by the usual route, Pinal about 200 miles from Prescott and 60 to 80 from Tucson, while Phœnix is upwards of 100 miles from Prescott, 60 from Pinal, 80 from Tucson and 100 from Tombstone. These subordinates are assessed 10% of gross receipts by the Sovereign Grand Lodge, for which, in return, we have no representation strictly in that body. Our representation is through a resident D. D. G. Sire, who never visits the Sovereign Grand Lodge, nor any other jurisdiction, officially. If we obtain any instruction, it must be gratuitously furnished by some worthy brother who volunteers to go abroad for instruction, or who happens to come among us with it already imparted to him. It seems the ordinary rule is, that petitions may be received from 10 or more subordinates in any Territory, having seven Past Grands, for the institution of a Grand Lodge; but that it is in the power of the Sovereign Grand Lodge to entertain and grant an application for a Grand charter "to any less number of Lodges who may regularly petition therefor and accompany the petition with reasons which shall be deemed satisfactory for such grant by two-thirds of the members of the Sovereign Grand Lodge, at any regular session." [Vide White's Digest, 1874, Section 753.] Now, it seems to many thoughtful members here that the best interests of the Order would be largely promoted by the organization of a Grand jurisdiction in this Territory. The expense of such a movement would be easily defrayed by the amount we now pay as dues to the Sovereign Grand Lodge, and the benefits would be very great. It would give a new interest and an irresistible impulse in the right direction. An annual council of the representatives of the several subordinates would tend to brighten all up alike in the work; and to this add the inspiring effect of a report in person by a Grand representative fresh from the Sovereign Grand Lodge—and we would have results not to be attained by any other means. The Order in the Territory would gain new vigor, strength and respectability in every sense by such a movement. The fact that our isolation from adjacent Grand jurisdictions renders this movement almost essential to the well being of the Order here. I offer these suggestions for the consideration of such of the Grand representatives as it may reach; and ask them to consider our case seriously and carefully.

Tal. P. Shaffner, G. R., writes as follows of the Patriarchal Degrees, in the *Guide*, Albany, N. Y.: It is unknown at what time the Patriarchal degrees were introduced into Odd Fellowship. I know they did exist there prior to 1819, and were called the "Gold" and "Purple" degrees, and those colors were placed upon the charters of Lodges. In 1821 the price charged for the Golden Rule degree was seventy-five cents, which was used for Grand Lodge expenses; and in March, 1825, it was resolved by the Grand Lodge of the United States "that Grand Lodges be informed that there is a color on their charters for a degree that they have not received, and that it will be forwarded as soon as possible"—that color was purple. The degree secret work was known to Wildey and Scotchburn, but up to that time the lectures had not been received from England. In April, 1825, Past Grand McKormick received the Patriarchal degree in Manchester, and was authorized to confer it upon Wildey and Welch, and subsequently the price fixed for that degree was one dollar. According to my historic notes, the Golden Rule was first introduced into the United States, then the Royal Purple, and then the Patriarchal.

In 1826, Uncle John Roach and his son, John J. Roach, entered into active work in the Grand Lodge of the United States. They had conducted a large book business in London, and were members and Past Grands of the Order there. They connected with their book business a printing establishment, and all the printing for the Order was done by them at that time. In April, 1825, the constitution of the Grand Lodge was amended so as to read: "That a State Grand Charter, together with the Golden Rule and Royal Purple, or fifth degrees, be charged at $20," and the Patriarchal degree having been received from England since the adoption of the constitution, it was resolved "that $2.50 be charged for the same." It will be remembered that the Covenant and Remembrance degrees were not numerically considered with the White, Blue and Scarlet degrees, but were styled "intermediate." They were introduced into England by Grand Sire Wildey, in 1826. They were written by Entwisle, and adopted by the Order in 1820, and by special grants given to Lodges.

From what I have said, it will be seen that the subsequently reorganized encampment degrees were introduced into this country in irregular order. They were mere side or collateral degrees until 1828, when they became adopted as an independent system of the Order. In 1827, Grand Sire Wildey was appointed to revise those degrees. The ritual was principally arranged by John Roach and his son, and it was printed by them in 1828, under the title of "Independent Order of Odd Fellows; Lectures, Charges and regulations of the Degrees for the Encampment of Patriarchs, in the United States." Accompanying these degrees were opening and closing ceremonies.

Following the Lodge system as a model, an initiation was composed and placed to precede the degrees, and, in order to give rank to color, the purple was placed as the highest degree, and the other three in the order as we now have them. Before this system was organized the degrees were conferred in regular order.

Henry E. Jackson, who brought over the degrees of the Lodge in 1819, and conferred them on Wildey and others, told me in 1842 that the ritual of the Golden Rule was almost entirely composed in this country. John J. Roach, whom I knew well as far back as 1837, informed me that he got up that degree, and his father arranged the opening and closing ceremonies, some of which are in use at the present time, having passed, untouched, through all the subsequent revisions.

With the above "revised and enlarged" ritual of the Patriarchal branch of the Order, an Encampment of Patriarchs was instituted in Baltimore on the 14th of June, 1827, when were installed John Boyd, Grand Patriarch; Thos. Wildey, High Priest; Tho. Scotchburn, Senior Warden; Richard Marley, Scribe, and J. Roach, Junior Warden.

This new departure, was sometimes called the "Encampment Lodge" and its by-laws styled it "Encampment No. 1" and it was so called until the 24th of August, 1832, when it assumed the title of "Jerusalem Encampment, No. 1, I. O. O. F." It was subordinate to the Grand Lodge of Maryland.

At the May session in 1828, it was resolved by the Grand Lodge of the United States, that it "most strenuously recommends the establishment of patriarchal encampments throughout the different States, as they will prove of considerable use and benefit to the Independent Order."

In the manner above described the patriarchal branch of the Order was brought into the organic system.

Knights of Pythias.

A number of the Knights residing in the District of Columbia are forming a mounted division, to be clad in the full armor of the Knighthood, as recognized by the Order.

The retiring Grand Chancellor of Minnesota in his report to the Grand Lodge, expresses himself as follows upon the subject of the endowment rank, and funeral and sick benefits: "In my opinion we are making too much of the insurance feature of our Order, and especially of the sick and funeral benefits. These of themselves, without doubt, have drawn thousands upon thousands to our ranks, while the inestimable principles taught in our ritual have elicited the candid thoughts of as many hundreds. Sordid motives are transient; they do not move men to heroic deeds, but devotion to heroic principles has led many to endure calmly the greatest torments of the body and mind possible for human fiends to inflict. The Order of Knights of Pythias is a young, healthy, vigorous society. It has had a wonderful growth since its foundation some 18 years ago, and now it ranks as one of the three most powerful secret organizations on this continent. This is well, and I refer to it with feelings of pride; but I fear that all societies whose principal feature is pecuniary aid or relief, though very popular now, may sometime come to grief. Brethren, I ask you to consider these things in the light of wisdom and experience, and perhaps you will deem it wise to take some steps towards the reduction of the current expenses of subordinate Lodges to a minimum, and so far as you are permitted to do so by the Constitution and Laws of the Supreme Lodge to abolish all benefits, and, on the broad foundation of Friendship, Charity and Benevolence, inculcate an ardent love for our sacred principles and make our beloved society a great instrument of good in the world, by making men wiser, better, and consequently happier. We have opportunity, by the instrumentality of our organization, with its ritual and other teachings, to be of service to our fellows; and if we neglect to avail ourselves of that opportunity, or if we make the Order an instrument of gain in any way, it is more our own loss really and to our own harm, than it is the loss and to the harm of those whom we sought to benefit. As we sow, so shall we surely reap."

Knights of Honor.

Anchor Lodge, No. 2,366, is progressing lively. On May 6th, 17 new applications were received, and on May 20th, 22 candidates took the three degrees.

The Virginia State Medical Examiner has decided, and the decision is endorsed by the Grand Lodge, that after a member has been received into the Order, "the benefit must be paid, no matter what the cause of death." This decision grew out of an attempt to nullify benefits in cases of deaths superinduced by intemperance. Examiner Harrison pertinently says, "If the investigating committee have discharged their duty faithfully, we will have less drunkenness in our Order."

The following appointments for Deputy Grand and Deputy District Grand Dictators have been made by Chas. E. Travers, Grand Dictator, for the ensuing year: District No. 1.—D. G. White, of No. 1756: Lyy, 1716; Eureka, 1756; Yerba Buena, 1788. No. 2.—A. Ryhiner, of 1718: Germania, 1718. No. 3.—R. G. Sawyer, of 1731: Friendship, 1731; Tancred, 1927; Fidelity, 2108. No. 4.—J. A. Magagnos, of 1755: Charter Oak, 1755; Saxon, 1848; Mission, 2106. No. 5.—P. Trommlitz, of 1841: Norman, 1841; San Francisco, 1922; Eagle, 2204. No. 6.—C. C. Gilmore, of 2163: Union, 1895; Oriental, 2163; America, 2229. No. 7.—E. Magner, of 1930: Yosemite, 1930; Keystone, 2107; Confidence, 2282. No. 8.—M. F. Cummings, of 1990: Occidental, 1990; Far West, 2324; Anchor, 2366. A. A. Egleston, of 1788, Deputy at Large.

The editor of the K. of H. *Reporter* recently paid a visit to the Supreme Reporter, and he tells, as follows, what he saw: The Supreme Reporter watches every department of the work connected with his office with a jealous eye, and we were surprised to see what order he is bringing out of the chaos which was thrust upon him by the Supreme Lodge at its last session by the enactment of General Law XXII. The work of his office, by the provisions of this law, is more than doubled, and beside is beset with many difficulties and perplexities.

We found employed in the office eight men besides the Supreme Reporter himself. The work under Law XXII alone is divided into three departments, as follows: Examining and perfecting the petitions and medical examiners' blanks; making the register of members of subordinate Lodges; issuing benefit certificates to members. The petitions and medical examiners' blanks are carefully looked over in the first department, and if correct are passed to the second department, where the registering clerks make a record of each member, as provided by the law. These registers, when complete, are passed to the third department, where the benefit certificate clerks issue the benefit certificates to the members.

The labor of examining one by one the petitions and medical examiners' blanks of the one hundred thousand members of our Order is by no means light, and beside it is beset with any number of perplexities, hindrances and difficulties. In the first place, many Reporters of subordinate Lodges pay no heed whatever to the requirements of General Law XXII, and send in their blanks in a very imperfect state. In some instances the beneficiaries are not named. In others the numbers on the roll-book are omitted, or the blanks at the top of the petitions not filled out. In some the date when the third degree was conferred is not recorded. In many cases no medical examinations have been made at all. In some instances Reporters have written to the Supreme Reporter that, "we have seen no petitions—we have never had any in our Lodge; but we can give you the number and names of our members, if that will answer your purpose. "In several instances, the Supreme Reporter says, to his inquiry of subordinate Lodge Reporters as to why the medical blanks of some of their members were not filled out, he has received the reply that those whose blanks were not filled out were charter members, and were subject to no medical examination, because the deputy who organized the Lodge told them that for charter members no medical examination was required. Thus the incomplete manner in which these blanks are sent in requires them to be returned once, twice and even three times before the information to make a perfect register is obtained. Therefore, the work of obtaining correct records is an almost interminable one. Since the 1st of last October the Supreme Reporter has had three men employed examining and returning these blanks to procure the required information, and yet the rolls of many Lodges are incomplete.

The labor of making the registers, even after the blanks are complete, is also beset with many annoyances. The signatures of members, in very many cases, are entirely illegible, and when the clerks turn to the blanks filled out by the subordinate Lodge Reporter they are often perplexed to find it spelled two different ways by him. General carelessness seems to characterize many Reporters. They send in blanks rolled together in a most unbusiness like manner, and so crumpled up that great trouble is experienced in again putting them in proper shape for filing.

The work of re-issuing the benefit certificates is one of much larger proportions than at first would appear to the casual observer. A most expert penman can only fill out about 200 per day of 10 hours. Then the labor of checking to avoid clerical errors, putting up in packages, addressing and sending out by express, requires time. Then, in addition, a notice and circular of instructions must be sent by mail to each Lodge to which benefit certificates are sent.

This work of reissuing the benefit certificates by the Supreme Lodge is a great one, and attended with no small expense to the Order; but it needs only a few hours' observation in the office of the Supreme Reporter to convince the most skeptical that it was most imperatively demanded. As will be seen from our observations above, men were coming into the Order without any medical examination whatever, while others were admitted when a proper medical examination would have excluded them. A general looseness to an alarming extent prevailed in many localities, and eventually must have brought disaster upon the Order. It was a timely step when the Supreme Lodge adopted Law XXII, and compelled strict examinations and a full record of each applicant, thereby correcting an evil which, sooner or later, would have swallowed us up.

The calling in of petitions and medical blanks have discovered a vast number of errors. In many instances members are rated much too low, and there are many instances where members have been compelled to advance as much as $20 each to make their accounts with the W. & O. B. Fund correct. The Supreme Reporter informed us that the amounts thus covered into the Supreme treasury will amount to at least $3,500.

Our attention was called to what seems to be unmitigated abuses. Reporters of subordinate Lodges send in packages by mail, paying only part postage. Sometimes this short postage amounts to 30 or 40 cents. This, during the year, amounts to a large sum, and is an injustice

to the Lodges who act honestly and pay their postage in full, as they thus not only pay their own but must then bear a portion of the short postage account. Many other abuses of a like character exist, which want of space will not permit us to mention.

Many amusing incidents are brought out in the correspondence with the office, as well as in the filling out of the blanks. To the demand of the Supreme Reporter for the number of each member on the roll-book of a certain Lodge, the reply came: "All the members are No. 1, except one, and he is No. 13." One man said his occupation was "a meat-shop;" another, "a railroad;" another, "a blacksmith shop;" another, "a hack-line." Some insist on attaching their wills to the petition, and one man starts off with: "In the name of God, amen;" then follows his bequest. Some want their benefit paid to "my lawful children." One says: "My benefit to be paid to my wife as long as she remains my widow; if she marries, then to my children."

Any one visiting the office of the Supreme Reporter and observing the amount of books, papers and documents of the greatest possible importance to the Order, which are unprotected from loss by fire, cannot but wonder why the Supreme Lodge has not ere this taken steps to provide fire-proof vaults for the safe-keeping of these books and papers. There are thousands of pounds of papers and books, which, if destroyed, would be an irreparable loss. This is a matter not lightly to be considered. There are the petitions and medical examinations of all the members, the registers, and no end of other valuable papers, which are only piled away on shelves, and would be devoured in a moment if they should ever come in contact with fire. Can our Order afford to allow them to remain so?

We would suggest that representatives and members of the Supreme Lodge, who can, should, on their way to the place of the next meeting, go via Wooster and stop at the Supreme Reporter's office, if only from one train to the next. They can thus see the office, how it is run, and learn its needs. They should look into this matter of providing for the preservation of its papers and records against fire.

American Legion of Honor.

THREE new Councils in process of formation—one in this city, one in San Rafael and one in Sunol.

THE progress of the Order is reported as quite satisfactory. There is a constant accession to the membership, and new Lodges are being rapidly formed in various portions of the State.

THE Supreme Commander, Darius Wilson, has issued a circular, forbidding Councils to issue communications, except those required by law, without first submitting them to him for his approval.

A CERTAIN Council in this city refused to receive the members of three recently instituted Councils, but upon further consideration reconsidered their action and admitted the brothers into full fellowship.

DEPUTIES C. S. Haley and L. O. Rodgers are doing good work in this city. D. S. Van Slyke, in the southern, and A. Noble and J. F. Pinkham, in the northern portion of the State, are organizing Councils.

GOLDEN WEST COUNCIL was instituted April 22d with 31 charter members; Golden Star, April 25th, with 74, and Excelsior April 30th with 32. They are all located in this city. Drs. Haley and Rodgers were the instituting officers.

PROTECTION COUNCIL was instituted in this city, May 24th, by Dr. Haley, D. S. C., with 27 charter members. About a dozen applications have since been received. The following officers were installed: Abraham Blackman, Com.; E. B. Eaton, V. C.; J. J. Coffee, O.; Lawrence Phillip, Chap.; A. Nathan. G.; Isaac L. Lang, Sec.; Barnard Levi, Col.; Levi Rephele, Treas.; Chas. Hess, W.; Sol. Jacobs, S.; A. E. Regensberger, Med. Ex.

A COUNCIL was instituted by D. S. Van Slyke, in San Luis Obispo, May 9th, with 27 charter members, and the following officers installed: G. B. Staniford, C.; P. A. Forrester, V. C.; C. J. Russell, P. C.; C. H. Woods, Sec'y; A. R. Booth, T.; J. J. Simmler, Collector; Isaac Goldtree, Chaplain; Chas. Haase, W.; J. K. Tuley, Orator; J. A. Goodrich, G.; L. Heyd, Sen.; L. Constine, Nathan King and J. J. Sheifferley, Trustees; Dr. J. H. Seaton, Examiner. The Council will meet once a week in Odd Fellows' Hall.

A NEW Council was instituted at Mendocino City, May 16th, by A. Noble, with 15 charter members, and installed the following officers: S. J. Challant, C.; W. A. Colburn, V. C.; G. C. Smith, Sec'y; E. W. Potter, Col.; G. Suetzer, Treas.; M. E. Moshier, P. C.; J. S. Gray, Chaplain; J. B. Hahdahn, W.; R. G. Coombs, O.; P. Hanson, G.; L. F. Burdet, S.; M. E. Moshier, Med. Ex.; S. Coombs, R. G. Coombs, W. A. Colburn, Trustees.

ONE of the largest Councils in the State was that organized at Shasta, by J. F. Pinkham, May 8th. It starts with 72 charter members. The following officers were installed: Samuel Isaacs, C.; Mrs. Julia Bell, V. C.; Geo. H. Opperman, Sec.; C. H. Darling, Col.; E. Lewin, Treas.; Dr. John M. Briceland, Med. Ex.; Hon. Aaron Bell, P. C.; Jas. E. Isaacks, Orator; Mrs. N. G. Darling, Chap.; W. A. Scott, G.; Kirk Spalding, W.; Chas. Behrens, Sen.

Order of Chosen Friends.

THE future sessions of the Grand Council will be held on the 3d Tuesday in April of each year.

THE last few weeks have been busy ones with this Order. The chief attraction was the visit of Rev. Thomas G. Beharrell, Supreme Councillor, who came to this State for the purpose of instituting a Grand Council. This was done May 17th, when the following officers were elected: C. L. Wiggin, P. G. C., America Council, No. 7, S. F. Chas. W. Bryant, G. C., Columbia Council, No. 11, S. F. Jas. M. Baird, G. A. C., Pacific Council, No. 8, S. F. T. M. Cook, G. V. C., Fidelity Council, No. 17, Redwood City. S. Danielewicz, G. R., Phœnix Council, No. 18, S. F. J. W. Shaeffer, G. T., Bohemian Council, No. 23, S. F. Mrs. Louisa A. Balch, G. Prelate, Samaritan Council, No. 13, S. F. Geo. L. Morgan, G. Marshal, Protection Council, No. 21, Oakland. D. E. Hamblin, G. Warden, Pioneer Council, No. 1, Yuba City. Robt. Hodgkinson, G. Guard, Vallejo Council, No. 22, Vallejo. I. A. Winship, G. Sentry, Meridian Council, No. 12, Meridian. Representative to the Supreme Council for the long term, Wm. Patterson, of Golden Shore Council, No. 5, S. F. Alternate, J. A. Calhoun, of Home Council, No. 14, S. F. Representative for short term, S. Danielewicz, of Phœnix Council, No. 18, S. F. Alternate, Mrs. Louisa A. Balch, of Samaritan Council, No. 13, S. F. Trustees—Philip A. Roach, Pacific, No. 8; Wm. Whidden, Alameda, No. 27; H. Froomberg, Crystal, No. 4.

The bonds of the Grand Recorder and Grand Treasurer were fixed at $3,000 each and those of the Trustees at $1,000 each.

The following are the committees as appointed by the Grand Councillor:

On Credentials—S. H. Ross, E. Robinett, F. J. Hatton, J. L. Lang, H. M. Balch.

State of the Order—J. Perrault, E. J. Squires, J. D. Martin, Geo. B. Ferguson, C. P. Low.

Laws and Supervision—L. O. Plaisance, Wm. Whidden, W. F. Bellars, B. F. Josselyn, T. F. Hatton.

Finance—L. J. Henry, Oscar T. Shuck, D. Seisbrettal, Robt. Hodgkinson.

Appeals and Greivances—L. F. Dunand, Philip A. Roach, M. S. Meyer, J. A. Calhoun, D. E. Hamblin.

Miscellaneous Matters—L. Getz, H. Froomberg, I. A. Winship, H. Reibenstein, Otis Clark.

Mileage and Per Diem—F. J. Hatton, H. Bannett, D. Lasky, W. R. Watson.

PHŒNIX COUNCIL gave a reception to the Supreme Councillor, Rev. Thomas G. Beharrell, on Monday evening, May 16th. The hall was beautifully decorated by the ladies of the Council with flowers and evergreens. A large number of the members of the Order were present. A feature of the meeting was the initiation of 62 candidates which was well conducted by the officers. After the initiation the honored visitor spoke for upwards of an hour, explaining the origin, objects and status of the Order. Then came a brief literary entertainment, which was followed by an adjournment to the banquet-hall, there to enjoy the good things spread. Chief Councillor Sternberg presided and announced the following toasts: "The Supreme Council," by Thos. G. Beharrell, Supreme Councillor. "Phœnix Council, No. 18," by J. W. Kinsley, Vice Councillor. "The Prospective Grand Council," by Chas. W. Bryant, Past Chief Councillor. "Our Guests," by James M. Baird, Past Chief Councillor. "Fraternity, Aid and Protection," by Bro. I. N. Choynski. "Our Sisters," by Martin S. Meyer, Past Chief Councillor. Dancing then engaged the attention of a number, and at three o'clock was brought to a close a very successful reception. The following are the names of the committee who labored so industriously for the enjoyment of those present: Sisters Boukofsky, Pfeifer, Danielewicz, and Bros. Sternberg, Levy, McNeil and Steadman.

Patriotic Order Sons of America.

THERE are 14 Camps in California.

THIS Order has a membership of about 90,000 distributed through 13 States.

The Order has a benefit system, by which $1,500 is paid to the heirs of deceased members.

The Order is divided into three degrees, as follows: 1. Subordinate Camp, or Red degree. 2. Council, or White degree. 3. Commandery, or Blue degree. When once a member of the Order, it is optitional with the brethren whether they advance in the degrees or not.

The officers of this State are as follows, all residing in this city: P. J. Merwin, State Commander; C. L. Weller, State President; A. K. Hollis, State Secretary. Dr. E. L. Willard, Assistant State Secretary.

THE following is taken from the *Catholic Telegraph*, published at Cincinnati, Ohio. It has reference to the title of this Order:

That sounds like a very harmless title for even a secret society, but the sequel will show that danger lurks beneath it. We have for some time past made quite a specialty of secret societies, and the study into the "ways that are dark and tricks that are vain" has been highly instructive and interesting reading to us. The Patriotic Sons are not one whit behind their worthy brethren of the O. A. U. in their determined and bitter hostility to the one true and holy church of God. The Order is a branch of the old Knownothingism, supposed to be extinct. It is alleged to be founded on "pure American principles," and for the propagation of free education. "The Order has for its objects the inculcation of pure American principles, the opposition of foreign interference with State interests in the United States of America, the cultivation of fraternal love, the preservation of the Constitution of the United States, and the propagation of free education."

QUALIFICATION FOR MEMBERSHIP.

No person shall be entitled to membership in the order except he be of good moral character, sixteen years of age, a believer in the existence of a Supreme Being as the creator and preserver of the universe, born on the soil or within the jurisdiction of the United States, in favor of free education, opposed to any union of church and state, and to the interference of any foreign power, directly or indirectly, in the affairs of this government.

Catholics will readily see and understand what is meant by "foreign interference" when we quote the following from the report issued by the head of the order at Cincinnati, dated September 1, 1880:

"It seems that everything is not as lovely as it might be in Catholic circles here. Some time ago Bishop Elder, in a letter to his different pastors, took strong grounds against Sunday picnics, and also against the various military organizatioms connected with the church; but not long after the various companies of Catholic Knights held a national convention here, winding up in a Sunday parade and picnic. The result is now a lively little warfare being carried on between the Archbishop and the would-be defenders of the 'true faith.' And now Americanism has proved stronger than Catholicism, and quite a number threaten to leave the church—a state of things evidently satisfactory to the Patriotic Sons of America, as is proved by the next report, expressing great sorrow that the anticipation of a general apostacy has not been fulfilled:

"In our last we spoke of the row in Catholic circles between the Archbishop and the Knights, but ignorance, hypocricy (*sic.*) and superstition have proven stronger than Americanism, and the valiant (?) Knights having taken back all the naughty things they said, and repented of the deeds done in the flesh, are once more back again within the folds of the 'holy mother church.' Can a man be a good American and humiliate himself in this manner before a foreign prince? We think not."

It is evident that the Patriotic Sons of America are imbued with the most virulent animus against the Catholic Church. It will be interesting to our readers to learn that the National President of the Order is Mr. John S. Reeder, of Hamilton, Ohio, and that the National Chaplain is the Rev. George M. Maxwell, of Wyoming, same county.

The following is the State Camp of Ohio: State Prest., H. B. Hendly, 262 West Fifth street, Cincinnati; State M. F. and C., ——— Farrel, Zanesville; State Secretary, Geo. M. Morris, 224 West Second street, Cincinnati; State Commander, J. A. Ginner, 228 Hopkins street, Cincinnati.

There are more than 261 Lodges, most of them in Pennsylvania, but several are scattered through California, Maine, New Jersey, Indiana, Massachusetts, Maryland, New York and our own State. There are several Lodges in Cincinnati, but we have at present only tidings of the following: No. 7—Meets first and third Tuesday evenings in Murdock Hall, 195 West Fifth street, Cincinnati; Geo. W. Malley President; E. W. Hendley, R. S., 262 West Fifth street, and nine other camps.

This Order is possessed of an official organ, now in the fifteenth year of its publication. Its circulation is confined to initiated members, and it cannot be purchased at any news stand or of any book agent. This delectable sheet is known as the *Camp News*. The editor, who resides at Philadelphia, evidently thinks his readers cannot have two much of a good thing, as is evident from his note, viz.: [The following excellent lines were written for our August issue, and now published by request.—ED.] On a beautiful and highly Christian poem, of which the following is the first stanza:

THE JESUIT.

BY ELIZA A. PITTSINGER

In Rome a tyrant, and in Spain a thing
That wears a mask, and bears a poisonous sting;
In India a strangler, in France a knave,
In Ireland a bigot and a slave.
In our Republic a designing tool
And traitor, warring with the Public School;
And whether in Greece, in Hindostan, or Spain,
His record bears the progeny of Cain.

The other five stanzas are, if anything, more abominable than the first.

After this little exposition of the tenets of the Patriotic Order of the Sons of America, we hope the Patriotic Sons of the Catholic Church, in America will watch the localities infested by the said Order in the interest of their Church, their children and their homes. Altar and fireside are both threatened.

Order of the American Union.

FROM the prospectus of this new Order, organized by some of the leading men of this city, we take the following:

The "Order of the American Union" is a fraternal, benevolent society, united by the pledge of honor, modeled somewhat after the Federal Government, having its capital at San Francisco, California, the place of its birth, and controlled by a National Assembly, composed of representatives from the various States.

Its main purpose is to provide for the families of deceased members.

This it does by the maintenance of a benefit fund—made up by assessments levied upon all the members, who are divided into three classes: The first class securing to their dependents $1,000; the second class, $3,000; the third class, $5,000.

Members pay the following rates when assessments are called for, one payment being made in advance upon initiation, which sum remains the amount of each assessment levied upon him thereafter:

RATES FOR BENEFIT FUND

Between Ages of	1st Class—$1,000.	2d Class—$3,000.	3d Class—$5,000.
21 to 25	$ .30	$ .90	$1.50
25 to 30	.40	1.20	2.00
30 to 35	.50	1.50	2.50
35 to 40	.60	1.80	3.00
40 to 45	.70	2.10	3.50
45 to 48	.75	2 25	3.75
48 to 50	.85	2 55	4.25
50 to 52	.95	2.85	4.75
52 to 54	1.05	3.15	5.25
54 to 55	1.10	3.30	5.50
55 to 56	1.15	3.45	5.75
56 to 57	1.25	3.75	6.25
57 to 58	1.35	4.00	6 70
58 to 59	1.45	4.30	7.20
59 to 60	1.55	4.65	7.75
60 to 61	1.75	5.25	8.75
61 to 62	2.00	6.00	10.00

This Order does not permit any National, State or Local Assembly to pay sick benefits out of either its benefit or general fund, and the benefit fund is under the sole control of the National Assembly.

It does not permit any Local Assembly to be organized in either of the States of Louisiana, Mississippi, Arkansas, Tennessee, Alabama, Florida or Texas, without the consent is first obtained of a majority of all the Local Assemblies of the United States.

Candidates must pass a rigid medical examination.

They are qualified to become Assembymen in the Order, if they are sound in body and mind, of good moral character and prudent habits, are citizens of the United States of America, and believe in God.

There are no degrees in this Order, but new members are introduced and obligated with brief ceremonies.

No Assembly can be organized with less than 50 members, nor, in cities of 10,000 or more, with less than 100 members.

Assemblies are not permitted to charge over $5 admission fee, including the medical examination; nor to charge more than 25 cents per month dues; nor to pay any salaries or compensation to officers, except that they may remit the dues of the Clerk, Auditor, Treasurer, Sergeant-at-Arms and Door-keeper. The National Assembly remits all assessments against such officers, provided they joined the Union under 50 years of age.

Assemblies may meet semi-monthly or monthly.

Citizens of the United States, who so prefer, may become Yeomen of the Order of the American Union, without joining any Local Assembly, by passing the prescribed medical examination, and taking the written obligation before some officer authorized by law to administer oaths, and transmitting the same to the Secretary of the N. A. at San Francisco. Such citizens must be recommended by three Assemblymen in good standing. They must pay all assessments and $2 per annum dues directly to the N. A. at San Francisco, and must keep two assessments paid in advance, so that there will always be at least one assessment to their credit. Such citizens are not permitted to participate in Assembly meetings, and are not eligible to office in the Order.

Suspension of an Assembly by the N. A. does not work a forfeiture of individual rights.

STANDARD SOAP CO.—The Standard Soap Company, as one of our local manufactories, may be justly termed one of the leading industries of the Pacific coast, and in variety and quality not excelled by any manufactory in the United States. Almost every variety of soap that is used in manufacturing, bleaching, medicated, family toilet and fancy brands, may be obtained at the wholesale house, 204 Sacramento street. The Standard Soap Palace, 637 Market, under the Palace Hotel, is one of the attractions and marvels in this city, as it is a Palace of Soap of the choicest varieties and sweetest odor. Their manufactory, situated at Berkeley, on the bay, close to the Overland R. R. line, gives them advantages that enables them to successfully compete with the Eastern brands. The genial manager, Bro. J. J. Aplegate, with his coadjutors, are deserving of the highest praise for bringing this purifying art to such perfection and excellency. We recommend the Standard soap for family use or the toilet.

THE wholesale house of Taber, Harker & Co., 108 and 110 California street, dealers in groceries, is favorably known as one of the best and most reliable houses in this city. Bro. Wm. Adams is always on hand to fill all orders in this line.

BRO. HODGE'S cloak and suit rooms, No. 10 Fifth street, is the place for the ladies to get a ready-made suit, or to order in the latest style and at lowest rates.

THE sewing machine agency, No. 141 Fourth street, is filling a want in this city. All kinds of sewing machines are bought and sold.

A. O. U. W. Directory.

Cards inserted in this list at the rate of 25 cents per month payable semi-annually in advance. If errors or omissions are noticed, please write the office direct.

CALIFORNIA.

OFFICERS OF GRAND LODGE.

CLAY W. TAYLOR, Past Grand Master Workman Shasta
W. H. BARNES, Grand Master Workman....San Francisco

Safety on Railways.

There is a certain ratio between the number of passengers carried and the number of accidents to life and limb, on every railroad. But it is found by experience that the danger in traveling does not increase with the number of passengers or frequency of trains, so much as on the amount of freight. The relative safety of most of the chief English lines is well known. For instance, the Lancashire and Yorkshire company pay as compensation for damages £1,200 for every million passengers carried. Others a decreasing amount, until the Metropolitan is reached, and this pays only about £6 for every million passengers carried; yet on the latter the trains are more frequent and greater in number.

This English experience points to a reform there as here. That goods traffic and passenger traffic should be kept separate and distinct; and that freight traffic should be as far as possible carried on at night, when the mail trains are fairly out of the way. This is the conclusion of the *Engineering Times*, which has paid considerable attention to the question.

Each year, however, we find that our railway business increases, yet the number of deaths by accident does not seem to increase in proportion, showing that the increase is not in a constant ratio. It is astonishing how few accidents there are on our crowded roads, where it is considered that the safeguards are as much fewer than in Europe. The crossings are not guarded here and the trains do not slow up. The local road doing the largest business in this vicinity is that running through Oakland and Alameda. There are some millions of passengers carried each year, yet very few persons are hurt when the amount of traffic is considered. There is no freight traffic on this part of the road, and, if the Eng ish experience applies here, that may be a reason. However, it is a fact that notwithstanding the constantly running trains from 5 A. M. to 12 midnight through the streets of two populous cities the accidents each year number much fewer than one would be disposed to estimate.

Artesian Water in Oakland.

The operation of boring an artesian well is a very simple one, requiring no very complicated apparatus or expensive machinery. Yet skill is required in handling the rods and tubes, the drills and augers, and in using the proper appliances at the proper time. Sinking a shaft is an easy thing to do, but it takes a miner to do it well. So with the artesian well, any one can do it, but the man with experience can do it best.

In previous numbers of the *Press* we have given the *modus operandi* of artesian well-boring, with illustrations of the various devices used. And we have also given engravings showing the location of the wells in San Francisco, and diagrams showing the position of the water-bearing strata, from the Sierra across the Sacramento valley, under the bay, and in this city. In the present case, therefore, we shall confine our remarks to the question of artesian wells in our sister city of Oakland, where there are many.

Oakland being a large city as to area, its population being spread over a very wide tract, and all the homes having more or less ground around them, requiring more or less water, the question of water supply has been a serious one. It is pretty well conceded that the city should supply itself with water. It is the opinion of 99 citizens out of 100 that if the city had provided its own water and gas, economically, at an early day, the population would now be from 50,000 to 60,000 instead of 38,000. More cheap homes would have been built, and more manufacturing enterprises established. The citizens now want cheap water, cheap gas, cheap fuel and good wagon roads, the narrow gauge railroad tunneled through to Contra Costa county to bring in cheap produce, when Oakland will rapidly expand. The narrow gauge railroad will be a good promoter in this direction.

Now, Oaklanders cannot have all these advantages at once, but they will soon have the new railroad and they now have cheap artesian water. This is a fixed fact. The artesian water of Oakland is generally of superior quality. On the block in which the writer lives is an artesian well 84 ft. deep, and the water rises from the bottom stratum of this to within two or three feet of the surface. This water is pure, clear and sparkling, and is, moreover, very cold and palatable. This is the case with all the artesian water. There is no smell of frog-pond about it. In the filters in Oakland houses there are now bodies of loathsome worms, leeches, bugs, etc., horrible to the sight, to say nothing of the taste.

People who have modest homes and medium-sized families are generally required to pay as much, or more, in Oakland for water than for either the items of bread or of milk. In fact, nearly all of the citizens of that town feel as if they were robbed every time they have to pay this extraordinary monthly water rent.

In one way, however, the Oakland people can get ahead of the water company, and that is by getting artesian water, a less costly operation generally than in San Francisco. To learn the capacity and cost and location of a number of these wells, we interviewed Mr. W. G. Spence of 604 14th street, who during the past few years has bored the following wells, and who gives us particulars from memory. We give the approximate capacity, but in a number of instances it is doubtless understated.

No. 1 is a well of 12-inch bore, corner of Kirkham and 5th street. It has a capacity of 10,000 gallons per hour, is 180 ft. deep and was made on a contract for which the railroad paid $1000.

No. 2 is on the northwest corner of Kirkham and 5th street. It has a 10-inch bore, is 185 ft. deep and furnishes 6000 gallons per hour. It cost $600.

No. 3 is a 12-inch bore, corner Pine and Taylor, 130 ft. deep; furnishes 8,000 gallons per hour; cost $550.

No. 4 is a 7-inch bore, and is on the corner of Wood and Taylor Sts. It gives 2,000 gallons per hour; is 128 ft. deep; cost $200.

No. 5 is on the corner of 11th and West 5th; is a 7-inch bore, 260 ft. deep; cost $650, and yields 3,000 gallons an hour.

No. 6 is on the corner of Castro and 10th. It is a 7-inch bore, 330 ft. deep; cost $700, and gives 3,500 gallons an hour.

No. 7, on the corner of 7th and West, is a 7-inch bore, 400 ft. deep, costing $800; yields 3,000 gallons an hour.

No. 8 is a 12-inch bore, corner of Adeline and 5th street, 185 ft. deep, yielding 10,000 gallons an hour, and costing $800.

No. 9 is on 2d, near Clay. It is 12 inches in diameter, 285 ft. deep, yields 10,000 gallons an hour, and cost $900.

No. 10, on First St., near Jefferson, is a 12-inch bore, 240 ft. deep; capacity, 10,000 gallons per hour; cost $800

No. 11 is on the corner of 20th and Market. It is a 7-inch bore, 160 ft. deep; capacity 7,000 gallons, cost $370.

No. 12 is on Telegraph Avenue and Durant St., is 11-inch bore, 70 ft. deep; yields 3,000 gallons, and cost $265.

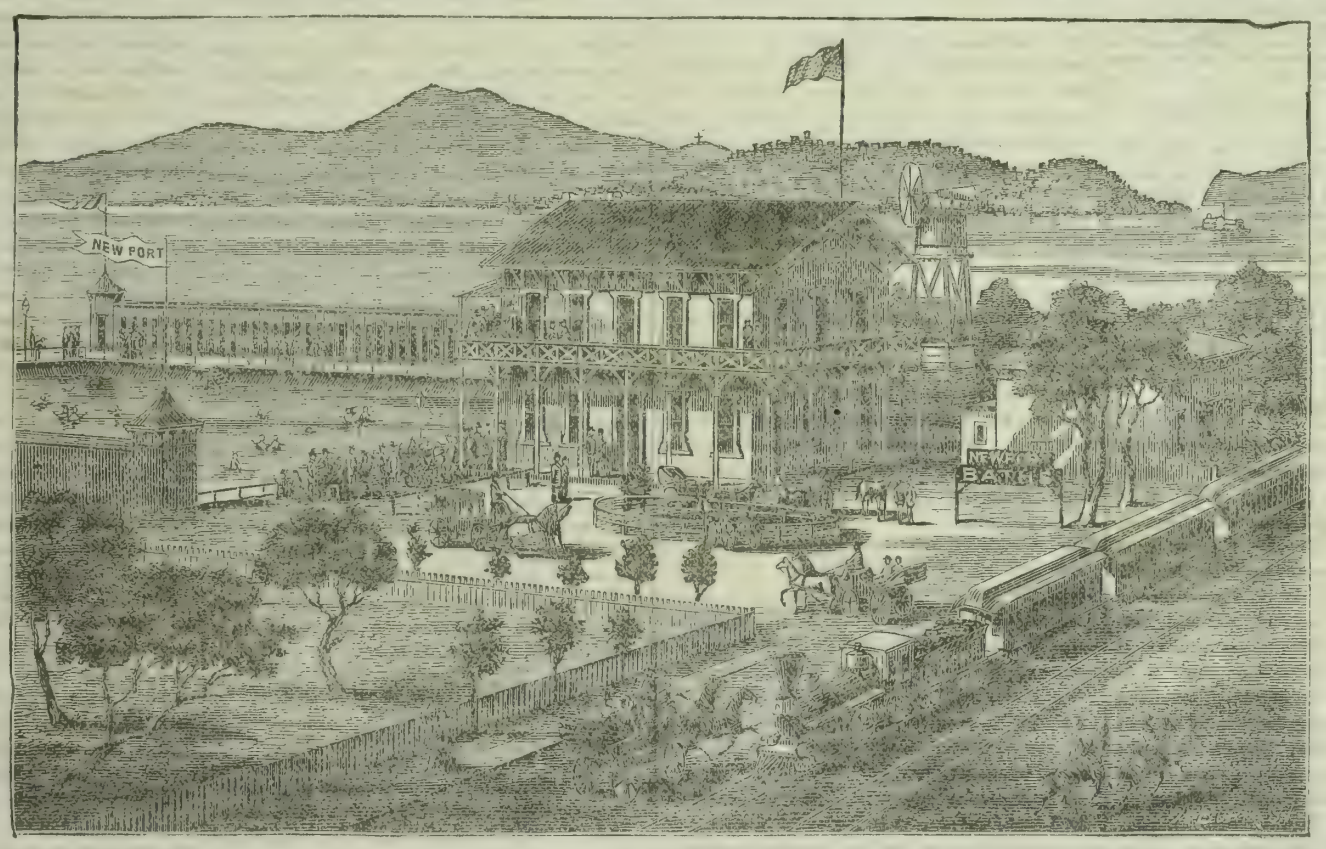
No. 13 is on 10th and Clay Sts.; is a 7-inch well, 90 ft. deep; yields 2,500 gallons an hour, and cost $120.

These statements of the different wells of varied depths at several parts of the city will show the yield and cost. This list embraces the largest wells in Oakland proper, but only about a twentieth of the number. In many socalled surface wells, generally four or six inches in diameter, good water is obtained in from 40 to 60 ft. Some of these have a capacity of from 1,500 to 2,000 gallons per hour. The water usually rises to within 7 to 14 ft. of the surface. The water is usually cold, but in some deep wells is moderately warm.

In Oakland they usually, in digging wells, find a sand stratum from 40 to 50 ft., then clay stratum from 20 to 100 ft., then the water is usually struck on gravel or coarse sand. Sometimes a cement or concrete of gravel and clay is found—a blue deposit, somewhat moist, like the dark mud of the bay, compressed to the consistency of cheese, and underneath this, a stratum of clam or oyster shell debris; under this shell debris, there is always a seam of water, and then always clay.

The water stratum seems to exist on undulating strata of sand or gravel, at the highest points seeming to exist in sand, at the lowest in gravel. It is seldom that any considerable obstructions are met with in boring, although redwood logs have been encountered in several instances at the depth of about 84 ft.

We recommend the city council of Oakland to appoint a committee to investigate and report on the best and most feasible plan for the city government to supply the citizens with water for domestic use, and for protection from fires. Had Oakland provided and furnished both water and gas for its citizens for a trifle over cost during the first five years, its population would now be 60,000. It would be more of an inducement to new settlers than many imagine who have not thought of the subject. The subject of good water in our cities is of more than local importance, as people all over the State look to the centers of population as points most suitable for the education of their children. Of course they prefer, other things being equal, to find a place where water, the great necessary of life, is abundant and pure. We shall be pleased from time to time to receive further information from Mr. Spence, and other practical well-borers, concerning the progress of well-boring in Oakland, and in other parts of the State, as we propose to give continued attention to this all-important-subject.—*Scientific Press.*



To Prevent Corrosion in Steel Pens.—According to the *Moniteur des Produits Chimiques*, this can be done by placing them for half an hour in a solution of sulphate of copper, and then letting them dry slowly. Of course the process simply gives the steel a thin coating of copper, which is not likely to be affected by any of the inks in ordinary use.

The Newport Baths.

The engraving on this page gives an excellent illustration of one of the most popular bathing establishments on the coast. The mild air on the Alameda side of the bay renders this most exhilerating and healthy enjoyment a pure delight. When to this is added new bathing suits, cleanliness and every appliance that can make one enjoy the pleasure of a dip in the waters of the bay, it is no wonder that the Newport baths have attained such a wide popularity.

Alameda, with its beautiful climate, secluded nooks, pleasant walks and drives, has become a favorite place of resort for San Franciscans. The sea bathing on the beach has attracted thousands of people to the town. On Saturdays and Sundays particularly the bluffs above the beach are lined with people. The warmth of the water at Alameda and the absence of wind and cold fog make it the only available sea bathing place near the metropolis. The Newport baths have a large enclosure where the water is kept and warmed by the heat of the sun, while at the same time it is changed twice a day by the incoming tide. By this means there is always plenty of water for swimming and no inconvenience is occasioned by low tide.

Our best people go to these baths and express themselves with pleasure both as to the management and accommodations. This year they have been entirely renovated, new buildings added, which are covered on one side with glass.

NEWPORT SWIMMING BATHS, ALAMEDA.

Road Materials.—"Whinstone is the most durable of all materials, and wherever it is well and judiciously applied the roads are comparatively good and cheap. A road made of small broken stone to the depth of 10 inches will be smooth and durable. Ordinary-sized wheels touch the road for about an inch of their circumference, and every piece of stone put into the road which exceeds an inch in any of its dimensions is mischievous. The stones should be broken so that none shall exceed six ounces in weight. Every road is to be made of broken stone, without mixture of earth, clay, chalk, or any other material that will imbibe water and be affected with frost. Nothing is to be laid on the clean stone on pretence of binding; broken stone will combine, by its own angles, into a smooth, solid surface that cannot be affected by vicissitudes of weather, or displaced by the action of wheels, which will pass over it without a jolt, and consequently without injury."—*J. L. M'Adam, on Roads.*

Lead shot is now manufactured in low towers, provided with an ascending stream of air, drawn up by a fan, worked by water power, by which means the same cooling effect is produced as by letting the melted lead fall from a great altitude.

In the East Indies fish are suspended in fresh water, which is artificially converted into ice, and thus packed in ice blocks, three feet square and nine inches thick, they may be carried a long distance into the interior without injury.

The gravestone in a Woonsocket cemetery bears, besides the ordinary inscription, the words, "This stone is not paid for," cut in by the irate maker.

Lumber and Wages.

About all the lumber mills on the coast streams from this port up to Mendocino City have had to raise the wages of laborers, on account of the scarcity of men. Two years ago they paid from $30 to $40. Last year they paid $35 to $45. This year they pay $40 to $50. These men are also boarded. This rate of wages is for hands in the woods, choppers, "jackscrews," chain tenders, sawyers and swampers. The common roustabouts, such as the swampers and sawyers, get the $40, and the choppers, "jackscrews" and chain tenders, $45 and $50. The common mill hands have also been raised to $35 and board.

Of course the more skilled get larger wages. Foremen in mills get about $100, according to their experience, etc. Engineers get $75; the head sawyer about $70; ox teamsters about $70. They formerly paid 2½ cts. apiece for sawing ties, 2½ cts. for hewing them, 2½ cts. for splitting, and 2½ cts. for swamping and felling, making about 10 cts. Now they pay 6½ cts. for the sawing and splitting, and 3½ cts. for the hewing. Then there is the swamping and felling. At Caspar they now offer 25 cts. apiece for ties at the landing. Last year they could only get 22 and 23 cts.

The reason of the increase of wages is the scarcity of men. There is a class of men who stay on the coast right along and who do the kind of work referred to. During the past two or three years, while times have been dull, the lumber trade has been dull and many of the mills have either shut down or run on short time. Many of the men have sought other employment or gone away, and the desirable labor is therefore scarce now that the lumber business is reviving and the mills are starting up. The demand for lumber is now increasing and the mills are starting up again.

Beginning at Rockport, south of Mendocino, the mill is running and cutting about 30,000 ft. a day. The Ten Mile River mill is also running and cutting about 30,000 ft. a day. The Noyo mill, we believe, is not running. The Caspar mill, which can cut about 60,000 ft., is cutting about 40,000 ft. a day. The Mendocino mill at Big River, which has a capacity of 60,000 ft. a day, is cutting about 40,000 ft. At Little river, the mill is, we believe, closed down. The Albion is sawing about 30,000 ft. a day. There are two mills at Salmon creek, one of them now being built by L. E. White. The other is sawing about 30,000 ft. a day. At Navarro river they are doing about the same. The mill at Greenwood creek, Cuffey's Cove, run by A. D. Moore, is sawing between 30,000 and 35,000 ft. a day. The Gualala mill is cutting from 40,000 to 50,000 ft. now. The Duncan mill, which ships by railroad, is, we understand, cutting about 35,000 ft.

The six mills at Humboldt bay, one at Trinidad and two at Crescent City, are not we understand affected by the advance in wages. The demand for lumber is now greater than for some three years. The available acreage of Humboldt county redwood lands is figured at 510,000 acres. There are hundreds of thousands of acres of timber lands along the coast yet, which are untouched. Now that business is picking up again, a revival of the lumbering interests of the coast has occurred.

A Cheap Varnish.—The preparation called Olmstead's varnish, made by melting equal parts of resin and lard together, so as to make a soft plastic mass, easily spread on metallic surfaces without lumps, is unsurpassed for preventing rust and oxidation. It is best when applied to warm metal surfaces, when this is practicable. It is very cheap, and should be used frequently, at least every three months, where injury from rust is derived. It is most excellent to apply to Russia iron surfaces.

A cable-laying ship possibly represents the highest development of marine engineering, for a hitch in the machinery may mean the failure of the expedition. An instance of the perfection which has been reached has been furnished by the cable-ship, *Kangaroo*, which ran recently from New Zealand to St. Vincent without once stopping the engines. The distance of 9,500 miles, supposing about 16 miles to be run every hour, represents continuous work for 25 days—a fairly sufficient testimonial to the excellence of the machinery.

PACIFIC STATES WATCHMAN.

A. O. U. W. Home Paper.

Issued on the 1st and 15th of each month.
At No. 202 Sansome Street, San Francisco, Cal.

Subscription (in Advance), $2 a Year.

Favorable to Advertisers.

By consolidating the large subscription lists of the *Pacific Workman* with the Pacific States Watchman our advertisers gain an unusually great advantage. We doubt if any one weekly newspaper has ever been circulated to as many different readers on this coast, as have been served heretofore by the *Workman* and Watchman together. Certainly, no other periodical is now patronized by a better class of industrial, professional and business men. In fact, our subscription list (like the A. O. U. W., still increasing), embraces many of the foremost business and representative men throughout the towns and cities of the coast.

We have pride in making our paper "clean and handsome," and first class in all respects—to the benefit of both our readers and advertisers.

ADVERTISING RATES.

One Square (¼ inch), per issue	$ .75
One Square per month	1.25
Two Squares, per issue	1.50
Two Squares per month	2.50
Obituary notices and resolutions (with 25 copies post-paid for friends of deceased) per sq. (¼ inch)	50

☞For reading notices, extraordinary display, special advertising and choice places permanently, extra rates will be charged. Reasonable reduction will be made for large and long-continued advertisements. No extra rates for the space occupied by engravings.

OFFICIAL RECOMMENDATION.

[*Resolutions adopted by Grand Lodge of Cal., Feb. 3, 1881*]

Whereas, the Pacific States Watchman, the pioneer A. O. U W. advocate on this coast, without official aid, has long rendered able and valuable services for the good of our glorious organization, we earnestly recommend that our Lodges and the brethren individually patronize the Watchman as liberally as circumstances will justify.

Entered at San Francisco P. O. as second-class matter.

San Francisco, - June 1, 1881.

Please Excuse Us.

We are sometimes importuned by good brothers to make retort in kind to certain disparaging statements made to the hurt of the A. O. U. W. by some so-called fraternal papers ostensibly devoted to the interests of some other organization. We have no stomach for this sort of business. The A. O. U. W. is a great Order. Its altars are set up all over our great and glorious country. It has an honorable record. It is the parent of all the two score or more of its kind. It can afford to be dignified, magnanimous and charitable, and to deal kindly with its offspring even though they depart from the faith in which they were reared. Time proves all things. The birth and growth and prosperity of the A. O. U. W. is a marvel. Step by step it has advanced toward perfection in plan and detail of structure till now it is without a blot or blemish—a grand and glorious success. It may learn from its offspring—no doubt will—but it cannot afford to quarrel with them. The A. O. U. W. believes in a republican form of government. Its offspring without an exception have espoused the cause of despotism. We believe in this we are right and they are wrong. We believe republican government to be a type of the highest state of civilization, whether in nation or fraternal society. Barbarism is its antipodes. Despotism occupies the middle ground. We prefer to stand at the forefront in the line of human progress. True, it is the post of greatest danger and of greatest difficulty, but it is the post of highest honor. It is better to make an effort and suffer defeat than to do nothing at all or sneak away from danger. But we remember it has been said that the most difficult undertakings are often the most successful. It has been so with the A. O. U. W. up to the present time. Our record is a record of difficulties but it is a record of triumphs, and our name is the synonym of all that is good and grand and glorious. No, good brothers; we cannot afford to go down to the mire and throw mud at the children, even if they do behave badly.

Owing to the pressure of business engagements, Wm. H. Jordan, P. G. M. W., has resigned his position as President of the Workmen Guarantee Fund Association. This resignation does not affect his trust in the association, as he states that it has his fullest confidence, and that his many engagements would not allow him to devote that attention to its affairs which it demands.

Graded Assessments.

We presume the subject of graded assessments will, as usual, come up again before the Supreme Lodge, and that body will be asked to change our system for some other conceived to be more just. We trust the Supreme Lodge will do no such thing. Let well enough alone. When experience shall have proven the plan of "level" assessments unjust, it will be time enough to cast about for a better one, but so far, experience indicates that our system is more just than any other. If our young men cost the Order as much as the older ones, they should pay as much. Covering a period of five and a half years, the average death rate in this jurisdiction is 1 in 115. Of those who joined at 21, the rate is 1 in 122; of those who joined at 49, the rate is 1 in 105. In the first-class the rate is but a trifle below the average, while in the other it is but a trifle above—not enough in either case to prove anything, except that on the score of justice, there is nothing to complain of on either side—not enough, at any rate, to warrant a departure from the tried and beaten path.

We are well aware that our facts do not agree with the commonly accepted theory in this matter, but we long ago learned better than to quarrel with facts. Given a thousand theories against one fact and the fact wins every time. The truth is, all our conclusions as to death-hazard according to age when applied to assurance have been based on false premises. We have taken, say, 1,000 lives of persons in general, and compiled a table of average duration of life from age to age. Then we have applied this to ascertain how much each should pay for assurance accordingly, on the presumption that he who insures his life will remain in the association till he dies. First, we blundered in basing our table on mankind in general, instead of lives selected with reference to perfect normal health. Second, we made a more serious blunder in presuming that all who insured their lives would remain with us till they died, when the facts are, that not more than one in five do so remain. Here are two unrecognized factors that have knocked our theories into smithereens. Statistics have shown us that the average expectancy of life of the assured at the time of coming into the society is about 35 years, and the average expectancy of our liability to each of the assured is about seven years—a little less in both cases, and statistics, so far as we have them, also show that for this period of about seven years, the hazard on the life of a man of 21 is almost exactly the same as on that of a man of 49—*both having passed a like examination as to physical health and morals* on coming in.

It is greatly to be regretted that other Grand Recorders have not made the same character of statistics that our's has done, so that we should have the identical facts we are seeking, instead of other facts which at best will serve only as a basis of a theory. It is only to find how many members have been admitted of each age, from 21 to 49, and then how many of these same persons have died *in the order*. We would then have the death-rate in 29 classes, and could compare them just the same as if they were so many distinct societies that received members, of only each particular age. Now, until this shall be done, and until statistics so made shall give a different showing than that which has been already made, any change in our assessment plan would be a change for the worse. Again, we say most emphatically, let well enough alone.

Chico Lodge has presented one of its charter members, Dr. G. W. Davis, who is about to depart for the East, a handsome gold badge. It is well designed, very unique, and is intended for a watch-chain charm. On one side is inscribed "C. H. P," under which is an opened Bible, while upon the other is this inscription: "Presented to Dr. G. W. Davis, P. M. W., by Chico Lodge, No. 58, A. O. U. W., May, 1881." The presentation speech was made by J. F. Watkins, to which Dr. Davis responded in an appropriate speech. The presentation was altogether unexpected by Dr. Davis, and the scene was the most touching that has taken place in the history of the Lodge.

The Pacific States Watchman gives to its readers another of its 24-page numbers, with the current issue. The subscribers of this well-conducted journal get much more than they were promised, which is not usually the case.—*Call.*

To be or Not to Be.

The Degree of Honor is not a success. It was promulgated by the Supreme Lodge at its first session in 1873, and to-day there are not more than 100 Lodges of the Degree in existence—indeed there may not be a dozen so far as we know, for official reports of Grand Lodges give us no light on the subject. The Supreme Lodge projected the Degree into the Order, and then left it to take care of itself. True the ritual and secret work have been twice revised, after a sort, an installation service adopted but never promulgated, a form of charter ditto, but never issued. We have the bare Degree, such as it is, but no general laws for its government. It's like a child whose parents have driven it from house and home and left it to shirk for itself. Action in behalf of the poor outcast has been urged upon the Supreme Lodge at every session since its institution, but to no purpose. We believe the Supreme Lodge has made a mistake in this regard. It has left undone the things it ought to have done, for it either should have made something of the Degree more than it now is, or abolished it altogether. We believe the Degree can be made of vast benefit to the Order, but to do this it must have laws of general application governing it, and then in connection therewith should be a beneficiary department substantially the same as that for subordinate Lodges, only the amount payable on the death of a member might be, say, one thousand dollars, instead of two thousand, and membership should be of two classes—beneficial and non-beneficial. The Supreme Lodge is the proper body to regulate all this business, so as to secure uniformity in the work and laws of the Degree. We understand our representatives will bear with them to the Supreme Lodge a carefully prepared scheme for perfecting the Degree of Honor, at least so far as laws and regulations for its government are concerned, and trust that it will receive that attention which the importance of the subject demands. Should this scheme or something similar be adopted, Degree Lodges would spring up with a rapidity without parallel in the history of fraternal organizations. We believe it safe to assert that in California at least fifty Degree Lodges would be organized in a year, with an aggregate membership of not less than 3,000. Let us add this element of strength to the A. O. U. W., and not drive our members and their families elsewhere to find what they ought to find in their old home.

The Relief Law in Practice.

At the present time of writing nearly all of our Lodges have responded to the relief call, and the balance will no doubt send in their remittances before the Watchman reaches its readers. The payment has been cheerfully made, and with but few exceptions from the general funds of the respective Lodges.

We have heard but one complaint in regard to the law, and that is that a fund of $1 for each M. W. should be created to remain idle, with little probability of any call upon it oftener than once a year. This being a special fund that cannot be used for any purpose only for that contemplated by the law, it is argued, and with great force, we must admit, that much difficulty and complication of accounts will result in keeping it intact, and of such exact amount as to fill the requirements of the law at all times. The almost unanimous desire is that this requirement of the law be repealed, and Lodges allowed to meet such calls as may be necessary for relief by appropriations from their general funds, or by assessments, as are now provided, for creating the fund. If the feeling in other jurisdictions is the same as here, no doubt the Supreme Lodge will amend the law accordingly, and that is all the changes that would perhaps be desirable at the present time. Nevertheless, we adhere strongly to the opinion that time will show one other change to be not only desirable but necessary, and that is, to abrogate the provision for returning the whole or any part of relief contributions to the jurisdictions whence they came. But let us wait and see how the law will work in this regard as now constituted. We have learned that experience is worth a thousand times more than any theory, however seductive in appearance. We dote on facts—real, hard, established facts. There is no logic, nor argument, nor eloquence like the logic or argument or eloquence of facts, and for them we can afford to wait, and then, whatever change, if any, may be necessary or desirable, we can make understandingly.

California Representatives to the Supreme Lodge.

The brethren of Detroit, Michigan, are making arrangements to give the representatives to the Supreme Lodge a good reception. The California delegation is P. G. Masters, M. T. Brewer, Wm. H. Jordan and Clay W. Taylor. M. W. Fish is Foreman of the Supreme Lodge. Bro. Brewer is widely known in this State as a fruit commission merchant, his house being one of the leading in Sacramento. It has been among the first to ship fruit overland, and to it the people of the East are greatly due the pleasure of testing California fruit. His connection with the A. O. U. W. dates from almost the beginning. He attended the last Supreme Lodge session held at Boston, and those representatives who will again be present at Detroit will no doubt be glad to see him. Bro. Jordan is one of the leading business men of Oakland, the sister city of San Francisco. He has been prominently connected with its material progress. In fact, he has grown up with the town, and several of its important industrial establishments are connected with his name. He was the first active Grand Master in this State. When the Order was new and doubts as to its permanency existed, it was his earnest and enthusiastic action that greatly facilitated its future and present popularity and success. So well did he fill his position that he was elected for two terms. Our last representative is Clay W. Taylor. Bro. Taylor is one of the most popular men in northern California. He has for several years held the position of District Attorney for Shasta county. So well is he liked in his district that he has been elected to the office of District Attorney of the popular votes by the members of both political parties. He is Deputy Grand Master of the F. and A. M. Clear headed, strong of heart and earnest of purpose, he will prove a most valuable member of the Supreme Lodge. When his clarion voice rings out the truths of the Order, the representations will bear witness to his worth. This will be his first appearance in the Supreme body. M. W. Fish is Foreman of the Supreme Lodge, and will necessarily be in attendance. It will be his third appearance in that body. His present position bears evidence of the manner in which he is held by his brother Supreme officers. He is one of the officers of the medical department of the California State University, a member of the City Council of Oakland, which town boasts of 40,000 inhabitants. As a physician he ranks with the best, as a Workman he has always proved honest and true, and as a man he enjoys the respect and confidence of the community. We bespeak for these officers a kind reception, and can assure our brethren Eastward that they will find them true and loyal Workmen. The last session was attended by the above representatives with the exception of Clay W. Taylor. Michigan Grand Lodge has appropriated $500 toward paying the expenses. It is expected that the Governor of the State and the Mayor of Detroit will deliver addresses. The city is described by those who have been there as being one of the loveliest in the country, the people hospitable and generous, and the coming session will no doubt be one of the most interesting and pleasant in the history of the Order. The time of year at which it will be held is more agreeable than heretofore, June being a less stormier month than March.

Bro. Sam Black, of Red Bluff, paid Yerba Buena a fraternal visit on May 27th. He reports a membership of 60 and moving along in a prosperous condition. Our genial Brother, under head "good of the Order," made a short complimentary speech, followed by Bro. J. M. Davies, P. M. W., who made a grand speech, that was listened to with wrapt attention. In the course of his remarks he paid a high compliment to the Pacific States Watchman, saying he recognized it as the best fraternal paper now published; also, that Brethren would do well to stand by this great Workman organization, that guaranteed security and perpetuity, rather than run after those new, untried fraternal societies, that promise so much, and that at some time will end in a bubble.

Harmony, No. 9, has the honor of making the first payment under the Relief Law to the Grand Recorder in this jurisdiction. On May 21st the M. W. degree was given to 7.

Grand Recorder's Department.

Headquarters of Grand Lodge, A. O. U. W., Rooms 40 and 41, St. Ann's Building, corner of Eddy and Powell, San Francisco. H. G. PRATT, G. R.

WM. C. FLINT, ESQ., 216 Sansome street, San Francisco, is Chairman of Committee on Laws and Supervision. All By-Laws, or amendments to same, should be sent directly to him.

THE revised edition of the Constitution is out and ready for delivery.

THE increase in membership in this jurisdiction over and above all losses, for the month of April was 290.

Parties desiring unbound sheets of the Constitution to bind with By-Laws, can be accommodated by applying to A. L. Bancroft & Co. The charge will be four cents a book.

IT is sufficient for the law that transfers of memberships into or out of a Lodge be reported monthly on the monthly report blank, but a better way is to report such events when they occur, and then repeat on the monthly report. Frequently transfers are made and not reported either by the Lodge the member joins or that he left, and so our books are out of joint of course.

Grand Recorder's Statement for April.

We condense from Grand Recorder Pratt's Financial Statement for April the following leading figures:

WARRANTS ISSUED.

No. 186, Supplies, F. Kroger, & Co	$ 54.00
187, Salary, H. G. Pratt, G. Rdr	291.66
188, Contingent, C. H. Haile, G. Rvr	25.00
189, Contingent, Postage, H. G. Pratt, G. Rdr.	34.00
189, Contingent, Supplies, H. G. Pratt, G. Rdr.	1.35
189, Contingent, Expense, H. G. Pratt, G. Rdr.	4.60
189, Contingent, Exchange, H. G. Pratt, G. Rdr	3.10
190, Supplies, Mrs. L. G. Richmond & Son	55.60
190, Expense, Mrs. L. G. Richmond & Son	20.00
191, Expense, Wm. C. Flint	8.00
192, Expense, David Farquharson	50.00
194, Expense, A. L. Bancroft & Co	300.00
198, Expense, Geo. Spaulding & Co	3.25
199, Expense, Taylor & Nevin	7.50
202, Supplies, Supreme Lodge	93.00
Total amount warrants issued, G. F	$ 951.06

DISBURSEMENTS.

PRESENTATION.—The anniversary committee of Valley, No. 30, having a surplus of $47, purchased an ivory gold-mounted gavel and presented the same to Valley Lodge. Inscribed on the gavel was the following: "Presented to Valley Lodge, No. 30, A. O. U. W., by the Anniversary Committee of 1881." Connected therewith was a black marble stand resting on a highly ornamented mat. Bro. Lyon, P. M. W., in a highly interesting and humorous manner made the presentation speech. Bro. Case, M. W., received the souvenir, and in his felicitous manner responded. A short recess was had to inspect the beautiful gavel that in coming years shall mold the destinies of this large Lodge of Workmen. A motion was made and carried that Valley, No. 30, visit Oak Leaf, 35, on May 31st.

WE had the pleasure of meeting Bro. A. J. Brown, Recorder of Chico Lodge, No. 58, in Harmony No. 9, on the 21st inst. Our genial brother from Chico reports 116 members, and in a very prosperous condition. At every meeting they work in some of the degrees.

Formation of the Grand Lodge of Nevada.

The meeting for the organization of a Grand Lodge for the State of Nevada, was held May 18th. The representatives met at Reno, the meeting being held in the Lodge-hall of Reno Lodge, No. 19, I. O. O. F. All the Lodges were represented with the exception of Hope, No. 11, of Austin. The following is a list of the Lodges and representatives who were present:

Alpha, No. 1.—E. N. Robinson, C. L. Broy.
Gold Hill, No. 2.—S. W. Chubbuck, A. C. Cowan, D. Thorburn.
Storey, No. 3.—J. K. Brown, J. V. McCurdy, H. W. Zartman.
Ormsby, No. 4.—J. C. Calhoun, F. M. Sterling, T. S. M. Smart.
Nevada, No. 5.—A. Dawson, W. D. Wagar, Jas. T. Davis.
River, No. 6.—J. L. Campbell, J. D. Gignoux, J. R. Shaw.
Security, No. 7.—W. Sutherland, P. J. Dunn.
Lucille, No. 8—P. R. Savage, H. W. Bonham, C. B. Brierly.
St. James, No. 9—Thos. C. Hanson, A. P. Woodward, R. W. Wood.
Victory, No. 10—F. W. Dunn.

Deputy Supreme Master Workman Kinsley presided and appointed the following committees and also the following temporary officers:

On Grand Lodge Constitution—Bros. Chubbuck, Sterling, Dunn, Wagar and Shaw.
On Supreme Lodge Constitution—Bros. McCurdy, Wood, Cowan, Savage and Broy.
On General Laws—Bros. Zartman, Dawson, Smart, Woodward and Sutherland.
On Finance Committee—Bros. Thornburn, Brown, Calhoun, Campbell and Dunn.
On Credentials—Bros. Robinson, Gignoux and Bonham.
Officers—F. M. Stirling; P. M. W.; Chas. Lykins, For.; I. C. C. Whitmore, Rdr.; S. Ogg, W.

The Committee on Credentials made their report and found the above named brothers entitled to sit in Grand session as representatives. The Grand Lodge then began its deliberations.

Committees report on General Laws, and also report of Committee on Constitutions of Subordinates and laws of general application read and adopted. The session adjourned to 7:30 P. M., to meet at that hour at the Masonic hall. A vote of thanks was tendered to Reno Lodge, No. 19, I. O. O. F. for the use of their hall.

At the evening session, held at Masonic Hall, J. W. Kinsley, D. S. M. W., presiding, the only business presented was the reading of a report on Constitution for subordinates, and the adoption of the same. Adjourned, to meet in the same place on Thursday, May 19th.

On the second day the meeting re-assembled at Masonic Hall, Bro. Kinsley presiding, and Bro. Chubbuck acting as temporary Recorder. The Grand Lodge degree was then conferred upon the above representatives.

The next business presented was that of election of officers, and the following named were elected:

E. N. Robinson, Grand Past Master Workman, of Alpha, No. 1.
J. V. McCurdy, Grand Master Workman, of Storey, No. 3.
A. C. Cowan, Grand Foreman, of Gold Hill, No. 2.
F. W. Dunn, Grand Overseer, of Victory, No. 10.
P. J. Dunne, Grand Guide, of Security, No. 7.
H. W. Bonham, Grand Watchman, of Lucille, No. 8.
D. Thorburn, Grand Recorder, of Gold Hill, No. 2.
W. D. Wagar, Grand Receiver, of Nevada, No. 5.

Grand Trustees: C. L. Broy, of Alpha, No. 1, three years; J. E. Gignoux, of River, No. 6, two years; A. Dawson, of Nevada, No. 5, one year.

At 11 A. M. recess was declared, preparatory for installation.

A recess was taken for fifteen minutes, after which the Grand Officers were installed.

The following were elected Supreme Representatives: E. N. Robinson, J. K. Brown and R. W. Woods.

The Lodge convened at two o'clock in the afternoon and proceeded to discuss the amendments to the Grand Lodge Constitution, after which the constitution was adopted as a whole.

A resolution that the next meeting of the Grand Lodge be held in Winnemucca, commencing on the 2d Tuesday of May, 1882, was adopted.

The amendments to the constitutions of subordinate Lodges were, after various amendments, adopted as a whole.

The report of the Committee on Finance was adopted as read.

A resolution fixing bonds of Grand officers was adopted.

A resolution instructing the Supreme Representatives to endeavor to have Utah and Idaho added to the jurisdiction of Nevada was passed.

A resolution that the Grand Lodge be incorporated was adopted.

A vote of thanks was tendered the Masonic Lodge, through Chas. Knust, for the use of their hall.

The following standing committees were appointed by the Chair:

Finance—Shaw, Conn, Brierly.
Laws and Supervision—Chubbuck, Williams, Williamson.
Appeals and Grievance—Brown, Sutherland, Fletcher.
Amendments—Dawson, Wood, Calhoun, Savage, Zartman.

The following were appointed District Deputies:

Eureka—C. L. Broy.
Lander—Dunn.
Humboldt—Woodford.
Washoe—J. T. Davis.

All business being transacted, the Grand Lodge adjourned *sine die*.

NEWS received from different Lodges in this State is to the effect that the visits of Grand Master Barnes have put new life and energy into the subordinates. Those who are conversant with the large amount of labor he is performing, express surprise that he is able to meet all demands. As the head of the Order in this State, he can be likened to the general of a victorious army. But there the simile ends. For while one is leading his men on to bloody warfare, the other is marshaling his hosts under the banner of fraternity, for the purpose of insuring to the wives and little ones of the departed a protection from the stings of poverty. It is truly a grand cause, and calls for grand efforts. Our worthy Grand Master is imbued with the principles of the Order, and proposes to give his best efforts during his term for the propagation of the principles o the A. O. U. W. Pæans of praise and silent prayers of thankfulness will ascend from the hearts of many when they consider that without his cheering words they would have been left to the mercies of the world. It must be his recompense, and when his term is finished it will be with the proud satisfaction of duties well and worthily performed.

Resolutions of Respect.

[IN MEMORIAM.]

HALL OF HERCULES LODGE, No. 53, San Francisco.

WHEREAS, In the course of events, this Lodge finds the chair of its P. M. W. vacant, not by the natural and usual causes, but by the sudden and startling call of a brother to pass beyond the sphere of this life, leaving behind those who loved, mourn and sorrow. Therefore be it

Resolved, That in the death of P. M. W. Bro. Thomas Wilburn Cunningham this Lodge has lost one of its most active and fraternal members, society a good citizen, the parents a worthy son, and the family a kind and considerate husband and father.

Resolved, That in remembrance of our departed brother, the charter of this Lodge and the vacant chair be draped in mourning for the remainder of his term.

Resolved, That this Lodge extends to the aged parents, the weeding wife and the fatherless children, in this the hour of their great sorrow, its fullest sympathy; and bid them look with hope and confidence to a happy reunion across the river, where all is peace, and quiet must forever reign, assured that their loss is his gain.

Fraternally submitted in C. H. & P.,
L. M. MANZER,
P. E. HILTON,
JAS. W. BLAKE. } Com.

In Memoriam.

On Friday, May 6th, at her home in this city, Mrs. Lou. C., wife of Dr. Walter Lindley, P. M. W. of Los Angeles Lodge, No. 55, breathed her last, after a long and painful illness. Mrs. L.'s spotless life and warm-hearted nature had endeared her to a large circle of friends and her loss is deeply deplored in this community. She took an active interest in the social and literary work of No. 55 from its organization, and her bright, genial presence made her a general favorite at all our entertainments. One of these at Turnverein Hall, last November, being the last public entertainment she attended.

Over the home which her life so blest,
The dark'ning shadow of death is cast;
She is gone from earth to a blissful rest,
All the trials and cares of life are past.

We shall hope to meet on the golden shore
When the "boatman pale" for us shall come,
And the voyage of life is haply o'er,
She will welcome us to that peaceful home.

R. D. W.

THE Relief Committee are in need of funds. The heavy drafts made on them by brethren from all parts of the Pacific Coast and the Eastern States, who are in distress or out of employment, has depleted the Relief fund. As there will be a small profit on each ticket sold for the picnic, it is to be hoped that Workmen will buy as many tickets as their circumstances will permit.

THE new Workmen Diploma, a notice of which appeared in our last issue, is meeting with much favor. The publisher, Bro. C. H. M. Curry, is receiving orders far beyond his expectation. It is pronounced one of the finest works of art that has yet been issued in this State.

A. J. PEDLAR writes us that the recent visit of Grand Master Barnes to Yosemite Lodge, No. 171, Fresno, has done much to encourage the membership and that they expect much good to come in consequence. The Lodge is thrifty and steadily progressing.

Supreme Lodge Regulations.

OFFICE SUPREME RECORDER, A. O. U. W.
Meadville, Pa., May 12, 1881.

To the Officers, Committees and Representatives, Supreme Lodge, Session 1881.—BRETHREN: You are hereby officially notified that the *ninth* annual session of the Supreme Lodge, A. O. U. W., will convene in the city of Detroit, State of Michigan, on the 7th day of June, 1881.

The session will be held in A. O. U. W. hall, Walker block, corner of Fort and Griswold streets, and will be called to order at 10 A. M. on the above date.

Arrangements for hotel accommodations have been made at the Michigan Exchange hotel, Jefferson avenue, at $2 per day.

The Committee of Laws and Supervision, and the Committee of Finance will meet at the above hotel on June 4, 1881.

By direction of the Supreme Master Workman I make the following request: It is desirable in the interest of economy, to make the sessions of the Supreme Lodge as short as possible, and at the same time carefully legislate upon all matters of importance that may be presented. Those who have attended previous meetings of the Supreme Lodge are well aware of the great amount of valuable time consumed in the presentation and reference of the various propositions submitted by the different Grand Lodges and their representatives. These propositions, prior to action by the Supreme Lodge, are required to be submitted to different committees for report, and as the great majority are propositions to amend, construe or enact laws, they are referrred to the Standing Committee on Laws and Supervisions. The duties of this committee are therefore made very arduous during the session, and, in many instances, matters submitted do not receive that consideration their importance demands, and many times the sessions are unnecessarily prolonged, waiting their report. This committee is required by law to meet three days prior to the session of the Supreme Ludge, to consider matters submitted to them.

In view of the foregoing, each representative to the Supreme Lodge is earnestly requested to comply with the following:

If you have any matters to submit to the Supreme Lodge for its action,

1st, By order of your Grand Lodge;
2d, As to the construction of any law or regulation;
3d, Propositions to alter or amend any law or regulation;
4th, Propositions to enact new laws or regulations;
5th, Questions for decision by the S. M. W.;
6th, Any appeal or grievance to be submitted.

You will please forward the same to the Supreme Recorder on or before the 30th day of May—*making two copies*—one to be presented to the Supreme Lodge, the other to be referred to the proper officer or committee.

Yours, in C. H. and P.,
M. W. SACKETT,
Supreme Recorder.

DEATH OF REV. E. B. TUTTLE.—The Rev. Edmund B. Tuttle, a brother of one of our California pioneers, Capt. Joseph Tuttle, a member of Spartan Lodge, No. 36, died in New York recently. He was born in Auburn, N. Y., in 1815, and when a young man went to New York, where he was employed on several newspapers as a reporter—the *Herald* for a long time, he being a protege of James Gordon Bennett. Subsequently, having qualified himself, he was admitted to orders in the Episcopal Church. He came to Chicago several years before the war and engaged in missionary work among the Swedes, becoming, in a little while, Rector of St. Angarius' Church. In June, 1862, he was appointed hospital chaplain in the army and assigned to duty at Camp Douglass, where he remained until it was broken up in 1865. He was very kind to the prisoners, and those still living doubtless remember him very well, because he endeared himself to all by his Christain conduct. He established St. Mark's Church, was its Rector, but gave up the parish in order to return to the army, he being appointed Post Chaplain in 1867, and ordered on duty out West. He remained there some time, writing several books—Indian tales for children. A long leave of absence was granted him, and he went abroad and lived for quite a time on the Island of Jersey, in the English Channel. Returning to New York, he became associated with James Greene Wilson in writing a history of Illinois and the Northwest, and this was his employment when he died. Mr. Tuttle was an excellent writer and a Christian gentleman. He had many friends in Chicago.

AMMONIA FOR PREVENTING PETROLEUM FIRES. M. Schlumberger has communicated a note to the *Societe Francaise d' Hygiene* on the "Automatic Extinction of Petroleum Fires." Many accidents are caused, he says, chiefly by the igniting of the substance through imprudence. The druggist, for instance, in going into the cellar where the oil is kept does not always take proper precaution, and the result is that a disastrous explosion often takes place. He proposes a method of extinction in this and similar cases which he recommends shall be made compulsory under police regulations. His plan is to place on each barrel of petroleum a large bottle of liquid ammonia, so that, at the least explosion or on contact with the flames, the glass will be broken and the vapor of the liberated ammonia will form an automatic mode of extinction. The author states that he speaks from practical experience, and that he has frequently been indebted to ammonia for safety while conducting distillations of a dangerous character. He suggests that the plan should be extended to mining operations, and that easily broken vessels filled with ammonia should be stored wherever there may be a risk of accident from fire-damp explosions. Carbonic oxide cannot burn in an ammoniacal atmosphere.

A CURIOUS INSTANCE of the deodorizing of illuminating gas was cited by Prof. Rensen in a recent lecture on "Coal Gas." In Dresden a quantity of gas escaped from a pipe outside of a dwelling and passed through the earth into the house, with its odor entirely gone. It was breathed unconsciously, and several deaths occurred in consequence.

MANY have an idea they are serving the Lord when they are only meddling with what is none of their business.

The Bamboo.

Now that different varieties of the bamboo are growing well in California soil and interest in the plant is general, items of the great usefulness of the plant abroad are valuable. We have had many such before, but testimony from a well-known Californian who has just returned from Asiatic travel is pertinent. Hon. Irving M. Scott, of this city, has been delivering lectures before the Mechanics' Institute on his observations abroad, and in one of these lectures is the following concerning the bamboo: One of the features of Japan is the use they make of bamboo. I do not know of anything that would be more valuable to California, or any climate where it would grow, than this one article of bamboo. If I can recall the uses to which I saw it put I will give them to you. If you see a Japanese ship or a small boat—a schooner or a yacht, as we would call them—you will see that the masts are of bamboo; the yards are of bamboo; the sails are of bamboo; the ropes are of bamboo, and the poles with which she scuds along or comes up to the wharf are of bamboo. The captain's slippers are made of bamboo, and the carpet in the captain's room is made of bamboo. His drinking cup may be of bamboo, and many of the ornaments are large stalks of bamboo, carved. They use it for scaffolding to build their houses. They make their partitions in all their modern houses with a net-work of bamboo, on which they fix their plaster, in place of laths, as we do. They use it for clothing, for pipe stems. They pipe their hot and cold water in bamboo pipes; they make strings, toys and fans of bamboo, and bamboo makes the handsomest grove that we saw in our travels—slender and straight, and its foliage was as feathery as it is possible to conceive. Inside of the castle at Kioto, the finest grove said to exist in the world, we saw.

Photosphonic Discoveries.

At the meeting of the National Academy of Sciences, April 21, Prof. A. Graham Bell read an important paper describing at great length the recent investigations made by Mr. Tainter and himself in the field so brilliantly opened by them a year ago. After referring to their earlier observations on the production of sound by radiant energy, Prof. Bell said that at his suggestion and during his absence in Europe, Mr. Tainter had pursued the investigation of the sonorousness of matter under the influence of radiant energy, employing a vast number of substances inclosed in test tubes in a simple empirical search for loud effects. He was thus led gradually to the discovery that cotton-wool, worsted, silk, and fibrous materials generally, produced much louder sounds than hard rigid bodies like crystals or diaphragms, such as had hitherto been used.

Mr. Tainter next collected silks and worsteds of different colors, and speedily found that the darkest shades produced the best effects. Black worsted especially gave an extremely loud sound. As white cotton wool had proved itself equal, if not superior, to any other white fibrous material before tried, he was anxious to obtain colored specimens for comparison. Not having any at hand, however, he tried the effect of darkening some cotton wool with lampblack. Such a marked re-enforcement resulted that he was induced to try lampblack alone. About a teaspoonful of lampblack was placed in a test tube and exposed to an intermittent beam of sunlight The sound produced was much louder than any heard before. Upon smoking a piece of plate glass and holding it in the intermittent beam, with the lampblack surface toward the sun, the sound produced was loud enough to be heard, with attention, in any part of the room. With the lampblack surface turned from the sun the sound was much feebler.

EARACHE—CHLOROFORM VAPOR.—Dr. Morgan states, in the *National Medical Review*, that he has often promptly relieved the distressing earache of children by filling the bowl of a common new clay pipe with cotton wool, upon which he dropped a few drops of chloroform, and inserted the stem carefully into the external canal, and adjusting his lips over the bowl, he blew through the pipe, forcing the chloroform vapor upon the membrana tympani.

THE OCEAN LEVEL.—M. H. Trautschild, of Moscow, lately sent in a paper to the Geological Society of France, maintaining that the level of the ocean was not invariable, in which he expressed the following conclusions: 1. The level of the sea has fallen, as parts of the earth's crust have risen from the bottom above its surface. 2. The surface of nearly all the continents has once been at the bottom of the sea, and has risen from the waters, partly in consequence of upheavals, partly in consequence of the retreat of the ocean. 3. When the continents have been formed, a part of the waters of the sea is carried away from them, and held on the land as lakes, rivers, eternal snows and as a constituent of organic matter—thus the quantity of water in the ocean has been constantly diminished, and its level has fallen. 4. As the earth cools, ice accumulates near the poles and on the mountains, water is soaked down more deeply into the crust of the earth, and mineral hydrates are formed everywhere. It follows that the level of the sea has been gradually falling ever since water has existed as a liquid upon the earth.

THE DISCOVERY OF URANUS.—One hundred years ago, the 13th of March, 1781, in the garden of a small house in Bath, England, an amateur astronomer was, by the means of a 20-ft. reflecting telescope, hard at work on his catalogue of stars in the constellation Gemini. His attention was attracted to one he had never seen before and not registered. Quickly applying a high magnifying power to the mysterious visitor from parts unknown, it presented a sensible disk, and proof was soon found that it changed its place among the fixed stars. The astronomer was Herschel; the unknown star was Uranus. Plain Mr. Herschel of Bath, the musician-astronomer, became famous, and honors clustered around him during his peaceful life, till in his 84th year he joined the majority.

A NOVEL METHOD OF RAPID LIGHTING.—At the Royal Palace in Berlin, 40,000 wax candles are instantaneously lighted by a single match. The wicks are previously connected by a thread spun from gun cotton, on lighting one end of which all the candles are lighted simultaneously, and thus the whole of the 700 apartments are lighted at once.

ON HIS FOURTH HUNDRED.—Mr. Edison took out his 301st patent on the 12th of March.

Lodge Locals.

Recorders are invited to correspond. Members may also find suitable reading here for "good of the Order" in the Lodge.

Ashler, 165.

This young and enterprising Lodge meets in Odd Fellows' Hall, Alameda, on Tuesday evenings. The Lodge is now a little over one year old and has a membership of 60, representing largely the leading men of the town of Alameda. A prominent feature of this Lodge are its periodical literary entertainments, which have become one of the chief attractions of this thriving city. The meeting on Tuesday evening, May 24th, was one of more than ordinary interest. First, after usual business, was an arrangement to have a floral celebration, to be held on the 31st of May, combined with literary exercises. Second, a large delegation from Alameda, No. 5, including C. H. Haile, Grand Receiver, who were received with honors. Under head Good of the Order, Bros. Wm. Sanderson, and C. H. Haile, G. Rec., made short speeches. A significant remark was made by Bro. Haile: Since I have been Grand Receiver I have paid over $250,000 under beneficiary certificates. The last one was paid nine days after notice to the Grand Recorder; promptness and certainty being distinguishing features of our Order. Bro. Turner, of Harmony, No. 9, was called and made some very interesting remarks, followed by J. A. Forbes, Overseer of Alameda, No. 5. The M. W. of Ashler, Bro. Wheaton, who is a very efficient officer, then made a few remarks welcoming the visiting brethren and announced that, following their custom, the brethren might consider themselves free from restraint. Bro. Wheaton, as Master of Ceremonies, with the assistance of two of the brethren of Ashler, proceeded to unroll and hold to view about 50 feet of canvass, on which was painted caricatures and local hits on the occupation of a number of the brethren, and ludicrous and prominent scenes in every day life. As each picture was brought out, Bro. Wheaton, in his inimitable and interesting manner, explained and commented thereon, much to the gratification and amusement of his audience. There seems to be a vein of good humor, cordiality and interest among the brethren, and pride in their Lodge, that stamps Ashler as one of the live and thrifty subordinates of Workmen.

Colusa, 66.

EDITORS WATCHMAN:—One of the memorable events in the history of all Lodges occurred at Colusa on the 17th ult., being nothing less than a fraternal visit from G. M. W. Barnes. Preparations on a large scale had been made by the Lodge for a grand reception, and when the Lodge was called to order over 60 Workmen were present. Nos. 114, 115, 117 and 170 were well represented, besides other brothers from San Francisco. Bro. Barnes presided, and after exemplying the work of the J. W. degree, conferred the M. W. degree on one candidate. After the Lodge was closed, all present repaired to the Colusa Theater, where an assemblage of about 400 were in waiting. Bro. Barnes was introduced and delivered an address on the Order, setting forth its many good points in his usually forcible manner. After this, songs, recitations, etc., were rendered by some of our home talent, when Bro. Barnes was called out, and after asking his audience to forget for a while that the Grand Master was present, proceeded to amuse the audience in his inimitable way for a short time. Those wishing to dance were then invited to Spect's hall, and some 75 couples accepted the invitation and engaged in a social hop till 2 o'clock. Altogether the whole affair was a grand success, and will, as a brother from 170 remarked, prove a benefit to every Lodge in this district. Colusa Lodge expects to increase its membership one-third within the next three months, for the people of this community begin to realize the advantages of "this system of protection for those near and dear to them," and are asking admission at our gates.—Fraternally, in C. H. and P., A. M. P.

El Monte, 188.

EDITORS WATCHMAN:—El Monte Lodge No. 188, gave its first banquet Saturday evening the 14th, inst. The committee on invitation were pretty liberal, and Bro. Dodson's hall was filled to overflowing, with an audience creditable to the village, who listened to the exercises of the evening with much eagerness. Bro. Geo. W. Dobyns, our Master Workman, presided, and introduced Bro. J. M. Dunsmoor, who, after delivering an address of welcome, reviewed the Order from its beginning to the present day, which was received with much enthusiasm. Bro. C. Soward closed the exercises with a few witty remarks, and invited the assemblage into the banquet-room, where the tables fairly groaned with goodies which the *Sister Workmen* (who are heart and soul in the work) had prepared. After supper all joined in "tripping the light fantastic" till 12 o'clock when the band played "Home, Sweet Home," and all returned to their firesides with the feeling that the A. O. U. W. would not break the Lord's day by feasting and dancing, even in El Monte. The result of our banquet is already seen, as several applications are now in, and more in the hands of the brothers to be presented at our next meetings. Yours, in C., H. & P., W. T. GERMAN, Recorder.

El Dorado, 118.

EDITORS WATCHMAN:—Our Lodge was instituted July 29, 1879, with 21 members. We now number 50, and have taken in 11 members during the last month. All of them are among our best citizens, two being physicians, three lawyers and one Superior Judge—Gen. E. Williams. He has no superior as a lawyer or judge in the State. We have lost one member by drawing out and joining a Lodge in San Joaquin county, that being the only member we have lost from any cause. I believe that we are working up to average with Lodges in the interior. All of the officers try to do their duty and the members render them all the assistance possible. We expect a large increase this summer.—I remain yours in C. H. P., SENECA DAVIS, D. D. G. M. W.

Yolo, 22.

The *Yolo Mail* of May 14th says: Saturday was a splendid day for the Workmen. A cool breeze tempered the heat of a tropical sun, making the day balmy and pleasant, and a large gathering assembled at Coil's Grove, insuring the success of the affair financially, and causing the picnic to be one of the most enjoyable occasions of the season. The picnic was the more enjoyable because no excursion trains were run, and the assemblage represented Woodland and Yolo county people almost entirely. The festivities of the day were inaugurated early in the morning by a grand street parade of the members of the Society, headed by the Ellis band. The procession formed at the Odd Fellows' Hall, under the commaad of Grand Marshal James Viers, of Woodland, and Deputy Marshal A. M. Ayers, of Cacheville, and the body paraded up and down Main street several times, making a very presentable appearance in their appropriate and beautiful regalia. About ten o'clock the company disbanded, the majority of the members taking private conveyances for the picnic grounds. At the grove a large crowd had collected early in the day and the scene was a very animated one. Dancing, and various games and sports were in progress, and pleasant groups of people were scattered over the grounds, engaged in merry chat and divers amusements. When the main body of the Workmen arrived, at noon, the usual anniversary exercises of the Lodge were had, Mr. J. K. Smith, President of the day, called the meeting to order, and introduced the orator, Grand Master Workman, Wm. H. Barnes. He spoke at some length, considering subjects of general interest to the organization. After prayer and singing, the meeting adjourned, and the dinner hour was announced. Dinner was served at the refreshment stands and by different groups of pleasure seekers throughout the grounds, and the vigorous exercises of the morning did much to insure the success of this part of the picnic. The afternoon passed very pleasantly, everybody seeming to have a good time. During the entire day the platform was filled with dancers, who raced with time until dusk had almost come. Towards evening the crowd commenced leaving for home, and for an hour or two the roads leading from the grove were thronged with teams of all descriptions. In one sentence, the picnic was a quiet, social occasion, and gave pleasure to all who attended.

San Francisco Lodge Locals.

Bernal, 19.

The meeting of Bernal, No. 19, on May 2nd, was quite entertaining. One application was received. After the usual routine of business, the Entertainment Committee, G. Powell, P. M. W., Chairman, callled on and introduced the following programme: Remarks, A. A. Egleston, D. D. G. M. W.; reading, Bro. Houghton, P. M. W.; instrumental music, Bro. Frank Stewart, who often favors his brethren with his versatile musical genius. On other occasions he has played on six instruments at one time. On this evening he played on two, accompanied by song; reading by Bro. R. T. Delano and Bro. Sanchez, P. M. W. It was an enjoyable and well spent evening, in keeping with the reputation of this Lodge.

Burns, 68,

The monthly literary exercises of this Lodge are very attractive and profitable. The last one was carried on by the following, the Lodge room being well filled: Song, Bro. Desmond; Shakesperian reading, by Bro. T. Maher; solo, by special request, Bro. Geo. Brenner, of Valley No. 30; reading, Bro. N. S. Wirt. A local parody on the members of the Lodge by the Recorder, Bro. Pohlman, proved a good hit and afforded much amusement; reading, by Bro. Fusier; recitation, by the Foreman, Bro. Chas. Wilson; song, Bro. Thompson, closing with a solo by the Financier, Bro. Fairweather. At their last meeting a proposition was entertained to admit ladies and the young folks at their next social, as also to have them take part in the literary exercises. This Lodge is steadily increasing in membership, and their Lodge meetings are always pleasant and interesting.

The entertainment given by the brethren of Burns was one of the real enjoyable evenings of the last month. The business of the Lodge was hurriedly passed and the programme was opened by well-timed and appropriate remarks by Brother Doherty, M. W., followed by a piano solo by Miss Fairwether, (daughter of Brother Fairwether, Financier), an effort that was well applauded; duet, Messrs. Brahmer and Fairwether; recitation, and encore, H. N. Mayhew, D. D. G. M. W.; recitation—tragic, Brother T. C. Maher, one of those masterly efforts that is seldom heard and was most enthusiastically recalled; solo and double encore, Brother Gus Pohlman, who in his inimitable and unique manner called down the house time and time again. Mr. Jester, in impersonations and ventriloquism, proved the attraction of the evening. Solo and encore, Miss Linda Hoag; comic recitation, Dr. Wilson, which created no little amusement; song, basso, Brother Bremner, well rendered and heartily applauded; trio, the Scotch drinking song, Messrs. Bremner and Bremner and Linklater, Mrs. Linklater presiding at the piano. A very artistic and pleasing performance that was well received and was a fitting close to one of the most interesting Lodge socials of the season.

Friendship, 179.

This young subordinate has had a series of misfortunes in various ways since her organization, business calling her Master Workman away from the city in each term. Her presiding officers have been very efficient and active, and her present Master Workman, Bro. G. L. White, is equal to any they have had heretofore. They are moving steadily along, having work on each evening. Their membership is now 61, and several applications. On Wednesday evening, May 11th, the M. W. degree was conferred on two. The same evening they elected Dr. Jas. G. Jewell medical examiner. The name they have—Friendship—is really significant of the cordiality and fraternity existing among the members. In this respect they are not excelled by any Lodge in this jurisdiction. It is always a pleasure for visitors to call on the brethren of Friendship.

Franklin, 44.

May 8th, Franklin, No. 44, passed a very pleasant evening. The M. W. degree was conferred on one, and a petition for one was read. Under head Good of the Order, Bro. B. F. Bean, an artistic violinist, amused his audience by harmonies and imitations of other musical instruments and animals, Bro. Chas. Hoffman accompanying on the organ in part of his exercises. Speeches were made by several brethren, and a real cordial and profitable meeting had. It seems to be a settled policy in all our city Lodges to utilize their local talent by having literary exercises at the close of their Lodge work. In these exercises Franklin, No. 44, need not be in the rear, as she has the local talent among her membership to give a first-class entertainment at short notice. From what we heard from individual members of this Lodge, we may expect a large accession to her membership in the near future.

Golden Gate, 8.

Golden Gate, No. 8, under the present administration is moving to the front with her old-time prosperity. At their meeting on the 19th inst. several applications were received and the J. W. degree conferred on seven candidates, in a manner that was very creditable. There was a large attendance, and a vein of cordiality and good feeling noticeable throughout the evening.

Hercules, 53.

Hercules gave an exceedingly interesting entertainment on Friday, May 20th. The programme was started by Bro. Manzer in an interesting opening speech, after which he introduced Miss Ruly Manzer, who gave a fine solo on the piano. Then came Master Meyer and sister on violin and piano, followed by Miss Normie Northey in song and piano solo. Bro. Carroll gave a solo on the guitar. The song by Mrs. A. C. Diggins was heartily applauded and encore demanded and given. A solo on the organ was given by Bro. Rhind, after which the entire Lodge joined in singing the ode. The entertainment was in keeping with the reputation of the Lodge, the performers all done well, and everything passed off pleasantly. The following was the entertainment committee: Bros. Manzer, Carroll Sr., and Dodge. No. 53 is one of our "outside" Lodges, but it ranks with the leading subordinates of the city in vim and activity.

Myrtle, 42.

On Saturday evening, May 7th, the brethren of Myrtle were paid a visit by Geo. T. Shaw, D. D. G. M. W. The business of the Lodge was attended to, amongst which was the drawing of a draft on the General Fund, of 25 cents per capita, to pay the Supreme Lodge assessment fund. Under head "Good of the Order," Bro. Shaw made a few pertinent remarks that were well received, followed by Bro. Barry, P. M. W., in one of his humorous and felicitous speeches; reading, Bro. Shuck, P. M. W.; recitation, Bro. Morris, Financier; solo, Bro. Bogart, Organist. Bro. Thomas, of Unity, 27, was called upon and made a few well-timed remarks. Myrtle manages to have these literary exercises at each Lodge meeting, and they are always acceptable to members and visitors.

Magnolia, 41.

This Lodge will give an anniversary party, Thursday, July 14, 1881, at B'nai B'rith building. The following Committee of Arrangements have been appointed: Bros. J. Hoesch, Chairman; J. Davis, P. M. W.; M. Warshauer, Jacob Gans, A. N. Levy, Wm. E. Cody. From what we hear, and knowing the Committee appointed, we predict a very enjoyable party.

Valley, 30.

On Wednesday evening, May 4th, Valley, No. 30, held one of its grand meetings. Laurel hall was completely filled with Valley's own membership, including a number of visitors. The business of the Lodge, which looks after the interests of 800 members, was attended to with strictest care. Among some items was the donation of $50 to a distressed brother. One brother from Sacramento joined by card. A number of petitions were read for the degrees. Wm. H. Barnes, G. M. W., and E. F. Loud, D. G. M. W., being present, by invitation acted as M. W. and Foreman, and with the assistance of the officers, conferred the J. W. degree on 14 candidates with that correct and dignified manner that was alike impressive and praiseworthy. A very pleasant and sociable recess was had, after which the M. W. degree was conferred upon 11 candidates by the same officers. Under the management of her officers and leading members, who watch and work for this Lodge, it is now, as it always has been, the pride of her members, as well as every brother Workman. Sojourning brothers can always spend a pleasant evening by calling at Valley, No. 30.

Following the very interesting meetings, the one of May 18th was equally so. Five petitions were received; five received the J. W. degree and 14 the M. W. degree. There was a large attendance. A part of the evening the large hall was comfortably filled.

Washington, 60.

The quiet and steady manner in which this Lodge has advanced in membership is a noticeable feature of its history. On each night they have one or more candidates for the degrees. The membership has now reached 193, among whom are a number of our solid merchants and leading business men of San Francisco. A prominent trait in this Lodge is that there are no suspensions for non-payment of assessments. On Thursday evening, May 12th, the degree of M. W. was conferred on one. The work was correct and given in a manner that reflected honor on the officers. As a rule there is generally a very good attendance, and a fraternal feeling and cordiality exhibited among the members. Under the guidance of their organist, Bro. Geo. A. Knight, the musical part of the exercises are unexceptionably good. It is safe to predict that in this term they will pass the 200 mark.

Yerba Buena, 14.

Wm. H. Barnes, G. M. W., paid this old pioneer a fraternal visit on Friday evening, May 6th. In the course of his practical remarks he said: "My work is one of labor and of love in making visits throughout this Grand jurisdiction. We have issued over 1,000 certificates since the first of February. I have traveled extensively in the past month and it affords me pleasure to say that the extraordinary interest and favor with which this Order is received is quite satisfactory and gratifying. In my addresses the public halls could not hold those who wished to hear the principles of our Order discussed. At Chico I had the pleasure of addressing 4,000 at Gen. Bidwell's grove. History will record the survival of the fittest in the beneficial societies of our land. From my knowledge of the status and *personnel* of our membership in this State I believe our Order will live on side by side with the older and honored fraternal societies when we shall have had our certificates paid and our places taken by the coming generation." Under the present administration of this Lodge, assisted by the brethren, there is an unusual degree of prosperity. The degrees are conferred on one or more on each meeting with hardly an exception. This Lodge pays weekly sick benefits and are painstaking and watchful in looking after the interests of their members. Each Lodge in our jurisdiction has some peculiarity that is noticeable to the careful observer; one of these we believe is this—that for stalwart men and those of large stature Yerba Buena excels any Lodge in this city. It is rumored that a fine windfall is in store for this Lodge as soon as the necessary steps can be taken in preparing the papers. We hope to be able to say more about this in the future.

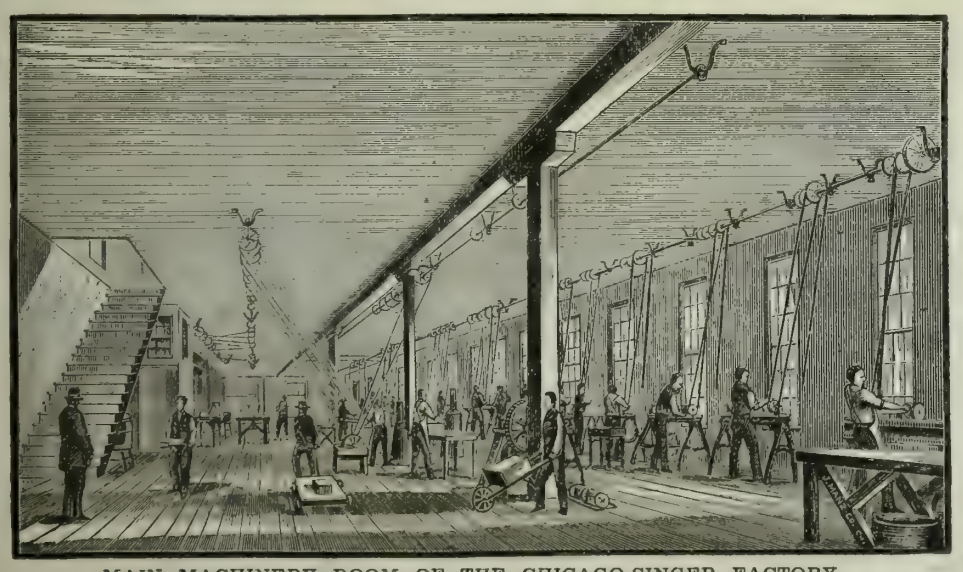
DOWN WITH MONOPOLY!!

Sheldon's

ANTI-MONOPOLY

Sewing Machine Depot,

130 Post Street, San Francisco.



Although the patents expired years ago, the old monopoly companies hold to their high price system and defraud the people of their just share in the benefits of the patents. They cannot afford to reduce prices now, because they still continue their expensive plans of disposing of machines, making it cost them five or six times the actual original cost of the machines to sell them, or in fact to force them on the people, as they do, whether wanted or not.

All this is Changed at Sheldon's Establishment

BECAUSE the Agencies for a number of first-class machines are combined under but one expense, and that a very light one, no ornamental offices or salaried agents to pay, and prices reduced accordingly.

For Thirty years a corporation was protected in their monopoly of a patent, but now the privilege of monopoly having expired, the people are given the free use of said patent, and an independent company has been organized, who propose to furnish the machines of this same patent at a reasonable profit, and are now making the

Velocities of Wood-Cutting Tools, &c.

Circular-saw teeth, 6,000 to 9,000 ft. per minute; band-saw teeth, hand feed, 3,000 ft. per minute; band-saw teeth, power feed, 4,000 ft. per minute; gang saws, 20-inch stroke, 120 strokes per minute; scroll or jig saws, 800 to 1,500 strokes per minute; planing and moulding cutters, 5,000 ft. per minute; shaping and carving cutters, 6,000 revolutions per minute; Daniel's planer cutters, 8,000 ft. per minute; machine augurs, 1½-inch diameter, 900 revolutions; ⅝-inch diameter, 1,200 revolutions; ½-inch diameter, 1,800 revolutions; rod and dowel machines, 1-inch and under, 3,000 revolutions; 2-inches and over, 2,000 revolutions; mortising machines, heavy work, 350 strokes per minute; mortising machines, light work, 700 strokes per minute; tenoning cutters, 2,500 revolutions per minute; emery wheels, 6-inch diameter, 3,200 revolutions; 12-inch diameter, 1,600; other sizes in proportion; main shaft for wood-shops, 350 revolutions per minute.

It is quite a common error to give too great a speed to saw teeth. They should not scrape, but cut out the kerf, and all should work evenly. With a moderate speed, the cutting edges and throats being in good order, the greatest useful effect will be obtained from a given amount of power, and the teeth will be most readily kept in order.

JAS. H. MILLER, Tucson, A. T., wishes to hear the whereabouts of Alphonso Miller and sister, who were in Marysville, Cal., in 1866.

DISINFECTION OF SHIPS.—San Francisco is, like most seaport towns, particularly liable to small-pox epidemics. It is, in fact, in a worse condition in this respect than most cities, since it is here that the Chinese immigrants first touch our shores. Our quarantine laws, though good in themselves, are not always administered so much to the satisfaction of the citizens as to the passengers on the steamers. The steamers are disinfected, or supposed to be, as soon as the passengers leave, for they must be ready for the return trip in a few days. In this connection it will be a matter of interest to know the system of disinfection for ships adopted by the medical experts of the Australian government, which we take from the *Scientific American*. It is as follows: Sulphur to the extent of 12 grains per cubic meter of the space to be disinfected was first burned in an earthenware vessel or basin, placed in the center of a mass of sand to prevent all risk of fire; every article of clothing, all the linen, etc., were hung across the cabin, the latter being then hermetically closed for three hours, and afterward exposed to the strongest possible drafts of air for 12 hours; finally, the walls, floor, ceiling, etc., were washed with one kilogramme of lime, or one-half kilogramme of chloride of zinc, to every hundred liters of water.

New Application of the Link-Belt.

The varied and far-reaching applications possible to a new and valuable invention are rarely seen at the outset, but develop from time to time, as the employment of the device becomes more general and wide-spread. The growing application of the link-belt is no exception to the this rule. This invention, which has long proved very useful in many ways, has recently found an entirely new application—to the propulsion of stern-wheel steamboats. In the past there has been no transmitting agent that would stand the exposure incident to driving the paddle-wheel of a stern-wheel steamer except the cumbrous beam, which must be duplicated, and, of course, with two engines occupying a large amount of space and weight of material by reason of the peculiar duty to be performed and slow motion required.

During the past year an enterprising firm in Chicago has substituted the link-belt for the beam, which device allows the engine to be placed nearer to the center of the boat, requires but one engine, and that of small size, by reason of the increased speed which can be employed. By this device a comparatively small engine may be employed, as simple as an ordinary sewing machine, and yet of sufficient power to drive the largest of the class of steamers alluded to.

Another important advantage gained by use of the belt is the facility with which the floats of the paddle wheel may be adjusted to the varying draft of the boat; for the wheel is so mounted that it may be readily raised or lowered bodily, even when in motion, without any derangement of the machinery. The vast number of uses to which this improved elevating and conveying device may be put, and its great capacity as a labor-saver in mechanical industry, is securing for it a most favorable reception among progressive mechanics everywhere.

ASHES AS EMERY.—A manufacturer whose business requires the use of large amounts of emery, has been trying an experiment with the ashes of anthracite coal, and he affirms that he has obtained good results from the use of ashes as a substitute for the finer grade of emery. He takes ashes and saturates them with water, the liquid being poured off after standing an hour or two, then being poured off again, and so until he obtains several grades, down to a substitute for emery flour. When dried, the deposit cuts readily and leaves a satisfactory surface.

Insurance.

THE
NEW ENGLAND MUTUAL
Life Insurance Company,
OF BOSTON,
All Policies in this Company are Governed by the Massachusetts Non-Forfeiture Law.
The only Company on this Coast Governed by this Law.
This Company was incorporated A. D., 1835, and has accumulated Assets of
$15,000,000.
THIS COMPANY HAS PAID OVER
$150,000 on this Coast
for Policies that had Lapsed from a Few Days to nearly Five Years.
In the above cases the full amount of the Insurance was paid less the overdue premium. Had these policies been in any other company doing business on this Coast, they would have been forfeited.

Amusements for the Young.

A favorite amusement with the young, and often relished by "children of a larger growth," is the construction and parading after nightfall of jack-o'-lanterns. The golden pumpkin is taken from the store within the granary or chosen from frost-bitten vines, and having been subjected to the process of "scooping," is made ready for the chisel of the embryo sculptor. With cunning hand our young artist applies his unerring jack-knife to the glistening rind. At first he traces with delicate touch the outline of features, which he possibly intends to be majestic, Jove-like in their effect upon the beholder. The form of the features having been determined on, the chiseling knife cuts deeper until only a paper-like thickness of the inner rind remains. The fragment of a tallow candle is then inserted through a hole in the top of the disemboweled pumpkin, and the lantern is ready for exhibition. When the candle is lighted and carried into a group of children, as shown in the engraving, it is a source of infinite amusement to the larger ones, though occasionally, as in the scene before us, the "wee small childre" appear startled, and if we did not know the origin we think few of us could withstand such a genii-like glance as flashes from the outre features of the average "jack-o' lantern."

This pleasant pastime is particularly appropriate to the country. There amusements of different sorts are not of such frequent occurrence as in the populous centers. The people must therefore have recourse to such changes from the regular routine of every-day life as will make their surroundings more comfortable. By taking the children into their pleasures, giving them all the healthful enjoyment possible, it will cause them to look back with fond memory to their early scenes and treasure in their minds sweet recollections of their childhood days. It will also perhaps lay the foundation for that lightness of spirit essential to meet the many trials and vicissitudes of fortune they may encounter. By all means let light and gladness be the lot of youth: they will have enough of sorrow and care in old age.

AN OLD-TIME SPORT FOR YOUNG PEOPLE.

AMONG the propositions that will be presented to the Supreme Lodge are the following: To abolish the square and compass as emblems or tools, and substitute the shield or anchor; to condense the Degree of Honor; an unwritten work for said Degree; to prohibit the issuing of beneficiary certificates, "subject to will," or "payable to order;" to provide for the payment of such certificates where parties have died and left no "order" or "will;" to change some features of the installation ceremony; to substitute a badge for the sashes now worn by ladies of the D. of H.; to change the Relief Law so as to avoid the keeping of a separate fund for that purpose.

DO NOT fail to go to our annual picnic; it will be the grandest gathering of the season.

PRESENTATION IN MAGNOLIA.—Under head Good of the Order, Bro. Goldsmith, in a humorous and solemn manner, presented to the M. W., Wm. E. Cody, and to the Foreman, Bro. Tyler, a pair of gavels. The size was somewhat out of proportion to those generally used in the Lodge-room, the handles being about four feet long. They were accepted on condition that the donor would have them silver-mounted. A motion was made and carried authorizing a committee to purchase a new pair of gavels, more appropriate for the uses of the Lodge.

FAIRFAX is situated about eight miles from San Rafael, amidst the most romantic scenery in the State. There are no better grounds than those at Fairfax park.

The Revised Bible.

The new version of the Bible is the principal topic of conversation in many circles. The great preponderance of opinion in this country seems to be that it will finally be accepted by the people. It is interesting to note the manner in which both American and English revisers proceeded in their work. The English and American committees worked separately, each making a list of changes which they thought advisable. Then these were compared and it was found that about sixty per cent. of the proposed changes agreed. Dr. Philip Schaff, of New York, one of the revisers, thus relates what became of the rest: "Of the suggestions proposed by the American committee, and not by the English advisers, more than half were adopted after a consideration of our arguments in their support. The change which we suggested and which the English committee refused to sanction, related chiefly to archaic expressions which we desired to replace by modern forms. The English committee, however, upon the ground that it was essential to the success of the work to make as few changes as possible, in order that the new Bible might read as nearly as possible like the old. We agreed with them, but nevertheless thought that, especially in this country, modern forms of speech, understood by every one, were desirable. As we are in some sense responsible to the American people for the accuracy and value of our work, we insisted as a matter of right to ourselves that our suggestions should be incorporated in the American edition of the Testament issued from the Oxford presses. The appendix will not be a long one, perhaps not more than a dozen pages, and Americans can choose for themselves between the two texts."

Of course in a work of this kind which has been woven, so to speak, into the very hearts of the people, there must necessarily arise antagonisms to the changes made. But the eminent learning and ability of the revisers is a guarantee that the work was well done. It was also necessary to make the revision on account of the many errors in the King James version.

Home Miscellany.

Home.

Paint me no picture, artist,
Of landscapes, birds or flowers;
Paint me no twilight scenes of lore,
Nor grand nor massive towers.

Paint me no Alpine scenery,
Neither blue Italian skies,
But paint me, instead, I pray thee,
The blue of my father's eyes.

Paint me no saintly Madonnas,
Paint me no womanly grace;
But paint me, oh! paint me, artist,
The lines of my mother's face.

And paint, nay in New England,
Beneath the low drooping trees,
In the shade of the murmuring forests
In the sound of the mountain breeze,

A low brick house, and humble,
And there right beside its door,
The sweet, old-fashioned white roses,
And the woodbine climbing o'er.

The dooryard smooth and grassy,
The apple trees all in blow,
And the dear, quaint, wide old garden,
With its seed beds in a row.

And paint it true, good artist,
Ah, paint ye it strictly true,
Put on the trees no brighter green,
On the flowers no deeper hue.

Sing me no songs, oh masters,
That ye find in time-worn books,
But sing me the songs everlasting,
Of the glad and joyous brooks.

And ripple them over the meadows,
Follow them under the hill,
Blend them with sighs of the pine tree
And the wild, wildwood birds trill.

And soften them, good master,
With the patter of the rain,
As it fell in days of childhood,
So soft on my window pane.

Then from the dim old forest,
Catch an echo deep and long,
To weave with thine other fancies,
Oh master, into my song.

And when the sun is sinking,
Way beyond the purple hills,
And the mystic cloud of twilight,
My heart and memory fills,

I'll sing them o'er, good master,
While the stars their vigils keep
Till I fall 'way into dreamland,
And murmur them on in my sleep.

—*Woman's Journal.*

A Reconciliation Party.

"I should like to do it, Tom," said the genial plump old gentleman; "your return from India gives an excellent opportunity."

"Humph," rejoined the bronzed young soldier, who was lazily smoking on an easy lounge; "you'll find it a tough job, I expect."

"Perhaps, but—ah—it would please me greatly to see a reconciliation between your aunts—the only living relatives I have, except yourself. See?"

"I *hear*, sir, which is much the same, I suppose."

"You were such a boy when you went away, you can hardly remember them, I should say."

"Oh, yes I can, though. By Jove, I should think so! Aunt Maria Pringle on her way to chapel with a big Bible, and Aunt Jane *en route* for All Saints' with a large gold cross on her prayer-book, and the two passing each other without a nod was too impressive to be forgotten."

"My dear boy," expostulated the kindly old father, "isn't it just a little—ah—uncharitable only to remember—ah—the sore point."

"They gave me nothing else to remember them by, sir," replied the young man; "but don't let me damp your ardor. I shall be only too glad to help on anything that pleases you."

"That's kind of you, Tom; and as you have offered to help me, perhaps you wouldn't mind—ah—leaving the little—ah—invitations for me, and adding a friendly word of your own?"

Tom acquiesced, and watched his father's shiny bald head reddening with the warmth of his feelings as he indited the two notes which were to bid the belligerent sisters to the Christmas dinner; and as he watched the simple-hearted old gentleman he wondered how two such women as Mrs. Pringle and Mrs. Mace could be his sisters.

"There, Tom; no distance between the two houses, you see," said Mr. Blossom, handing his son the notes.

"Old cats," soliloquised the young man as he buttoned his great coat. "They live near enough to have an opportunity of showing how they hate each other daily, I suppose."

It is remarkable the influence a returned relative has when sick-leave is the result of a slight wound, and his face is a handsome one. Tom Blossom got an acceptance out of the aunts before he left them, and his father's whole evening was spent in continually rubbing his hands to express his satisfaction, and in adding suggestions as to good dishes for the Christmas dinner.

The seldom-used drawing-room was brilliant with fire and candle-light. Mr. Blossom stood on the hearth rug, ready, with beaming smile and hearty greeting, for the coming guests.

"Mr. and Mrs. Pringle," announced old Mead, the butler.

Aunt Maria was very tall and angular, and her high cap made her more imposing—she quite eclipsed her husband, a nervous little sandy-haired fellow.

"A merry Christmas," cried the beaming host.

"The same to you, John," replied Mrs. Pringle; and the husband wriggled about in the endeavor to show that he was as merry as anybody else.

"Mr. and Mrs. Mace."

Aunt Jane was a bantling little woman, with a sharp voice, and spectacles worn over very sharp eyes. She promptly responded to her brother's and nephew's greetings, as did her husband, and then came a pause, during which little Mr. Pringle's hands got damp all over, and tall, good-natured Mr. Mace twiddled with the bow of his necktie. Tom felt the awful moment had come.

Mr. Blossom coughed, and then, with a bow, possessed himself of one of Jane's and one of Maria's hands, and standing as a link between the two, he said:

"You have both done me a great kindness. This season is so full of peaceful, affectionate associations!"

"My dear brother, I know my *duty*," solemnly murmured Aunt Maria.

"I hope we both do!" sharply corrected Aunt Jane.

"O, I *know* you do; you are both most excellent Christians; and all I ask of you is that you will shake each other's hands in friendship before we sit down to our Christmas dinner."

"I never wished it otherwise," said Aunt Maria, in a mournful tone, as she grudgingly offered her hand.

"Nor I, I'm sure," added Aunt Jane, and the cold hands met; and feeling relieved from the burden of a family feud, little Mr. Pringle rushed at Mr. Mace and shook and squeezed his fingers frantically.

"Dinner's on the table, sir."

Who needs describe a Christmas dinner? May every one who reads this enjoy such a turkey, such beef, such plum pudding as Mr. Blossom's table boasted; and may every one, as he did, carefully avoid all the small and unnecessary fripperies which are sent to the table in these days, and which, if eaten, entirely spoil the glorious harmony that follows indulgence in our time-honored Christmas fare.

"Where did you attend service this morning, brother?" inquired Aunt Maria, with interest.

"O, just round the corner; quiet little church, you know."

"Ah, you should have heard Mr. Gowny. Such passion, such fervor."

"Takes an hour, though, to show it in," remarked Mr. Mace, stupidly-good-humored himself, and unaware that he was treading on anybody's toes.

"Hush, my dear Henry!" expostulated his wife, putting her handkerchief to her mouth as if much distressed, and then apologetically continued:

"Henry is spoilt, you know; our rector is so very clever, and says so much in only twenty minutes."

"Superficial," remarked Aunt Maria, violently cutting away at the wing of a turkey on her plate. "I hope, Tom, you have not forgotten Mr. Gowny; pray come there on Sunday—he appeals so to the feelings."

"Nothing appeals to my feelings like brevity, Aunt Maria," replied Tom very thoughtlessly.

"Then we shall see you," said Aunt Jane, briskly; "and to lunch after church I hope."

"Champagne, ma'm?" inquired Mead, wiser in his generation than his betters, and just saving Mrs. Pringle from going off.

"Don't be afraid of it, Maria; I know it's safe and sound," cried the hospital host; "and Jane, my dear, *your* glass is empty! Look after her, Tom."

"All right, father. Let me keep this pudding alight, though," and as the flames arose and made the sprig of holly crackle, he thought how much nicer it would have been if he and his father had been alone, for his aunts' faces reminded him of snap-dragons.

How comfortable the husbands were! They really liked each other, and for one evening their Christian wives allowed them to show it. They had got as far back as the time when they played football together, when Aunt Maria made a move for the drawing-room, followed by Aunt Jane. Having stood attention, with their table napkins in their hands while the two elderly women filed out, they returned to hot punch and early reminiscences, which would have made them happy for hours, but a look of anxiety on the cheery face of their host checked them. Hark! Yes, a sound of female voices in angry discussion was unmistakably heard.

"You go," said Mr. Pringle, nervously appealing to Mr. Mace.

"No, no, you go," responded that gentleman with a concerned face.

"I'll go," announced Mr. Blossom, and his hand firmly undid the door, and the others followed him, old Mead bringing up the rear.

"I was prepared for peace, but you have broken it."

"By no means; it is your uncharitable spirit."

"Sisters!" cried Mr. Blossom, and his voice was full of dignified reproof, "is this your religion?"

"It is impossible that you can understand our position, brother," said Mrs. Mace, her face crimson with mingled feelings; "you have meant well, but really, Mr. Mace, you had better send for a cab."

Mr. Mace was slowly moving to obey when the host's voice again claimed attention.

"Hold! You may think I have made a mistake in asking you here, but I don't think I did; and having good will towards you all, I do not mean that we shall part without, at any rate, an effort on my part to promote your happiness."

Aunt Maria leaned back in her chair and looked sullenly at the fire; and Jane remained standing, tapping her foot angrily on the hearth-rug. Mr. Pringle tied knots in his pocket handkerchief, and wished he had half his worthy host's courage; and Mr. Mace leaned against the door-post, looking helplessly from Tom (who regarded nothing but his boots), to old Mead, whose eyes rested admirably on his master.

"Maria and Jane, whatever bitterness of feeling there is between you now, remember, and you both remember, a time when you shared every grief and every joy, when your lives were full of pure, unselfish pleasure they have long ceased to know. What has wrought the change? Religion? Heaven forbid!" and the honest old face grew earnest and powerful in its look of appeal. "It is the fighting under first one man's banner, then another, that has soured you; and you, in your party quarrels, have deserted the ranks where our mother enrolled us as children. By the memory of our childhood and the day of rejoicing we now celebrate, I entreat you to return to the natural affection of our early years; and if you cannot agree in all things, remember that the true watchword of religion is—Love!"

"Hear, Hear!" cried Mr. Mace enthusiastically.

"'E can preach and practice, too," muttered the butler.

And the aunts? There was a silence, and then—O, good sight!—Maria rose from her chair and was met on rising by Jane, and wholesome healing tears washed away the cold barriers of years as they embraced each other in the spirit of their girlhood's days.

"More punch, sir?" inquired Mead, briskly, finding it necessary to account for his presence at the drawing-room door.

"Certainly; lots more, and small glasses for the ladies. Come, Mace, Pringle, Tom! Wake up; we don't part to-night till 12 o'clock, and then we'll drink to our next merry meeting."

And when the cheerful party ended, and the old butler had speeded the parting guests, he congratulated his master.

"It's done, sir; an' it's *well* done! I never expected it. Family quarrels is bad, sir! but bless you, them *religious* ones is wuss!"

Your Children's Friends.

I know that children's company is apt to make some trouble to a home mother, but it is a kind of trouble that pays. It makes children so much happier to have their little friends made welcome at their own home. It raises mother in their estimation to have other little folks think she is "nice." Children are sharp little critics; form their opinions, and speak of them to others, quite as decidedly as their elders do.

A little girl who had displeased her mother was "punished" by having her little playmate sent home with sharp and angry words, which were entirely unmerited. The heart of the little visitor was greatly shocked at the rude blow to her spirit and never, even to the grown up years, could look at that woman except with aversion. She was an excellent woman in the main, but she had her "cross spells," like some others we may know. Everybody appears at their worst when such spells are on.

It is an excellent thing to know with whom your children play, and how they deport themselves. If they are made welcome at your home, you have the very best opportunity of gaining this information. It need not be very irksome if you keep the number within bounds. In summer our little visitors like to sit out with their playthings on the shady porches, or in the door-yard. In cold weather they can have the warm dining-room. If disposed to run over the house, it is sufficient to say decidedly, "Don't run up stairs, please, just play in the dining-room," and I have never known a child to disregard the request.

It is worth a great deal to make children happy. They remember little treats longer than we suppose. A lady once said that one of the pleasantest recollections of her childhood was of sitting on a grassy bank, and of a fair hand reaching from a window and placing a handful of large, delicious strawberries in her lap.

I often set out a plate of sandwiches, cookies, apples, or whatever is handiest in the pantry and then let the little girls arrange them to suit themselves on this little sprigged tea-set. A little coffee and sugar and milk in their small dishes make their happiness complete.

Be a lady to your boys' friends and leave a good impression upon them, if you wish to retain the respect of your own dear boy. It hurts boy's feelings and mortifies them intensely to have mother speak snappishly to them before companions, making them feel that they are not wanted. Such boys are apt to wander away, with most resentful feelings, to seek such company as the mother would dread to have for their associates. But whom should she blame the most?—*Olive, in Rural New Yorker.*

An old man who had been badly hurt in a railroad collision, being advised to sue the company for damages, said: "Wal, no, not for damages, I've had enough of them; but I'll just sue 'em for repairs."

"I have important business—I must go hens," he remarked. "Nay, not so," said his friend; "'tis but a ruse-ter leave me."

Abe Lincoln and the Baby.

A writer in the *Inter-Ocean* tells how Abraham Lincoln's engagement with Mary Owens was broken off by a baby, in this way:

"My cousin, Nancy Green, had a great strapping baby that she was in the habit of lugging about with her wherever she went. Possibly Lincoln didn't have a passion for babies; at any rate, he was not in love with this one. Well, at the time I mention, Lincoln had grown very fond of Mary Owens, and she seemed to take quite a fancy to him. They were together a good deal, and finally, as was understood, became engaged. One day Mary and Nancy Green were going a mile or so to a neighbor's, and Lincoln went with them. As usual, Nancy took the baby and trudged along with it, although it was a heavy weight for her. Perhaps she expected that Lincoln would offer to shoulder the boy himself for part of the distance, and so relieve her, but if she had such expectations they were not realized, for he put his hands in his pockets and leisurely sauntered by the side of Mary Owens, without a glance toward the baby. Pretty soon Mary became cold, and answered Lincoln with short and curt sentences. Then she refused to talk with him at all, and by the time the end of the journey was reached she fairly withered him with her glances. Lincoln did not know, or seemed not to know, what the matter was, and at last asked an explanation. 'What's up, Mary?' said he, 'you seem to be in bad humor.' 'Oh, no,' she replied, mockingly. 'I'm ez purring and good-natured az a kitten. What is there to ruffle a body, my gracious!' "It's something I've done, I suppose,' said Lincoln. 'No,' replied Mary, tartly, 'it's nothing you've done. It's what ye hain't done, and that's what's the matter.' 'Well, what is it,' replied Lincoln. 'You don't know of course,' responded Mary, disdainfully. 'No, I'll be hanged if I do,' said Lincoln. 'Well, I'll tell you,' said Mary. 'You've walked yer for more'n a mile with us—a great, strong feller like you—and let that woman carry a baby what weighs nigh unto 40 pounds, and never so much as lifted yer finger to help her. That's what ails *me*.' 'Why, she never asked me,' said Lincoln. 'Oh, she didn't! And you hadn't politeness enough to offer to help her, but must wait to be asked.' 'Why, I never thought of it,' returned Lincoln.' 'I always supposed she would be afraid to let a fellow like me touch the baby, for fear he might break it or something. I'd carry a bushel of them for you, Mary.' 'Yes, *now*,' said Mary, bitterly. '*Any* time,' said Lincoln 'If I *asked* you?' responded Mary. 'Well, I reckon you could ask me if you wanted them carried,' retorted Lincoln. 'I just tell you what it is, Abe Lincoln,' cried Mary, getting excited, 'any man as is fit to be a husband would have offered to a-carried that child when he could see its mother near about tired to death.' 'And I didn't offer?' said Lincoln. 'No, you didn't,' responded Mary. 'And so I ain't fit to be a husband?' said Lincoln 'That's just the fact, you hain't,' said Mary, Lincoln turned about with a laugh, and didn't appear to think much more about the matter. He treated Mary very nicely, and much as if nothing had been said, but her words no doubt made a serious impression, for from that time their intimacy began to wane, and after a while there was a general understanding that the engagement was canceled."

A Warning to Girls.

A short time since a young girl named Ida Forster, a resident of this city, committed suicide at Piedmont springs, near Oakland. She was in the company of a married man, one Dodge, and the evidence before the coroner's jury was to the effect that she was in love with him and destroyed herself in a fit of jealousy. It appears that though having a wife and child, this Dodge had sought the company of Miss Forster so persistently, and his protestations of love were so unremitting, that he succeeded in weaving around her a web from which she could not escape. The girl, whom relatives and friends agree was both beautiful and good, is dead.

The scoundrel who enticed her to the brink of the precipice and then hurled her over, is alive, and, unless given his dessert by some relative of the victim, will live to destroy the reputation if not the lives of other girls. There are too many such reptiles as this Dodge in this city. The community can spare them, and it cares not how soon nor by what means they are forced under the ground. The death of Miss Forster should teach girls, who have not already learned the fact, the folly and danger of heeding protestations of love from a married man. His advances are not honorable; they cannot be honorable. The knowledge that he has promised to love another woman is reason for assuming that he utters what he knows to be false, and the fact that he cannot honorably court and legally marry the girl, should teach her that he seeks only her destruction.

There is no justifiable grounds upon which a pure, honest girl may heed the love-making of a married man. He has no legal or moral right to so address her, and she who listens to such addresses is doing a dishonorable thing which it is not the man's fault if he does not make the first step in a path that will lead her to disgrace and ruin. Girls, make it a rule of your life to hold the married man who tells you he loves you, a scoundrel, and shun him as you would the sin that destroys both soul and body —*Golden Era.*

For our Boys and Girls.

Our Puzzle Box.

Numerical Enigma.

I am composed of 17 letters.
My 1, 13, 3, is the lair of the wild beast.
My 5, 2, signifies to proceed.
My 4, 6, 8, is a fastening.
My 7, 16, 13, is to strive earnestly against opposition.
My 14, 12, 9, 11, is to close.
My 10, 8, 3, is an enclosure for certain animals.
My 14, 15, 2, 17, is a room for manufacturing or other business.
My whole was the exclamation of a dying naval commander to his men. AUNT HANNAH.

Initial Changes.

1. Change the initial of a plant and obtain a pale, sickly color.
2. Change the initial of a coin and obtain to listen.
3. Change the initial of to summon and obtain a public walk.
4. Change the initial of to bound and obtain a state of catalepsy.
5. Change the initial of to chirp and obtain a slight taste.
6. Change the initial of to degrade and obtain a part of a chain. CEPHA.

Decapitations.

Entire, I am to eject; behead me and I am to leave out; again, and I am an article of clothing; again, and I am a personal pronoun. O. G.

Word Square.

1. A black pigeon from Barbary.
2. Superficial contents.
3. To tear asunder.
4. Requested. DICK N. S.

Syncopations.

1. Syncopate a liquid measure and leave a cavity.
2. Syncopate a thin plank and leave a poetical writer.
3. Syncopate a piece of money and leave to consider carefully.

Dare to do Right.

Four boys were in the road shooting at a mark with bows and arrows. It was a very interesting sport, they thought, as they let their arrows fly at the white spot on the brown bark of the old elm tree by the road, hitting it only once in a great while, and then through chance rather than skill.

"I'm tired of shooting at that tree," said Charley Evans, "and I propose we have something else for a mark."

All the boys agreed, and a piece of board was set up against a stone for a target.

Whiz-whiz! went the arrows, and one or two nearly hit the mark, but not quite.

"I know I can do better next time," said Harry Grant, as he ran after his arrow, which was sticking in the ground close by the board. "I'll try, anyway!"

And try he did. He adjusted the arrow very carefully on the string of his bow, and took a deliberate aim.

Whiz! went the arrow again; and a shout from the boys told that something had been hit. And sure enough there had; for a hen started to run across the road between the young archers and the target just as Harry's arrow left the bowstring, and the arrow had struck her squarely on the head and knocked her over, where she lay kicking and making a rattling noise in her throat, while blood dropped out of her mouth on the grass.

"I say, Harry," cried Charlie, "here's a go! You've shot Mr. Jones's black hen, that he thought so much of!"

"Is she dead?" asked Harry, who was rather taken aback by his sudden luck in archery.

"If she ain't now she will be, pretty soon," answered Charlie. "There! she's dead now!" he added, as, with one more kick and a convulsive movement of her wings, the hen ceased all motion and lay perfectly still.

"What'll you do?" asked Johnnie Adams.

"I suppose I'll have to pay Mr. Jones for it," answered Harry.

"Why, he won't know anything about it," said Johnnie, "will he?"

"Yes, of course, if I tell him about it," replied Harry.

"You ain't goose enough to tell of it, are you? Of course *we* never shall, and if we *all* keep dark he'd never know what become of the old biddy. That's the best way. We can throw her into the creek," and Johnny gave the dead hen a toss with his foot.

"Do you think that would be the *right* way Johnny?" Harry asked, looking at Johnny with his frank, honest eyes full of brave resolution to do right.

"Why ain't it," said Johnny, with flushing face. "If you don't tell him, how will he ever know you did it?"

"*I* should know that I did it," answered Harry, "and if I did not tell Mr. Jones I should feel just as if I had lied. It would be *acting* a lie if I were to pretend to know nothing about it—wouldn't it, Charlie?" and Harry turned to his friend who had remained silent.

"I guess you're about right," answered Charlie.

"I *know* I am," said Harry. Father always told me when I had done wrong to confess it. I am sure I did not mean to hit the hen, and I shouldn't have fired if I had thought of such a thing. But it is done, and the only thing I can do is to take poor Biddy up to Mr. Jones and *tell* him all about it."

"What'll he say," asked Johnny. "You know he thought a heap of that black hen, because she was of a better breed than his others. He brought her all the way from the city last fall. He'll be madder than sixty!"

"Perhaps he will," said Harry, as he picked up the unlucky hen and started toward Mr. Jones' house, "but mad or not, I will do what is right!"

Mr. Jones was weeding in the garden when Harry came up the path. He looked up, very much astonished to see the feathered pet he had been so choice of swinging in Harry's hand as he held her by the legs.

"What's all this?" said the old gentleman, getting up from the half-weeded bed, and coming to the path.

Harry began at the beginning, and told the whole story. He kept back nothing, for he was a boy of noble principles, and to conceal anything that ought to be told was almost as bad as to keep back the whole.

"I didn't like to come up here very well, with the hen, but I thought I ought to, sir," Harry said, as he concluded his recital of the circumstances which brought the poor black hen to an untimely death.

"You did right, my boy, just right," said Mr. Jones, in his hearty, honest way. "If you had kept the matter to yourself, I don't know but I should have punished you pretty severely if I had ever found it out, for I thought a great deal of that hen, a great deal, my boy; but since you are honest enough to tell the truth, and that without any one's telling you to do so, I shan't say anything about the affair. It was nothing but a hen after all, and you wasn't to blame, though you would have been if you hadn't told me. Don't say a word," he said, as Harry spoke of paying him, "I shan't take a cent. It is worth the price of the hen to know that there is one really honest boy in the neighborhood."

Harry went back feeling very greatly relieved. He had dreaded the meeting very much, for he knew Mr. Jones was sometimes cross and irritable, and he feared he would be very angry at the loss of the hen. But he had done just as right told him to do, and the load was gone.

I hope every one of the boys or girls who happen to read this story will do just as Harry did. If they do anything unintentionally that ought to be confessed, why, confess it, and in the end they will feel all the better for it.

Household Hints.

WASHINGTON CAKE.—One cup of sugar, ½ cup of butter, ½ cup of sour milk, 2 eggs, ½ teaspoonful of saleratus, 1½ cup of flour, lemon to taste. If you wish cream cake, make two loaves, split open twice, and spread between the layers the following cream: One-half pint of milk, ¼ cup of sugar, 1 egg, ½ cup of flour; boil the milk, beat together egg, sugar and flour, and add enough cold milk to stir; stir the mixture into the milk and let it boil till done; then add ½ tablespoonful of extract of lemon; spread when cold.

RENOVATING OIL CLOTH.—Oil cloth washed in hot water or in soapsuds, or with a brush, will look dingy when dry, and soon crack and peel off; but when always washed in luke-warm water with a piece of soft old flannel, and wiped perfectly dry each time, will last longer and retain its young looks down to old age; it greatly improves its appearance to use half milk and half water. Skim milk, if not sour, is just as good as new milk. This makes oil cloth look as if varnished. Neither soap, hot water or brush should ever be used on it.

TO CLEAN MATTING.—In cleaning matting wash twice during the summer with salt and water—a pint of salt to half a pailful of warm, soft water; dry quickly with a clean soft cloth. Treated in this way the matting will not grow yellow. Or, if preferred, apply a thin coat of varnish to the matting. That will make it more durable and grea ly improve its appearance. If varnished, it will not need washing. Now and then wipe with a wet cloth and dry quickly, Use white varnish on white matting. Be sure and have the varnish thin or the matting will crack.

INDIAN BREAD.—Four cups of corn meal, 2 cups of graham (or white flour), 2 cups of sweet milk, 2 cups of sour milk, 1½ cup of molasses, 1 teaspoonful of saleratus. Steam 2 hours and then bake slowly 1 hour. If made thinner, by leaving out part of the meal, and a pint of berries added (dried or canned ones will do) it makes a delicious plain pudding. Eat with cream and sugar.

GINGER DROPS.—One cup of molasses, 1 cup of brown sugar, 1 cup of cold water, ½ cup of butter, 1 teaspoonful of saleratus, 1 teaspoonful of ginger (cinnamon is very nice in place of ginger). Stir rather hard and bake in a quick oven. Drop on buttered tins.

GINGER COOKIES.—Two cups molasses, 1 cup butter or lard, 1 teaspoonful saleratus, 1 tablespoonful ginger, flour to knead. Roll and cut in squares with a knife

Health Column.

Cancer.

Many persons undergo a good deal of mental suffering from the want of knowledge of one important fact in relation to this dreadful disease. It is this: When cancer commences, its march is steadily onward toward death, unless arrested; therefore any sore or tumor, however suspicious in appearance, which gets better, or which can be arrested by simple remedies, so that it improves or heals, is not cancer.

I do not say that such sores may not eventually become cancerous, where a tendency to the disease exists, and their liability to do so would probably be a little greater, as disease usually attacks the weaker points; but I do say that a sore that shows marked improvement from its worst condition should cause but little uneasiness or worry. It seems very difficult to determine with anything like certainty whether cancer is, or is not, an hereditary disease. Physicians are divided in opinion, just as they are in regard to the nature of the disease.

I have seen very many cases, and in all stages of development; and I am inclined to believe that the tendency to cancer is inherited—not that the disease exists as a blood poison, but that certain particles or nuclei exist by inheritance, which are liable under certain conditions to develop into cancer. I believe, moreover, that the prospect of eradicating the disease depends on its location, and upon the promptness with which the proper remedies are employed. If deep-seated, they had better be left to themselves, and efforts made to keep up the general health. If superficial, it is possible to destroy them effectually, in many cases, because they exist at first as local affections, the blood remaining for some time uncontaminated.

There resides in New York to-day, a physician, who twenty years ago lost the entire under lip by cancer. He says he arrested the disease by applying tannin to the sore every day and, on the day following, standing in front of a looking-glass, he could see small black spots in the sore; these were the upper extremities of the roots of the tumor, and, seizing them with a small pair of forceps, he would draw them out. He extracted very many in this way; in fact, all that existed. Many of these he had preserved between plates of glass and showed them to me. They were from one to two inches long, and resembled the rootlets of a plant. In *Hall's Journal of Health* for December, 1877, I gave the history of a case of undoubted cancer that was cured by electricity. The patient was a most intimate friend, and my anxiety was great, for not a symptom was wanting on which to rest a doubt as to the true nature of the disease; it had extended rapidly to the ulcerative period, and seemed to me an almost hopeless case. My associate physician took a different view of the case, and it proved to be the correct one.

His theory was that cancer was at first a local affection, an independent and foreign body, and that the system does not become contaminated until ulceration has extended far enough for the matter to be absorbed into the system; that strong currents of electricity passed through the tumor would kill it, and that in a few days it would shrivel up and become detached from its seat, leaving the wound in a healthy condition. Such proved to be the case. In five weeks from the first application of electricity no sign was to be seen that any sore had ever existed, and the patient has been in the enjoyment of his usual good health ever since.—*Cor. Hall's Journal of Health.*

ALCOHOLISM A PREDISPOSING CAUSE OF CRIME AND EPILEPSY.—In a recent number of the journal with the awkward title *Brain*, Dr. Clarke has published some tables of statistics, which lead him to the conclusion that "alcoholism of parents is a predisposing cause of crime and epilepsy in their children." Forty-four per cent. of the epileptic criminals were the children of drunken parents. The proportion of epileptic and insane relatives is found to be very much greater with criminals than with ordinary epileptics. The convictions for bastardy are three times as numerous among epileptics as among non-epileptics. The statistics show that the amount of crime, as indicated by the number of convictions, is greater among epileptics than among ordinary criminals.

PITTING OF SMALLPOX.—Dr. Swimmer advises a mask to be formed of very pliable linen cloth, leaving apertures for the eyes, nose and mouth. The inside of this is to be smeared with one of the following liniments. 1. Carbolic acid, 4 to 10; olive oil, 40; and prepared chalk, 60 parts. 2. Carbolic acid, 5; olive and pure starch, of each 40 parts. 3. Thymol, 2; linseed oil, 40; and chalk in powder, 60 parts. The mask should be renewed every 12 hours. Compresses impregnated with one of these mixtures may also be placed on the hands, and on any parts of the face with which the mask does not come into exact contact.—*Gazette des Hopitaux.*

NITRATE OF SILVER FOR WORMS.—Dr. Greensword *(Medical Summary)* was accidentally led to regard nitrate of silver as a remedy for worms. Further use of this drug has convinced him that it is one of the most potent agents we have for the destruction and expulsion of worms. He He gives a teaspoonful three times a day of a solution of five grains of nitrate of silver in six ounces of rain water.

Worth Knowing.

CAUSES OF EXPLOSION.—At a recent meeting of the Polytechnic Club of the American Institute, Mr. Allen questioned whether the laboratory experiments frequently mentioned to account for boiler explosions were fair equivalents to the conditions of actual practice. From the very nature of the settings, there can be no electrical reason for explosions. It is interesting to note that some years since Mr. Barnet Le Van made some experiments at Philadelphia, which would settle the question in regard to the effects of low water. A boiler was blown off under heavy pressure and the plates made red-hot, water was then sprayed into the boiler upon the plates; the pressure fell instantly and the boiler leaked. This should end the hot-plate and low water theories, especially as we find, in most instances, bad enough workmanship to account for all the explosions which happen.

LACK OF AIR.—Some workmen think themselves "tired," when they are only poisoned. They labor in factories, breathe air without oxygen, and in an atmosphere of death. They are, too often, allowed to smoke, and thus add fuel to the flame that is consuming them. They knock off work "tired" and listless, when they are merely weakened by foul air and made dull and heavy by an atmosphere charged with disease. They keep the windows shut and close the door on health, while they lift the gratings of the tomb by breathing and re-breathing the poison from their own lungs, and the floating particles of matter about them. Open the windows—let in the sunshine and the breeze, stop smoking, and you will soon find that it is the poison of confinement, and not labor, that wearies and tires.—*Montreal Herald and Star.*

COPYING DRAWINGS.—By a method patented by M. Joltrain of Paris, it is claimed that copies of drawings having nearly black strokes on a white ground can be made by the following sensitising mixture: Gum, 25 grammes; chloride of sodium, 3 grammes; perchloride of iron at 55° B., 10 cubic centimeters; sulphate of peroxide of iron, 5 grammes; tartaric acid, 4 grammes; water to fill up to 100 cubic centimeters. The developing bath may be a solution of ferrocyanide of potassium, red or yellow, acid or alkaline. The printing is done in the ordinary way, and the developing in a bath of red or yellow prussiate of potash. After washing the proof is put into an acidulated bath, which darkens the lines to an indigo tint, and is then again washed and dried.

PAPYROTILE—THE LATEST DECORATIVE NOVELTY.—Under this name the London *Building and Engineering Times* describes the latest novelty in products for decorative treatment of interiors. Papyrotile is neither paper or tile, but a tough, pliant fabric, in substance like leather, though artificially composed of prepared materials which result in a non-conductor of heat and sound. These quasi-tiles may be advantageously employed for wall or ceiling decorations simply by the aid of glue or other cement, and are readily cleaned by the ordinary dust brush. The decoration is applied in one or more colors to straight or curved lines, either flat or in high relief.

ASHES AS A SUBSTITUTE FOR EMERY.—We copied a paragraph on this subject a week or two since. And now comes a correspondent in the *Iron Age* who writes as follows: "A paragraph has been going the rounds of the papers that some one has discovered in anthracite coal ashes a substitute for emery. As it may save many from going to the trouble of washing ashes to try this last discovery, I thought I would write you to say that as the ashes in question contain only finely divided silex, which can be bought crushed, graded and bottled to any degree of fineness for one cent per pound, $20 per ton, it does not look as though it was worth the trouble and bother of extracting it from refuse of any kind."

A PULVERULENT LUBRICATING MATERIAL for axles, shafts, etc., is prepared by Herr Drechsler, of Dresden, thus: The finest graphite powder is worked up thoroughly with egg-white, or yellow, or both, to a firm dough, which, in a metallic vessel, is kept in a vessel of boiling water till the egg-white and yellow are fully coagulated. The mass is then dried at 90° C., so thoroughly that it can be bruised or stamped to powder. This powder is applied to a slowly-revolving axle or shaft till axle and bush take the peculiar dark shine of graphite.

ARTIFICIAL INDIGO.—One of the most interesting and promising industrial discoveries made during the past year was that of Prof. Bayer of an artificial coloring substance as a substitute for vegetable indigo. This new product is gradually coming into use in England, and, according to the *Textile Manufacturer*, bids fair to soon become a formidable rival to the vegetable product.

LUBRICATING GEARS.—Where a mill is driven by mortise gearing it has been recommended to use a mixture of pulverized chalk and linseed oil for lubricating purposes. It is said that this mixture is much better for wooden cogs than oil, tallow or flour. The chalk for this mixture should first be pulverized and then sifted with a fine sieve.

Fraternal.

Masonic.

PETALUMA is to have a new Masonic hall.

AT Watsonville, St. John's day (June 24th) will be celebrated by Pajaro Lodge, No. 110. A ball will be given at the rink in the evening.

ON the 1st of March, 1876, there was instituted Vesper Chapter, No. 20, Order of the Eastern Star, at Masonic hall, Red Bluff. The membership was, in 1880, over 90.

SACRAMENTO has living within her border one Grand Master (Samuel Crawford Denison) and four Past Grand Masters (Gov. Geo. C. Perkins, Wm. A. Davies, N. Greene Curtis and James L. English.

VESPER LODGE, No. 84, F. and A. M., was instituted at Red Bluff on the 5th of May, 1855, under dispensation, and a charter was granted by the Grand Lodge of California on the 8th of May, 1856. The membership now reaches 75. J. Granville Doll was the first Worshipful Master. During 1859-60 money was raised and a building erected in Tehama, the lower story to be used as a school building and the upper by the Free Masons. It was completed early in 1861, and on May 30th Moline Lodge, No. 150, F. and A. M., was instituted, and received a charter the following year. Henry W. Brown was the first W. M. The membership was 25 in 1880.

MRS. S. JENNIE MANN, Worthy Grand Matron of the Grand Chapter of the Order of Eastern Star, and several other ladies, representing the Grand Chapter, recently organized a Chapter of Eastern Star of Masonry in Stockton. The points to be visited on the present trip are Wheatland, Meridian, Gridley, Red Bluff, Millville, Shasta, Reading, Weaverville, Etna and Yreka. Nevada City, Grass Valley, North San Juan and Dutch Flat. Since her election as Grand Matron of California, she has been active in visiting various quarters of the State, and has instituted several new Chapters. The Order was never so prosperous in this State as now, and much of this prosperity is due to the never-flagging industry and energy of the present Grand Matron.

I. O. O. F.

TEHAMA COUNTY forms No. 28 district, and comprises Red Bluff Lodge, No. 76, and Tehama Lodge, No. 183.

RED BLUFF LODGE, No. 76, I. O. O. F., received a charter in May, 1858, and has run successfully since. Helena Rebekah Degree Lodge, No. 37, of the I. O. O. F., was instituted at Red Bluff, August 4, 1877.

IT is proposed to erect a monument to mark the last resting place of Nathan Porter, G. G The Grand Lodge endorsed the monument, and through the Secretary has issued a circular to the Lodges soliciting voluntary contributions to the extent of $2,000.

I. O. O. F.—Two Irishmen upon going into an interior town noticed these mystic letters upon the cap-stone of a building. Says one to the other: "An' phat's that mane, Pat?" "Shure and you're stupid if you don't know, Teddy! Why that's the hoight of the building shure, 100 fate, do ye's mind?"

AT the session of the Grand Lodge I. O. O. F., held at Eureka, Nevada, June 8th, the special Committee on Constitution for subordinate Lodges presented a new Constitution for their government; which was read and adopted. Among other important laws was one defining that weekly benefits shall not exceed one-half the amount of annual dues; members are prohibited the use of intoxicating liquors to such an extent as to neglect their business or family, under the penalty of expulsion; a member holding a membership of twenty-five years in a Lodge, may apply to another for membership before taking a withdrawal card; terms of subordinate Lodges are reduced from one year to six months.

FORMERLY Victoria ruled over the whole of Australia, but distance, difficulties in traveling, and increase of members, have led to the granting of charters for Grand Lodges to South Australia and New South Wales. The Grand Master at the first triennial session of the Grand Lodge of Australasia reported a total membership of 8,000, and steady prosperity throughout Australia. New Zealand sends encouraging news; and so great is the progress in Queensland that probably a charter for a separate jurisdiction will soon be granted to that tropical country. Considering the depression that has paralyzed trade in these colonies, it is clear that the merits of the Order have attracted numbers of useful members within its fold. The total of Odd Fellows under the wing of the Grand Lodge of Victoria is 4,237, distributed as follows: Victoria, 3,642; Tasmania, 260; Queensland, 244. A Lodge of 91 members in New South Wales is claimed by Victoria, but it will most likely be transferred to its proper jurisdiction before the close of the quarter. An increase of 851 members was reported for the year 1880.—*Cor. New Age.*

D. S. CARTER, in the *Triple Link*, writes: "I believe dues should be just enough to faithfully meet the reasonable expenditures of the Lodge. Odd Fellows pay higher dues than any Order extant, I believe. Odd Fellowship is today the richest fraternal organization in the world. And well and faithfully does it fulfill all of its obligations. So far, all right; but I fear these facts may lead to mercenary motives on the outside, and perchance, on the inside, which are corrupting to every principle of the Order. I believe that each Lodge should make the weekly allowance for sick benefits as nigh as possible *nil*. The Lodge should be sole judge in each individual case as to whether or not to donate, and if so, how much. Odd Fellowship is not an insurance company. It is essentially a Fraternal Order. If every member is an Odd Fellow indeed, then can we look on the world-wide family and say, all are my friends—yes, my brothers; not one will do a wrong to me, nor permit others to if in their power to prevent. This is true Odd Fellowship, and it is grand and noble; because it inspires us to honor, friendship, love and truth."

THE Providence *Transcript* relates the following incident, which occurred during the passage of the Odd Fellows' procession through Courtland street, on Anniversary day. A new house is in process of erection on the corner of Courtland and Dawson streets, and one of the Odd Fellows in the line, thinking that he discovered an old friend at work in the building, felt that it would be the proper thing to run in, shake hands with him, and then rejoin the procession; so, darting across the street, he entered what looked to him to be the opening into the cellar, as he thonght that to be the easiest and quickest way to get to his friend. Placing his hands on the sides of the openiug, therefore, he dropped in; but instead of dropping into a cellar, he found that he had dropped into a cold air box, from which there was no means of egress except by the way he came in, and the opening was far above his reach. He was obliged, therefore, to yell lustily for assistance, and after awhile some of the workmen heard his cries and rescued him from his uncomfortable position. He also found that he was mistaken about seeing a friend in the building, and as the procession was a long distance ahead by the time he rejoined it, he had quite a laugh with his comrades over what he thought was a new style of initiation.

Knights of Honor.

NO CHANGE was made in the ritual.

THE German resolution, passed at the last session of the Supreme Lodge, was repealed.

THE next session of the Supreme Lodge will be held in Baltimore, Md.

OFFICERS of the subordinate Lodges are to hold for one year, instead of six months, as formerly.

THE eighth annual session of the Supreme Lodge was held at Minneapolis, Minn., May 10th to 18th.

HON. W. B. HOKE was re-elected Supreme Dictator. Judge Breckinridge was also re-elected Supreme Treasurer.

THERE are now in the city of Philadelphia, 15 Lodges of Knights of Honor, with a total membership of over 1,000.

THE following benefits have been paid from the first organization: In the year ending May 1, 1875, 2 deaths, amount paid, $1,003 65, No. assessments, 2; 1876, 20 deaths, paid $40,000, assessments, 11; 1877, 72 deaths, paid $133,000, assessments, 10; 1878, 150 deaths, paid $300,000, assessments, 11; 1879, 463 deaths, paid $922,000, assessments, 19; 1880, 556 deaths, paid $1,101,000, assessments, 14; 1881, 678 deaths, paid $1,317,000, assessments, 13. Total number of deaths, 1,941; total paid, $3,824,003.65; total No. assessments, 80.

GEO. H. NELSON, a member of Anchor Lodge, No. 2366, died in the latter part of February, and up to the present writing his benefit certificate has not been paid. There are also several other cases of similar character, and considerable feeling is being manifested among the different Lodges in this State in consequence. The fault seems to lie with the Supreme Reporter, who is not as prompt as he might be in returning the benefit money to the heirs of the deceased members. The law says, under the duties of the Supreme Reporter, "He shall immediately upon proper notice of the death of a brother, draw an order upon the Supreme Treasurer for the amount due on said death, and forward the same to the subordinate Lodge of which the deceased was a member." In the case of brother Nelson we are assured by the members of the Lodge that all the forms necessary have been complied with.

ANCHOR Lodge, No. 2366, has attained a remarkable growth for an infant of but four months. She has already doffed her swaddling clothes, and takes the position of active youth. Her roll shows a membership of 110, and with the applications for degrees will make about 130 members by the close of June. We congratulate this youngster, and say go on and prosper. You bid fair to be the leading Lodge of this Order in the State of California.

TANCRED LODGE, No. 1927, gave a musical and literary entertainment at its hall in Shiels' building on Monday evening, June 6th. The hall was neatly and tastefully decorated with palms, etc. The following programme was given: Part first—Wedding March, Mendelssohn, (two pianos and eight hands), Messrs. F. Haesters, R. L. Yanke, F. Lust and H. Curtaz. Recitation, Z. U. Dodge. Vocal solo, Miss Emma Ellinghouse. Reading, Thomas D. Riordan. A vocal solo (in German) was then given by F. Urban, comedian of the German Theater Company. The gentleman has a splendid voice, which he uses with fine effect. J. A. Campbell gave a recitation entitled "My Pipe" in good style. The last piece of the first part of the programme was "La Favorite de Vienne"—Tershak—given on the flute and piano, by Messrs. S. Fleishman and F. Haesters, which was loudly applauded and was rendered very finely. Part second of the programme opened with "Athalia March," Mendelssohn, (two pianos and eight hands) by Messrs. F. Haesters, R. L. Yanke, F. Lutz and H. Curtaz. A fine performance of high art music. An essay entitled "One Hundred Years Hence" was given by Miss Alice Rhine. It was read by the young lady at the High School exercises, and was received with so much favor that she was requested to read the same at the Lodge entertainment. She pictures our new City Hall as a fish market, Chinatown removed, and generally revolutionizes the present appearance of the city. A vocal duet by Miss Emma Ellinghouse and F. Urban was sweetly given. Miss Ellinghouse has a fine voice, which she uses with signal effect and charms her listeners by the purity of its tones. Thomas C. Maher recited "Othello's Defense," and for an encore gave "The Vagabonds." This gentleman is to be congratulated for his splendid elocutionary powers and the life and spirit which he put into the compositions. A grand fantasie (Le Pardon de Ploermel) Meyerbeer, (two pianos, four hands) was given by Messrs. Haesters and Lust. The next gentleman on the programme not being present, Thos. C. Maher gave an imitation of Lawrence Barrett in Richard III. It was recited in perfect imitation of the accentuation of that eminent tragedien. The performance closed with "Tannhauser March," Wagner (two pianos, eight hands), by Messrs. Haesters, Yanke, Lust and Curtaz. This was one of the most successful Lodge entertainments of the season, reflecting great credit to the committee having charge.

American Legion of Honor.

THE Supreme Council A. L. of H. has removed its office from 5 Temple Place to 442 Washington street, Boston.

SECRETARIES are requested to read and comply with law 12, page 41, of the constitution and laws. Councils violating this law are liable to suspension.

DISTRESS CALL, No. 2, issued for the purpose of paying to the widow of H. G. Oliver, a charter member of Union Council, No. 168, a benefit of $5,000, now amounts to $610.56.

IN all Southern States, benefit certificates will hereafter be issued only on a special contract, duly signed, the substance of which is, that if a companion should die of yellow fever he will forfeit all right of the payment of the sum named in his benefit certificate.

THE Supreme Treasurer has turned over to the Trustees $12,000, which has been invested as follows: In registered U. S. 4 per cent. bonds, $2,000; in registered U. S. 3½ per cent. bonds, $10,000. There is still in the Supreme Treasury over $6,000.

FROM the 25th of August, 1879, to May 1, 1881, the Medical Examiner-in Chief rejected 2,156 applicants for membership in the A. L. of H. Nearly all of these applied for sixth degree membership, and were recommended as good risks by subordinate examiners.

AT the request of several medical examiners the Medical Examiner-in-Chief has decided to issue checks, good for 50 cents, which can be procured by medical examiners, deputies, or councils, in any desired quantity. The object of this is to furnish a convenient method of transmitting the exact amount with each application sent to the Medical Examiner-in-Chief, and thereby obviate the necessity of keeping accounts. The checks are to be paid for in advance, but will be redeemed on demand. These checks are also received as cash by the Supreme Secretary and Treasurer.

SUPREME TREASURER Chas. K. Darling gives the following financial statement for the month ending April 30th:

GENERAL FUND.

Balance on hand last report		$15,336.68
Received from Supreme Secretary		9,822.06
Total receipts		$25,158.74
Paid 75 orders, amounting to		8,171.12
Balance on hand		$16,987.62

BENEFIT FUND.

Balance on hand last report	$ 5,699.07
Received on Assessment No. 7	10
Received on Assessment No. 8	15.38
Received on Assessment No. 9	1,294.51
Received on Assessment No. 10	25,745.09
Received on Assessment No. 11	1,137.00
Total received and on hand	$33,861.15
Paid order No. 45	$ 5,000.00
Paid order No. 47	5,000.00
Paid order No. 48	3,000.00
Amounting to	$13,000.00
Balance on hand	$20,861.15
Orders No. 46	$5,000
Orders No. 49	5,000
Orders No. 50	2,000

Drawn, but not presented for payment.

Order of Chosen Friends.

THE office of the Grand Recorder, O. C. F., is located at 601 California street, room No. 1.

THE first meeting of the Executive Board was held in this city, May 20th, when the following business, taken from *Our Chosen Friend*, was transacted: The Grand Councillor and Grand Recorder were appointed a committee to procure a seal for the Grand Council. The Grand Trustee, Grand Assistant Councillor and Grand Recorder were appointed a committee to procure a suitable office for the Grand Recorder, with full power to furnish the same. It was resolved that the regular meetings of the Board be held in each month at two o'clock, the first one to take place on the last Saturday in June. An order for $350 was ordered drawn in favor of the Supreme Councillor for traveling expenses, and an order for $50 in favor of Supreme Councillor for charter fees. The Grand Councillor and Grand Recorder were instructed to liquidate all expenses incurred in connection with the reception of the Supreme Councillor, and during his stay in this city. The Grand Vice-Councillor and Grand Recorder were appointed a committee to procure the necessary stationary, printing and postage stamps for the Grand Recorder. The Grand Assistant Councillor, Grand Vice-Councillor and Grand Trustee were appointed a committee to receive in behalf of the Grand Council all the supplies in the hands of the late D. S. C., and receipt for the same. It was resolved that organizing Deputy Grand Councillors receive the same compensation for organizing Councils as Deputy Supreme Councillors receive.

THE picnic given by this Order at Shel Mound Park, passed off pleasantly. The poem for the occasion was written by Oscar T. Shuck, P. C. C., of Columbia Council, No. 11. The orator was James H. Barry, of Phœnix Council, No. 18. We make a few selections from his excellent address: The Chosen Friends cannot claim the honor of being the first in the field. It is simply an offering of kindred organizations. It is the youngest, but the brightest child of them all. Profiting by the experience of its parents, it has introduced new features into its platform, and upon that platform it can afford to stand or fall. We make no war upon sister societies. We recognize their virtues, and give them the credit which is their due. To such Orders as the Knights of Honor and United Workmen belong the honor of having inaugurated this grand co-operative system in behalf of humanity. In all the gentler, nobler attributes of human nature, woman has always proved herself the superior of man. She has been behind him in nothing—but rascality. Her soul is as pure as the morning dew of heaven; her philanthropy is as broad as the universe itself. Her self-imposed mission has ever been to comfort the sick, relieve the needy, and lift the fallen wretch from the depths of degradation and shame unto a life of usefulness to himself, to his family, and to society. How beautiful it is thus to contemplate her—to see her not as the piece of fuss and feathers, the flounced, flaunting, gossiping, simpering creature which she has betimes been portrayed; not as the slave of fashion, nor the "lady" queen of the parlor; not as an unsexed, short-haired, long-tongued clatterer for what is popularly called "woman's rights;" no, not as any of these things, but simply as

> "A perfect woman, nobly plann'd,
> To warm, to comfort, and command."

As such, Brothers, alone should we contemplate her, for of such is our Order composed, and "of such is the kingdom of heaven." In these Orders we have no suits to bring and none to defend. I tell you, ladies and gentlemen, their plan is the best ever devised for the protection of the widow and orphan. When members die, we do not look for any defect in their policy—the money is paid without trouble and without delay. We are all sentinels at the post of honor; every man stands guard; and we can lay our head upon the pillow of death with full confidence that our brothers and sisters will faithfully discharge the trust confided to them. In a kindred organization of which I am a member, it cost me $15 for assessments last year. Never was money paid in a better cause. It was a drop in the well for the relief of 78 stricken families; it went to protect the widows and feed and educate the orphans of 78 brothers in the cause. Tell me, is this not a grand reflection—that every dollar we pay is like manna dropped from heaven upon a desolated home. But we do still more than this. "Help one another" is a grand old maxim, which we have adopted as our own. If a brother be out of employment, we help him to procure it; if he be in distress, and is worthy, we relieve him; if he be unfortunate, if he be down, yea, as low as the gutter, we help to lift him up, and make him assume "the godlike attitude of a man."

I. O. G. T.

AT the annual session of the Right Worthy Grand Lodge, I. O. G. T., held at Topeka, Kansas, George B. Katzenstein, of Sacramento, now the G. W. S. of California, was elected R. W. G. Templar, thus placing him at the head of the Order for the world.

RED BLUFF Lodge, No. 192, I. O. of G. T., was organized Oct. 12th, 1865, by Rev. A. C. McDougal, in the Presbyterian church. It began with 22 members, and within one year the membership was over 200, being then the banner Lodge of the State. The Chiefs wore the prize regalia for one year. This Lodge always holds quarterly reunions which are very pleasant affairs. The membership is now over 200.

THE various lecturers engaged by the Good Templars throughout the State are sending in reports every week of meetings held and new Lodges organized. Over 70 Lodges have already been instituted since last fall, and by August 1st, the close of the Grand Lodge year, an in-

crease of nearly 100 Lodges will be reported, in addition to a number of old ones which have been resuscitated.

THE two new Lodges lately organized, one at West Oakland and the other at Temescal, are both doing well, with every promise of future success. Temescal Lodge at its last meeting decided to hold its regular meeting on Tuesday evening. The use of the Methodist church having been offered, and as it makes a very nice Lodge-room, they have decided to hold their meetings there hereafter.

Patriotic Order Sons of America.

THE National Camp will meet in Portland, Me., June 21st.

AT the meeting of the National Camp a new set of national officers will be chosen.

THE delegate from this coast is going to try and have the National Camp meet in this city in 1883.

A NEW Camp was organized in this city on Saturday evening, June 4th, at Washington Hall, 35 Eddy street.

I. A. HEALD, the well-known machinist and model maker, goes to Portland, Me., to attend the convention of the National Camp. He will also likely visit Washington, where he was leader of the American brass band, Springfield, Mass., and other places.

Order of the American Union.

THE yellow-fever district is excluded.

IT maintains a reserve fund as a protection against epidemics.

ONLY citizens of the U. S. and their lady relatives are admitted.

THE Order admits members at large who may not desire to affiliate with assemblies.

MEMBERS at large pay $5 entrance fee and $5 per annum dues, and the regular assessments of other members.

THE following are the officers of the National Assembly: John H. Crocker, ex-President; A. K. Stevens, President; Jos. H. Moore, Vice-President; Oscar T. Shuck, Sec'y; Chas. E. Baker, Treas.; Henry Coad, Chap.; E. R. Robinson, Sergeant-at-Arms; D. E. Goldsmith, Doorkeeper; Dr. Washington Ayer, Med. Ex.

THE National Assembly of this new California protective Order, which has been in session in this city for several weeks, having put the Order in successful operation and perfected the details incident thereto, will institute Washington Assembly, No. 1, at Red Men's hall, 320 Post St., next Thursday night, the 16th inst. The roll contains 150 names. The selection of names for Jefferson Assembly, No. 2, is well advanced, while steps have been taken for the institution of Hamilton Assembly, No. 3, about six weeks hence. A distinguishing feature of this Order is the admission of members at large, composed of such citizens and their lady relatives who may prefer not to affiliate with local Assemblies because of their inability or unwillingness to attend meetings. The Secretary of the National Assembly (Oscar T. Shuck, No. 22 Montgomery block) will give further information respecting this Order.

U. O. A. D.

THE seventeenth annual session of the Grand Grove convened in this city June 8th, at Druids' hall, Sutter street, Noble Grand Arch Cottingham, presiding.

The reports of the Grand officers showed that there has been scarcely any change in the numerical strength of the Order during the year. Two new Groves have been instituted, and one has surrendered its charter and consolidated with another. Official visitations have been made to nearly every Grove in the State, and the visits have been of value to all concerned. On the 6th of May, the Centennial anniversary was observed throughout this and foreign lands. The number of Groves in California is 29; number of members, 1,466. Lost during the year, 38. Total revenue of year, $26,051.24, a gain of $1,991.41. Assets of Groves, $72,561.05, a loss of $2,321.35. Relief paid for year, $11,682.55; increase, $132.30. Deaths during the year, 20.

The status of the Order in this country is as follows: Grand Groves, 16; Subordinates, 244; Chapters, 25; Druidic Circles, 15; members, 1,-234. Relief paid for year, $77,582.82. California stands second on the list; only one jurisdiction (Illinois, with 47 Groves) is larger.

An endowment feature was adopted last year to pay $500 at a death. The first assessment was levied December 12, 1880, and paid January 26, 1881. It aggregated $615.50. The last assessment was collected May 16, 1881, and brought in $534.75. Some amendments are suggested to the Endowment Law to add to its value; $2,500 has been paid, and $2,000 more is in process of settlement.

Charters were granted to Petaluma Grove, No. 38, and Olema Grove, No. 39.

The Committee on Jurisprudence submitted a report to the effect that a brother thirteen weeks in arrears is indebted for three months' dues.

A committee was appointed to translate the Constitution into the German and Italian languages of subordinate Groves.

The report of the Committee on Legislation, in favor of rescinding the rule requiring propositions submitted to the Grand Grove to bear the seal of a subordinate Grove, was adopted.

The following officers were elected: Noble Grand Arch, E. Maginnis, of No. 16; Deputy Grand Arch, Philip Rohrbacher, of No. 9; Grand Secretary, Henry A. Chase, of No. 17; Grand Treasurer, Charles Weber, of No. 4; Grand Marshal, Henry Wulff, of No. 9; Grand Guide, L. Alexander, of No. 5; Trustees—George Peckham, of No. 16; L. G. Schord, of No. 19; F. Staud, of No. 3. Bonds of the Grand Secretary were fixed at $3,000, the Grand Treasurer $5,000, and the Trustees $2,000 each.

The "Endowment Fund Law," which was thoroughly discussed in all its bearings, was finally adopted, many important amendments having been made.

The Board of Directors of the "Druidic Endownment Fund" were authorized to levy assessments in cases of F. M. Corcoran, of No. 6, Sacramento, and L. Laumeister, of No. 9, Stockton.

San Francisco was selected as the place for holding the next session.

Native Sons of the Golden West.

THE Order of the Native Sons of the Golden West is advancing rapidly all over the State. There is also an application for a charter from Virginia City signed by a number of the leading young men of that city.

OAKLAND PARLOR is progressing wonderfully. Their hall has been entirely renovated, the walls having been newly painted, the roof raised about four ft. and a new carpet laid down all over the halls. They have two or three initiations every meeting and also have reinstated a number of suspended members.

THE Grand Parlor of the Native Sons of the Golden West convened in Oakland on Tuesday, June 7th.

The following Grand officers were present: Grand President, Frank J. Higgins; Grand Secretary, Henry Lunstedt; Grand Treasurer, Joseph Becht; Grand Marshal; H. Clay Chipman; Grand Chaplain, F. G. Wisker; Grand Lecturer, A. L. Samson. The Grand President appointed Henry Trevor Deputy Grand President pro tem. in the absence of Frank D. Ryan. Grand Secretary H. Lunstedt presented the credentials of members, which were referred to a Committee on Credentials, consisting of H. Clay Chipman, of Sacramento Parlor, F. G. Wisker, of California Parlor, and J. J. Nagle, of Oakland Parlor, who reported the following delegates entitled to seats: California Parlor, No. 1—A. C. Lutgens, John H. Grady, H. Lunstedt, E. G. Du Pay. Oakland Parlor, No. 2—Joseph Becht, John J. Nagle, Henry Trevor. Sacramento Parlor No. 3—H. Clay Chipman, C. E. Parker, W. Shields, Ed. F. Cohn. Marysville No. 6—Geo. B. Baldwin, W. J. Andrews, J. C. Venter. Argonaut, No. 8 (Oroville)—A. F. Jones, M. J. Green, D. W. Walsey.

Grand Treasurer Becht presented his report, showing the receipts of the Grand Parlor to have been $276.75; disbursements, $139.95; balance, $136.55.

The report of the Grand Secretary, Henry Lunstedt, was received, showing the organization of three new Parlors—Marysville, Stockton and Oroville—and a gain of 131 members; the receipts of $1,591.90, and the disbursements, $1,500; benefits paid, $338; cash on hand, $1,659.

The Committee on Legislation recommended that the endowment plan be referred to next session, deeming the Order too young to assume so important a responsibility.

The following officers were elected: Grand President, H. Clay Chipman; Deputy Grand President, George B. Baldwin; Grand Secretary, Henry Lunstedt; Grand Marshal, S. L. Terry; Grand Treasurer, Joseph Becht; Grand Inside Sentinel, J. J. Nagle; Grand Outside Sentinel, W. J. Andrews; Grand Lecturer, Major F. Jones.

Selections.

NOTWITHSTANDING the multiplication of new Orders, the old ones are as progressive as of yore.

A MAMMOTH reunion of the Temperance people of the city and State will be held at Woodward's Gardens on the 23d inst. All of the various temperance organizations and churches will be represented. Wm. H. Barnes has been invited to deliver the address, and there will also be appropriate musical and literary exercises from 1 to 2:30 o'clock P. M.

IT IS about time, says the K. of H. *Reporter*, that something were done toward improving the musical feature of our ceremonies. "Auld Lang Syne" and "Bonnie Doon" may be very fine airs, but one tires of hearing the same tune night after night, especially when it is murdered rather than sung. We all of us have heard of the man who could eat pork and beans with a relish for 40 consecutive days, three times a day, but when it became a regular diet he sickened of the delicacy. And so it is with many of our Lodges. They want a change. It is monotony that kills. Like the little girl who had been told about the joys of Heaven and asked if she was real good if they wouldn't let her go down into hell and have a good time once in a while, our brethren sigh for something that shall occasionally take the place of the now almost unbearable prescribed odes. There seems to be no good reason why a collection of really musical airs should not be authorized by the Supreme Lodge, from which selections might be made as each Lodge saw fit, the programme to be varied from time to time. There be men who can no more sing "Bonnie Doon," as it should be sung, than a steam calliope can discourse sweet music. They drag it out like an ox-team going up hill, and never come within hailing distance of the tune. We know of Lodges which are way up in their work, whose officers perform their work acceptably and give the lectures in a most impressive manner, whose members are full of zeal for the Order's welfare; but their singing (heaven save the mark!) is execrable. Saw filing is harmony in comparison with it. "Bonnie Doon" is too much for them, that is all. There are tunes they could sing, plenty of them, and good ones, too. Give them a chance. "Auld Lang Syne" is a grand old air, too good to be treated as it so often is. Keep it for state occasions, and give us something easier, something that has a snap to it, something that can't be converted into an instrument of torture by unskilful mouths. In short, why not reform this thing altogether? Why cling to the same words any more than to the same air? Perhaps it might be objected that the words are a part of the prescribed ritual. At all events, some latitude might be permitted in the opening and closing odes. What matter, so long as there be singing at the beginning and close of the Lodge sessions? Nobody would suffer, where many now do, and the cause of musical culture would be advanced and many an outraged ear be outraged no more. The Supreme Lodge would do well to consider the musical part of our ceremonies.

AVERILL MIXED PAINT.—It would hardly seem that the simple idea of preparing ready-mixed paint for general sale would create such a revolution in the use of paints as it has done. Before the Averill mixed paint came on the market, people had to buy lead, oil, color and dryers separate, and mix the paint themselves. As this required skill, few attempted it, but hired painters to do the work. Now, however, any small job of painting can be done by mixing a quantity to suit of Averill paint, which is ready mixed and prepared for use in any color. It is also purchased in large quantities by consumers who get a paint of uniform grade of excellence. This pioneer in mixed paints is composed of pure linseed oil, pure white lead, pure zinc and the best colors for tinting, which, by the patented process of manufacture, are united to produce a paint which is at once beautiful and durable. The "soluble glass" uniting the oil and pigments, the whole mass dries with a hard, rich, glossy appearance; and it will not chalk or peel off. The paint can be scrubbed or washed as occasion requires, when its freshness will be renewed. At the office of the general agent for the Pacific coast, O. S. Orrick, 403 Market street, we recently had occasion to note the great variety of colors and tints in which this paint is now mixed. Every possible shade is prepared, and it is put up in large or small packages, so one can procure the exact quantity required, without loss from waste.

"JULY 4TH, 1881."—Florence Social Club will give their third annual grand prize carnival at the Mechanics' Pavilion on Monday evening, July 4th, in commemoration of the one hundred and fifth anniversary of the United States of America's independence. There will be thirty-three prizes of a high order and excellence given to the best sustained characters, etc. The tableaux will be quite numerous—numbering twenty-three—representing events in the history of our country, Rome, England, local hits in our own city, and other scenes that will be instructive, grand and pleasing. The reputation of this club in the past and their experience will warrant the expectation that this celebration will be one of the grandest and best arranged events of the kind that has ever been given in this State. The Executive Committee and Committee on Awards are well known citizens, and the prescribed rules and regulations will be strictly enforced. Tickets, admitting gentleman and lady, $1 50; single floor tickets, $1; reserved seats, 75 cents; spectators, 50 cents. Reserved seats can be secured at T. W. Tucker & Co., 131 Kearny street.

B. FRIEDLANDER, merchant tailor, has changed his tailoring parlors, 491 and 605 Montgomery, to 761 Market. With a more commodious room to exhibit an extensive line of new and varied patterns of suitings, his numerous customers cannot fail to find just the patterns to please their fancy. Bro. D. J. Levy, the celebrated cutter and fitter, is at the head of this department, which is a sure guarantee that a perfect fit and stylish cut will be turned out on every suit that leaves this popular establishment. Samples and rules for self-measurement sent on request to any address, and satisfaction assured to all who patronize this well known house. This is a first-class and reliable place to procure business suits or the finest dress suitings.

WE have the pleasure of recording the notable fact that Bro. Capt. Geo. Hunt of Triumph, 180, and captain of the steamer *Harriet*, had the honor of bringing the first cargo of the new crop of wheat in this city this year. The cargo consisted of 1,500 sacks from Hill's Ferry, and was consigned to the house of Sol. Wangenheim & Co.

A Reply to Anti-Smoker.

EDITORS WATCHMAN:—In your issue dated May 15th, appears an article on smoking in general, and in Lodges of A. O. U. W. in particular, which I am in duty bound to reply to, on account of the love I bear for my dear old mother and sisters, and in fact, on account of every woman living in that beautiful country where I was born, called Holland.

I will call the writer brother, for, judging from the article, he is a member of our Order. He says: "Who are the brutal amongst the nations. The Indian is a smoker. He treats his women worse than his dog. The Dutchman smokes his pipe and harnesses his wife to the plow alongside of his cow."

Now, in regard to the Indian, I will give the brother the benefit of the doubt; but in regard to the Dutchman harnessing his wife to the plow, I take great pleasure in denying that through the same columns in which the brother made his assertions; and I will further state that the brother is not very well informed in regard to the Dutchman's habits; if he was he would never have made the assertion that they harness their wives to the plow.

Now, while I'll admit that the Dutchman smokes his pipe and that his wife assists him to make their home as happy and as comfortable as possible, and that she will go and help her husband (if he is too poor to hire his help) to do his daily labor, when and wherever she can; but to say that a Dutchman was ever known who harnessed his wife to the plow, I hereby deny it in toto. From the brother's article a person would think that the only place where women are treated like queens is in the South—the land of chivalry. Now I will state here for the benefit of the brother, that not only 40 years ago, but as long as Holland has been a nation, has its women always been treated like queens (if not better) by their husbands; and every person that is acquainted with the Hollanders and their habits will bear me out in the above assertion.

In reply to the smoking part of the article, I will say that I think the brother does an injustice to the Order at large, for this reason: If any person who is not a member of our Order should read the WATCHMAN, and the brother's article in particular, he would think that our Order compels its members to smoke while the Lodge is in session, while on the contrary, our Order and its laws try to prevent the brothers from smoking as much as possible; and I don't know of any Lodge in this or any other Order, where the members are permitted to smoke during the session of the Lodge. They may have a recess for the purpose of introducing visiting brothers, and then one may smoke; but that is no general law of the Order; and I do not think that there is one M. W. in this Order that will permit a brother to smoke in the Lodge-room if he knows that it is offensive to another. Respectfully Yours,

DUTCH SMOKER.

Resolutions of Respect.

[IN MEMORIAM.]

HALL OF MERIDIAN LODGE, No. 145, A. O. U. W., San Bernardino, Cal., June 1, 1881.

To the Master Workman, Officers and Members of Meridian Lodge, No. 145, A. O. U. W.—SIRS AND BROTHERS: Your committee, appointed to draft resolutions of respect to the memory of our deceased brother, John McFarlane, respectfully submit the following:

WHEREAS, Our late brother, John McFarlane, has been removed from our midst by the hand of death, we feel it right and proper to pay a fitting tribute of respect to his memory. Therefore, be it

Resolved, That we feel deeply and mourn the loss of our departed brother.

Resolved, That, in the death of Bro. McFarlane, this Lodge mourns the loss of a worthy member, his family an affectionate husband and the community an honorable and useful citizen.

Resolved, That this Lodge tender to his bereaved family its sincere and heartfelt sympathy in their affliction.

Resolved, That the charter of this Lodge be draped in mourning for 30 days.

Resolved, That these resolutions be spread upon the records of this Lodge; that the Recorder be instructed to transmit a copy thereof to the family of our deceased brother, and that the PACIFIC STATES WATCHMAN and the local papers of this town be furnished with a copy for publication.

ISAAC C. GIRADE, N. D. VALENTINE, J. R. FOSTER, } Com.

DAMIANA BITTERS.—This great Mexican remedy to restore vitality and invigorate the human system, is growing in popularity as its virtues are known. A number of our leading physicians accord to it, as a restorative agent, their unqualified approval. The plant from which it is made is shipped here in large bales, and the growing demand for it makes a prominent feature of our imports. The Damiana Bitters are made and prepared under the immediate supervision of Bro. Wm. Hess, who is the sole proprietor at his laboratory, No. 12 New Montgomery street.

BRO. JOHN HORNER, 1300 Folsom, manufactures to order all kinds of men's boots and gaiters, as well as ladies', misses' and children's shoes. His prices are very moderate and goods of the best quality.

THE Workmen of Compton, Los Angeles county, have purchased a lot and erected a building in which to hold their meetings.

A. O. U. W. Directory.

Cards inserted in this list at the rate of 25 cents per month payable semi-annually in advance. If errors or omissions are noticed, please write the office direct.

Tubbs' Hotel.

This hotel has recently changed hands, and has been thoroughly renovated, having been repainted, frescoed and refurnished throughout. Mr. H. S. Greeley, the present proprietor (also of the Galindo hotel, of Oakland), is well known for his thorough knowledge of hotel keeping and for his courtesy and attention to his guests, and is meeting with deserved success at both his hotels.

Tubbs' hotel is within 50 minutes journey from San Francisco. Trains leave Clinton station both to and fro every hour, and the street cars to Oakland pass the hotel every half hour. The views of the surrounding country are very beautiful, especially that across Lake Merritt to the hills beyond. We should not omit to mention the stairway fire escapes from the upper floor, which preclude all danger to residents from fire.

There is a fine billiard-room, with new tables; good reading-rooms and sitting-rooms a very elegant ladies' drawing-room, with fine piano; a first-class table is kept; in short, every comfort of a home is to be found here, combined with the freedom of hotel life. The charges are very moderate, and we recommend alike visitors and city residents not to fail to visit this delightful resort. An illustration of the hotel appears from time to time in our columns.

BY TELEPHONE.—Subscribers, advertisers and other patrons of this office can address orders, or make appointments with the proprietors or agents by telephone, as we are connected with the central system in San Francisco.

BRO. JOSEPH GIUSTI'S OYSTER, CHOP, AND CHOWDER HOUSE, 105 California Market, for ladies and gentlemen, is the place to get an oyster cocktail, or a meal fit for a king. His customers always feel happy after partaking of his good cheer. His parlors are open night and day.

WORKMEN receiving sample copies are invited to examine the WATCHMAN, and subscribe for it.

A Cheerful Disposition.

What a truly glorious thing is a cheerful disposition! To those who are inclined toward the happy side of life, how pleasing to meet cheerful, happy people! If we can meet the various little troubles and annoyances that are continually confronting us with a smile, a laugh and a light heart, we are indeed to be envied and admired.

A cheerful disposition is one of the rarest gifts that Dame Nature has bestowed upon us. Should we not in observance of her great generosity, try to cultivate this gift, and while we are trying to become bright and good-natured, help others who probably have more to burden their minds? It is distressing to me to look at a sad-faced woman. I seem to feel that even if she has had trouble and has experienced hard times a brighter looking face would not come amiss. I speak of the face because on it the disposition is often plainly written.

When people wear such doleful looking faces they are sure to be cross and peevish. A cheerful countenance is very seldom out of place. No matter what our misfortunes are, if we can look on the bright side and feel that there is still something to be thankful for, it is indeed well for us. "Turn over the picture and look at the bright side." This simple saying implies a great deal when looked at from the right stand point. To see the bright side of everything is, we might say, to be perfectly happy. We cannot be cross and ill-natured, and happy at the same time, so is it not better for ourselves and every one around us, to be as cheerful and light hearted as possible?

I attended an evening party not long ago, and a short time before the hour of departure, a gentleman who sat near me spoke of a young lady who was present, and referred in glowing terms to her countenance and cheerful disposition. "Why," said he, "I havn't seen a look of anguish on her face the whole evening." I never could tell why he used the word "anguish," for that would be more properly applied to some one who was in great distress.

The term was entirely out of place, but the sentiment was all right. The young lady had a happy, contented look, which I am sure was very much more becoming than a scowl would have been.

It doesn't cost anything to be cheerful, and we feel better, can work with more energy, and I am sure we are more willing to oblige and please others than if we are inclined to be cross.

Sometimes it is hard to overcome our natural inclination to be snappish and disagreeable (I speak from experience), but it is best to smother it as soon as possible and give everything as kind a reception as we can.

We have to live and we cannot live alone, so let us, one and all, strive to make each other happy. If we are good-natured and possess cheerful dispositions we will always have friends. —*M. A. Goodcell, San Bernardino.*

James Russel Lowell's Tribute to the Modern Engineer.—At the late annual banquet of the Institution of Civil Engineers, the American Minister, in proposing prosperity to the Institution of Civil Engineers, said: "I feel that there are certain relations between engineers and that general civilization of which literature and art can also claim their share, which gives me, perhaps, some claim to propose the toast assigned to me. Naturally, in some respects I confess I am wanting in sympathy with some of the achievements of modern science; yet, with all the world, I must confess that you are the makers and the masters of the modern world, so far as it is visible, palpable, and serviceable to the rest of the world. * * I think there is no achievement of modern science which so touches the imagination as that narrow bridge for thought which engineering skill has stretched through the profound and silent stretches of the Atlantic between this continent and the other. Nothing touches the imagination more than the way in which the modern engineer has realized that dream of the ancient philosopher—that the earth was a sentient being. It has made mankind contemporaries in a sense in which they were never contemporaries before."

The Brain Worker.—So long, says a medical authority, as the brain worker is able to sleep well, eat well, and take a fair proportion of out-door exercise, it is not necessary to impose any special limits on the actual number of hours he devotes to his labors. But when what is generally known as worry steps into complicate matters, when cares connected with family arrangements, or with those numerous personal details which we can seldom escape, intervenes; or when the daily occupation of life is in itself a fertile source of anxiety, then we find one or the other of these three safeguards broken down. Probably the man of business or the successful lawyer fails to shake himself free from his anxieties at night, and slumber becomes fitful or disturbed. The nervous system, unsettled by the mental strain, brings about various defects in nutrition, and then we meet that depression which is the chief misery of the overworked.

The narrow-gauge cars of the South Pacific Coast Railroad commenced to run from the depot, corner of 14th and Webster Sts., Oakland, over the new bridge to the company's landing at the creek, making close connection with all Alameda local and Santa Cruz through trains, and with boats to and from San Francisco. The time from San Francisco to Oakland over the new route is 40 minutes.

Grounds for Health and Pleasure.

The engraving on this page is after a photograph of the croquet ground at Anderson springs, in Lake county, and a glance at it will show how easy it is to arrange such grounds where forest trees are growing on the property, and give a hint of how much pleasure can be gained from them. Where there are no trees growing it will take more time to arrange a grove, of course, but no time should be lost in preparation. Planting quickly growing trees, not on a geometrical circle, or ellipse, or square, but irregularly, and yet so as to enclose an open space, soon yield the desired result in a State where trees grow so rapidly as in California. It would be a great advantage for both city and country homes, where the space is available, if both croquet and play-grounds could be oftener arranged. It would afford much innocent pleasure to the younger members of the family, and the old folks could here find a retreat for rest and meditation. The making of a few rustic seats and benches, the suspension of a hammock and swing, the laying off of a croquet ground—all these need cost but little, and yet yield a heap of enjoyment and pleasure.

CROQUET GROUNDS AT ANDERSON SPRINGS, LAKE COUNTY.

The croquet grounds illustrated in the engraving are fortunately located, the forest trees environing the place with stately forms. These grounds resound with the music of a babbling trout brook just hid in the trees beyond the border, and are reached by a pleasant pathway leading across the crystal stream from the main hotel. Let those whose lives are cast in the city try and snatch a few days to commune with nature and her surroundings.

Cozy Corners.—A room without a cozy corner lacks the prime characteristic of a home. However much money may be spent in furniture and artistic decorations, in elaborate draperies and other embellishments, it will retain a cold and formal appearance not the least inviting to those who, wearied in mind and body, long for a cozy corner in which to rest. We have been in houses where the parlors were palatial, the dining-rooms stately, with meals to correspond, the bed-rooms elegantly upholstered, and the "sitting-room" giving a standing invitation not to sit down, and have felt a sensation of dignified dullness owing to the absence of cozy corners. There is a cordial greeting in the outspread arms of the easy-chair, a friendly salutation in the comfortable lounge, if it happens to set in just the right place, and an appeal to the domestic side of one's nature in the home-like arrangement of inanimate things which affect us far more than many of us realize.

Since the local option law went into effect in Massachusetts 46 towns have voted not to grant liquor licenses, and eight towns to license sales.

English Women in Politics.

The Rev. George Washburn, D. D., writing in the *Independent* of "The Influence of English Women in Politics," testifies as follows in relation to the beneficial effects of their influence:

We may accept it as a fact that women in England play an important part in politics. I think that all those who are personally acquainted with English society have been impressed with this fact. The wife of an English statesman takes it for granted that she is to be her husband's chief political ally. Young ladies devote themselves to the study of political questions and fit themselves to be the wives of statesmen. One of the most distinguished political leaders in England told me, not long ago, that his daughter was one of the most trusted advisors on questions of state. She had devoted her life to the study of these questions, and was certainly much better informed than many members of Parliament. I once asked the wife of a distinguished English ambassador if she was as much devoted to politics as most ladies in her position. She said: "Of course I am. It is part of my work."

So far as I can judge, the influence of English women on politics at the present time is not in any way corrupt or demoralizing. It is based on talent and carefully acquired knowledge, and is not used, as it once was, to favor corrupt legislation and money-getting. Of course, there are weak-minded women, as there are stupid men, whose social position leads them to meddle in politics, whose good sense does not equal their ambition and who sometimes make mischief; but, on the whole, their influence is a decided advantage to the state. Mr. Kinglake, in his last volume on the Crimean war, calls attention to the importance of this influence, and speaks of the intervention of Florence Nightingale and others as "a priceless reinforcement of brain-power" when the male brain in England was giving signs of weakness. He repudiates the idea that their most important work was nursing the sick. There is considerable truth in this statement.

An Industrial Problem.—One of the great industrial problems to be solved by the American people is how to adjust the relations of machinery and minutely divided labor, so as to secure on the one hand the best and cheapest productions, and on the other hand to counteract the tendency of specialization to narrow the scope and value of the workman's life. Our operatives are also citizens and sovereigns; and society cannot afford to spoil the citizen to save a fraction of a cent on a yard of cotton or a few dollars on the price of a ship or an engine.

The fashionable term now is "*En Ville*," instead of "present," as formerly.

Life.

The question of life is a very prolific theme. Each patriarch, as he nears the end of mortal existence, will be found to differ materially in what constitutes life in its true sense. It will be found that but few can use Paul's exultant expression, or assure themselves that the crown of victory awaits them beyond the mystic river. As the world is now constituted in its social and commercial, industrial and professional aspect, it surely is a fight from the youth's first folly to the flickering breath of the aged sire. We have to fight for existence, and for position in society. We have to fight against influences inherited from those who failed to obey the laws of nature. All the ills which surround humanity are transmitted from one generation to another, and the warfare with our own inharmonious nature creates pains and penalties which might have been avoided, if our progenitors had walked up to that high moral standard.

It certainly is encouraging when the young crave the "short and good articles which teaches the true way of life." Future generations would reach a very high excellence if all young men and women had the same hunger for such spiritual food. Where the mind is filled with good thoughts and ambitions the physical partakes of the same high and refining elements; all of which the ancients understood when they reminded us "to keep pure and clean the temple of the living God." If their God's spirit dwells within man, the necessity is plain of keeping clean from the pollutions of life, both mind and body. More especially should we keep a curb upon thought, word and deed; for the power of thoughts, even upon our physical, is of more importance than the thoughtful even can comprehend. Hence then should our thought be under the same rein as our minds, for the God of our own soul sees every one of them, refining or polluting in their nature. Thought should be silently aspiring for good; and to make these thoughts practical, they should be accompanied by doing good.

We may give a few sentences on the best mode of conducting life through its many mazes and temptations, but there is a certain point when we must leave the family of humanity to grapple with their own spiritual destiny, through the workings of conscience—the most infallible guide which life has ever known.

Practical life is all around us. Agriculture is the oldest and truest of the many occupations which civilization has brought upon us. Cities team with wealth and poverty; the busy and the idle. If the unemployed would turn their attention to the raising of grains, vegetables and fruits, how much better would they be in mind and purse. To a waif without money, friends or home, what is life? He has no hope but under the sod, while God has given him a fruitful domain—an Eden in climate and productiveness. Far better is a lot on the hillsides or virgin prairies, than the sand lot where broods of the hoodlum hatch venom to sting humanity. Homes might be created in rural districts by this same idle element, which would add to their own wealth and health, and to the worlds progression all that is great and good. For is not France's greatest fortune in her small rural farms occupied by industrious and happy families? Life is short, even at the longest. We have only one lease from mother nature, we should make the most of this short space, to leave the world better than we found it, and then we, too, may say with Paul, "I have fought the good fight."—*John Taylor, Mt. Pleasant, Cal.*

Queer Bread Materials.—Earth bread is made from a white earth in Upper Lusatia, formerly a part of Germany, but now under the rule of Prussia, and the poor of that region use this bread in times of scarcity. The earth is dug from a hill where saltpeter was once manufactured. When laid in the sun until heated it cracks, and globules like meal exude from it. These are mixed with a little flour and soon ferment, and are then baked. It is supposed that the saltpeter or soda in this earth gives it lightness. Something similar to it is found in Catalonia, and is also used for bread. It is affirmed that in cases of extreme need, many have lived on this bread for weeks without experiencing any injury. Soft stones were ground and made into bread in the late famine in India, to prolong, if possible, the lives of that stricken people. Fish-bread is still used in Iceland, Lapland, Crim-Tartary and other places far north. The fish is first dried, then beaten to a fine powder; and sometimes the inner bark of some of the trees of that region is mixed with it, and then wet and made into bread and cakes. Moss-bread is manufactured in Iceland from the reindeer moss or *lichen rangiferinus*, which, towards the month of September, becomes soft, tender and damp, with a taste like wheat bran. This moss contains a large quantity of starch, and the Icelanders gather it in the latter part of the summer season, thoroughly dry it, then grind it into meal; and bread, gruels and pottages are made with it. The want of better grains frequently compels the poor Icelander to bake a kind of bread from the seeds of the sand reed, *elymus arenarius*, which, on their shores, are merely eaten by the birds of passage.—*Millstone.*

The committee at Los Angeles who have examined the act of 1859, authorizing a division of the State of California, submitted their report Thursday, that said act is still valid, and that all that is needed to make it effective is the concurrence of Congress.

PACIFIC STATES WATCHMAN.

A. O. U. W. Home Paper.

Issued on the 1st and 15th of each month.
At No. 202 Sansome Street, San Francisco, Cal.

Subscription (in Advance), $2 a Year.

Favorable to Advertisers.

By consolidating the large subscription lists of the *Pacific Workman* with the Pacific States Watchman our advertisers gain an unusually great advantage. We doubt if any one weekly newspaper has ever been circulated to as many different readers on this coast, as have been served heretofore by the *Workman* and Watchman together. Certainly, no other periodical is now patronized by a better class of industrial, professional and business men. In fact, our subscription list (like the A. O. U. W., still increasing), embraces many of the foremost business and representative men throughout the towns and cities of the coast.

We have pride in making our paper "clean and handsome," and first class in all respects—to the benefit of both our readers and advertisers.

ADVERTISING RATES.

One Square (½ inch), per issue	$ .75
One Square per month	1,25
Two Squares, per issue	1.50
Two Squares per month	2.50
Obituary notices and resolutions (with 25 copies post-paid for friends of deceased) per sq. (½ inch)	50

☞For reading notices, extraordinary display, special advertising and choice places permanently, extra rates will be charged. Reasonable reduction will be made for large and long-continued advertisements. No extra rates for the space occupied by engravings.

OFFICIAL RECOMMENDATION.

[*Resolutions adopted by Grand Lodge of Cal., Feb. 3, 1881*]

Whereas, the Pacific States Watchman, the pioneer A. O. U W. advocate on this coast, without official aid, has long rendered able and valuable services for the good of our glorious organization, we earnestly recommend that our Lodges and the brethren individually patronize the Watchman as liberally as circumstances will justify.

Entered at San Francisco P. O. as second-class matter.

San Francisco, - June 15, 1881.

Extracts from Speech of Wm. H. Barnes, G. M. W., at Oak Leaf Anniversary.—It is a wonderful Order we represent, coming in six years ago and planting itself in Oakland, bringing comfort, contentment and happiness. This is why you are here to night to celebrate your third anniversary. Here in this jurisdiction are 12,000 stout hearts that represent $24,000,000 in security to woman, our equal and helpmate, and to the children. We mean to take care of the widows and orphans, and see that none shall go over "the hill to the poorhouse." This grand pendulum of Workmanship that is moving from east to west is bringing from field and city, office and workshop, rich and poor, is swinging into our grand army 10 Workmen every 24 hours. We have gone on, doing as we agreed, fulfilling our pledges, until we stand to day the admiration of the world. The oak has been the symbol of power and protection, and Oak Leaf will stand as one of the powerful pillars of the Order; and her companion, the fair ones of Ivy, No. 4, cling around them and assist the noble brothers of Oak Leaf. We must not forget that the press representing our Order has grown in proportions, until to-day we can point with pride to the Pacific States Watchman as one of the best, if not the very best, fraternal paper in the world As such, it should receive our hearty support and assistance.

A large concourse of people assembled at Hare's grove, near Decoto, at the A. O. U. W. picnic. They came from Alvarado, San Lorenzo, Mission San Jose, Haywards, Livermore, Newark and other points, enjoying themselves in the usual picnic style. A procession was formed which marched to the pavilion, where S. H. Henry, President, introduced Grand Master Barnes, who delivered an oration. The odes of the Order were sung by the assemblage, and national airs played by the band. A handsome jewel charm was presented to W. H. Haley by J. A. Plummer, on behalf of the donors.

The ladies of the Degree of Honor, A.O.U.W., San Jose, gave a social entertainment at Champion hall, Tuesday eve., May 31st, to the other Lodges of the Order in that city. The occasion was characterized by selectness of the company and its charming entertainment of musical, intellectual and gastronomical exercises.

We are assured by Bro. Nield, of the N. P. C. R. R., that ample accommodations will be provided for all that may come.

Our Mission.

The Watchman aims to be in its most comprehensive sense a fraternal paper. Primarily it is devoted to the interests of the Ancient Order of United Workmen, in the full faith and belief that in that Order is found a fraternal society without a peer in the field which it aims to occupy, but it is not blind to the fact that in many other societies the outgrowth of this there are many excellent features, some of which time may prove to be worthy of adoption; and yet we would not forget the admonition to "prove all things and hold fast that which is good." We are content that each should have a full and fair opportunity to establish its right to public favor and confidence, unmolested by even what would seem to be just criticism. What if some are based on a fallacy? What if some promise more than they will by any possibility be able to perform, and so will be compelled to amend or change their systems? What if some should die the victims of unrealized expectations? Nobody will be the loser to any extent worth making any fuss about. A society that pays out for the benefit of its members all it receives, furnishes mutual protection at absolute cost, and hence nobody can be cheated by failure. Therefore we do not share in the alarm which some feel because of the multiplicity of fraternal Orders of the beneficial class. All will not live. It is a question of the survival of the fittest. Nor do we fear for the A. O. U. W. because of what might perhaps be fitly styled competition by similar organizations. We have known many instances where a Lodge of our Order was established in a town large enough for two or more, and we have known such Lodge to be fearful lest the establishment of another would be the ruin of the one already struggling for an existence, and yet despite the efforts of the parent Lodge, when the second came into the field the result was a godsend to the first. And this is the almost invariable result. So with rival organizations aiming at substantially the same object. Only a little while ago the A. O. U. W. stood alone in its peculiar field. Now its competitors are counted by scores, and still none outstrip the original, many are prospering, and we are glad to note the fact. We give them the benefit of a friendly grasp, and a fraternal greeting, as our columns continually attest. Nor do we shut out those venerable and grand societies from which in a measure even the A. O. U. W. owes its existence, though their field and ours are circumscribed by different lines. All find a welcome and a kindly embrace.

We want to do good in the world—to make men better and happier. We want to see the homes of our people builded and protected. We want to see poverty banished from the land—not by almsgiving—not by those who, by industry and economy have saved something, being compelled to divide with the idle and the profligate, but by stimulating honest endeavor, by sustaining those who strive as they should, and then by our mutual efforts to place a protective shield over the household of every one who is worthy. In such a cause may we not confidently expect the approbation of the Great Supreme Master.

What is the best way in which to show your family that their welfare and their happiness is your first thought? As the world goes, money will be one of the means by which this end can be reached. A beneficiary certificate presented to them, guaranteeing $2,000 upon your demise, will be a bridge by which they can safely cross over what may be the darkest period of their lives. Then, your association with other men who have done the same, the fraternal greetings extended in the Lodge-room, will make you a better man. Let the doubting look into this. The A. O. U. W. will be ready to receive you.

Silver Wreath Lodge, No. 2, Arizona, was instituted May 14th by L. M. Prince, D. S. M. It is located at Globe city, Gila county, and had 24 charter members.

Owing to the illness of his partner, Bro. M. T. Brewer could not attend the session of the Supreme Lodge, and Grand Recorder Pratt had to go in place.

Valley, No. 30, at their meeting on June 3d, authorized the trustees to send tickets to all widows and orphans of brethren who formerly belonged to Valley.

True Words.

Bro. Walter Ferral delivered an address before Mendocino Lodge, May 19th, from which we take the following: "He who joins this Order with the intention of simply paying a few paltry dollars and drawing $2,000 in return from its treasury, is not a true Master Workman. The duty consists in more than simply paying a few assessments. It consists in attending your Lodge meetings and using all your power and influence to make those meetings pleasant; to create a fraternal spirit among the members, and to prevent any discord arising calculated to breed confusion; to at all times render a willing and cheerful obedience to the laws of the Order and to those officers whose duty it is to execute them, and whether in or out of the Lodge room make your guiding rule in life be Charity, Hope and Protection."

In speaking of the duty which fathers owe to their families, he said: "I say in all sincerity it is your duty to prepare for death. You are as liable to be the next victim as is your neighbor. Experience has taught us that death is at our door by day and by night. Are you now ready? Think of this question seriously; supposing that ere to-morrow's sun kissed the bosom of our beautiful Pacific you should be summoned from earth, what would be the condition of those you have sworn to love and protect? Remember they cannot live upon the sympathies of friends. Do you desire that they shall see, when their heart strings are snapping asunder with grief—when their cheeks are burning with the tears of sorrow over their loss—the specter of poverty and want haunting them to increase their torture? Does this picture not look like a living reality to some whom I am now addressing? If you see your picture in the mirror, I adjure you by all that is sacred in Heaven and on earth to lose no time in preparation. Enroll yourselves as members of the A. O. U. W., and 12,000 true brothers on California soil will see that the wolf is kept from the door, and that those who are near and dear to you are protected from the chilling winds of a cold world. To the ladies we appeal for help. We have a right to ask for kind words and bright smiles at your hands. It is for your happiness that we are banded together, and the name of some true woman is on almost every beneficiary certificate that our Order must meet. If you are in favor of spreading a due deference to religion, if you are in favor of temperance, if you are in favor of morality, if you are in favor of trying to make humanity better, if you are in favor of those who are struggling to provide for you when your dress shall bespeak companionship with the narrow home that awaits us all—then throw upon this Order your brightest smiles, and as the twinkling stars in the blue canopy above us seem to stand as sentinels of God—so will the A. O. U. W. pledge its sacred honor to the purest of all earthly things—woman—that it will ever stand as the faithful guardian and sentinel, whose mission shall be to comfort and provide for the widow and orphan when death has robbed them of their natural protector. When time has run its course and all worldly things have become obliterated—then and not till then will the mission of the A. O. U. W. be ended."

A writer in the Pacific States Watchman expresses himself in a forcible manner on the subject of suicides, taking strong grounds against the payment of their death losses. These occurrences are becoming so painfully prevalent that the subject will force itself upon the attention of the Supreme Lodge at no distant day. It is undisputed that in the greater number of cases the cause of suicide, like murder, is directly traceable to intemperance. Let none but sober men be admitted, and let the excessive use of intoxicating liquors be cause for expulsion (where members have become so addicted after admission) and deaths from suicide will be of less frequent occurrence.—*Baltimore Protector.*

J. M. La Rue is Deputy for San Joaquin and Tuolumne counties, in place of J. R. Williams, declined. Bro. La Rue writes us that he went to Sonora May 18th for the purpose of instituting a new Lodge. The names of officers will be found elsewhere.

The annual re-union of the Workmen at Fairfax on the 21st will bring together our brethren from every portion of this jurisdiction, Oregon, Washington and Arizona.

A Lecture to Wives.

The following address was delivered before a recent open meeting of Ashler Lodge, No. 165, Alameda, by Bro. R. Wheeler: You may say, "Why do you not lecture on this subject at home instead of before an audience of husbands and wives?" Any married man knows by experience such a venture is not safe in any home when the wife is possessed of that spirit which belongs to women. A man may try that on some poor, subdued creature, whose marital life has been all trials, and one who has never been the recipient of a kind or encouraging word from her mate. We want it understood that Workmen do not have such wives. They are all women of spirit, of self-reliance, and therefore, any and every Workman knows the danger of delivering a lecture to his wife at home. It is an action that he will not seek. Here in this Lodge-room such a lecture is safe, although the wives may be champing their lips and inwardly muttering the words of a hero of many a contest—"Let me upand at him!" Here they cannot retort, for this is the husbands' sacred precinct.

There are many different kinds of wives. There is the good, bad and indifferent, the selfish and the generous, the economical and the extravagant. But there is one kind of wife—I do not know in which category to place her. It is the wife who interferes with her husband attending to his Lodge duties. She who is willing that other loving wives shall be deprived of the companionship for the evening of an affectionate husband. But in the case of the death of her husband this wife is not averse to the taking of the $2,000 which this Order gives, and which probably would have never reached her hands had it not been for the liberality and good sense of those who see that their husbands are frequent attendants of the Lodge, that their dues are paid, and the duties they owe to the Order fulfilled. No human has a right to demand more than it will give. No wife has the right to demand that the husbands of others shall assume offices in a Lodge, shall go to the Lodge-room, and transact the business which secures the payment of the beneficiary certificate in case of death, unless willing that her husband shall also attend the Lodge deliberations and business. There is no right given her which allows the imposition of her selfishness. And again, the wife who does not compel the attendance to the Lodge, of her husband, at least once a month, if a mother, is, in a sense, neither a true wife nor an honest mother. No matter what may be her circumstances to-day, she cannot foretell the future, and is guilty of a great wrong to speculate upon it. Where is the law given her to jeopardize that which the careful husband is laying away for her and family in case of his death, and this she does when, in any manner, she seeks to prevent the attendance of her husband at a Lodge meeting. In the Lodge-room, the husband will never go astray. By the teachings of the Order he is taught to improve himself, and if he does not leave each meeting with holier feelings than he came, he has not listened to the instructions. But throwing this aside, who is going to look after the interest in the Order when he himself is neglectful of it, and every member of the Order has equally the same interest, viz.: that his family will receive the $2,000 in solid gold coin after his death. It is all very well to say there will be plenty of others there to transact the business, but suppose there is not, the Lodge cannot open without a quorum; at the next meeting it might be the same way, and so on it might go, until having failed several times to observe the laws laid down for the governing of subordinate Lodges, the charter is taken away, the money paid is lost, and only through the kindness of some other Lodge, the brothers thus left out in the cold are provided for. I do not say that this will happen, but it might if your wives do not attend more sacredly to the duties you owe yourselves and children. See that the husband attends Lodge regularly; ascertain if his dues and assessments are paid promptly. Never interfere with his purpose to attend a Lodge meeting, but on the contrary be pleased to see him go, for in it is the signification that he is providing for you and your little ones.

Three new Lodges were instituted in Iowa from March 24, 1881, to April 21, 1881, with an aggregate of 63 charter members. There were also 103 new beneficiary certificates written in April, and seven rejections for membership. This jurisdiction has a membership of nearly 10,000.

The Workmen throughout the city are taking great interest in our coming picnic. One feature we notice is that each *paterfamilias* is sure to count up for all the little ones, so that all may go and enjoy a real country picnic, and have what it really will be, a great family gathering.

S. F. Barstow, Deputy of Marin county, reports a new Lodge in process of formation at Olema.

Grand Recorder's Department.

Headquarters of Grand Lodge, A. O. U. W., Rooms 40 and 41, St. Ann's Building, corner of Eddy and Powell, San Francisco. H. G. Pratt, G. R.

Wm. C. Flint, Esq., 216 Sansome street, San Francisco, is Chairman of Committee on Laws and Supervision. All By-Laws, or amendments to same, should be sent directly to him.

We have had printed a supply of blanks for term reports of Financiers and Receivers, which are subject to order. Ten cents per copy.

The Lodges would confer a great favor upon this office if the General Fund account could be closed at the end of this term. Do this much brothers, and you will receive our united thanks.

The Order in this jurisdiction is still making its rapid strides, with no indication of nearing the terminus. Let the best material be our motto, and grand success will crown our efforts.

We trust that the officers will be prompt in sending to this office the semi-annual reports. The D. D. G. Masters will aid us much by remitting the per capita tax of 30 cts. as soon as possible.

Bro. C. F. Hall, D. D., of Tulare, is working up a new Lodge in his district. Also, Bro. S. F. Barstow, D. D., of San Rafael, has a new Lodge under way. Several other deputies have been engaged in gathering material for new Lodges, and we expect to hear from them soon.

From our financial statement it can be seen that most all of the Lodges responded to the relief call promptly. We hope that the few remaining Lodges will send in their amounts, so that we will be able on the 20th of June to close up the account with the Supreme Lodge.

The Recorders of Lodges will please notice that we close our books on the last day of each month. The financial statement and bills are always made out from that date. Should the Lodges remit money on or about the first of the month, on the General Fund, before the bill reaches them, they will deduct the amount so paid from the bill when they receive it, and pay the balance.

At the installation of officers the semi-annual report should be handed to the installing officer for inspection, who should return the same to the Recorder of the Lodge for transmission by that officer to this office. The installing officer should forward the per capita tax, which for this term is 30 cents per *member*, and this includes all who have not been suspended from the Order, Junior Workmen with the rest.

Look well to the choice of officers for the coming term. In ninety-nine cases out of a hundred good officers make a good Lodge. If you have a good Recorder and a good Financier keep them in office if they will consent to serve, even for a reasonable consideration. To change faithful and efficient clerical and financial officers is bad policy as a rule.

On the first of July next the new officers will be installed in their several places of trust. Before the change of such officers is made you will allow us again to entreat you to consider well the material you select. It is of the greatest importance that the best qualified brothers should thus be chosen; and as far as practicable have the old and faithful officers, such as the Recorders, Financiers and Receivers re-elected. New changes in any branch of business are the cause of no little confusion, hence the necessity of keeping old and experienced officers to transact the business of the Lodges.

Many of the officers consider remittance reports as a matter of *red tape* and that it has no particular merit otherwise. We would say to such that it is not a matter of superfluity or style simply, but an imperative demand by the Grand Lodge at its last session. The Finance Committee whose duty it is to audit our books and accounts refuses to *consider* any entry of cash, unless we can show a voucher for the same. Hence the necessity of the report accompanying the remittance of all funds, and all money sent to us, as no receipt will be given in any case unless we have a voucher for the same.

Let Workmen remember that for each ticket sold 15 cents will go into the General Relief fund to help some needy brother or family.

From Grand Master Workman.

Official.

Office G. M. W. of California,
San Francisco, June 11, 1881.

To whom it may concern:

Several complaints have reached this office that at picnics, balls, and other gatherings, under the name of the A. O. U. W., that the law of the Order has been violated in regard to the use of liquor, etc. Said law positively forbids the using, or causing to be used, at any public entertainment, etc., any intoxicating liquors, and it is the duty of the Grand Master Workman to see that the laws of the Order are complied with.

Therefore, it is hereby ordered that no public gathering shall be held in the name of the A. O. U. W. in this jurisdiction, except by dispensation of the Deputy of the district where said parties proposing to use the name of the Order are located. And said district deputies are hereby required to grant such dispensations only upon the written promise of the officers of the Lodge or Lodges, or committee of members managing such celebration, picnic, ball, etc., that no intoxicating liquors shall be sold or caused to be used (see Sec. 672 of Digest).

The holding of picnics, etc., in the name of the Order in places where liquors are sold, is hereby positively prohibited, and a violation of this law by Lodges or committees of members, under the name of the Order, shall constitute an offense against the laws of this Fraternity, and render those violating it subject to charges.

Wm. H. Barnes, G. M. W.

What are We? What are Our Aims?

The following address was delivered at an open meeting of Noe Valley Lodge, No. 185, May 24th, by Bro. J. B. Metcalfe, of Excelsior Lodge, No. 126. The Lodge, as is its custom, also had music, recitations, etc:

The above questions are more frequently addressed to Workmen than any other, and as they are practical and pertinent, they should be practically answered. To the first proposition, "What are We?" emphatically we answer, "The Ancient Order of United Workmen" is one of the greatest moral structures of the nineteenth century; that in its conception exists the latent germs of a power, which if ably developed in consonance with the elevated aims of the Order, will, in its beneficence to humanity, be as potent an assistant as can be maintained without the pale of the rich blessings of the Christian Church.

To the second proposition, "What are our aims?" we as readily reply: They are the social comforts, mental and moral culture, and the practical well-being of our fellowmen. These are the obects of our resources, and the measure of the intent of our, as yet, undeveloped powers.

I use the term undeveloped powers because the "Ancient Order of United Workmen" is comparatively in its infancy, but infant though it be, we can freely arrogate to ourselves the honor of being a precocious young giant. We are to-day, when we compare the relative date of our organization, numerically stronger, at least in the United States, than the time-honored Orders of Masonry and Odd Fellowship. This, though, is but the least of reasons for being proud of the lusty life of this vigorous infant. When you appreciate the fervid enthusiam that pervades its frame, and how full of manly worth, prodigality of talent, wealth, culture and strength that are the bright elements of its composition. we are forced to wonder if this be not ripe manhood, the result of years and mature wisdom.

What, then, is the inspiring cause that has awakened into teeming life a power that we hold is so fruitful of beneficence and good? that brings men together in such fraternal accord and friendship? The teachings of the Order tells us the secret is, that its fundamental principle is as ancient as creation itself; that its very essence is coeval with the birth of man. Its principles are as ancient as creation itself, because, when the great God blew the breath of life in the nostrils of man, he created him a finite being, and left us dependent, one upon another, filled with weakness and imperfections. This is our common heritage, and we are forced to lean upon one another or perish; for it is only by the mutuality of assistance by the individual members of society that civilization and society exists. Even the arts and sciences are of kindred nature, and flourish best in each other's society.

The Christian church proposes to make plain the philosophy of man's spiritual life, we desire to solve the present pressing problem of man's earthly living, and, in recognizing the Divine decretal of man's dependence, we think the problem is best solved by the compact of brotherhood and the mutuality of aid.

It is from this part of mutual assistance that springs our power for good, and therein lies the secret of the strength of the Order.

What grander design can human thought conceive than concerted strength for the encouragement of useful pursuits, of mental and moral culture, and the helping of our fellow creature to lead a higher and a nobler life? The Order's injunction is to let not your hands be idle, but be a workman in a practical sense; for by industry you maintain individual credit, and thereby the credit of the Order. "Go to the ant, thou sluggard," the Holy writ proclaims, for the wise king knew that happiness and contentment followed thrift and industry. You are met at the very threshold of the Order with the earnest instructions to lead a life of usefulness, to cultivate mental graces and social intercourse.

It is not infrequent that by these mediums that some dormant faculty of the human mind leaps to the front, that might have slept on until the oblivion of the tomb enshrouded it in eternal night.

By the encouragement of philanthropy, fraternity and social intercourse in the Lodge assemblies, is fostered a magical tie, for when we go forth into the outside world, and brother Workmen meet, the heart responds to a mysterious feeling of fraternal accord, that has been born of the pledge of faith and the compact of Brotherhood.

The "Ancient Order of United Workmen" is in no sense a religious Order, according to the general acceptance of the term; but it is the handmaid of every Christian creed, and by its very catholicity, shuns any sectarian limit. It asks simply that the ark of your covenant be freighted with plighted faiths unbroken between ourselves and our fellow men, and with friendships "passing the love of woman."

It searches not the conscience further than to ask an unquestioning faith in the Father of all and the Giver of every good gift, but leaps across the conflict of creeds and looks out abroad and beyond the great sea of life to where its troubled waters break ceaselessly upon the shores of eternity, and whether a man be priest, preacher or layman, they all can be equally, *good Workmen.*

It insists that you simply be a guard upon your own and each other's character, for the frailty of human nature is a legacy of man's first fall, and asks that you help your brother to enable him to help himself.

How little a man knows of his own strength until temptation faces him. How some glittering and fascinating power often leads him noiselessly to destruction. Unconsciously he may have some moral weakness in his character that, like a mere atom upon some Alpine mount that has been caught up in its icy splendor as it accumulates upon its rugged hight, enfeebles the great mass as the weight increases till at last it plunges headlong into some yawning abyss and lies with its glacial beauty all shattered. This is but too oft the story of the moral wreck of man.

Our Order is not a temperance society in the popular sense of the word, but it demands that each member be a sentinel upon his own habits in order that throughout all his life will still come back the cry that "All's well."

Vice is so stealthy and insidious that "we first endure, then embrace." Have you not seen some noble spirit laid low by its creeping gains upon a moral weakness? How men of sterling worth, and admired for their social traits, have drifted into the grim grip of alcoholic vice until the fiery liquid has besotted the bright intellect and bowed the manly form—aye, until he has become a "libel upon God's creatures," and would, in his moral decreptitude, "sell out Heaven for something warm to prop this inward sinking?"

And lastly, another and the great practical object of the Order, its beneficiary feature.

Although the Order has been not quite six years in the State of California, the great good that it has already accomplished can scarcely be credited by those who are not members. It was organized August 21, 1875, at West Oakland. Its membership throughout the United States on the 1st of April, 1881, amounted to 96,690. In California, on the 1st of May, 1881, there were Master Workmen in good standing, 11,840, and 193 working Lodges, and the amount collected up to that time for beneficiary claims, was $320,400, and of this sum, all, with the exception of $3,000 or $4,000, has been paid out to the representatives of deceased members.

It is but too frequent that the protecting arm of a family is struck down, when its sturdy aid is most needed, and a penniless household is left to mourn in penury and want; but when a Workman is summoned to lay down his work here, and passes to the life beyond, the greatest sorrow that can be known to a human heart is lifted from his breast by the knowledge that gaunt hunger will not press its bitter cup to the lips of his loved ones. The spirit will have scarcely taken its flight, ere the protecting hand of the Order seeks the sorrowing inmates of his home.

How sweet then the consolation, when disease and sickness has wasted the frame and withered the limb, when the manly cheek is blanched by frightful pestilence, to feel the assurance of brotherly protection. Or, when the mystic veil has been rent, and we pass beyond the cares of earth, to know that the fond ones we leave behind us shall not want, because the Brotherhood, in friendship strong, have pledged themselves to Charity and Protection.

Rum at A. O. U. W. Picnics.

Editors Watchman:—To the reader of average intelligence the title alone is, in itself, suggestive; to the thoughtful, serious and unprejudiced mind, it is alarmingly suggestive. Why? For the simple and plain reason that it is a fact beyond contradiction that rum (and I mean by the word rum anything and everything that will produce drunkenness) is permitted to be offered for sale at any and all of the picnics given in the name of, and under the direction of the A. O. U. W. It is also a well-known fact, equally indisputable, that the Constitutions and Laws of the Grand and subordinate Lodges prohibit the sale of rum or the use of it at any social or festive gathering of the members thereof. Why then is it allowed? Are our laws a dead letter or are they a living lie? Do we solemnly pledge ourselves to do certain things and to leave undone certain other things, and then do the things which we agree not to do, and leave undone the things which we agree to do. Do we, as citizens, believe in respecting and obeying the laws of the Government under which we live, transact business and enjoy the privileges connected therewith? I take it we do. Well, if as citizens of the republic, we quickly resent any insult to our laws, why, then, should we not, as members of the A. O. U. W., be as quick to resent and oppose a like insult to, or evasion of, the laws of the Order which we profess to uphold and love so dearly?

Or is it the real Simon-pure love in the one case and empty profession and maudlin hypocrisy in the other? How many decent and respectable men in the whole Order in this State are there who desire to take their wives and children to picnics given under the auspices of the Order when they know perfectly well beforehand that the "principal attraction" (?) there will be "rum and drunken men?" Is it an impossibility to have an enjoyable picnic without rum? "But," says a person, "you certainly do not mean to exclude beer?" Candidly, I do; for it is painfully true that beer will make men drunk. Have we not reached the period in the life of this organization when we can sternly refuse to allow our minority to control the Order?

True it is that our G. M. W. issues strong and stirring orders and sends forth the circulars on the subject of rum drinking and intemperate members. But how are these orders regarded or these instructions carried out? He no doubt would be astonished if he knew the want of effect. Sooner or later this organization will be compelled to look this important question squarely in the face, and we all know "a stitch in time saves nine." Let the salvation of the Order appear before it is too late. All of us know how disgusting it is to be annoyed by drunken men anywhere, more especially at a picnic; well, then, isn't it outrageously shameful for a brother member to sell or give away rum to his fellow-member in order to make him drunk "at a picnic?" If the "cause" is removed the "effect" will not be seen.

It may be suggested that it is an easy matter to point out defects and to talk about these inconsistencies, but how to bring about the remedy is quite another matter. My idea is that one of the most potent means to be used in order to bring on a change for the better, or the remedy, if you please, is agitation of the subject. Let it be discussed in the Grand Lodge and in all the subordinate Lodges in the jurisdiction. Put the questions, "rum," or "no rum," at our picnics, etc., to vote in each Lodge, and have the names of all the voters published in the A. O. U. W. home journal. Let the outside masses see if we are a "rum organization" or otherwise. And as the home journal carries much valuable information into the families of the members of the Order, the information on this especial topic would, no doubt, be read with serious interest and subjected to severe comment by the ones who are intensely interested in the welfare of the Order, namely, our wives and children, friends and sweet-hearts. Where is there a true faithful woman that wishes to see her husband's name recorded in favor of "Rum at A. O. U. W. Picnics?" Would it make our children feel glad and rejoice that *their* father was in favor of it? Do you think any worthy and honest young lady would exult in the fact if *her* lover and intended husband should be found in the "Rum at A. O. U. W. Picnics" rank. But, if the Order ever intends doing anything on this subject, let us get at it and do it now. If not, let us be candid enough to say we see and know of this evil, but are either unwilling or powerless to conquer it. But do not let us give up the fight without at least a showing of opposition. Therefore, agitate, agitate, agitate. Candidly, Candor.

USE OF THE EYES.—The man who avoids excesses of every description has a fair chance of retaining his eyesight until old age sets in. A time comes to every one when the physical powers begin to decay, and then, unless the brain has been kept active and recipient by exercise, there is nothing left to live, and the man perishes. We say that he died of gout, or over-eating, or of kidney disease, or of the failure of the particular organ which was the first to exhibit symptoms of the approaching end. In reality he has died of stupidity, artificially produced by neglect of the talents with which he was endowed. That which is true of the organism as a whole is true, also, of its parts; and the eyes, among others, are best treated by an amount of systematic use which preserves the tone of their muscles and the regularity of their blood supply. Acuteness of sight is aided by the attention bestowed upon objects within the range of vision. In people who cannot read the sight is far from acute. I have even had reason to think that the wives of such men were indebted to their household needle-work for the maintenance of a higher standard of vision than that of their husbands; and I have no doubt that idleness of the eyes, if I may use such an expression, is in every way hurtful to them, and that proper and varied employment is eminently conducive to their preservation and efficiency.

THE ENERGY OF THE HEART.—We may form some conception of the enormous energy of the human heart when we reflect that a good climber can only ascend 9,000 ft. in nine hours, that is, can only raise his own weight 1,000 ft. in an hour, that is, of course, continuously for any length of time, while the work done by the heart is equivalent to raising its own weight (10 ozs.) 13,860 ft. high; and we may put this even more strikingly by pointing out that the most powerful engine ever made by man, the "Bavaria" locomotive of the Vienna and Trieste railway, can only raise itself through 2,700 ft. in an hour; that is, its energy is less than one-fifth of that of the human heart (Houghton). Of course, the actual amount of work done, both by engine and climber, is much greater than that done by the heart; but relative to weight, the energy of the heart far exceeds that of the other two.

CHANGES IN THE DIAMETER OF TRUNKS OF TREES.—According to the *Gardener's Chronicle*, MM. Kraus and Kaiser have been making some researches from which it appears that the trunks of trees undergo daily changes in diameter. From early morning till early afternoon there is a regular diminution till the minimum is reached, when the process is reversed and the maximum diameter attained at the time of twilight; then again comes a diminution, to be succeeded by an increase about dawn—an increase more marked than that in the evening. The variations in diameter coincide, therefore, with those of the tension, but they are shown to be inverse to the temperature, the maximum of the one corresponding roughly to the minimum of the other, and so on.

FREE COACH TO AND FROM THE HOTEL.

Important to Bread Eaters.

The London *Court Journal* states that the letter to which the following article, from the Huddersfield *Journal*, refers, caused every bakery in London to be beseiged: "We last week published a letter from 'Chemist,' on the advisability of the more general consumption of 'wheat-meal' bread. The question is one of great importance, and demands serious consideration. Wheat-meal bread is made from grain which has been deprived of only the outer covering, that is to say, the flour contains the bran. The bread thus produced is not only much cheaper than the ordinary white bread, but it is much better. A shilling's worth contains three times more flesh-giving material, 70 times more heat-producing material, and three times more bone-forming material than is to be found in a shilling's worth of beefsteak. For the discoveries in this respect we are indebted to the late Baron Leibig, who has done more than anybody else to show the world the secret of economical and wholesale cooking. Of course, it is not proposed that the highly nutritious wheat-meal bread should be man's only food. In Spain, it is true, the peasant lives and flourishes on wheat-meal bread and garlic, but the British working man would be very loth to go without the roast beef of old England. There can be no reason, however, why wheat-meal bread should not be substituted for ordinary white bread. By its nutritive qualities men would need less quantities of other victuals, and thus an appreciable saving of money would be the result, while (in growing children especially) the bones, sinews and muscles would be strengthened, and thick coats of pure enamel would preserve the teeth from decay. The only obstacle in the way of the adoption of wheat-meal bread is prejudice."

THE TELEPHONE THROUGH WATER.—*L'Electricite* states that M. Dohrn has introduced the telephone in connection with his scientific explorations of the bed of the Bay of Naples. By its use the diver and the boatman overhead are able to communicate with each other quickly and intelligibly.

ENEMIES OF SPIDERS.—The well known naturalist, the Rev. H. E. McCook of Philadelphia, has been talking to the academy of that city on spiders, which he designated as the most benevolent of insects. Among the principal enemies of the spider he enumerated many of those hymenopterous or four-winged flies, the bees, wasps, etc., which produce flesh-eating grubs. Large numbers of spiders are used by these species as food. The nest of one of these forms was exhibited, built of clay in such a manner as to resemble the pipes of Pan. When opened these nests were found filled with spiders of different species. They were all paralyzed by the fly, but not killed, and in this state of suspended animation they remain until the hatching out of the grubs, which eagerly devour them one after the other. The unfortunate captives lie limp in the jaws of the grubs, showing no signs of sensation, and making no resistance whatever. Other flies, and among those, may be included the common black house-fly, prey upon spiders by destroying the cocoons, or by sucking the contents of their eggs when they happen to be uncovered or only slightly protected. The eggs are also devoured in large numbers by birds. Some species of birds assist in preventing the spread of spiders by making use of their webs, especially the thicker portion used in the construction of cocoons, to build their nests. A nest was exhibted, composed of this mineral in such quantity as to indicate the destruction of a great many webs. Those hymenopterous insects which deposit their eggs in the cocoons of the spiders are, however, their most destructive enemies. When the grubs are hatched they attack the eggs and young of their hosts, and consume them as food until sufficiently developed to obtain their nourishment.

HIGH UP.—The crown of the hat of the statue of William Penn, which is to surmount the tower of the new public building of Philadelphia, will be just 525 ft. above the pavement. This is ten ft. and one inch higher than the highest towers of the Cologne cathredral.

ELECTRIC lighting is in successful operation on more than 60 steamers of the Mississippi river and its tributaries. It is believed to add much to the safety of that kind of traffic and traveling.

An A. O. U. W. Floral Celebration.

Ashler Lodge, No. 165, Alameda, gave a floral reception on Tuesday evening, May 31st, in Odd Fellows' hall. This large and richly furnished hall was elaborately and tastefully decorated with flowers, evergreens, exotic plants and artificial pyramids and flowers to an extent and perfection seldom seen. At the entrance over and around the doorway, the decoration commenced, extending in a wreath all around the room close to the ceiling. In the center were immense hanging baskets, while on the platform were two monuments of flowers eight ft. high, standing in huge Japanese flower-pots four ft. high, between which were a large number of ornamental vases and flower-pots filled with the choicest flowers. Across the room, wrought out of bright-colored flowers, were the words, Ashler Lodge, No. 165, beneath which, on the canopy, were flowered letters, A. O. U. W.—Welcome! The hall was completely filled with invited guests, who on entering the hall were allowed to select a lappel bouquet. As a fitting adjunct a very choice musical and literary entertainment was given, the programme of which was posted on one side of a neat Japanese fan. Bro. Wheaton, M W., as Master of Ceremonies, welcomed the large, select and fashionable audience, and introduced the programme by a piano duett, by Miss N. Mayrisch and Bro. R. Chartrey—a pleasing performance; reading, "The Death of the Old Squire," Bro. A. F. Craven; ballad, "I'm Queen of a Fairy Band," Mrs. H. W. Arthur Nahl—a fine artistic effort that was heartily applauded; essay, "A Lecture to Wives," Bro. R. Wheeler—printed elsewhere; cornet solo, "The Serf Polka, with piano accompaniment, Master B. F. Daggett—a masterly effort that was applauded with a recall; reading, "How I Edited an Agricultural Paper" (Twain), Bro. E. T. Barnes; piano solo, "Hungarian Storm March," Miss Fanny Danforth, a fine performance that was applauded unto a re-call. Intermission of 10 minutes. Piano duett, overture, Mrs. F. Varden and Mrs. R. F. Clark, an effort that evinced high art cultivation, and that was listened to with pleasure; address, Wm. H. Barnes, the surroundings and occasion seemed to bring out our Grand Master's best efforts, and his interesting and instructive remarks were listened to with rapt attention; duett, "Mother Kissed Me in My Dreams," Mrs. J. Tretheway and Bro. J. W. Hand; piano solo, "Delta Kappa Ep Silon March," Bro. J. E. Baker; recitation, "The Knight and the Page," Bro. A. S. Cheminant, for an encore, Drake's address was given; ballad, "The Mariner," Bro. R. Frank Clark; Bro. Wheaton entertained the audience in his variations, and was encored. This floral tribute and literary exercises was the voluntary contribution of the members of Ashler and their families. The male performers were all members of the Lodge, and the ladies, with two exceptions, related thereto. The Committee of Arrangements, consisting of Bros. H. B. Wheaton, R. V. Clark, A. S. Cheminant, P. B. Barton and J. W. Hand, are deserving of praise for the able manner they carried out this floral celebration.

Fortuna, 13.

The first grand celebration by Fortuna Lodge No. 13, of Napa, was held Monday, May 30th, and consisted of a public picnic at the Terrace Springs pleasure grounds in the day time and a grand ball at the Opera House in the evening. The Lodge, formed, says the *Reporter*, in procession in front of their hall at about 10 o'clock, and headed by the Napa brass band and marshalled by T. N. Mount, marched down Main street to Second, up Second to Randolph, down Randolph to Third, out Third to Asylum Avenue, where they received the Orator of the Day, W. H. Barnes, G. M. W., of San Francisco, and thence out Cemetery Avenue to the grounds. Here the assemblage was called to order by the President of the Day, F. A. McDonald, and prayer offered by Chaplain E. B. Ware. This finished, the President, after giving the guests a cordial welcome in behalf of the Order, introduced the orator of the day, Grand Master Workman Barnes. We presume it is not necessary to assure our readers that the address was interesting; that it was an able effort, scholarly, appropriate, and brimful of sound arguments, and humor, and timely suggestions. Mr. Barnes has addressed Napa audiences before, and by his eloquence and pleasant manner of address has won the favor of all. After the oration an intermission was taken to allow the people an opportunity to eat their lunches, after which the dance commenced, and was kept up until half past five. During the day interesting games were indulged in, for which prizes were offered to successful competitors: The festivities wound up with a grand ball in the evening at the Opera House. Music was furnished by six pieces of the Napa band, and was of an exceptionably good order, consisting of a number of entirely new selections. Some 80 couple were in attendance, who chased the fleeting hours with merry feet until about three o'clock in the morning. Lunch, consisting of hot coffee, sandwiches, cakes and ice cream, was served underneath the stage by Mrs. Tobin, and was well patronized. Altogether the first celebration of the A. O. U W. of Napa county has proved a success, financially as well as socially.

Humboldt.

EDITORS WATCHMAN:—The members of Bay City, No. 111, will celebrate the second anniversary of the organization of that Lodge on the 21st of June. The manner of the observance of the occasion has not yet been fully decided upon. The organization of a Lodge of our Order at Trinidad will, for obvious reasons, be delayed until July or August; but District Deputy Bell confidently hopes to have a new Lodge in working condition at Ferndale before the end of June. Bros. Veasey, of your city, and Ross, of the steamer *Ferndale*, have been active in laying the real character of our Order before the people of that section.—Eureka, May 7th, G.

Lakeport, 34.

The third anniversary of this Lodge was celebrated in fine style on May 21st. The Lower Lake *Bulletin* says: The procession was formed at Smith's Grove, three-fourths of a mile west of Lakeport, at half-past ten A. M., under the direction of P. M. Daly, Master of the Lodge, and marched some 300 yards to where a fine rostrum and seats had been provided, headed by the Lakeport Cornet Band, under the leadership of Bro. Jas. Laycock and Prof. J. A. Epperson. On arriving, Bro. H. A. Oliver, P. M., in a few, brief and appropriate remarks, addressed the Brotherhood and the large public audience, who honored the occasion with their presence, on the purpose for which they were assembled, and the social and fraternal relations of the Order, after which he introduced Bro. G. W. Wilson, who proceeded to give, in a clear and logical speech, a history of the formation of the Lodge. At the close of his remarks, Bro. R. W. Crump, P. M., was introduced as the Orator of the Day. Bro. Crump, on taking the stand, proceeded to give a graphic sketch of its history, aims and purposes, and spoke of it as second to none, although not claiming an origin as ancient and as venerable with the centuries; yet, by its harmonious and fraternal spirit, as well as by its broad and liberal rules, it had gained for itself a reputation no less than any other organization, beneficiary or otherwise. After the close of the address and stirring music by the band, Bro. Oliver, after paying a well merited tribute to Col. H. Winchester, of Lower Lake—whom he denominated the Bard of Lake—for the excellence and beauty of a poem dedicated by him to Lakeport Lodge, No. 34, introduced Miss Lillie Martin, who read it in a manner which indicated a knowledge of correct delivery, only obtained by careful study. The reading of the poem completed the literary exercises of the day, when, on invitation of Past Master Oliver, all were called to a well and splendidly filled table of everything good in the line of eating, after which, a dancing floor having been previously prepared, the "fair ladies and brave men" indulged in that pleasant and social pastime to their hearts' content. Too much praise cannot be given to the different committees for the admirable manner in which everything was conducted. We take pride in saying that good order prevailed throughout the day.

Visalia, 79.

The Workmen of Visalia picnicked at Roger's grove Friday, May 20th. The *Delta* furnishes the following report. The music during the literary exercises was furnished by the Visalia Silver Cornet band. The principal feature of the programme was an able address by W. B. Cullom, on "The Ancient Order of United Workmen a Charitable Institution." It was replete with masterly rhetorical effects and sound logic. The idea was human progress, embracing intellectual and moral advancement. Great calamities have been the forerunners of progress. Out of Napoleon's excesses grew the tranquility of political Europe. The Koran paved the way for the Bible, and the Saracen for the Christian. Benevolence and charity are the underlying and fundamental natural qualities of the human conscience, and it is this spirit which benevolent organizations encourage and develop, raising men above common prejudices and personal differences to that higher level of pure humanity which makes man the prototype of his Maker. The amount paid the heirs of a deceased member is but a small part of the good accomplished by the A. O. U. W. It has a broader, a deeper and a more comprehensive mission. It cares for the sick, it lightens the burdens of poverty, it promulgates a safe code of morals, it is active in rescuing benighted wanderers from the ways of darkness and misery, it teaches charity, and paves the way to heaven. It modifies the rigors of political, social and religious differences, and binds all men in a bond of common humanity. The address concluded with words of welcome. After it came an essay on "Education," by Rev. Mr. Mitchell, itself an able and earnest plea and defense. Prof. Orr followed with the reading of Bryant's poem "God's Temples," which was read tastefully and with grace and feeling. Lunch was then served, and in that affair the Workmen displayed their usual earnestness. After lunch came dancing on a platform erected for the purpose, Myer's band and Prof. Henke furnishing the music. As the second annual May picnic of the local Lodge of the A. O. U. W., the affair throughout was pleasant, and will long be remembered by those who enjoyed it.

New Lodges.

Sonora Lodge, No. 197, was instituted at Sonora, Tuolumne county, May 18th, by J. M. La Rue, D. D. G. M. W., with the following list of officers: E. A. Matson, P. M. W.; Frank W. Street, M. W.; J. T. Murnan, F.; C. C. Ortega, O.; Wm. Hartwig, Rdr; Sol. Benas, Fin.; C. E. Street, Rvr; C. H. Burden, G.; J. L. Roberts, I. W.; D. Leeber, O. W.; Dr. E. A. Matson, Med. Ex. The Lodge started with 17 charter members.

Henry Lewis, Deputy of Stanislaus county, instituted Oak Grove Lodge, No. 198, at Oakdale, on May 27th, and installed the following officers: H. Hall, P. M. W.; C. B. Ryer, M. W.; A. Beith, F.; G. H. Rowland, O.; M. J. Perez, Rdr.; H. L. Howe, Fin.; R. Lovell, Rcr.; C. P. Adie, G.; U. McKee, I. W.; W. D. Logan, O. W. Thirty persons more applied for membership, and the prospects are very favorable for a good Lodge.

Oakland Lodge Locals.

Anniversary Celebration of Oak Leaf, 35.

The third anniversary of Oak Leaf No. 35 was held in their large hall, corner Franklin and Twelfth streets, on June 6th. The decorations were not elaborate, but chaste and artistically arranged by the Sisters of Ivy No. 4, D. of H. The chairs of the principal officers, pedestals and chandeliers were wreathed with choice flowers and evergreens. On the wall, in flowers, was the word "WELCOME" over the M. W. chair, whilst in the rear were the words "IVY No. 4." At an early hour the large hall was filled (no standing-room left) with a fine audience of well-dressed ladies and gentlemen. Bro. J. J. Jones, M. W., as Master of Ceremonies, commenced this choice musical and literary entertainment by presenting (on the part of the ladies of Ivy No. 4) a most exquisite lappel-bouquet to Wm. H. Barnes, G. M. W. The G. M. W. was taken quite by surprise, but managed to say, "I've regard for them." Piano solo—Bro. G. F. Page. This was followed by another departure: Bro. Hirschberg, P. M. W., in an eloquent and humorous speech (on the part of the ladies) presented a beautiful basket of flowers. "History of Oak Leaf Lodge," Bro. C. H. Dunton—a concise history that was listened to with much interest, and as Bro. Dunton pictured it in truth and fact, it seemed to us that each brother of Oak Leaf was proud of his membership, and felt it an honor and heritage to leave to his family. Piano solo, Miss Minnie Shilling; Duett, Bro. and Mrs. Ballantine—a very pleasing effort, that brought in the range of all music, changing from the gay to the operatic, and called for a hearty encore. Cornet solo, Bro. C. L. Crabtree, with piano accompaniment—a very artistic performance and well applauded. Solo—Sister Simonds. Recitation—Sister Dunton. A dramatic essay that was listened to with wrapt and almost breathless attention, and was cordially encored. Zither solo—Bro. G. Trost. An unique performance, that made a pleasing variety of artistic music. Solo (comic)—Mrs. W. H. Ballantine. This was the laughable part of the programme, and it filled it well, creating much amusement, applause and encore. Address—Wm. H. Barnes, G. W. M. An oration that was worthy of the occasion, and received with marked favor. Recitation—Prof. H. C. Eastman, a member of Mission, No. 56. A masterly effort, that showed the finished orator. Duett—Miss Anna Newcum and Mr. J. W. Newcum. Recitation—"Meriky's Conversion," Mr. M. O. Higgins; comic, and very interesting to the audience. Comic song, Mr. F. S. Sanford; very entertaining and pleasing. Recitation—"Whiskey Bill," Mr. D. K. Higgins, closing with an organ solo by Bro. G. F. Page. This was one of the many notable and appropriate celebrations that are being held by the different Lodges throughout our State. Any one who had the pleasure of seeing this audience, and the interest, pride and pleasure evinced in the countenances of the members, cannot doubt the perpetuity of our Order, and the continued prominence of this thrifty and commendable subordinate.

San Francisco Lodge Locals.

Friendship, 179.

On June 2d there was a goodly attendance in this young Lodge. A motion was made and carried that a committee of three be appointed as an entertainment committee. This Lodge, following the practice of most of our city Lodges, and a large number of the country Lodges, has taken a step that will make its meetings attractive and instructive.

Harmony, 9.

On June 4, several petitions, and four candidates received the J. W. Degree. A committee of ten were appointed to sell tickets and solicit prizes for the annual picnic. A draft of $192 was drawn in favor of the benficiary fund. It is now an assured fact that the old pioneer will pass the 200 mark this term. After a minute and painstaking care of all matters appertaining to the Lodge and individual members thereof, who, as it appeared, were in some instances thousands of miles away and still under the care of this worthy Lodge of Workmen, under head Good of the Order, a number of brethren of the Relief Committee having called in a body to pay a fraternal visit, were prevailed upon to say a word. Bros. Reading, P. M. W.; Egleston, D. D. G. M. W.; Fick, of Hercules; Rossbach, M. W. of Olympic; Cattrel, Foreman of Triumph; Thompson, Recorder of Noe Valley; Henry, Med. Ex. of Harmony, and Decker, member of the Relief Committee, made short complimentary and fraternal speeches that were well received and well applauded. The M. W., Bro. McCann, was accorded a vote of thanks for the gift of a fine box for the working tools of the Lodge.

Hercules, 53.

The usual interesting meetings are held by Hercules, No. 53. On June 10th the M. W. degree was conferred on three candidates, and applications for the degrees received for three. The work in the secret work was correct, dignified and impressive, reflecting honor on all the officers of the Lodge. The Guide fills an important position in conducting the work of the Lodge, and on this evening Bro. J. H. Congdon acquitted himself with credit. There was a large number present, and from the conversation we judge Hercules will have a good representation at our coming picnic. The Entertainment Committee reported progress, and promised a good time on next Friday evening. Under head "Good of the Order," Bros. Basler, of Harmony, Kenney, of Valley, Manser and Bro. Haskel, of Golden Gate, made short but acceptable speeches.

Memorial Anniversary.

The first anniversary of Memorial, 174, was celebrated with great eclat at B'nai B'rith Hall on Friday evening, June 10, by a social and ball. This was an invitation party, and the managers having the selection had just large enough company to make it pleasant and enjoyable. The hall was tastefully decorated with evergreens, while over and across the platform was suspended, in large golden letters, "1880—Memorial, 174—1881." "A. O. U. W." Counting in the beautiful and extremely well dressed ladies in attendance, our brethren of Memorial and their guests appeared to much better advantage than ever. There seemed to be a cordiality and satisfaction exhibited throughout the evening by dancers and guests. Blum's band of eight pieces discoursed sweet music to this happy and select company. At 9 o'clock the exercises commenced by the grand march, Bro. Chas. S. Hoffman, P. M. W., with Miss Hattie S. Perry having the honor of leading. A programme of 16 dances whiled away the happy hours until after 12 o'clock. This, their first anniversary, was a success, and in keeping with the history of their Lodge. The several committees are herewith given, in hopes that this WATCHMAN will be preserved to hand to those who may follow in their honored footsteps. Reception Committee—J. H. Gyselaar, M. W., J. O. Ralston, G. E. Gerlach, Receiv., O. W. Lilkendey, C. W. Nevin, P. M. W., H. Schaffner, Rec., S. H. Carkeet, H. Morton. Floor Manager—Chas. S. Hoffman, P. M. W. Aids—J. M. Hudson, J. H. Winter. Floor Committee—J. M. Rademaker, J. A. Manning, N. Swinerford, J. Blohm, J. Russel, C. H. Hanke.

Spartan, 36.

This term has been one of prosperity to this, one of the old pioneer Lodges. The increase has been over 25, swelling their membership to 140. On June 3rd their Lodge room was well filled with their own membership and visitors. The work of the evening aside of the usual routine of business was conferring the J. W. degree on two candidates in an unexceptionable manner. Bro. W. S. Hout, although one of the youngest M. W. in our jurisdiction, has earned for himself a very enviable name as one of the bright lights in our Order. A good deal of interest was taken in the meeting in regard to the coming picnic, a number of the brethren buying tickets when they knew their business would hardly admit of them attending. Under the head of Good of the Order, Bro. Danforth, P. M. W., and Bro. Prevost, Foreman (who will probably take the M. W's. chair in the coming term), paid a compliment to the WATCHMAN. Bro. Danforth took occasion to criticise the looseness and venality of some of our Medical Examiners, citing several cases that either showed gross negligence or ignorance and unprofessional conduct.

Triumph, 180.

It is with feelings of pride and pleasure that we record this young Lodge, less than one year old, having a membership of 100. On June 7th five received the J. W. degree. The secret work, as well as the ritualistic, was given in a correct and impressive manner. As showing the character of the membership, the average age of these candidates is 33 years. The brethren of Triumph feel a pride in the unprecedented success of this Lodge, formed, as it was, under adverse circumstances. To commemorate, they propose to celebrate their first anniversary, which will occur the 21st of August. A live and experienced committee have been appointed, and from inklings of what they intend to do, we may expect one of the pleasantest reunions that has been held this year. It is always a pleasure to visit this Lodge and see the true, cordial spirit that exists among this model Lodge of Workmen.

WORKMEN, their wives and families and friends, can attend our picnic with the assurance that everything will be carried on with decency and order. Any questionable parties or disturbing elements that may arise will be summarily disposed of.

A TELEGRAM was received by Wm. H. Barnes informing him that Baxter, of Michigan, is elected S. M. W.; Fish, of California, S. F.; and Case, of New York, S. O.

WE call attention to the card of Behneman & Joost, dealers in groceries, etc., southwest corner of Taylor and O'Farrell streets. Our Brothers know how to please their patrons.

Grand Recorder's Statement for May.

We condense from Grand Recorder Pratt's Financial Statement for May the following leading figures:

WARRANTS ISSUED.

204, Salary, H. G. Pratt, G. Rdr.	291.68

241,823.—BEER FAUCET—E. J. Rubottom, Felton, Cal.

NOTE.—Copies of U. S. and Foreign Patents furnished by DEWEY & Co., in the shortest time possible (by telegraph or otherwise) at the lowest rates. All patent business for Pacific coast Inventors transacted with perfect security and in the shortest possible time.

THE restaurant and saloon kept by Bro. John P. Gallagher, northeast corner Front and Market, is one of the popular resorts of this city. The banquet given at the Masonic Temple May 25th, provided by Bro. Gallagher, was a recherche affair.

BRO. HOWARD BLACK, the custom shirt maker, No. 39 Sutter street, up stairs, can suit the most fastidious in this line, both as to fit or quality of goods.

THE vegetable and fruit store of Bro. D. R. Avery, stall 18 and 19 Center market, is always filled with the choicest and all varieties of California and Oregon produce. Call and see.

BRO. Hodge's cloak and suit rooms, No. 10 Fifth street, continues one of the attractive places in this city for ladies to procure every kind of outfit for themselves and children. While he keeps in stock a full assortment of ladies' wrappers, corsets, dress trimmings, etc., he pays special attention to orders at lowest rates.

IN a hurried visit to the Mission foundry, corner Twenty-fifth and Noe, we found Bro. Wm. Axford, proprietor, busily engaged in making fine castings for the State Capitol. By his enterprise and skill combined he has established a reputation as an expert in making fine castings, and driven a large number of the Eastern importations out of the market. Anyone wishing fine and intricate work done in his line would do well to call on the veteran Receiver of Noe Valley.

Our Agents.

OUR FRIENDS can do much in aid of our paper and the cause of practical knowledge and science, by assisting Agents in their labors of canvassing, by lending their influence and encouraging favors. We intend to send none but worthy men.

Painting on Brown Paper.

Painting on brown paper is now all the rage. Concerning the new craze the London *Queen* says: "Brown paper of the darkest shade and thickest texture, and gray paper of a coal granite tint are just now in demand as materials for painting upon for dados, panels, cornices, and book-covers and other things. They give a background on which the light and shade are at once relieved; and while gray paper is the softest, brown paper, partly by the contrast of the rough surface, gives the most relief. The best brown paper for the purpose, is the stout, continuous kind used by the paperhangers and upholsterers for backing, which can be had at all the carpet warehouses in any quantity. The colors are oil paints in tubes or water colors, well ground with Chinese white, used with fine bristles or red sable brushes.

Another method is to lay on the Chinese white, well ground to the consistence of thin cream, and when it is dry to paint over it with ordinary water colors. Red sable brushes are also the best for both the latter. Minute finish is out of character with the kind of work; the effects should be put in broadly, and the designs be distinct and of few large objects. In connection with this subject it may be appropriately mentioned that the "Angry Swans," two of the finest of Turner's drawings, which are on exhibition at the National gallery in London, are painted on common brown paper, which had been used as the wrapper of a parcel.

NEW SUBSTANCE IN THE ROOT OF THE COTTON PLANT.—Mr. W. C. Staeble, an American chemist, has discovered a curious new product in the bark of the root of the cotton plant *(Gossypium herbaceum)*. When the bark of this root is exhausted by alcohol of the specific gravity of 0.84, a dark, reddish-brown liquid is obtained, which when distilled to recover the spirit, leaves a resinous matter which amounts to 8% of the original weight of the bark. The new product thus obtained appears black and shining, but when pulverized takes the color of the cochineal. It dissolves in 14 parts of alcohol, 15 parts of chloroform, 23 parts of ether, and 122 parts of benzol. It dissolves also in caustic alkalies, and is precipitated from these solutions by acids. Hydrate of potash colors it green. Sulphuric acid dissolves it with a red brown color. Its other properties have not yet been examined.

THE LARGEST STEEL CASTING.—Messrs. W. Jessup & Sons, of Sheffield, lately made the largest crucible steel casting of which we have any record. It was a spur rim 28 ft. in diameter, machine molded, and was cast whole. The total weight of the casting was 10 tons. The rim is intended for the cotton mill of Mr. Smallpage, Burnley. The steel wheels are expected to pioneer a new branch of industry in the Sheffield trades.

THE Trustees of the Napa Insane Asylum have purchased 402 acres of land from W. H. Coombs for $12,000. This makes the Asylum property include about 900 acres.

TRICHINOSIS.—According to a recent report to the Sanitary Committee of Massachusetts, it appears that of 2,701 pigs examined during five months, no less than 154, or nearly 6%, contained trichinæ. The animals came from different and distant regions, but the majority were from the Western States. The same report affirms that rats are affected with trichinosis at Boston to a much larger extent than in Germany. Of 51 rats caught in a Boston slaughter-house, 30 presented trichinæ. On the other hand, 28 fowls fed in the establishment were found to be healthy. Forty rats taken in another large slaughter-house all contained trichinæ, but of 60 found in different stables only six were thus affected. In France little consideration has, until lately, been given to the danger of trichinæ in imported pork. At Lyons, however, inspection has been commenced, and has quickly borne fruit. An enormous consignment of lard, amounting, it is said, to 120 tons, was lately received at Lyons from New York. Of 50 specimens examined immediately after arrival, three were found to be infested with trichinæ. At Barcelona six cases of death from trichinosis have occurred in three months.

ACID PROOF CEMENT.—Finely powdered glass, mixed with soluble silicate of soda will be found to answer this purpose.

SELF-LUMINOUS PHOTOGRAPHY.—According to the *Photographic News*, self-luminous photographs are attracting much attention in Vienna. When these are examined by daylight they look like ordinary paper photographs, but in the dark they are beautifully phosphorescent in the high-lights, have a more or less feeble glow in the half-tones, and in the deep shadows possess no luminosity. The preparation of these self-luminous photographs is very simple. A silver print on albumen paper, or a collo-type is rendered transparent by brushing over it a mixture of equal volumes of castor oil and oil of turpentine. The superfluous oil is removed by means of cotton-wool or a linen rag, and the phosphorescent paint is then put on. The paper thus prepared is then dried, and afterward mounted with its reverse side on cardboard. As soon as it has been exposed to the daylight and the light penetrates the transparent or semi-transparent parts, the phosphorescence of the luminous paint underneath is excited, and in the dark the image is seen with all its gradations. Brilliant pictures and moonlight landscapes give especially good results.

As regards this matter of pensions to Government clerks it seems to us that after a man has been writing for thirty or forty years it's natural that he should be a pen-shunner.

Insurance.

THE
NEW ENGLAND MUTUAL
Life Insurance Company,
OF BOSTON,

All Policies in this Company are Governed by the Massachusetts Non-Forfeiture Law.

The only Company on this Coast Governed by this Law.

This Company was incorporated A. D., 1835, and has accumulated Assets of

$15,000,000.

THIS COMPANY HAS PAID OVER
$150,000 on this Coast
for Policies that had Lapsed from a Few Days to nearly Five Years.

In the above cases the full amount of the Insurance was paid less the overdue premium. Had these policies been in any other company doing business on this Coast, they would have been forfeited.

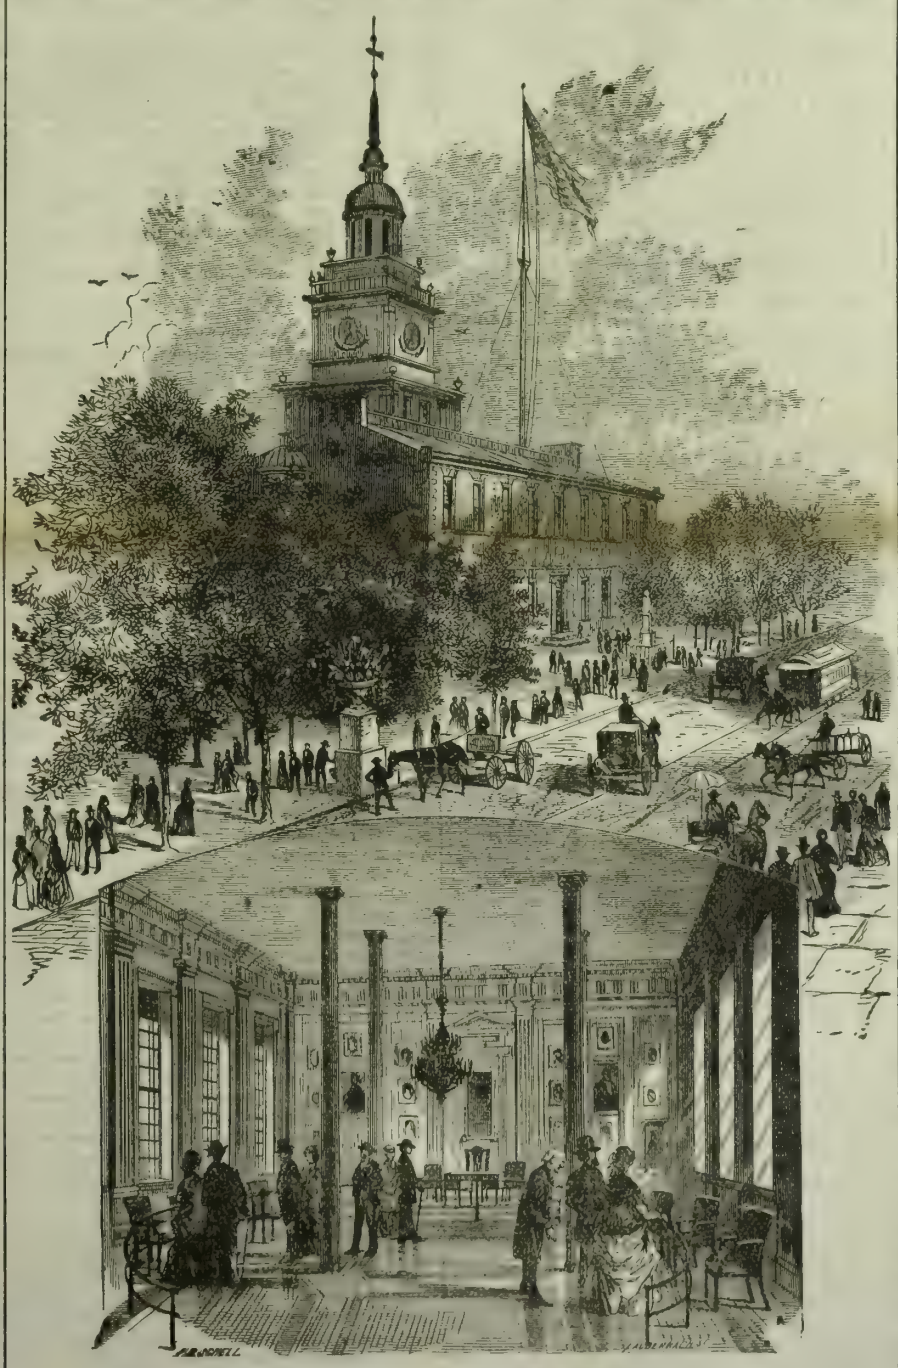
The Fourth of July.



The years are carrying us farther and farther away from the old heroic times when brave men unflinchingly placed their names to a document which would have cost them their lives had the oppressors triumphed, but which, as the right prevailed, gave them undying honor. We would not lose sight of these early, noble deeds. We would not forget that the Fourth of July is not a mere opportunity for fun and fireworks, but that the prototype of the day we celebrate was indeed the birthday of the nation.

To aid the thought in the recollection of the incidents of the brave Declaration, we give an engraving of the exterior and interior of the historic building which has been often called the "Cradle of Liberty." It is old Independence hall, in Philadelphia. The hall is preserved with jealous care, so that coming generations may share with us the inspiration of entering its portals and recalling the old scenes. Interest centers on the building and its contents, and in connection with the engraving we give the following description from the pen of a recent visitor: The east hall has a goodly number of historic relics, most worthy of note among which is the famous old Liberty bell, which rang out melodies for the sons and daughters of the new land over a hundred years ago, but now shows the fingers of time in a huge fissure. Here is the old front door belonging to the Chew mansion, which was battered and splintered at the siege of Germantown. Dresses of "ye olden time" are abundant, showing that loving descendants of the men and women of those days have guarded them carefully. A piece of one of "Lady Washington's" dresses is a flowered cambric—quite like the gay chintz so much in vogue for lounge coverings. Here are portraits of all the signers of the Declaration, officers of the Continental army and members of the first Congress. The Georges are there, too. Is it prejudice, or do their faces look out from the canvas crafty, sensual and selfish? Jars and chairs and tables used by Gen. Washington, have a charm about them from the thought that they have been part and parcel of his plain household—a thought which redeems their excessive homeliness.

The original Declaration of Independence, with paper brown with age, ink faded and dim, had a mysterious awe about its immortal wording. Close by is the veritable inkstand into which those grand men dipped their quills, one after the other, as they traced those names which the tongue of history shall ever be proud to repeat. The inkstand is heavy and cumbrous, is made of solid silver, and bears the maker's name—Philip Syng, 1752. The first draft of the Constitution hangs in a frame, a conspicuous object of attention.

There are several portraits of Washington, taken at different ages. William Penn is here, in company with his second wife—a wholesome, plain, sensible sort of a lady. The face of Francis Key, the author of the Star Spangled Banner, is sparkling and refined. Marquis de Lafayette, the noble Frenchman, is gentle, courteous and soldiery. In this hall, in a case, are numerous articles of the toilet—dresses, stomachers, towels, stockings, high-heeled slippers, laces, over-dresses, ribbons, etc., all of great antiquity; also table articles, such as spoons, knives and forks, sugar bowls and similar things.

Here is the celebrated painting by Benjamin West, depicting Penn's treaty with the Indians. The subject is true to life. In the shade of the lofty woods, the Indians and whites have gathered to listen to their "pale brother," as he stands there, earnestly setting forth the conditions of the treaty. The old chiefs are gravely listening, while their eyes are turned calmly upon him, as he stands there, surrounded by his friends. The women of the tribe have drawn near to hear the "big talk," while the half-naked boys and girls, with their symmetrical limbs, are amusing themselves near. The figures are clear, bold and natural. Here, too, are many original letters of Benjamin Franklin, written in the troublous days of our country, when his heart was full of forebodings lest her leaders went not right. How his great soul would be troubled could he have a chance to observe them now! With a long look at the many treasures this room contains, I cross the hall to a room filled with old portraits of the prominent men of those days; look at some old, stiff and unenviting chairs and settees, and ascend to the two halls above. Both these rooms are fitted up in modern style, with rows of desks and a few easy chairs. It was formerly one room, known as the banqueting hall, where, on all state occasions, the festivals were held. Here Washington delivered his farewell address to the Continental Congress, whose deliberations took place in this hall. There is a splendid painting representing him in the act of making this last speech, which hangs over the very spot where he stood.

INDEPENDENCE HALL, PHILADELPHIA.

The Fourth in this City.

The Fourth of July will be celebrated in a manner worthy of the day in this city. Notwithstanding the absence of the First Regiment at Santa Cruz, it is expected that the military display will be very fine. The arrangements for decorating Kearny and Montgomery streets are being completed. There will be eight strings of flags, thirty to the string, on each block between Montgomery avenue and Market. In the center of the strings, evergreen wreaths will be placed, alternating with which will be streamers of red, white and blue. Standing at the head of Montgomery or Kearny and looking toward Market, the scene presented will be very striking and beautiful. Besides these public decorations many of the buildings on the line of these streets will display a wealth of flags and bunting.

The programme will, in many respects, be different from that heretofore arranged. The Committee on Games have reported that there will be the usual races, jumping and tug of war of the Olympic Club and others, for medals and money prizes. There will also be bicycle riding and drill for medals. The above games will take place at the Bay District tract. An excellent programme has been arranged for a day's sport on the water. Clubs and individuals have entered freely, and it is now an assured fact that every racing boat in this city will compete on the Fourth. The prizes to be given will be very liberal, something outside of the usual run on these occasions.

A tournament, under the auspices of the Executive Committee of the Fourth of July celebration and the Pacific Coast Archery Association, has been arranged to take place at the Bay District park. It will afford the public an opportunity to witness a contest between some of the finest archers in the United States, both at long and short-range shooting. Gold and silver medals will be offered as prizes, also various articles of use to bowmen. A horse programme has also been arranged, for which money prizes have been offered.

The literary exercises will take place at the Grand Opera House, Mission street. Geo. H. Knight will deliver the oration, and Thos. H. Maher will read the Declaration of Independence. Musical selections by the orchestra, singing and reading will constitute the programme.

Thus it will be seen that a programme has been arranged to suit all tastes, and the Executive Committee are deserving of great credit for the thorough manner in which they used the means at their disposal. Let us hope that no accident will occur that will endanger life or limb. Let citizens think of the day as celebrating the birthday of the freest and greatest Government on the globe, and let all resolve to so shape their actions as to pass the free heritage they now enjoy to generations yet unborn. Do this, and the Fourth of July will always hold a high place in the affections of the people.

OUR ELECTIONS.—Our city Lodges have held their elections and will soon be prepared to resume active work in making Workmen. One peculiar feature that is commendable, is that the Recorders, Financiers and Receivers have been re-elected as a rule, also rotation in the other offices. The Lodges have been well attended, and where a vote has been taken it has been quite large. Spartan polled 60, Harmony 90, Unity, 80, and others in about like ratio.

Home Miscellany.

The Hardest Time of All.

There are days of deepest sorrow
In the season of our life,
There are wild despairing moments,
There are hours of mental strife;
There are times of stormy anguish
When the tears refuse to fall,
But the waiting time, my brother,
Is the hardest time of all.

Youth and love are oft impatient,
Seeking things beyond their reach,
And the heart grows sick with hoping,
Ere it learns what life can teach;
For before the fruit be gathered
We must see the blossoms fall,
And the waiting time, my brothers,
Is the hardest time of all.

Loving once, and loving ever,
It is sad to watch for years,
For the light, whose fitful shining,
Makes a rainbow of our tears.
It is sad to count at morning,
All the hours till evening fall;
Oh, the waiting time, my brothers,
Is the hardest time of all!

For it wears the eager spirit,
As the salt waves wear the stone,
And hope's gorgeous garb grows threadbare
Till its brightest tints are gone;
Then, amid youth's shining tresses,
Silent snows begin to fall;
Ah, the waiting time, my brothers,
Is the hardest time of all!

Yet at last we learn the lesson
That God knoweth what is best.
And a silent resignation
Makes the spirit calm and blest,
For perchance a day is coming
For the changing of our fate,
When our hearts will thank him meekly
That he taught us how to wait.

—*Golden Censer.*

Marthy's Wooing.

The Romance of a Winter's Evening.

It was a wild February evening, with a fierce northeaster hurling a blinding sheet of snow against the windows, hiding and muffling the city noise and lights, and obliterating all signs of the highway in its drift and whirl. Feeling as far removed from the world as if we were keeping a lighthouse on a desolate island, the family were congregated in the wide, low-walled sitting-room, which was cheerful enough with lamp-light and fire, in spite of the imprisoned feeling which a snow-storm will give even those who live in thickly populated neighborhoods. One played on the piano the fitful, half sad, half merry strains of an old waltz. One worked with an air of absorption in bright-colored worsted, while all the others, with the exception of us children, were contentedly walled behind books and newspapers.

Having been kept in the house all day by the storm, we were beginning to find picture-books and dolls monotonous, and not being alive to the beauty of the passionate strains of Chopin, we retired to the kitchen, hoping to find "Marthy," our chief "help," in a story-telling mood. But one glance at her face assured us that the situation was hopeless.

Marthy—she would not allow anyone to pronounce her name Martha—was always doing things in the gospel. "When I marry, I shall marry in the gospil," she very frequently said, with an air of unconquerable determination. And she was still preparing for matrimony, as she had been for 30 years and more (she was past 50 now) with the most matter-of-course zeal and prudence. The stock of household linen which she was storing away from year to year, was something remarkable, and though a great deal of it had grown yellow with age, she was very fond of displaying it to her admiring friends, and was not in the slightest degree disturbed by any unfounded and ill-natured insinuations that she might never have any use for these household treasures.

Martha had not been without her opportunities, it is true. She was not beautiful to look upon, her features having the appearance of being unnaturally elongated, like a face in the bowl of a spoon, a queer candle-mold figure, and a skin both red and wrinkled, like that of a frost-bitten apple. But she was industrious as a bee, neat as wax, and, as her friends remarked, "she was spry as a cricket, 'n didn't 'pear no older than she did 20 years ago." Then, though she did work for a living, she was by no means obliged to do so. She possessed quite a fortune, well invested in bank and railroad stock, and was quite famous in her "meetin'" as a woman of means. In the first place, the railroads had seen fit to cross one corner of the snug little piece of land by the river, which her father left her when he died 25 years before.

Then they took a notion to build wharves on the remainder of the land as the little city increased in size, and Marthy shrewdly held on to her possessions until nearly all the commerce crept up in that direction. Then she got what prices she saw fit to demand for it; and found herself richer and of more consequence than she had ever dreamed of being, even in her extravagant youth, when she wildly aspired to marrying a presiding elder.

"But 'taint no sign that I should set and twiddle my thumbs coz I've got a little property," she said, and still kept house for Deacon Hobbs, who lived out in the country and was a widower with seven children.

Deacon Hobbs expressed himself of the opinion that they had better marry, they got along so well together, but Marthy felt obliged to differ with him on this point.

"I couldn't never feel justified in merrying out o' my own meetin'," she sighed. "If you was a deacon of the Methodist church, 'stead o' the Baptist, I might consider the matter."

Since she had lived at our house a period of sixteen years or so, the household on several occasions had fallen into quite a panic for fear of losing this neat, deft-handed servant. At one time it was a sturdy young farmer from the back country; at one time it was the stage-driver, who had taken shelter from a wild storm in her kitchen, and had fallen in love with her squash pies. And at another time it was a tin peddler, between whom and Marthy the rag trade had progressed with a tender smoothness which was amazing, considering the native sharpness of both.

But after a few weeks of most earnest and devoted courtship, each of these admirers, emulating the Arabs, folded his tent, that is, got into his wagon and silently stole away, haunting our back dooryard no more when the witching hour of twilight made shadows in the lilac and syringa bushes by the kitchen windows. But never, since my memory, had a lover appeared to woo our grey-haired maid, and I am sure that Marthy's friends considered her situation hopeless, as far as matrimony was concerned, in spite of her money and her thrift, for the unmarried men in the "meetin'" were all too young. Marthy scorned youthful swains, and for some unaccountable reason, the elder men all died before their wives, and a widower was a being unknown.

On this particular evening Marthy was all alone in the kitchen, the hired man being occupied with a sick horse in the stables, and Phebe, her assistant of whom she contemptuously spoke "as that hired girl," had become a victim of the toothache and gone home for a few days. Marthy did not approve of "hired girls."

"Oh, Marthy, do tell us a story," I exclaimed, determined at least not to give up this pleasure without first making an effort.

"Git out! I don't know no stories, 'n don't you see I'm busy on work much more important than story-telling?"

"Why, Marthy, you know heaps of them. Tell us how your house was all covered up with snow once, and you like to be smothered."

"Children shouldn't never contradict. I ain't agoin' to tell no stories, 'taint profitable."

Here the sound of heavy footsteps on the doorsteps arrested her speech, and a loud rap at the back door caused her to drop her work and hastily repair to the sitting-room.

"Mr. Jones, I wish you would be kind ernuff to go to the back door," she said to my father. "Somebody knocked, 'n I feel kinder skittish to night, I'm sure I kent tell why."

"It's some tramp who has lost his way in the storm, I suppose," said father, hastening to investigate.

The wind rushed in at the open door piercing cold, and hurling great clouds of hail and snow. Nothing was to be seen but darkness, through the blinding drift, but on being invited to walk in, the darkness took the shape of a little man very much tied up in mufflers, and wearing a rustic and rather shabby looking overcoat.

"Beg your pardin' for intrudin', sir, but you see I've got lost in the storm. It does storm considerable."

This we thought was stating the case mildly.

"It stormed when I left home," the stranger continued. "I live in Whitneyville, out back here, but my darter't lives over here to the city, 'n seein' as her husband was away, 'n I could as well as not, I thought I'd go 'n spend the Sabbath with her, 'n here I be dependent on cherity fur a night's lodging. My old mare was lame, you see, else I should ha driv her 'n reached my desperation afore now, but—"

"Yes I think you might have," said father, smiling. "But sit up to the fire and warm yourself, you must be very cold and very much exhausted too. I'll bring a glass of brandy and—"

"No sir, 'scuse me, but no sperit fur me, I'm dretful against drink though occashuns may sometimes be pressin'. I would like a cup er tea, though, seein' as I haint hed no supper nor nothin'."

Marthy, who had folded her work with a sigh, and with sad resignation to her duty in aiding the unfortunate, had procured meat and procured a very dry piece of dried apple-pie from the pantry, on hearing sentiments against "sperit" which her soul approved, hastily substituted a whole mince pie for the unfavorable piece of dried apple, and cut a loaf of fresh bread. But she did not favor tramps of any kind, and prepared the repast, even for this light of temperance, with the air of a martyr. Father went back into the sitting-room, and the little man, who had a bald head fringed by a row of light auburn curls streaked with gray, and very rosy cheeks, began to be conversational.

"Sorry to trouble you, I'm sure, marm," he said, rubbing his hands and speaking in a soft, drawling tone, which he evidently intended to be polite.

Martha regarded him with a look which said plain enough, "well, you certainly ought to be."

"My daughter, Mis' Jooly Stebbins, 'll be dretful put out by my not appearin' at her house to-night. With her husban' up river, 'n her little girl sick, she won't injoy the conserlations of the Sabbath ter-morrer very much, I'm afeard."

"Sakes alive! is Mis' Jooly Stebbins your daughter? Why, she b'longs to my meeting," exclaimed Marthy, with a countenance changing to sudden graciousness.

And seizing the teapot which she had placed upon the stove, filled with the cold tea which was left from supper, she instantly disposed of its contents by the way of the waste-bucket, and proceeded to make a fresh draught, using the fragrant hyson generously.

"Sho! glad to meet you, sister. The gospil is a sacred tie that binds us all together in love. When I meet a sister in the gospil I feel as if I had been acquainted with her always."

The acquaintance was surely progressing, and Marthy looked deeply touched.

"Which kind er preserves do you like best, damson or strawberry, Brother ———, I forgit the name?"

"Bro. Parker, marm; preserves is immaterial, yet I might say strawberry, if I was to be pressed. Lemme see—I've often heard Jooly speak of the friends she hes made sence she come to the city to live. There's one, Miss Marthy Hopkins, thet she seems to be dretful found of. They say she's a charitable lady, 'n imminently pious."

Martha blushed like a girl.

"I'm Marthy Hopkins myself, 'n I set great store of Jooly, too. As fur the rest, Brother Parker, we hain't none of us perfec'. The human heart is deceitful, 'n desperately wicked."

Bro. Parker expressed a great deal of delighted surprise.

"I feel ter home now," said he—"more ter home than es if I was in my own house in fact, for it's dretful lonesome there since Abby died. Lemme see your husban'——"

"I never hed no husban'," said Marthy, cheerfully, at the same time tying a spotless white apron, with a girlish trimming of pink, over the dark calico one which she always wore unless it were a holiday, and stealing anxious glaces in the looking glass.

Bro. Parker looked astonished. As if the wily little man wasn't acquainted with her whole history; as if he hadn't planned to spend the Sabbath with Jooly solely on her account. To be sure, he had not intended to make her acquaintance that evening, but the fates had been propitious and stranded him at her door.

"Don't you never feel kinder lonesome?" he inquired, with a deeply tender tone and glance, between two mouthfuls of cold chicken. "Women hain't fit to brave the sorrers of life alone."

Marthy cast down her eyes with a look of prim propriety.

Maidens should be mild and meek,
Swift to hear and slow to speak!

"Well, yes, I do sometimes," she confessed, falteringly, after a little pause. "But then, I hold it sinful to repine, 'n I'm too busy, generally speakin', to know whuther I'm lonesome or not."

"I dare say, but then et's nateral for a woman to cling."

Marthy looked a little grim, and Bro. Parker saw that he was not on the right track.

"Now, I should enjoy this excellent meal a good deal better ef I had somebody a settin' opposite me to the table. Contrary to Scriptures, bread eat in secrit hain't pleasant to me. S'posin' you set down here ef you don't like eatin' much of anything."

"Pshaw!" exclaimed Marthy, with a blush and a nervous giggle.

Nevertheless she did as he requested, and Bro. Parker was so engaged in making eyes at her over the top of the urn, that he put mustard in his tea instead of upon the cold meat, and committed all sorts of eccentricities.

"Now, hain't this cosy?" he said, as the meal progressed, after the state of the church and the warmth and coldness and the "meetin's" had been duly discussed.

Martha smilingly admitted that it was.

"Just like a little bit of heaven aforehand," he continued. "Don't you think, seein's we are both of us alone in the world, 'n members of one family in the Gospil, we'd better jine hands and pull on together through life 'n allers set opposite one 'nother same's we are now?"

They were not opposite each other, for the brother had hitched his chair by degrees until it had quite reached Marthy's side, but that made no difference. One expects flights of the imagination in the speech of an ardent lover.

"Well, I don't know but what 'twould be for the best. The Gospil seems to pint that way."

And Marthy blushingly allowed one arm of the brother to remain around her waist, while the other aided in the employment of eating plum cake.

A few moments later, one of the family suddenly opening the door, beheld this astonishing scene in wide-mouthed horror and amazement.

But Marthy was equal to the occasion. Quickly extricating herself from the embrace of her joyous lover, she rose to her feet, and spoke with even more than her usual majesty:

"I spose I may as well give Mis' Jones warnin' now as any time. I allers said how I wasn't never goin' to marry out er the gospil, 'n so I hain't!"

"What a romance, said my father, when he heard the tale. "Well, the brother did reach his desperation, after all!"

There is a growing disposition on the part of many States to place women on the boards of management of all penal and reformatory institutions where girls or women are necessarily confined. Indiana has now tried this plan for nine years with most favorable results. It is befitting that women should have control of institutions where girls and women are confined, and this example will probably be followed by other States.

Speak Well of the Living.

"At midnight las' night," said the old man in a solemn voice, as he looked up and down the aisles, "at midnight las' night de speerit of brudder Charles Climax Goshport, a local member of dis club, passed from y'arth to de unknown. Only a week ago he sat in dis hall; to-night he am dressed fur de grave. What ackshun will de club take?"

"I 'spose, sah," said the Rev. Penstock, as he rose up, "dat it am in order to present a resolushun to de effect dat he was a man of de highest integrity, liberal-hearted, high-minded, an' dat his loss am a sad blow to de hull city."

"Yes, such a resolushun am in order. Brudder Penstock can you remember dat you ebber took Brudder Goshport by de han an' gin him a word of praise fur his hard work an' honest ways?"

"I—I—doan' remember that I ever did, sah."

"Am dar a person in dis hall who kin remember dat he ever put hisself out to favor Brudder Goshport?"

Not a man answered.

"Kin any one of you remember dat you took any pertickler interes' in how he got along?"

Not a voice was heard in reply.

"To be a little plainer," continued the President, "am dar' one single pusson in dis hall who eber felt five cents' worth of anxiety fur Brudder Goshport's worldly or spiritual welfare?"

The hall was so quiet that the sound of Elder Toots rubbing his back on the sharp edge of a window casing gave everybody a start.

"Not a man in dis hull club—not a man in dis hull city, so far as we know, eber put hisself out to do a favor for or speak a word in praise of our lamented brudder, an' yet we have the cheek to talk of a resolushun settin' forth his many vartues an' our heartfelt sorrow! No, sir! We doan' pass no sich bizness heah! I should be ashamed to look his widder in de face, if we did. It am de way ob de world to let men alone jist when a little help would give 'em a broad and easy road. We h'ar of dis or dat man havin' won de gratitude of de people, but we doan' h'ar of it until he am dead. When a man has gone from y'arth de papers an' de public suddenly diskiver how honest he was; what a big heart he had; how much good he wuz allus doin' an' what a loss to de world his death will prove. De time to praise a man is when he am livin' besides us. Praise hurts nobody, but many a good man has grown weary fur de want of appreciashun. Heah am 72 of us in dis hall to night, an' we have to own up dat not one of us neber went outen our way to prove to our brudder dat his gentle ways, his squar' dealin' an' his upright life war' any mo' 'preciated by us dan as if he had bin a hoss-thief! An' to pass a resolushun would be to brand ourselves hypocrites. Let no man dare offer one."—*Lime Kiln Club in Detroit Free Press.*

Feeding the Baby.—"How we feed the baby, to make her healthy and happy; with health hints," by C. E. Page, M. D., is a book of 144 pages, published by Fowler & Wells, and for sale by A. L. Bancroft & Co. This treatise heralds a new departure in the alimentation of infants, and gives every evidence of conscientious and intelligent study on the part of an author of broad experience, familiar with all the details of the nursery. The central feature of the work represents the infancy of the author's own daughter, whose first months were happily made free from the common inconveniences, not to say horrors, popularly supposed to be unavoidably connected with this period of life. Our author makes plain how infantile diseases may, in great measure, be avoided, and infant life made as free and joyous as that of the most fortunate among the lower animals. We know this manual will be welcomed by many mothers in all parts of the land, as one of the most important questions with parents is *how* to feed the baby, to promote its health, its growth, and its happiness. The hope of the children must be found in an enlightened motherhood, and every effort in this direction should be welcomed. Physicians will know how to prize the work of a specialist in this particular branch of medicine.

Duties of Women.—For the sake of our readers who may not have had access to the dignified and able presentation of the "Duties of Women," by Frances Power Cobbe, a few thoughts are selected: "It is a vast responsibility which lies on us, my friends, to do whatever may be in our power to lift up the womanhood of the future, to reclaim it from the faults and save it from the shame and suffering of the past, and to help on our whole sex to lead diviner lives—lives more blessed for themselves, and assuredly also more blessed for men—than women have yet led in any age or country. He who labors to lift woman, labors in the most effectual way to lift man. The human race can only advance like the human body, by the joint motion of both its limbs."

Patchwork.—Patchwork has taken a new start of late, and is becoming more elaborate and more difficult, but at the same time, far more satisfactory. Some of the designs found in carved ceilings of the sixteenth century are being reproduced in patchwork for cushions and chair covers, loose embroidery sketches being laid upon it here and there.

For our Boys and Girls.

Our Puzzle Box.

Numerical Enigma.

I am composed of 21 letters.
My 4, 16, 7, is a domestic animal.
My 5, 20, 18, 6, 10, is a relative.
My 2, 10, 20, is a kind of fowl.
My 12, 3, 6, 1, is a kind of cloth.
My 9, 11, 13, 21 is a girl's name.
My 1, 19, 15, is a game.
My 17, 8, 15, is a mat.
My 14, is like my 5 and 8.
It is for my whole that one of the Southern States is noted. CEPHA.

Our Flower Garden.

1. A period of time, and to perceive.
2. A color.
3. Stood up.
4. A space, and to commit sin.
5. A number, and part of the face.
6. To strive, an exclamation, and to permit.
7. A falsehood, and to want.
8. A quick movement, and an article of food.

JENNIE.

Amputations.

1. Behead and curtail a part of the body, and leave a part of the head.
2. Behead and curtail a kind of bird and leave to pinch.
3. Behead and curtail to vibrate and leave to gain.
4. Behead and curtail to seize and leave to tear.

DICK N. S.

Problem.

There are two numbers whose difference is nine, and whose sum multiplied by the greater gives a product of 266. What are the numbers?

Blanks.

[The blanks are to be filled out with the same words transposed.]

1. The burglar turned —— as he heard the loud —— of a bell.
2. How ——, with two seaman, went ashore to procure —— to eat.
4. I made an —— of the matter at the —— I saw you last. JENNIE.

Answers to Last Puzzles.

NUMERICAL ENIGMA.—"Don't give up the ship."

INITIAL CHANGES.—1. Mallow, sallow. 2. Mark, hark. 3. Call, mall. 4. Prance, trance. 5. Pip, sip. 6. Sink, link.

DECAPITATIONS.—Vomit, omit, mit, it

WORD SQUARE.—

B A R B
A R E A
R E N D
B A D E

SYNCOPATIONS.—1. Pint, pit. 2. Board, bard. 3. Coin, con.

Little Johnny's Anecdotes.

'Possoms has tobacco pouches on the stomach, and one time there was a 'possom which was a show. A feller came to see the show, and he had a bunch of fire-crackers, 'cause it was the Fourth of July. The feller took one off and put it in his mouth, and then he lit one of the others and held 'em out to the 'possom, and said: "Have a cigarette?" The 'possom it snatched 'em, and crammed 'em in its pouch, and wank its eyes, and said: "Now you can just whistle for your old cigarettes, for I am a regular saving bank, I am."

But bimeby they went off wild, and you never see such a busted bank like that 'possom.

My Uncle Ned had a 'possum which was a pet, and he had a little music box, too, but my sister's young man he plays the fiddle, and Sammy Doppy he can crow like roosters. One day the piano was moved out of the parlor, and Uncle Ned he wound up the music box and looked the other way, and the 'possum sneaked up and put the music box in the tobacco pouch of its belly, a playin' the "Sweet Bye-and-Bye" real nice. Then Uncle Ned he went into the kitchen and called Mary, the housemaid, and said: "Mary, you go into the parlor and tell your mistress when she gets done playin' the piano I would like to see her."

Bimeby Mary she comes a running back, white like a sheet, and said: "Oh, if you please, sir, that nasty cat of your'n has et the pianner."

A Monkey Trap.

An old, hard cocoanut is taken and a very small hole made in the shell. Furnished with this and a pocketful of boiled rice, the sportsman sallies into the forest and stops beneath a tree tenanted by monkeys. Within full sight of these inquisitive spectators, he eats a little rice and puts a quantity into the cocoanut with all the ostentation possible. The nut is then laid upon the ground and the hunter retires to a convenient ambush. The reader may be sure that no sooner is the man out of sight than the monkeys race helter skelter for the cocoanut. The first arrival peeps into it, and, seeing the plentiful store of rice inside, squeezes his hand in through the tiny hole and clutches a handful. Now, so paramount is greed over other feelings connected with monkey nature, that nothing will induce the creature to relinquish his hold. With his hand thus clasped he cannot possibly extract it; but the thought that if he lets go one of his brethren will obtain the feast is overpowering. The sportsman soon appears upon the scene; the unincumbered monkeys fly in all directions, but the unfortunate brute who will still not let the rice go, is thereby handicapped beyond hope with a cocoanut as large as himself—a state of affairs quite fatal to rapid locomotion, either terrestrial or arboreal. The sequel is that he falls an easy captive to the hunter, a victim to his own greed. Even when caught, he reads in the action of his captor a design to rob him of his rice, and he clutches it all the harder, and the very first thing he does when the nut is cracked and he is released, is to cram the contents into his mouth. Thoughts of escape come afterward.

Humorous.

Chips.

THE meanest man in the country lives in Missouri. He pleaded in a breach of promise suit that a contract made on Sunday night was not binding.

KEEP up with the procession of life, young man; close up to the band. If you ever fall to the rear, where the elephants are, you are apt to get trod on.

IN speaking of a newly wedded pair, a gentleman said of the husband, "The trouble with John is, he has no mind of his own." Oh, that will make no difference; Sarah will always be ready to give him a piece of hers!" responded a lady.

A FAMOUS surgeon advises one of his patients to undergo an operation. "Is it very severe?" asked the patient. "Not for the patient," says the doctor; "we put him to sleep; but it's very hard on the operator." "How so?" "We suffer terribly from anxiety. Just think, it only succeeds once in a hundred times."

"DID you serve in the war, uncle?" "No, sah; I was a cowardly niggah. I was a Kentucky niggah. And what did I want to 'list for?" "Were not the white men fighting for you?" "'Spose dey was. Dat was no sign why we should fight. Massa, did you ever see two dogs fightin' over a bone?" "Well, what's that to do with your fighting?" "A heap, massa. Did you ever see de bone fight?" The questioner left amid a general laugh.

A GENTLEMAN had five daughters, the first of whom married a man by the name of Poor, the second a Mr. Little, the third a Mr. Short, the fourth a Mr. Brown, and the fifth a Mr. Hogg. At the wedding of the latter her sisters with their husbands were there, and the old gentleman said to his guests, "I have taken pains to educate my daughters that they might act well their part in life and do honor to my family. I find that all my pains, care and expectations have turned out nothing but a Poor, Little, Short, Brown, Hogg."

Household Hints.

APPLE PUDDING.—Stew a half-dozen large apples into a nice, smooth sauce, and add, while warm, a half-tablespoon of fresh butter, and sugar enough to make thoroughly sweet. Heat a little butter in the frying-pan, and then pour in a cup of bread-crumbs, which must be stirred over the fire until they are pale brown. Then sprinkle these on the bottom and sides of a buttered mold; put three well-beaten eggs and half a teaspoon of lemon-juice into the apple-sauce, then pour it into the mould, strew some of the bread-crumbs over the top and bake fifteen minutes. Turn out on a hot dish and serve with wine-sauce.

MAYONNAISE SAUCE.—Good for lobster or any kind of cold boiled fish. The yolk of an egg, a light teaspoonful of dry mustard, a pinch of cayenne pepper, a saltspoonful of white pepper, a saltspoonful of pulverized sugar, a tablespoonful of cold water, rub smooth, and then with your left hand drop in, drop by drop, a half pint of sweet oil, rubbing steadily all the time with your right hand; when all the oil is rubbed in, and your dressing smooth and thick, add a light teaspoonful of salt and three tablespoonfuls of vinegar. Must be kept on ice until it is ready to serve.

SAVORY RICE.—Chop an onion very fine, and fry it in butter till it is of a gold c lor; then stir in a teacupful of rice; let it cook in the butter for a few minutes, stirring all the time; then add one pint of good gravy and let it simmer slowly. When nearly cooked, put in a little grated nutmeg, Parmesan cheese, salt and pepper to taste. Mix it up well, and when thoroughly done let it stand a few minutes before the fire, and just before serving stir in a small piece more butter. Serve garnished with croquettes of any kind of meat, with stewed tomatoes, or with slices of fried bacon.

POTATO DUCHESSE.—Take half a dozen potatoes, boil them, pass them through a sieve, and work into them in a bowl one gill of cream and the yolks of three eggs; add pepper, salt and nutmeg to taste, and some parsley finely chopped. When they are well mixed and smooth, take them up by tablespoonfuls, roll each in a ball, flatten it, and flour it slightly; lay them all in a pan with plenty of butter melted, and cook them slowly; turn them over when one side is done, and serve hot as soon as both sides are colored.

RICE.—An authority on rice says: When the excellence of rice as a diet is fully understood its use will be more frequent and of daily occurrence in every household. At this season of the year especially, it may properly be classed as superior to any of the cereals which are in such general use for the morning and midday meals. No other food is so easy of digestion, and at its present cost it is cheaper than potatoes, oat-meal or grain-grits of any kind.

PEA SOUP WITH CELERY.—Boil split peas till they are in a thorough mash; melt a little finely chopped suet well in a pan, and frizzle in it a finely chopped onion; mix this with the peas, add more warm water to make soup, pepper, salt and powdered sage, and let it simmer well for 20 minutes.

Health Column.

Cure for Whooping Cough.

Vapors from Purifying Boxes in Gas Works.

TO THE EDITOR OF THE NEW YORK "SUN:"—A friend sends me a slip cut from a recent edition of your journal, inquiring for a reliable remedy for whooping cough. I am enabled to give the desired information after actual experience in my own family, and through the equally favorable experience of more than a score of friends and neighbors who have tried it.

It is well known to most intelligent people that exposure of patients to the vapors arising from the purifying boxes in the gas works almost invariably relieves the terrible paroxysms, and, after repeated visits, cures have been frequently effected. This discovery was made by a physician of Paris, about 15 years ago.

The fact was published, and soon after visits began to be made to the Manhattan, New York, Brooklyn and other gas works, on the recommendation of our medical men. An epidemic of whooping cough raged in Newport in the winter of 1878. Over 200 patients, between the ages of two months and 75 years, visited the gas works. The treasurer of the company, Wm. A. Stedman, Esq., states that nearly all were benefited, and some were undoubtedly cured.

About that time the child of a distinguished chemist in Providence, R. I., was seriously ill with this terrible disease, and too weak to be taken to the gas works. The father procured a quantity of the liquid hydro-carbon deposited by condensation in the bottom of the purifying box, and vaporized it in a metal dish in the closed room of the little sufferer. Almost immediately it revived, the spasms were checked, and after a few days the child recovered and was as well as ever.

Microscopists have recently discovered that the cause of whooping cough (pertussis) is the rapid aggregation of bacteria under the root of the tongue. These must be destroyed before relief can be obtained. To this end such powerful medicine as quinine-bromide is given; but even that fails to reach the seat of the disease. Of course the ordinary expectorants are absolutely useless; change of air is rarely curative; hence the rapidly increasing percentage of deaths from this disease.

The New York Board of Health report for 1875 has a list of 489 deaths from whooping cough in that city. The deaths weekly in London, England, are from a minimum of 60 to a maximum of 220, over 6,000 annually.

Physicians generally inform the anxious parents that whooping cough must take its course, as a remedy is unknown, and they can only slightly relieve it; that the incubation and increase in violence will occupy six weeks, and from six weeks to six months will be required before it is entirely removed. The whoopings usually increase regularly in number from day to day to the fifth week, often equaling forty times in 24 hours. Very rarely is this disease preceded by any other, but so great is the strain upon the system that frequently it is followed by pneumonia, in which event death often ensues. A fatal termination is more generally the result of absolute physical exhaustion due to the great strain consequent upon the oft-recurring paroxysms.

A few years since my youngest child, never before ill, was stricken by this dreaded disease. The best medical talent was obtained, every known remedy tried, most watchful care constantly exercised, but without the slightest avail. The child actually coughed itself to death. With all the grief of this sad experience still fresh, in April, 1879, we were alarmed by a new incursion of the destroyer. Our children, five and seven years, were attacked, seemingly with the severity of the preceding case.

It was then I learned of this Providence chemist's discovery, and that simple but ingenious apparatus had been invented by which the hydro-carbon (by analysis found to be cresolene $C_6H_5CH_3O$), could be evaporated in a closed room. I immediately procured both. The apparatus is a metal stand six inches high, supporting a cap, holding half an ounce of cresolene. The heat is applied either by a petroleum night-lamp or gas, vaporizers being made to attach to an ordinary gas-burner.

Cresolene is a rose-pink liquid, with a boiling point of 397°. It is not unpleasant in odor, but, on the other hand, is extremely grateful to anyone with the least bronchial or catarrhal affection.

In three minutes after the lamp was lighted, the vapor of the cresolene was diffused in every part of a room 15 by 20 ft. In 10 minutes the children manifested evident relief, recovered from their dull exhaustion, and were playing on the bed, even laughing aloud in their evident freedom from the paroxysm.

I was not advised it could be continued in safety all night, or even day or night, and at the expiration of 15 minutes extinguished the lamp. The children had been whooping 20 times a day. One of them did not even cough for 12 hours, the other for 36.

Learning that the vaporization could be continued day and night with more rapid benefit, I applied it for five nights in their sleeping-room. The spasms ceased and they speedily recovered.

At that time an epidemic of whooping cough was raging in my vicinity. I advised my neighbors of this apparatus. Many of them were used, and with the best results.

I believe the vaporizers and cresolene are now to be obtained from druggists. I am confident it will be found equally efficient in all throat and lung diseases. Inhalation is the true mode of treatment. The apparatus is nearly perfect as an agent for deodorizing, disinfecting and perfuming not only the sick room but an entire house. It deserves an extended trial. RANGELEY.

Worth Knowing.

HOW SLEIGH BELLS ARE MADE.—It has no doubt been a mystery to many how the iron ball inside of sleigh bells got there, and it is said to to have taken considerable thought on the part of the discoverer before the idea struck him. In making sleigh bells the iron ball is put inside a sand core, just the shape of the inside of the bell. Then a mold is made just the shape of the outside of the bell. This sand core with the jinglet inside, is placed in the mold of the outside, and the melted metal is poured in, which fills up the space between the core and mold. The hot metal burns the core so that it can be all shaken out, leaving the ball within the shell. Ball valves, swivel joints and many other articles are cast in the same manner.

BLEACHING IVORY.—An English paper gives the following as a recipe in Sheffield for bleaching ivory for cutlery handles. The mode of procedure is as follows: Place, say, 2 quarts of peroxide of hydrogen in a stone pot, adding 4 oz. liq. ammon. fort. 880°, immerse the handles, and put over a common shop stove for 24 to 30 hours; the handles are then taken out and gradually dried in the air, not too quickly, or they would split. The deep color of the ivory is removed and a beautiful pearly-white ivory results when polished. The ivory is previously treated with a solution of common soda, to get rid of greasy matter and open the pores.

IMITATION LEATHER.—The Japanese make a paper to imitate leather, in which the surface has every appearance of a finished skin, with extraordinary firmness and elasticity, and it can be subjected to washing without any injury from the water. These peculiarities are not so much due to the superior quality of the material as to the mode of manufacture, the surfaces remaining intact, even when the paper is very thick, while with us paper of this kind soon loses its firmness, and the grain is impaired. Japanese leather paper is made extensively at Flangawa, near Yeddo, the capital of the empire.

SYRUP THAT WILL NOT FERMENT.—O. Schlickum, in *Pharm. Zeit.*, strongly recommends an addition of 10% of alcohol to the water with which the ingredients are to be extracted. He has never seen syrup prepared in this way ferment. The best proportion of sugar to the liquid he finds to be as follows: Syrups made with a more or less alcoholic menstruum, three parts of sugar to every two parts, by weight, of liquid; syrups made with water alone, five parts of sugar to three parts, by weight, of liquid; fruit syrups, nine parts of sugar to five parts, by weight, of liquid.

TO POLISH BRASS.—Pulverize a sufficient quantity of sal-ammmoniac very finely and moisten it with soft water, rub the paste on the brass; which should be warmed meanwhile over some clear coals of wood; then rub dry with a soft leather, dusted with a mixture of bran and Spanish white. Another method is to wash the brass with a solution of one ounce of alum boiled in a pint of strong wood ash lye; when dry, polish with fine tripoli on a soft chamois leather.

REMOVAL OF FUSEL OIL AND CLARIFICATION OF LIQUORS.—A few years since the following process was patented in Germany, which is now again recommended as standing the test of practice, for the above purpose: Eight litres of the liquor, tincture elixir, etc., are agitated for a while with a mixture of 30 grams pure starch, 15 grams finely powdered albumen and 15 grams of powdered milk-sugar. After 24 hours the liquid will be found free from all fusel oil, of a brilliant transparency and greatly improved in taste.

STRATENA, the cement, whose wonderful powers are so frequently exhibited upon the streets, is probably only the old Armenian cement. This is so strong that it will hold jewels in place, and is used for this purpose by the Armenian jewelers, who merely flatten the settings of their precious stones and then stick them in place upon the metal with this cement. It is made by dissolving isinglass in alcohol along with gum ammoniac. When well made it is perfectly transparent.

BIRCH FOR CABINET WORK.—The small value of birch wood for fuel, and its lack of toughness and strength, except in the smaller twigs, have led to its general neglect in the arts. Our more enterprising builders of railway cars, however, have discovered that its light weight, close grain, and rich finish make it admirably suited for certain applications where fine finish and bright effects are desired. The contrasts presented when white birch and light colored ash are relieved by the red of the cherry birch, are said to be peculiar but very pleasing.

Fraternal.

Masonic.

VESPER LODGE, F. & A. M., Red Bluff, has decided to expend $20,000 in the erection of a building for Masonic uses.

THE anti-Masons are going to put up a $2,800 monument at Batavia, N. Y., to William Morgan, whose mysterious ending in 1826 caused such widespread excitement.

A LOCK of Washington's hair is carefully preserved in an urn by the Grand Lodge of Massachusetts, A. F. & A. M., and each Grand Master, at his installation, receives the urn in charge, and becomes its custodian during his term of office.

THE question of lowering the fees for degrees from $50 to $30 is being talked of in Masonic circles. It was first brought up in 1879, and at the session of 1880 received an adverse report from the committee. However, a handsome majority was secured at the latter session, but as it required a five-sixths vote to adopt an amendment at its first reading, it had to lie over. If it receives a two-thirds vote at the next session it becomes a law.

WE are pleased to learn that all necessary steps have been taken, and the Sir Knights are busily engaged in perfecting themselves, preparatory to commencing work under dispensation. Sir Knight Abraham Powell will be Eminent Commander, Sir Knight Wm. Carter, Generalissimo, and Sir Knight Rodgers H. Galt, Captain-General. It is probable that the first meeting under dispensation will be held about July 5th. There is a great deal of interest shown in the movement, and every indication that it will be successful. This city is particularly well located for this purpose, lying as it does about equal distance from the strong Chapters of Napa, Suisun, Martinez and Benicia, from all of whom it will receive support, in addition to the large membership of Naval Chapter of Vallejo. It is stated that upwards of 30 members of Naval Chapter have signified their intention of applying for the orders at the earliest practicable moment. We predict for Naval Commandery a prosperous future.—*Vallejo Chronicle.*

I. O. O. F.

PAST GRAND SIRE Hon. John W. Stokes, of Philadelphia, has been a member of the Order for 47 years. He has been a member of the same Lodge for 44 years.

THE 28th annual session of the Grand Lodge of Pennsylvania was held at Harrisburg, May 17th. The Order is flourishing, and several new Lodges were added the past year. The report shows: Receipts of the Grand Lodge, $23,590.25; working Lodges in Pennsylvania, 898; present membership, 76,476, an increase of 170; brothers relieved, 10,242; widowed families, 902; relief paid, $343,236 88; receipts of working Lodges, $686,938.94; assets of Lodges, $2,369,653.04. Robert E. Wright, of Philadelphia, was elected Grand Master; James B. Nicholson was continued as Grand Secretary.

THE Grand Lodge of Connecticut met at Birmingham, May 18th. The Order is steadily on the increase, this year showing greater gains than last. The report shows: The total receipts of the subordinate Lodges, $73,470.41, and total disbursements, $62,061.99, including $26,296.15 for relief, $23,836.93 for ordinary expenses and $8,948.81 for fitting up Lodges. The gain in funds is put down as $12,345.42. The total fund of subordinate Lodges is $184,878.42. The total membership May 1st was 7,501, making a total gain, since January, 1880, of 540. The average amount for each member paid out in benefits was $3.91. There are 16 Lodges of Rebekahs, with a membership of 1,494. E. J. Hill, of Norwalk, was elected Grand Master, and Fred. Botsford, of New Haven, was re-elected Grand Secretary.

NASHOONON, Wonolanset, Quocheco, Monadnock and Tahanto are encampments in New Hampshire. Tacusa, Ucal, Schamo Walhalla, Sinnissippi, Iris, Undine, Areli, Atalanta, Tonnaluka, Shawbenee, Big Thunder, Winnesheik, Waubonsie and Kishwaukee are Lodges in Illinois. Waupaukonica, Nimissilla, Sippo, Olentangy, Nachee, Wyanooska, Okonoxy, Hochhocking, Mancinnetta, Rushtaboo, Turkey Foot, Tymochtee, Bright Eyes and Owl Creek are Ohio names for Lodges. Pennichuck, Allamakee, Ocheydad, Minnewaupkon and Nishnabotany are names from Iowa. Boonslick, Gray Eagle, Loconic and Wingenund are Missouri specimen names. Wa-we-a-tonong, Wau-bunnung, Osau-waubun, Thornapple, Strict Account and Kilwinning are Michigan selections.

A POOR man by the name of Thomas Hennings, living in Fayette county, Iowa, lost his house and almost all his effects by fire recently, when a number of the Odd Fellows, taking compassion upon Mr. Hennings in his loss, "chipped in," and by the aid of a few citizens raised a purse of $35.50—the Odd Fellows contributing $21.50, citizens the balance. The money was presented to Mr. H. by Fred. Shelden, was gracefully accepted by him, but after a few hours' deliberation on his part, it was returned. Mr. Hennings' conscience would not allow him to accept anything from a secret society, his creed being, we presume, that secret societies were in league with the devil.—*Iowa Odd Fellow.*

FROM the report of the officers of the Odd Fellows' Library Association, it appears that the total receipts by the Treasurer, W. H. Watson, were $9,695.83, and the gross disbursements $7,941, leaving a balance to the credit of the general fund of $1,754.83. The Librarian, Geo. A Carnes, reports that there are now 37,809 volumes in the library, or an increase of 1,032 during the past year, 937 purchase and 95 by donation. During the year 87,194 volumes were loaned, as follows: Belles lettres, 2,591; biography and letters, 2,657; history, 2,750; periodicals, 2,483; poetry and drama, 2,176; romance, 67,107; science and art, 2,412; theology, 319; voyages and travels, 2,699. The circulation is less than in previous years, but the decrease is principally in books of romance.

S. W. SMALL, in *Guide*, Albany, N. Y.: The titles, regalia and jewels of subordinate officers are: Noble Grand, collar and apron back, trimmed with gold and silver; the jewel is an all-seeing eye; Vice-Grand, collar and apron same as Noble Grand; jewel, "the moon;" Secretary, collar and apron same; jewel, "single and cross pins;" Treasurer, collar and apron same; jewel, "cross keys;" Chaplain, collar and apron same; jewel, "Holy Bible." After serving a term as Noble Grand, the brother has to serve a term as Outside Guardian, then he takes his seat as Noble Father (Past Grand), and having performed the duties of that office, he becomes a Past Noble Father. The regalia of Noble Father is the same as other officers, the jewel being the "cross sword and sun;" that of Past Noble Father same as other, the jewel a "seven pointed star." Initiatory and first degree members wear white collars and aprons; second degree members, white collars and aprons trimmed with green, or a rosette of white and green; third degree members, collar of light blue, or rosette; fourth degree members, scarlet collars, aprons of dark blue, or rosette; fifth degree members, collar of orange and yellow, apron of scarlet, or rosette; sixth degree members, collar and apron of black, trimmed with gold. The general emblem is the "three links;" the motto, "friendship, love and truth." All Lodges furnish their officers only regalia, the members provide for themselves the necessary regalia, which may be purchased from the Trustees of the Lodge.

Knights of Pythias.

THE new Lodge instituted at San Rafael (Tamalpais, No. 60), March 19th, has increased its membership from 60 to 100.

JOHN H. HARNEY, Grand Chancellor, and Frank A. Merguire, Grand Master at Arms, will accompany the different Deputies next week during installation.

THE entertainment given at B. B. Hall, June 15th, for the benefit of the K. of P. library was well carried out. Quite a large assemblage was present. It is the intention to give these entertainments quarterly hereafter.

MYRTLE No. 16.—C. W. Nevin, P. C.; C. S. Hoffman, C. C.; A. E. Buckingham, V. C.; C. L. Campbell, P.; O. Leavitt, W. A.; G. Winehill, I. G.; R. Young, O. G.; F. C. Woodbury, Trustee; A. L. Heiman, Rep. to Hall Ass'n.

A GOLD badge will be given to the member of the Order who donates the largest number of books to the K. of P. library. We understand there is considerable competition for the prize. The time will close for the term ending June 30th.

THE Endowment Rank, June 1st, was as follows: First-class, 12,048; second-class, 16,370; third-class, 147. Benefits paid in May: First-class, $11,000; second-class, $28,000. Total amount paid in both classes, to date, $735,317.

ON Wednesday evening, June 22d, a new Lodge, K. of P., was instituted at Pythian Castle, and the officers installed by John Harney, G. C., assisted by other Grand officers. The Lodge is made up principally of young men, all being residents of this city. The charter list contained over 100 names, about 80 members being present on the night of organization. The following officers were installed: D. L. Levy, P. C.; H. Schaffner, C. C.; A. H. Ewell, V. C.; S. A. Carkeet, P.; J. C. Martin, K. of R., and S.; P. I. Senter, M. of E.; A. G. Palmer, M. of F.; J. G. Morgan, M. at A.; A. Byrne, I. G.; H. Schwind, O. G. The ceremonies of organizing and the installation of officers being concluded, a collation was spread by the Lodge for the Grand Lodge officers and visitors present.

Knights of Honor.

LEONIDAS E. PRATT, Dictator-elect of Anchor Lodge, delivered an address after the installation services of Anchor Lodge, July 1st.

A TESTIMONIAL was presented July 1st to Chas. G. Ewing, retiring Dictator of Anchor Lodge, in recognition of his valuable services to the Lodge. A handsome gold-headed cane, properly inscribed, was the souvenir of the Lodge's esteem.

FROM the circular of W. B. Hoke, Supreme Dictator, we take the following:

All commissions heretofore issued to Deputy Supreme Dictators will be considered in force, and said Deputies are requested to go to work organizing Lodges in their respective jurisdictions, as rapidly as possible.

All State Medical Examiners heretofore commissioned (except where the Grand Lodge has recommended some other), are still in office, without necessity of a second commission.

The change made in our laws, at last session, do not go into effect until July 1, 1881.

From and after the election, in December, 1881, officers of the Subordinate Lodges will hold their offices for one year. Officers elected in June, 1881, hold their offices for six months (unless re-elected).

The proceedings of session of Supreme Lodge just closed will be furnished each Lodge at the earliest day possible, and much sooner than heretofore.

I desire to call the attention of Treasurers of Subordinate Lodges to the delay in paying calls to Supreme Treasurer. Call 81 was made May 2d, and time expires for payment June 1st, but few Lodges have remitted their call. Assessment No. 80—about half paid. Assessment No. 79—a large amount remains unpaid. Now, what excuse can be offered for this neglect? I know where the fault is. It is not with the membership, but the Treasurer of the Lodge. My sympathy is with a Lodge when it is unable to pay; but when the Treasurer retains the money, instead of forwarding, then there is no excuse. If you feel an interest in the Order, then I request you to pay immediately on notice from Supreme Reporter. The money is due when you receive the notice. Because the law allows your Lodge 30 days, there is no good reason why you should wait until the time is out. An advance assessment is in your Treasury, and your duty is to send immediately on notice and not wait 30 days. Our law says *immediately*, and does not provide that you should hold an assessment until you have collected a second one previous to forwarding the first. I have instructed the Supreme Reporter to inforce the law, and suspend as soon as the 30 days expire. Now, if the Lodges desire to save trouble, require the Treasurer to produce his receipt at next meeting after call. The Supreme Treasurer reports to the Supreme Reporter three times a week amount of money received on each day, and Supreme Reporter draws orders for the benefit of widows and orphans as fast as the money is in the Treasurer's hands.

You must be prompt, or your good credit is endangered. Hereafter, when a Lodge is suspended on account of negligence of Treasurer, I will communicate direct with Dictator of the Lodge, and demand that charges be preferred. During past year several Lodges have been suspended because of *negligence* on the part of the Treasurer, and deaths have occurred in three or four days after suspension, and before reinstatement.

I regret the necessity of appearing in the light of a scold, but no Treasurer who is not in fault will complain, and we have many hundred good, reliable and prompt Treasurers. It is the class retaining the money to whom I desire to speak. The Order must be more prompt in paying benefits.

The law of 1880, forbidding organization of German Lodges has been repealed.

Supreme Lodge has sustained my construction of Law XXII—1880—and the Supreme Reporter will issue benefit certificates, payable as directed by the member.

REQUEST.—For convenience and expediting the work in this office, we must insist that all communications addressed to this office must contain the name and the special address of the writer, the name, number, and location of the Lodge plainly written in pen and ink, *not* pencil, and a plain impression of Lodge seal. Reporters and others corresponding with this office, desiring that attention be paid the same, must comply with the above request. Should they fail to do so, their letters will surely and certainly be consigned to the waste-paper basket. To be compelled to consult the Registers of Lodges to ascertain the name of Lodge, its location and special address of the Reporter, as we have to do in a large majority of cases, causes a great loss of time from the other work of the office, and must be remedied in some way, so we adopt the above plan. Postage stamps will not be received in payment of Benefit Certificate or Supplies.—J. C. Plummer, S. R.

American Legion of Honor.

THIS Order is meeting with great favor in this State, Councils being instituted quite regularly.

MRS. ABBIE E. WOOD, who is and has been for many years Grand Secretary of the Order of Eastern Star, is, we learn from a reliable source, mentioned as a prominent candidate for the position of Grand Secretary of the new Grand Council.

THE new Council, instituted July 16th, at Santa Barbara, had a membership of 25, among whom was the Mayor. There was also seven lady members. The Lodge has a good field for future usefulness, and starts with bright prospects.

DARIUS WILSON, S. C., has issued an edict, the tenor of which is that the States of California, Georgia, Maryland, New York, New Jersey, Ohio and Texas are entitled to have a Grand Council, which must be instituted on the 8th day of August, not sooner nor later. In accordance with this, a commission has been issued to form a Grand Council, and will be organized in this State on the day mentioned.

VISTA COUNCIL was instituted by A. Noble, D. S. C., at Manchester, Mendocino county, June 16th, and the following officers installed: S. C. Hunter, C.; G. L. Savage, V. C.; Thomas Filben, Sec.; Mrs. E. Savage, Col.; H. Gilmore, Treas.; Dr. E. F. Bacon, Med. Ex.; R. H. Cuthbertson, P. C.; D. F. Cain, W.; H. Vennigreholz, O.; E. P. Gilmore, G.; L. F. Spaulding, Sent.; S. C. Hunter, D. F. Cain, T. Filben, Trustees.

SANTA BARBARA Council was instituted at that place by D. S. Van Slyke, D. S. C., June 16th, and the following officers were installed: P. J. Barber, C.; I. K. Fisher, V. C.; Miss Dorcas Wheelock, Sec.; F. A. Moore, Col.; A. Ott, Treas.; Mrs. A. McG. Stuart, Med. Ex., R. F. Winchester, Alternate; H. Clifton, Orator; A. Rynerton, G.; S. Lightner, Sent.; A. C. Stratton, R. F. Winchester, I. K. Fisher, Trustees.

Order of the American Union.

THE Washington Assembly of this Order initiated ten candidates—ladies and gentlemen—on Monday night, the 27th ult.

THE National Assembly will close its first annual session in a few days. It has decided to appoint deputies for both this city and the country and those officers will enter upon their duties immediately.

JEFFERSON ASSEMBLY of this Order will be instituted at Red Men's hall on Monday night, July 11th. Hamilton Assembly, to be instituted shortly, will be composed entirely of gentlemen. Each Assembly decides for itself whether it will admit ladies or not.

THE first subordinate of this new Order is called Washington, and it seems to us a very appropriate name to give the first local Assembly; for as Washington will always hold first rank in the affections of the people of the American Union, let us hope that the Assembly which was named in his honor will always remain a bright and particular star in the fraternal Order of the American Union.

As announced in our last issue, the first local Assembly of this new California Order was instituted on Thursday, June 16th. The following officers were elected: J. L. Fields, Speaker; J. G. Maguire, Supt.; John Henderson, Clerk; J. F. Prescott, A.; A. H. Gage, T.; J. H. Barry, Senator; J. M. Lyons, S. at A.; J. J. McCarthy, Asst.; D. E. Goodsmith, D. K.; Mrs. H. A. Crocker, Chaplain; Dr. L J. Henry, Dr. W. E. Welden, Dr. Kate N. Post, Med. Examiners; E. H. Knight, H. Coad, F. H. Canavan, Trustees. Washington Assembly, the name of the new subordinate, will meet every Monday evening at 320 Post street.

Order of Chosen Friends.

THE *Banner of the Chosen Friends* states that there is one committeeman too many on the committees appointed at the recent Grand Lodge session; also that February is the only month in which a Grand Council can hold an annual meeting.

A RESOLUTION was passed at the last meeting of the Executive Committee, held in Indianapolis, that a circular be issued to Councils notifying them that they can not use the old applications longer, and that they shall certify to the number of petitions on hand, over the seal of their Council, and the new petition will be furnished in exchange, free.

THE Supreme Recorder writes, under date of May 28th, that there are 158 Councils enrolled, with a membership of about 9,477, an increase since last report of 14 Councils and 989 members. The Order now extends into 21 States. California heads the list with 2,685, Michigan having 1,671 and Indiana 1,139.

THE new style assessment notices, adopted by the Executive Committee at its last session, goes out with the call for No. 7. This notice, which is a decided improvement on the old one, will be appreciated, we think, by the membership generally, and will greatly aid the officers in the discharge of their duties, as there are but few blanks to fill. This notice gives to each member the day the assessment is due, and also gives upon the back a full report of the condition of the Supreme Treasury. This report will be continued from time to time, as the notices are issued, giving all deaths and the amount received on each assessment. This plan is a good one, and it certainly will be of great value to the Order at large, for by the filing of these notices each member can have a record of the deaths he has paid on, and can have the privilege of satisfying himself as to their validity and correctness, and that, too, without extra expense either to himself or to the Order. Councils having old notices on hand would do well to preserve them, as an emergency might arise where they would be needed.

Selections.

THE Good Templars' Home for Orphans (non-sectarian) is situated at Vallejo, Cal. The number now in the home is 104; the number cared for since the opening is 1,000; the cost of the home and expense for support to date is nearly $200,000. Membership of the Order in the State, 14,400.

AFTER several delays the first subordinate Council of the Royal Arcanum was organized in this city Monday evening, June 13th, with the following list of officers: F. H. Lamb, Regent; Taliesin Evans, V. R.; J. M. Magagnos, P. R.; R. D. Bogart, Orator; J. F. Gawthorne, Sec'y; H. W. Gardner, Col.; E. H. Morgan, Treas.; S. B. Doane, Chaplain; W. H. Voorhees, G.; B. Bernard, W.; B. F. Farrar, S.; C. E. Blake, A. Badlam, J. M. Lenhart, Trustees; Dr. N. P.

Foster, Medical Examiner. The name of the new Council is Argonaut and was instituted by D. S. Regent Haines. It will meet every other week in Shiels' building. The Order has a membership of about 30,000 in the Eastern States.

CANADIAN ASSOCIATION.—This mutual aid and social society gave a grand installation ball at B'nai B'rith hall on Tuesday evening, June 28, 1881. As usual, the hall was in fine condition, a prominent feature being a large silk Canadian flag suspended across the front of the hall. The Hon. D. A. Macdonald installed the following officers for 1881-82: C. E. Hunt, Pres.; Jas. W. Harris, 1st Vice Pres.; W. J. McCormick, 2d Vice Pres.; Adam Gilliland, Rec. Sec'y; W. G. Buchanan, Fin. Sec'y.; R. S. Falconer, Treas.; J. W. Russell, Cor. Sec'y; A. H. Walker, Marshal; Trustees, Daniel McLeod and Edward Doyle; Dr. D. McMillan, Physician. There was a large company in attendance and a very enjoyable evening spent in social greeting and in spirited dancing of a programme of 12 dances, including several extras. Prof. Knell's string band discoursed good music to this happy company until a late hour. The committees were very attentive to their guests, and all seemed to be happy and at ease. A noticeable feature of the evening was, a large number of the ladies were tastefully and richly dressed. The several committees appointed to carry out this grand annual ball were: Executive Committee—Daniel McLeod, C. E. Hunt, M. J. Sullivan, A. Barker, S. Beatty, Jas. W. Harris, W. B. Blair. Reception Committee—W. H. Hutchinson, W. G. Buchanan, W. J. McCormick, R. S. Falconer, E. Doyle, John Elder, J. J. Morrison. Floor Manager—W. J. Gilliland. Floor Committee—Jas. McKay, A. Gilliland, James Miller, C. Annis, W. Samson, A. Houston.

A GRAND temperance reunion took place at Woodward's gardens, June 23d, and was attended by a large number of people. The societies represented were the Father Mathew Society of this city, the Women's Christian Temperance Association, the Sons of Temperance, the Champions of the Red Cross, and the I. O. G. T., under whose auspices the festival is being held. A committee of the Good Templars, consisting of C. Naylor, W. R. Joseph, A. Spencer, W. A. Piper and Bros. Klein, Carter, Kendall and Cragin were in charge of the proceedings. The Good Templars have 13 Lodges represented, with some 800 members in the city, and perhaps 14,000 in the State. Bro. Katzenstein of Sacramento, R. W. G. T., and the recognized head of the Order in the world, together with Judge Robert Thompson of this city, G. W. C. T., with other high officials, were present. A programme, as given below, followed by dancing, was arranged for the afternoon and successfully performed: Song, by Miss Fannie Colby; recitation, Miss Minnie Gately; the oration, by Wm. H. Barnes; vocal solo, Miss Annie Gordon; declamation "Alcohol," H. Webb; remarks by Judge Thompson and R. W. G. T. Katzenstein; song, Wm. Gansart; recitation, Miss Davis; remarks by B. C. Duffy of the Father Mathews; vocal duet, by the Misses Willis; short speeches by C. H. Haswell, P. W. G. T. of the Order; V. O. Clark, Esq., P. W. G. P. of S. of T.; R. H. McDonald and A. K. Stevens, followed by orchestral music. The programme in the evening was quite attractive, the speeches being made by F. E. R. Whitney and F. J. Culver of the Grand Lodge G. T. A social dance was held under the auspices of the Union Social Club. The re-union was quite a success.

A FEATURE OF THE COMING FOURTH.—The third annual prize carnival to be given by the Florence Social Club, at the Mechanics' Pavilion, on Monday evening, July 4th, promises to eclipse, in point of grandeur and magnificence, anything of a similar character ever witnessed in San Francisco, and it will undoubtedly be "the lone and bright star in the firmament of our city's amusements." Previous to the grand march, the management have prepared a series of acrobatic and daring aerial performances, tight-rope walking, etc., for the amusement of the spectators until the opening of the masquerade. The grand overture, by the Second Regiment Band, N. G. C., consisting of 30 pieces, will signalize the commencement of the grand march at 9:30 o'clock. This gorgeous procession will embrace a number of the most elegant and brilliant tableaux, a series of original and pre-eminently meritorious character representations, most select and captivating historical and dramatic scenes, and extremely ludicrous personations. The prizes, 33 in number, are of a high order of excellence, and are now on exhibition at J. W. Tucker & Co.'s, 131 Kearny street, where pamphlets, with programme of the evening and list of prizes, can be obtained.

THE Baldwin hair-dressing saloon and bath-rooms, in the Baldwin Hotel, are the resort of the elite of our city. The baths have all the modern improvements, one of which is an invention of one of the proprietors—a warm floor. Lampe Bros., both members of Olympic, No. 127, are the proprietors, and, under their personal supervision and able corps of assistants, our brother Workmen will find this an unexceptional place for tonsorial indulgencies.

BRO. J. T. COCHRAN, one of the members of Oak Leaf, No. 35, and also one of our solid commission merchants, is largely interested in the exportation of hops and barley. Selling of hops is a specialty with this house, No. 126 Clay street.

Address of A. G. Booth, P. M. W., at the Re-union of S. F. Workmen, Fairfax.

Mr. President, Ladies and Gentlemen: There is an old story—a myth probably—that Hercules once applied to become a member of one of the secret societies of antiquity. His application was referred to a council of wise and good men, who opposed his admission because he had been guilty of various crimes, and the demi-god was therefore rejected. They said to him: "You are forbidden to enter here, your heart is cruel, your hands are stained with crime. Go, repair the wrong you have done, repent of your evil doings and then come, with pure heart and clean hands, and the doors of our mysteries shall be opened to you."

We, as a society, within whose charmed circle none are admitted whose hearts are cruel or whose hands are stained with blood, celebrate our fourth anniversary to-day. A society whose mysteries are opened to those of pure heart and clean hands, while to those guilty of crimes, with hearts blackened and consciences seared with acts and deeds of cruelty—to such as these we say: Go, repair the wrongs committed, repent the evil deeds, and then apply with honesty of purpose and sincerity of heart, and our doors will be opened to receive you; we will then make you an honored member of our society, as the myth tells us Hercules subsequently became, in the Order where he was once rejected.

Every nation, from the remotest antiquity, has had its days of celebration, and every age has been characterized by popular festivals. History tells us of the Olympic games of the Greeks, of the festivals of the Romans, of the grand tournaments, games of strength and feats of endurance during the medieval ages. Our nation has its holiday—a day that fires the hearts of old and young alike with patriotic zeal. Organizations and societies have their days of celebration, anniversaries, picnics and re-unions. And wisely and justly, for they strengthen the bonds of friendship, they are the rainbows in human life, the oasis in our weary pilgrimage, where we may pause in our battle with the world, and rest our limbs and minds, tired and weary with the cares and labors of life, and unite our voices in one grand chorus of joy and praise untrammeled and unfettered by care or trouble.

Friends, the Ancient Order of United Workmen is not ancient! As an organization we can boast of no antiquity, we have no mouldy parchment scrolls, no dusty volumes of ancient legends, no history transmitted from the hoary past by sire to son from generation to generation. But what matters it, though its birth was of yesterday, if it is noble, good and pure.

Our Order was started in 1868 in Pennsylvania. It has now a membership of about 100.000. It has paid about $5,000,000 to the loved ones of our dead. Its certificates represent nearly $200,000,000 in a mutual organization where every member is a surety for every other. It was introduced upon this coast in 1875, has about 12,000 members in California, and has given nearly $350,000 to the friends of deceased brethren to lighten the burdens of life. An American organization we proclaim ourselves young, yet grounded as firm as the everlasting hills, and solid as the rock of adamant. We want not, we need not the aid of antiquity to support our claims for intrinsic worth or true merit. We stand free and alone, unencumbered by mystic legends. We scorn all borrowed plumage, we cast from us all legendary draperies, for

> "Loveliness needs not the aid of ornament,
> But is, when unadorned, adorned the most."

Among the various organizations that by a system of assessments raises a fund to pay a benefit upon the death of a member, stands prominently the Ancient Order of United Workmen. These organizations are waging a destructive war, and creating especial havoc among the old and self-styled reliable life insurance companies. Already their power is waning. There can be but one end to the conflict; our organizations must prevail over the companies, whose officers too often have no sense of honor, or feelings of humanity, who often are *defrauders* instead of *defenders* of the rights of the heirs of their patrons. A life insurance company pays large salaries, great commissions, heavy bills for advertising, printing, licenses, etc. Who pays it! The insured pays it all, besides a margin for poor investments. Our plan is founded on sound, solid business principles. We levy an assessment of $1 upon every member of our Order, when a death in our ranks renders it necessary; this, when collected, creates the fund from which the benefit is paid. This system provides an insurance that is cheap, because, at cost, secure and safe, for the money is in the hands of the members till needed; easy, for the reason that the assessments are small.

Each brother has a common interest in the welfare and prosperity of the Order, for it is a mutual association, "All for one and one for all." He knows that when an assessment has been levied and collected, that it will be promptly paid, without deduction or discount, to the person or persons to whom it rightfully belongs, and that it will help to cheer the hearts loaded with sorrow and clouded with gloom.

Each brother has a voice in the management and control of its funds, in the selection of its officers and the making of its laws. The brothers themselves manage their affairs, and that, too, without the aid of a board of directors, a $40,000 president, high-salaried officers and four-story, marble-front edifices. I tell you, friends, that an organization, managed and conducted as ours, that secures to the loved ones in the hour of bereavement and death, a sum that they can rely upon—a certainty—and that, too, without let or hindrance, will be blessed and prospered, and will grow and flourish when life insurance companies shall have failed and passed from existence, leaving behind them the memory only of their unworthiness.

The tendency of the age is toward centralization of power and wealth. The material growth and the development of the vast resources of our country is marvelous, gigantic enterprises and mighty undertakings, wonderful in conception and stupendous in execution, involving millions of capital, are the characteristics of the present age. Men live for money. They push and drive, toil and labor without ceasing, turn night into day and hurry through the world in a mad, wild career after gold; the times and the circumstances tend to develop the greed and avarice of men.

Wealth dazzles the mind; the heart is encased in selfishness, and man becomes blind to the finer feelings of humanity, oblivious to the sufferings of others, forgetful of wife, children, home, or the claims of society—all, all, are sacrificed in the race for wealth. Men seem to live and act as though the sum total of life was

> "Dimes and dollars, dollars and dimes,
> An empty pocket is the worst of crimes."

We need societies like ours, with their heaven-born principles of Friendship and Charity, to counteract this tendency of our age; these great principles and forces, the foundation and substrata of our societies must be developed and spread broadcast through our land with strong hands and willing minds, or our nation will become a land of money-getters; the accumulation of gold will be the main object of life, and all the noble attributes of manhood lost and traces of humanity destroyed.

Our Order teaches friendship and brotherly love. Its mottoes are Charity, Hope and Protection. The work that is being done, the practice of the precepts of our Order, make man better, nobler and purer. It instills into his mind the finer principles of humanity, the nobler sentiments of manhood. It dispels the clouds of error that surround him in his mad frenzy for gold, and teaches him the true lesson of social dependence.

Let our banner cry be, spread the principles of our Order, let advancement be our watchword. May our teachings permeate every part of our land, and every branch of our society. May our banner float on every hillside and in every vale, until our Order and its principles be universally recognized and acknowledged as the promoters of peace and happiness.

The way of the world is to expose the faults of others, to hold them up to ridicule, to make them the subjects of jest and satire; to set forth the imperfections of character and blemishes of reputation in an aggravated degree. Our charity, while it does not pass lightly over or excuse iniquity, yet it teaches us to be liberal in judging the acts of others, to lend a helping hand to the down-trodden and unfortunate. A kind act, a sympathetic tear, a word of encouragement fitly spoken may change the course of a man's life, and fill a heart loaded with despondency, with noble aspirations and high ambitions.

> "The pebble in the streamlet sent,
> Has turned the course of the mighty river;
> The dewdrop on the baby plant
> Hath worked the giant oak forever."

Our charity is not alone the inclination to do good, but it is the power and will so to do; not a fancy or theoretical one, but a thoroughly practical charity, one that has been tested, incorporated into the laws of our Order, and made its fundamental principle. The man that has no charity in his being, that lives for himself alone, that has no thought for the comforts of his wife and children when his name shall have been stricken from the "pay roll of earth's laborers," is certainly deficient in some of the qualities and attributes of a perfect manhood; but the man of a thoughtful and generous nature, will be careful to provide for those he loves, and the knowledge that they will not be left entirely dependent upon the cold charities of the world, but that kind brothers will care for them and gently guide them along the pathway of life, when he is dead and gone, will be a source of comfort and consolation to him. Many are the homes that have been made happy, many are the hearts that have been cheered through the agency of our Order, for death, that great leveler, spares neither rich nor poor, high nor low; and many are the widows and orphans throughout our land that invoke the blessings of God upon our Order and pray for the success and prosperity of that organization which aids and assists a brother while living, and opens its arms to receive and sustain those dependent upon him when he has gone to that "sleep that knows no waking."

Brothers, let us be true to the teachings of our noble Order! Its objects and its aims are pure and Godlike. Our methods are but human, but the principles which we inculcate are taught in the Book of God. Our workings may not be absolutely perfect, but our mission shall not have been in vain if truly and faithfully

* * * * * * * "We bear
To the Lord of the harvest our wheat with the tare.
What we lack in our work, may He find in our will,
And winnow in mercy our good from the ill."

The New Declaration.

That is a critical hour for any country or nation when the people become so absorbed in money-making or money-getting as to tire of keeping e'en liberty's feast, and to insist that they are persecuted if compelled to merely listen to their forefathers' declaration of rights. It is time for earnest action on the part of patriots when such conditions exist—time for mothers to re-consecrate their sons to liberty and to teach their daughters anew the significance of the words freedom and native land.

With the ocean's broad highway aflutter with the white wings of the fleets hurrying into this free haven with the thousands of earth's oppressed, it is time for action on the part of patriots. Schools must be organized, the press re-consecrated, a love of liberty and loyalty developed, or we cannot successfully solve the intricate problem awaiting solution. And if American men, with all their splendid powers, deliberately choose to ignore this royal opportunity and continue their wrangle for official honors and spoils, then, in the sacred name of liberty, I call upon the mothers and daughters "to speak to the people that they go forward."

Colonel T. W. Higginson, one of the knightly heroes of this present, thus voiced a text for us on Decoration day:

> Courage is first and last of what we need,
> To mold a nation for triumphal sway;
> All else is empty air,
> A promise vainly fair,
> Like the bright beauty of the ocean spray,
> Tossed up toward heaven, but never reaching there.
> Not in the past, but in the future, we
> Must seek the mastery
> Of fate and fortune, thought and word and deed.
> The past is on its starry track,
> We would not win it back.
> Gone, gone for aye, the little Puritan homes;
> Gone the beleaguered town, from out whose spires
> Flashed forth the warning fires,
> Telling the Cambridge rustics "Percy comes;"
> And gone those later days of grief and shame,
> When slavery changed our courthouse to a jail,
> And blood drops stained its threshold. Now we hail,
> After the long affray,
> A time of calmer order, wider aim.
> More mingled races, manhood's larger fame,
> A city's broader sweep, the Boston of to-day.
> Or, to change the last line,
> A country's broader sweep, the Union of to-day.

Yes, we hail this time of calmer order as the fitting hour of woman's era—the time for the warrior to stand with lance at rest, and reverently watch the teacher complete the work already well begun.

The holy mother hour in the national homestead, when the children shall forget the friction of the day, and ask for guidance and instruction from mother.

Would that in every hamlet, village, and neighborhood some representative woman would arrange that the grown-up boys should receive at least one hour's instruction from their mothers, so that the approaching national fete day should receive universal recognition. Let the hosts of foreigners crowding to our shores be met at the threshold with a welcome, and also an earnest lesson from the newer catechism of liberty. Oh, that the blindly selfish world might be taught one lesson of the unity of humanity. Made to comprehend that no one can obtain complete freedom, so long as there is one weary, oppressed, tempted, or wronged human being crouching neath our flag. Neither will the theory of a republican form of government ever be tested until every human being of mature age and sound judgment has a right to self-government and self-protection.

Truly, courage is what we need. The highest, loftiest courage known to the weak, the courage of devotion to an abstract idea, courage to face the ridicule of friends, to face the treacherous fire of prejudice, courage to speak truth to a world that is an unwilling and impatient listener.

Aye, courage to be often misjudged and misunderstood by the very people one would die for. Aye, the courage of a sensitive, loving soul to brave the loneliness of greatness. Aye, but would it not require greater courage for a truly royal soul, to be untrue to one's self, false to the truth, traitor to the world's peerless possibility—a noble character?

Hence if the recreant sons of a patriot ancestry protest against the old-fashioned declaration of independence of the forefathers, let the mothers give to the world a new declaration.—*Mrs. Harbert, in Inter-Ocean.*

THE SPRINGS IN LAKE COUNTY, and elsewhere generally, are well patronized this year. A pleasant party, as usual at this season, are enjoying themselves at Anderson Springs. A new log cabin, neatly and uniquely constructed and finished, by Mr. Partriquin, one of the proprietors, is an improvement added to the place during the year. The puffing geyser steam baths and the refreshing cold sulphur spring are still leading attractions.

WESTON'S Bakery, No. 9 Stockton street, is one of the popular resorts of families for meals. The variety of choice bread, pies, cakes, fancy biscuits, bon-bons, etc., always on hand (and made fresh daily), makes it one of the favorite places for supplies of this kind.

A. O. U. W. Directory.

Cards inserted in this list at the rate of 25 cents per month payable semi-annually in advance. If errors or omissions are noticed, please write the office direct.

THE new passenger station, in Chicago, of the Chicago & Northwestern railway, the finest and largest depot building owned by one company in the United States, was opened, and all trains running to and from it, June 1, 1881. The location is right in the heart of the business portion of the city, and is quite close to all of the leading hotels, and about equi-distant from all the depots of lines carrying passengers to Eastern points, thus making the "Northwestern" the most desirable line for Niagara Falls, Buffalo, Pittsburg, the Alleghanies, Baltimore, Washington, New York and Boston. Another new feature introduced June 2st, was the inauguration of the "Imperial Dining-car Line." The meals and service will be first-class in every particular, and will equal anything that can be procured in any strictly first-class hotel. The *menu* each day will include all the delicacies of the season, and will present that variety and excellence which will satisfy the most fastidious. The price of these meals has been placed at the very reasonable rate of 75 cents each. Those not desiring a full meal will be furnished with a lunch—tea, coffee or chocolate, with sandwiches—at very low rates. Thus the "Northwestern" leads all competitors in catering to the public. Its steel-rail track the most substantial—its equipment the best. Grateful for the very large patronage given by residents of the Pacific coast in the past, we solicit a continuance of the same. Any information will be gladly furnished by ticket agents of the Central Pacific railroad. A. Malpas, Overland ticket office, San Francisco; Jno. Talbott, Overland ticket office, Sacramento; and J. Meredith Davies, General Agent.

BY TELEPHONE.—Subscribers, advertisers and other patrons of this office can address orders, or make appointments with the proprietors or agents by telephone, as we are connected with the central system in San Francisco.

BRO. JOSEPH GIUSTI'S OYSTER, CHOP, AND CHOWDER HOUSE, 105 California Market, for ladies and gentlemen, is the place to get an oyster cocktail, or a meal fit for a king. His customers always feel happy after partaking of his good cheer. His parlors are open night and day.

The Great South Dome, Yosemite Valley.

[Written by G. H. S.]

In 1874, Prof. Whitney wrote as follows: "The Half or South Dome is a crest of granite rising to the hight of 5,000 ft. above the valley, seeming perfectly inaccessible, and being the only one of all the prominent points about the Yosemite which never has been and perhaps never will be trodden by human foot."

A close examination of this elevation shows that the prophecy would appear to be warranted. The valley front is a smooth, nearly vertical flat wall, which gives the name Half Dome. The remainder approaches an oval dome shape, falling off rapidly from the top to 60°, 70°, 80°, and nearly vertical as it goes down toward the valley, and these sides are from 2,000 to 4,000 ft. high, except at the rear side, nearly opposite the flat front face. On this side it is approached to within about 2,000 ft. by a comparatively easy trail, which diverges some distance above the Nevada fall, from the trail to Cloud's Rest. Upon leaving the woods, the Dome becomes visible for the first time. The first elevation is called "The Saddle." It is a steep narrow ridge, sloping down rapidly to each side, and is very steep upon the ridge itself, but there are many large rocks, some crevices, and an occasional scrubby pine bush by which to hold on until this ascent has been overcome.

Then comes a depression, or saddle, between its highest point and the dome, and this also slopes off, as its name indicates, so as to leave but a narrow standing room in the center. From this point the curved slope of the dome commences, and extends 900 ft. to the top. The actual angle is from 38° to 40°, and in some places possibly a little greater, which does not seem very steep when laid out on paper, but when it is in the form of a smooth granite rock, and has, in addition, a slope upon each side, it is bad enough to look *up* to, and is extremely trying to the nerves to look *down* at, unless they are pretty steady. The layers of rocks on the sides are in the form of shells, overlapping downward like shingles; whenever there are any breaks, these form steps of from one to two ft. high, which must also be surmounted while ascending the incline. This defeated all attempts which were ever made to climb this rock, until October, 1875, when Mr. Geo. G. Anderson succeeded, after two days and a half, in accomplishing the ascent. Mr. Anderson is a Scotchman, who has resided in the valley for 15 years. He is a ship carpenter by trade, and had followed the sea in that business for many years before settling on shore. Before his residence in the valley, he was engaged in putting up one or two suspension bridges over the Tuolumne and other rivers, and acquired considerable local fame for fearlessness and steadiness of nerve. After determining to try the ascent of the dome, he prepared eye-bolts, drills, chisels, and the necessary ropes, and packed them to a convenient place, and after much hard work he reached the top, and planted a flagstaff there. Since that time quite a number of men, and some ladies have climbed the dome, and have been repaid for the risk by the grandest view in the valley.

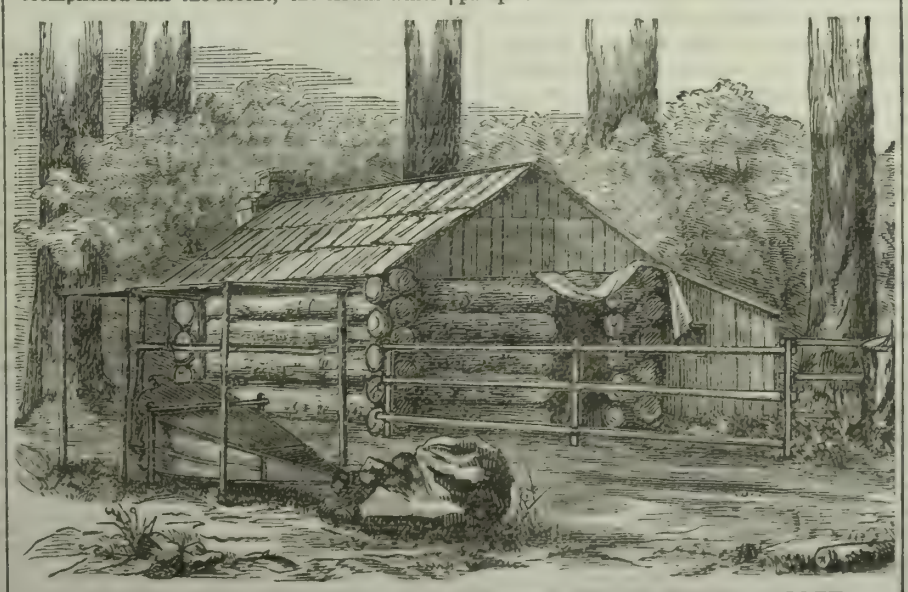
Last year the rope became unsafe, and was cut to prevent any further attempts and possible accidents. All this excited my interest, and when Anderson offered to accompany me to the Saddle, which he said was as far as we could go, I eagerly accepted the invitation, and this morning, accompanied by a friend, we started at seven o'clock, passing the Vernal Fall, and climbing the steep, narrow trail which surmounts the Nevada Fall, we followed a comparatively easy path toward Cloud's Rest, until we reached a point where we turned off and commenced the ascent toward the Dome. All of this portion of the trail leads through the forest, crossing little streams and some rocks, until we pass the cabin where Anderson lived and prepared the iron work and bolts for his attempts, a picture of which is given on this page. At this season of the year we find many of the peculiar, beautiful snow plants just starting from the ground all along the trail; but as we ascend, these disappear, and the trees become smaller, and finally disappear just at the foot of the Saddle. When we emerged from the timber and caught the first glimpse of the Dome and the Saddle, it appeared like an almost vertical wall of smooth rock and impossible to scale.

At this hight one easily becomes short of breath, and must make frequent stops to recover the breath. We climbed the projecting spur of the Saddle, with considerable difficulty, and took a long rest upon the comparatively flat surface at the top of this elevation. Two hundred and fifty ft. or more above us dangled the frayed and ragged end of the rope which had been broken at that point, and after extending, with one or two breaks, some 400 or 500 ft. upward, it again terminated, and apparently where it would be most needed.

I had made up my mind before starting that, if possible, I would attempt the ascent, but dared not speak of it to Anderson, fearing that he would not allow it, and when we first came in sight of the place my courage became exceedingly weak, and I was glad that I had not spoken of my intentions to anyone.

After resting a short time, however, I tried to go up a little way, but my boots slipped upon the rocks so that I felt convinced that I could not get up with them on. I then sat down and took off boots and stockings and slung them over my arm for use when I should reach the top, if I ever did. From this point the slope was too steep for the sharp granite sand to lie upon it, and the rock being perfectly smooth, my bare feet would hold upon it so that I could climb with but little difficulty.

Anderson now seemed to divine my intention, for he came up to me and, after gathering a few of the bolts which had been pulled out and were lying at the foot upon the Saddle, and selecting some of the best of the pieces of rope which were still lying there, to repair with, we started up, putting in a bolt here and there, and making the rope fast, for it was almost entirely loose from the point where it commenced, to its upper end. We added some rope at the lower end, and worked slowly up, not trusting the rope, as it was very weak in many places. Before we had accomplished half the ascent, the clouds which had been threatening all the forenoon, began to close in around us, and finally a sharp wind began to blow and some flakes of snow and hail to fall, we therefore abandoned the rope and went up the remainder of the distance as fast as we could. At the top I resumed my shoes, as there is nearly 15 acres of comparatively level space there, and at this time there was a large body of snow upon one portion of it. We found the flagstaff fallen down, and set it up, and then the clouds broke away a little and gave us a magnificent view of the valley. Just under our feet, and apparently so near that we could throw a stone into it, but almost a mile vertically below us, was Mirror lake, while down the valley all the familiar points seemed but a little distance away, but very small. The Cap of Liberty, Mt. Broderick, North Dome, Glacier and Eagle points are all far below us, but in the opposite direction Starr King, Cloud's Rest, Dana, Hoffman and many others tower still farther above us. Near the farther end of the flat vertical face of the Dome the layers of rock project over, From this point rocks thrown off were 21 seconds by the watch before striking, or rather before the sound came back to us, but it was impossible for me to appreciate the great hight. Standing upon this projecting point within a foot of the edge, I did not feel the hight much more than I would that of the Palace hotel when looking from the parapet. About 100 ft. back from the face of the rock there is a fissure from 8 to 15 inches in width and this extends for some hundreds of ft., one end running out to the face; the other I did not see. We threw small stones down this fissure and they rattled down from side to side for nine seconds before they found a resting place. This crack is estimated to be from 600 to 800 ft. deep, and if the mass of rock bounded by it is ever detached, it will terminate the existence of the present Mirror lake. We had hardly completed half our hurried inspection when the clouds began to close in around us again. All the distant and higher points were enveloped in dense black clouds, which were rapidly approaching and warned us to get down as soon as possible, but before we were half way down the top of the dome was hidden from sight. After reaching the foot of the Saddle, we again mounted our horses and retraced our steps through the rain, which began to fall heavily. Looking back, the whole of the Dome was entirely hidden from view by the heavy clouds, and as it looked as if it might rain until night we pushed on through it to Snow's hotel, just below the Nevada Fall, and were soon seated by a warm fire doing justice to a dinner which certainly did not lack appreciative appetites. Before our clothes were dry the clouds broke away, and the reflection of the declining sun upon the Nevada Fall brought out a magnificent rainbow, which was at first close to the fall, but before we left had moved out so that it stood some hundreds of feet in front of it, and presented a very novel appearance. During our stay here we examined some books of ferns, which were prepared by Mrs. Snow, and were arranged in an exceedingly artistic manner. Resuming the trail we reached the hotel at eight o'clock, tolerably tired by the long and exciting climb.



As new ropes have been sent to the valley by the commissioners, the South Dome will soon be again accessible to anyone who has nerve and does not mind a little hard work, and it is probable that by another season a flight of steps will be put up, as Mr. Anderson has all the necessary lumber just at the foot of the Saddle, and well protected.

CLIMBING THE SOUTH DOME, YOSEMITE.

ANDERSON'S CABIN, BACK OF SOUTH DOME, YOSEMITE VALLEY.

C. L. S. C.

The California Branch of the Chautauqua Literary and Scientific Circle meets at Pacific Grove, Monterey, June 28, 1881. Prof. Moses, Dr. Wythe, Dr. Anderson, of Santa Cruz, Profs. Norton, Childs, and More, of San Jose, Profs. George and Stratton, of the University of the Pacific, and several others, are named as instructors. Especial attention is given to the study of Natural History. Dr. Wythe gives a course upon Marine Zoology; Dr. Anderson, upon Marine Botany; Prof. Lemmon, upon the Plants of the Sierra; Miss M. E. B. Norton, General Botany, and Prof. H. B. Norton, upon Insects Destructive to the Orchard. The lectures are open to the general public. The lecturers work gratuitously, but the Circle pays their traveling expenses, so that a ticket for the entire course of lectures costs $2. The S. P. & C. P. railroads offer special inducements, and Mr. Stanford is building a large and commodious hall at the Grove, for the use of the Circle. For further particulars address Miss L. M. Washburn, San Jose.

Taking Comfort in Life.—Sooner or later, friends, the time for folded hands will come to us all. Whether or not we cease from hurry and worry now, we shall one day shut our eyes upon it and lie still, untroubled by the stir and fret of things about us. Why not take comfort as we go on? You, proud mother of a beautiful, active boy, of what use will it be to you to remember how exquisitely fine was his raiment, how daintily spread his bed, and how costly and profuse his toys? What the child needs is mothering, brooding, tender resting on your heart, and he needs it every step of the way from babyhood to manhood. Take the comfort of your opportunities, never mind though the dress be coarse, and the food plain, and the playthings few, but answer the questions, tell the stories, spare the half hour at bed time, and be merry and gay, confidential and sympathetic with your boys. And you, whose graceful young daughter is just blushing out into the bloom and freshness of a woundrously fair womanliness, do not be so occupied with your ambition for her own advancement in life, that you let her ways and your own fall apart. Why does she visit here and there, and receive visitors from this and that home, and you scarcely know the people by sight? You are losing precious hours, and the comfort you ought to take is flying fast away on these wings of time that are never overtaken.

The Pacific Land Agency, 305 Kearny, is one of the prominent and reliable land agencies of this State. They have business connections with all parts of the State and are prepared to negotiate for suburban homes, general farming, grain, grape and stock lands in all parts of the coast. Bro. J. N. Prather, Foreman of Sts. John Lodge, the junior member of the firm is always ready to give information to parties wishing to purchase homes or exchange property in the city or country.

Bro. J. H. Congdon, No. 6 Steuart street, wool and general commission merchant, is meeting with the success he so justly deserves. An experience of 12 years with the house of Miller & Co. warranted him in establishing his present business. Although this house is less than one year old, it is one of the leading commission firms of the city.

We take pleasure in calling attention to the Art Gallery of Bro. F. C. Baxter, 136 Post street. He was awarded first preminm at Mechanics' Fair, 1880, and the prices charged for life-size portraits, in all styles of painting, are very reasonable, and his contracts are filled strictly to the letter.

It is thought the Northern Pacific railroad will endeavor to reach San Francisco, its objective point, by the coast route, through Del Norte, Humboldt and Mendocino counties.

PACIFIC STATES WATCHMAN.

A. O. U. W. Home Paper.

Issued on the 1st and 15th of each month.
At No. 202 Sansome Street, San Francisco, Cal.

Subscription (in Advance), $2 a Year.

Favorable to Advertisers.

By consolidating the large subscription liste of the *Pacific Workman* with the Pacific States Watchman our advertisers gain an unusually great advantage. We doubt if any one weekly newspaper has ever been circulated to as many different readers on this coast, as have been served heretofore by the *Workman* and Watchman together. Certainly, no other periodical is now patronized by a better class of industrial, professional and business men. In fact, our subscription list (like the A. O. U. W.,still increasing), embraces many of the foremost business and representative men throughout the towns and cities of the coast.

We have pride in making our paper "clean and handsome," and first class in all respects—to the benefit of both our readers and advertisers.

ADVERTISING RATES.

One Square (½ inch), per issue	$ .75
One Square per month	1,25
Two Squares, per issue	1.50
Two Squares per month	2.50
Obituary notices and resolutions (with 25 copies post-paid for friends of deceased) per sq. (½ inch)	50

☞For reading notices, extraordinary display, special advertising and choice places permanently, extra rates will be charged. Reasonable reduction will be made for large and long-continued advertisements. No extra rates for the space occupied by engravings.

OFFICIAL RECOMMENDATiON.

[*Resolutions adopted by Grand Lodge of Cal., Feb. 3, 1881*]

Whereas, the Pacific States Watchman, the pioneer A. O. U W. advocate on this coast, without official aid, has long rendered able and valuable services for the good of our glorious organization, we earnestly recommend that our Lodges and the brethren individually patronize the Watchman as liberally as circumstances will justify.

Entered at San Francisco P. O. as second-class matter.

San Francisco, - July 1, 1881.

Presentation.

On Wednesday evening, June 8th, Bro. J. B. Curtis, who is now, and has been the Receiver of Fidelity since the organization of the Lodge, was the recipient of a valuable Receiver's badge, presented by his brother Workmen. This souvenir is made of solid gold and silver—just enough silver to follow the regulation. The upper and lower crossbars are made of solid gold, with the enameled letters, C. H. P. on the upper side, and a large solitaire diamond set in the lower bar. From the upper bar are suspended the crossed keys, wrought of solid silver, resting on a red ribbon, on which is printed, "Fidelity, 136, A. O. U. W." The badge is made of solid gold, with silver front, excepting the shield, which is gold, with enameled letters, A. O. U. W. On the back of the badge these words are engraved: "Presented to J. B. Curtis, Receiver Fidelity Lodge, 136, A. O. U. W." There is a little bit of history connected with this presentation that is too good to be lost. Bro. Curtis was kept in profound ignorance of the fact, and some one took the liberty to mar and disfigure his Lodge badge, which was the subject of conversation and comment on the part of his brethren, and mortification on the part of Bro. Curtis. After the usual routine of business, Bro. Smith, D. D. G. M. W., called the attention of the Lodge to the fact that Bro. Curtis, the Receiver, was not properly clothed, and that such dereliction must be remedied, even if necessity called him to bring the matter before the Grand Lodge. Bro. Curtis arose to reply but was rapped down by Bro. Young, M. W., who started off in the same vein of remarks as commenced by Bro. Smith, D. D., but thinking from the aggrieved and malignant look of Bro. Curtis that this part of the programme had been carried out, in a kindly and commendable manner recited the services and sacrifices that Bro. Curtis had made, steadily refusing remuneration of any kind. They had taken this way of testifying their appreciation of his services by presenting him the finest Receiver's badge that probably had ever been worn. Bro. Curtis was by this time completely nonplussed and the surprise and satisfaction resting on his countenance were better than words. The whole thing was wound up by a grand banquet, our modest Receiver being the guest of the evening. This souvenir was made by Bro. A. C. Titcomb, of Fidelity, manufacturers and importers of jewelry and diamonds, 24 Post street.

The Degree of Honor.

We regret that the Supreme Lodge did not take more positive action in relation to the Degree of Honor. A committee was created, of which Representative Pratt of this jurisdiction was made chairman. This committee made an elaborate report, embracing general laws, beneficiary article and constitution for the government of such Lodges. The scheme submitted seems altogether unobjectionable, and so perfect in all its parts as to challenge our admiration. Why the subject should have been laid over for one year, does not appear exactly clear to us, but such was the action of the Supreme Lodge, and so the little outcast of the Order must feed on the husks for another twelve months at least.

We believe that a very considerable number of our members desire not only additional protection for their wives and children over and above that now furnished by the A. O. U. W., but would be glad to place within the reach of their wives, daughters, sisters and mothers the privilege of joining to some extent in the same good work, without being obliged to go outside of the Order for that purpose; and inasmuch as under the plan submitted this might be done with no hurt or responsibility to members who should not join in this branch of the Order's work, we marvel that any opposition should have manifested itself; but some things are inexplicable. We advise that our D. of H. Lodges keep up their organization and add to their numbers. Let them unite in a petition to our Grand Lodge to take such action as may seem to be necessary looking to the adoption of the laws proposed for their government; and backed by so great a body as the Grand Lodge of California, our representatives at the next session of the Supreme Lodge may be able to accomplish what they were not at the late session.

It may be interesting to know that a neat little badge was adopted for the degree in lieu of the sash now worn; and that the Representatives were instructed to bring the matter of the Degree of Honor before their respective Grand Lodges in their reports to those bodies. Could a majority of them be induced to recommend the scheme, no doubt at the next session of the Supreme Lodge it would be enacted into a law.

Graded Assessments.

As we predicted, the subject of graded assessments was again brought to the surface in the Supreme Lodge at its recent session, and a committee constituted favorable to the plan, as it was proper to do. This committee made their report, but knowing in advance that it could not be accepted by the Supreme Lodge, they prudently asked that it be laid over a year for consideration. We propose to give an exhaustive review of this report in some future issue of the Watchman, and to expose the utter fallacy of the premises on which the report is based. The great trouble with the mass of mankind in dealing with such questions lies in the fact that they do not think for themselves, but are content to receive the theories of other people based often on plausible sophistry, even when established facts stand out boldly in direct opposition.

As showing the status of our membership and the probable future of our Order, Bro. Samuel T. Babbitt, a member of Harmony, No. 9, a man in the vigor of life, had the pleasure of greeting his son in his own Lodge on the night he was made an M. W. His son, Bro. John H. Babbitt, a member of the jurisdiction of Oregon, is a merchant in Salem, and on his recent visit to this city, was agreeably surprised to find his father an M. W. In this connection, we know of several cases where the father is an M. W., the son is looking forward to the time when his majority will allow an admittance to our mystic circle.

Recorders are requested to send the names of newly-elected officers for publication. We think it would be proper, also, to report how each subordinate has progressed during the term. The reports from local Lodges are of good service to the Order, and we would like to hear oftener from our country brethren.

The Watchman is indebted to Reps. Wm. H. Jordan and Clay W. Taylor for reports of proceedings of Supreme Lodge.

Red Bluff Lodge, No. 69, A. O. U. W., was organized Dec. 9, 1878, with 45 charter members.

Meeting of the Supreme Lodge.

A Synopsis of the Proceedings.

The ninth annual session of the Supreme Lodge, A. O. U. W. convened at Detroit, Mich., Tuesday, June 7th. The following officers were present: John Frizzell, P. S. M. W.; Roderick Rose, S. M. W.; M. W. Fish, S. F.; Thos. B. Case, S. O.; M. W. Sackett, S. Rdr.; S. S. Davis, S. Rec.; Hugh Doherty, S. G.; R. H. Flanders, S. W.; Monroe Sheire, Levy Andrus, Alex. McLean, S. T.

The following list of representatives from the Grand Lodges of the States named, prepared by the Committee on Credentials, was distributed when the session opened.

Pennsylvania—Samuel B. Myers, J. H. Lenhart, J. M. Stevenson.
Ohio—J. S. Brunaugh, M. J. Swadener, S. B. Berry.
Kentucky—C. Shryock, A. M. Sea, G. R. Keller.
Indiana—G. F. Cookerly, Will A. Y. Bishop, L. Finkbiner.
Iowa—P. S. Towle, H. B. Fouke, J. W. Willett.
New York—E. Ellmore, E. M. Clark, E. B. Travis.
Illinois—Alex. McLean, E. M Sanford, W. G. Morris.
Missouri—Wm. C. Richardson, John D. Vincil, J. A. Brooks.
Minnesota—Monroe Sheire, T. H. Pressnell, A. H. Taisey.
Wisconsin—H. C. Heath, C. M. Masters, J. F. McMullen.
Tennessee—C. O. Thomas, S. S. Garrett, Tully R. Cornick, Jr.
Michigan—Wm. H. Baxter, John B. Price, Henry C. Sessions.
California—H. G. Pratt, Wm. H. Jordan, Clay W. Taylor.
Georgia—James Fricker, Frank J. Moses, S. J. Pecot.
Kansas—E. S. Bertram, E. M. Forde, W. A. Cooper.
Ontario—M. D. Dawson, R. M. M. Patton, George W. Badgerow.
Oregon and Washington—D. L. Green. F. C. Van Epps, I. W. Case.
Massachusetts—H. A. Sborey, Thomas F. Temple, Julius M. Swain.
Maryland—Samuel Eccles, Jr., George W. Mowen, Jas. S. Keller.
Texas—C. C. Burke, B. Radkey, J. A. Crowell.

Owing to the fact that the Grand Lodge of Nevada was organized but a short time before the meeting of the Supreme Lodge, the representative from that State, Bro. R. W. Wood, did not receive his credentials before he left to attend the session. The committee, therefore, referred his case to the Supreme Lodge, recommending his admission, which was adopted.

Statistical.

The report of Supreme Recorder Sackett for the year ending March 1, 1881, shows that during that period 676 deaths occurred in the Order; that $1,309,350.72 was received for beneficiary assessments, and that the total amount paid on death losses was $1,305,887.50. There is now on hand in the beneficiary fund $21,930.65. The total number of Lodges is 2,033, and the total membership (June 1) was 98,000.

The report further shows that during the year 349 new Lodges were organized. Supreme Lodge per capita tax, $9,717.90. Average death rate per 1,000 members during the year 7.85. General average of assessments for the entire Order for the year 1880-81, 16.4-13.

The average age of brothers who died during the year was 41 years, 6 months and 7 days; their average duration of membership about 2 years and 9 months; and the average time intervening between receipt of death notice and payment of loss, 1 month, 16⅔ days.

A supplemental report was also presented by the Supreme Recorder on account of the date of the annual meeting having been changed last year from March until June. The condition of the various funds on June 1, 1881, may be summarized as follows: Beneficiary fund receipts, including balance, $63,995.46; disbursements, $62,030.30; general fund receipts, $9,400.70; disbursements, $2,194.57.

The highest average death rate per 1,000 members is in Ohio, 15 86; lowest is in Ontario, 3.09, and the next lowest in Michigan, 5.25. The average in California is 8.10.

In conclusion the Supreme Recorder says: "No Order in existence to-day can compare with us in prompt settlement of death losses, or the completeness of our business system."

Supreme Master Workman's Report.

The report of Roderick Rose, S. M. W., was submitted. He states that the troublesome yellow fever claims have been largely reduced since March 1st, and are now in such shape that they can be settled without litigation. Much credit is awarded to the Finance Committee and Supreme Recorder for careful financial management during the year. The appointment of a Supreme medical examiner, who shall be a skilled and reputable practicing physician, a member of the Order and a graduate of some reputable school of medicine, is strongly recommended. That the Degree of Honor be perfected and made to mean something, or else discard altogether, is also recommended. The application for an organization of Lodges in the Hawaiian Islands is submitted for consideration. The new Grand Lodge of Nevada was organized May 19th, and bids fair to become an important factor in the brotherhood. Quite a number of decisions were rendered by the Supreme Master Workman during the year. One of the most interesting was concerning the eligibility of membership of deaf mutes. He decided that if they are competent to earn a livelihood for themselves and families, and possess all the other necessary qualifications, they are eligible; the fact that they are deaf mutes will not of itself disqualify them.

Social Features.

On the evening of the first day of the session a reception, banquet and ball was given in honor of the Supreme Lodge. Tables were spread for 600 persons. After the covers had been removed several addresses were made. Mayor Thompson, of Detroit, spoke and enlarged upon the beauties of the city, its thrift and progress, its natural advantages, and its excellent financial condition. He bade the visitors a hearty welcome

Bro. H. C. Sessions, P. S. M. W., and Chairman ex-officio of the Reception Committee, and Bro. John Frizzell, P. S. M. W., of Nashville, Tenn., also made brief addresses, which were followed by these regular toasts and responses:

"Our Guests and the Members of the Supreme Lodge." Response by Roderick Rose, S. M. W.

"Our Fraternity, East, West, North and South." Responses by H. A. Shorey, of Massachusetts; Clay W. Taylor, P. G. M. W. of California; Leroy Andrus, of New York; and J. A. Brooks, of Missouri.

"The Jurisdiction of Ontario." Response by G. W. Badgerow, M. P. P.

"The Mother of the Order—Pennsylvania." Response by the Hon. S. B. Myers.

"The Youngest of the Family—Nevada." Response by R. W. Wood.

"The Press of the Order." Response by W. M. Bennett.

"The Ladies." Response by T. R. Cornich, of Tenn.

Dancing then followed, and continued until a late hour in the morning. The local papers report the entertainmont, in every respect, as a success. An excursion on the river was also given to the visitors and their ladies.

Business of the Session.

The first day of the session was occupied with the preliminary business of the organization of the Supreme Lodge, introduction of resolutions, amendments to the Supreme Lodge Constitution, and other miscellaneous matters. In our report of the proceedings, we shall give briefly all matters which were acted on favorably, and which are likely to interest our readers.

A resolution was introduced by Rep. Clay W. Taylor, that all reference to the square and compasses in the work of our Order, either as working tools or otherwise, be eliminated from our Ritual and Laws, and that the further use of these implements by the A. O. U. W., as working tools or upon official badges be discontinued, and that in their stead, the to us, more appropriate emblems—the anchor and shield—adopted. The committee on Ritual reported in favor of the resolution, and it was adopted.

A resolution was adopted that when the Supreme Lodge, at any regular session, shall alter or amend its constitution, laws of general application, or laws applicable to Grand Lodges, and when such alteration or amendment is in conflict with the provisions of the constitution of any separate beneficiary jurisdiction, then in such case the Supreme Lodge enactment must govern; and that it is the duty of the Grand Master Workman of each separate beneficiary jurisdiction to declare such amendment or amendments in force in his jurisdiction by his official circular, as soon as practicable after any session of this Supreme Lodge at which any such amendment or amendments may have passed.

The following officers were elected: Roderick Rose, P. S. M. W., Iowa; Wm. H. Baxter, S. M. W., Detroit; M. W. Fish, S. F., Oakland, Cal.; T. A. Case, S. O., New York; M. W. Sackett, S. Rdr., Pennsylvania; S. S. Davis, S. Rvr., Ohio; R. H. Flanders, S. G., Georgia; R. M. M. Patten, S. W., Ontario; J. D. Vincil, S. T., Missouri.

The following resolution, introduced by Rep. Wm. H. Jordan, after being slightly amended, was adopted.

Whereas, Certain persons having banded themselves together in an organization known as the "Select Knights of the A. O. U. W.," profess to confer one or more higher degrees than those designated in the Ritual of our Order; and

Whereas, Said organization exists without authority from this Supreme Lodge, and presumes to make use of the name of our Order for the advancement of its own interests and membership; therefore, be it

Resolved, That this Supreme Lodge of the Ancient Order of United Workmen, while appreciating all efforts made by kindred organizations throughout the world for the replenishing of the "widow's cruse," and the advancement of a true spirit of fraternity; yet distinctly disclaims any connection with, or responsibility for, the so-called "Select Knights of the A. O. U. W.," or any other beneficiary organization.

A resolution introduced by Rep. R. W. Wood, of Nevada, that the Territories of Utah, Idaho and Montana be added to the jurisdiction of Nevada, and to be known as the Grand Lodge of Nevada, was adopted.

Supreme Medical Examiner.

The following amendment to the Supreme Lodge Constitution, to be known as Art. X., was adopted:

Section 1. At each regular session of this Supreme Lodge there shall be appointed by the Supreme Master Workman, by and with the concurrence of the Past Supreme Master Workman, Supreme Foreman and Supreme Overseer, a "Supreme Medical Examiner," who shall be a competent practicing physician, a member of this Order, and a graduate of some reputable school of medicine. Said Supreme Medical Examiner may, for cause, be at any time removed, and a successor appointed.

Sec. 2. It shall be the duty of said Supreme Medical Examiner to promptly examine and pass upon every certificate of medical examination for membership in this Order when submitted to him. He shall endorse his approval or disapproval upon the certificate, and return the same to the Lodge forwarding it without delay. For each certificate of examination so passed upon by said Supreme Medical Examiner he shall receive the sum of 50 cents.

Sec. 3 Each Grand Lodge shall be required to appoint, in such manner as it may provide, a Grand Medical Examiner or Medical Board, by whom all Medical Examiners' certificates must be approved before the degrees can be conferred upon the applicant: *Provided, however*, That the compensation of, and by whom to be paid to, said Grand Examiner, shall be fixed by the several Grand Lodges.

Sec. 4. All medical examinations of applicants for membership in our Order shall be made by a respectable practicing physician, graduate of some reputable school of medidine, and no other—which qualifications shall be made to appear by a certified copy of their certificate of graduation,

or by license to practice. Subordinate Lodges may choose one or more physicians to examine applicants; but such examiners shall, in all respects, be governed by the requirements of this Article, and all examiners shall, as far as practicable, be members of this Order.

SEC. 5. All certificates of medical examination for membership in this jurisdiction shall, as soon as approved and signed by the proper Lodge Committee, or instituting officer, be forwarded with the prescribed fee of 50 cents from the fees advanced by the applicant to the Supreme Medical Examiner, who shall, if the credential certificates of examining physicians prescribed in Sec. 3 of this Article be on file in his office on the day of their receipt, pass upon and return the same to the Lodge forwarding. The Supreme Recorder shall furnish a blank form of credential certificate, and keep a record of all credential certificates filed in his office.

The following amendment to the S. L. Constitution, offered by Rep. Wood, of Nevada, was adopted:

Resolved, That Sec. 3 of Art. 10 of Supreme Lodge Constitution be amended by adding the following additional proviso: *Provided further*, That upon the institution of New Lodges degrees may be conferred and the Lodge instituted, but no Beneficiary Certificate shall be issued, nor shall any liability be incurred until such medical examinations and applications shall have been submitted to, and been approved by said Supreme or Grand Medical Examiner, or Board of Medical Directors.

Resolutions were introduced requesting the Supreme Lodge to hold its next session in Topeka, Kan.; San Francisco, Cal.; Cincinnati, Ohio; Niagara Falls; Chicago, Ill.; Indianapolis, Ind., and Buffalo, N. Y. The Finance Committee reported in favor of Cincinnati, which was chosen as the next place of meeting.

A resolution was adopted that all Grand and Subordinate Lodges of the Order be, and the same are hereby required to immediately remove from the badges of their presiding officer the jewel known as the square and compasses, and to substitute therefor the cross gavel.

The Committee on Degree of Honor, to whom had been committed all matters concerning said Degree, reported a constitution and beneficiary article, which was ordered printed in the Journal. At the time set for its consideration, Rep. Pratt moved the adoption of the report, which was carried.

Later in the session, Rep. Pratt presented a resolution, which was adopted, that it is the sense of the Supreme Lodge that the representatives from the several jurisdictions present the matter of perfecting the work of the Degree of Honor, and of adopting the report of the Committee on said Degree, made and submitted at the present session of the Supreme Lodge, to their respective Grand Lodges, and endeavor to obtain an expression of their judgment thereon, previous to the next session of the Supreme Lodge.

Graded Assessments.

Resolutions for the purpose of establishing a system of graded assessments were offered, all of which were referred to the Committee on Graded Assessments. This committee presented a report, which was ordered printed, in which were two tables showing the 29 ages at which the applicants are admissible, also giving the age and rate of each assessment. The committee further report:

By vote of the Supreme Lodge we were instructed how to report, but from the character of some of the papers referred to us, it is evident that we are expected to make some recommendations.

We therefore represent that your committee are unanimous in the opinion that as an abstract question the equity of a graded assessment properly arranged cannot be successfully opposed, yet with these definite views as to the equity of the system, our committee are not prepared to urge its adoption, or to recommend any change at this session in the present uniform assessment.

We believe that the subject is one of importance to the Order, and that it will attract increased attention until a change is shown to be unwise or a better system is recommended.

That the matter may receive a more careful and intelligent examination than it is possible for one committee to give it at this session, we recommend the adoption of the following resolution, which, with a slight change is the one presented as Document No. 71.

Resolved, That a committee of five members of the Supreme Lodge be appointed to collect and collate all statistical information that can be obtained from the various Grand Lodges, Supreme Lodge jurisdictions, and from other sources, and to classify and tabulate all information relative to the vital statistics of our Order, and that they collect and prepare such statistics during vacation, and make report at the next session of the Supreme Lodge.

And in order to aid the committee in obtaining such information, all Grand Lodge officers are requested to furnish such information as they can possibly obtain in their several jurisdictions, and to aid said committee to the utmost extent that the purpose contemplated by this resolution be subserved.

The question of the adoption of the report of the committee having come up at the close of the session on the sixth day, it was moved that the report of the committee be adopted, which was carried.

Miscellaneous.

Rep. Pratt, of California, presented a resolution which designates the regalia of the D. of H. to be a circular medal of the diameter of one and one-fourth inches, bearing upon its face the figure of a heart inscribed with the words, "Talitha Cumi," and surrounded by the letters "A. O. U. W.," and suspended from a cross-bar one and one-fourth inches in length, which is connected by a ribbon one inch in width and two inches in length to a pin-bar one and one-half inches in length. The color of the metal parts to be yellow, and the ribbon pink. Jewels for officers same as for subordinate Lodge officers. The badges not to prejudice such regalia as may be in use by the D. of H. Lodges.

Rep. Clay W. Taylor was appointed by the S. M. W. on the Committee on Laws and Supervision.

The per capita tax for the current year was fixed at 10 cents.

In accordance with a resolution introduced in the Supreme Lodge by the representatives from California, having for its object the amendment of the Relief Law, instead of as formerly raising a Relief fund by assessments, to be kept in the Lodges until called for, the practice hereafter will be for the Supreme Lodge, when extra relief for any jurisdiction is needed, to call for the necessary amount, no more nor less, and the jurisdictions will raise it in any manner they may prefer, send it forward, and that will close the transaction.

The business of the Supreme Lodge being concluded on Tuesday, June 14th, it adjourned, to meet in Cincinnati, Ohio, on the first Tuesday of June, 1882.

A NEWSPAPER has been compared to a window, through which men look out upon the world. Different newspapers have different spheres, all seeking to give their readers an idea of what is occurring in their respective vocations. A fraternal newspaper, like the WATCHMAN, endeavors to keep its readers posted as to the events happening within the Order. Therefore, no member of the Order who desires to keep posted, who wishes to see the Order spread throughout the land, and thus render his interest in the Order safe and sure, can afford to be without it. It encourages the weak, gives strength to those who are likely to weary in well-doing, and strives to present the principles of the Order in their true light. Its miscellaneous reading for both old and young is selected with great care. As the jurisdiction of California has the reputation of being one of the most successful in the Union, it is the desire to make the WATCHMAN a worthy exponent of the A. O. U. W. Recognizing the fact that the members of other fraternal organizations are members of our own, we give in our Fraternal Department news from authentic sources that may possibly interest them.

IF the Supreme Lodge in adopting the amendment to the S. L. Constitution providing for a Supreme or Grand Medical Examiner wanted to forbid the organization of any more new Lodges in remote jurisdictions, they could not have done it more effectually than by the action they took on that matter. However, it would seem they recognized that they put their "foot in it," to use a homely phrase, for by unanimous consent Rep. R. W. Wood, of Nevada, was allowed to introduce an amendment to Section 3, by which new Lodges may be instituted and the degrees conferred, but no beneficiary certificate shall be issued, nor shall any liability be incurred until the examinations and applications shall have been passed upon by the Supreme or Grand Medical Examiners.

AS AN evidence of the prosperity of the Order in Missouri, and the favor with which the *Overseer* is received, we notice that that paper is going to be enlarged. We are glad to hear of the fact, for it is a typographically clean and well conducted paper. By the way, we see that the editor confesses the error of his ways upon the subject of graded assessments, and assumes the same position as the WATCHMAN. Let the Grand Recorder of that jurisdiction collate facts and figures the same as Grand Recorder Pratt has done, and perhaps more light can be thrown upon this important subject.

FROM a reading of Sec. 3, Art. X., the new amendment to the S. L. Constitution, it will be seen it is not necessary to appoint a Grand Medical Examiner in this State until the next Grand Lodge session. This, we suppose, will be the course pursued in this jurisdiction.

IT will be seen from our report of the Supreme Lodge session that the square and compasses have been abolished, and the crossed gavels substituted. It will be necessary to have the former emblems removed immediately.

AMONG the deaths to be paid for in June in the Supreme Lodge jurisdiction we notice that of Bro. James W. Robb, of Seaside Lodge, No. 12, Astoria, Oregon, who died on the 25th day of April, 1881, from the effects of a pistol shot by an assassin.

GRAND MASTER BARNES still continues his fraternal visits. He is winning golden opinions for his work, and at the close of his term the unanimous verdict will be "well done, good and faithful servant."

Grand Recorder's Department.

Headquarters of Grand Lodge, A. O. U. W., Rooms 40 and 41, St. Ann's Building, corner of Eddy and Powell, San Francisco. H. G. PRATT, G. R.

WM. C. FLINT, ESQ., 216 Sansome street, San Francisco; is Chairman of Committee on Laws and Supervision. All By-Laws, or amendments to same, should be sent directly to him.

OUR office will be closed on the Fourth in order to pay proper respect to the American "Bird-o'-Freedom," etc., etc. Workmen are naturally patriotic.

A FEW of our Lodges have not yet responded to the Relief Call. Under the law the standing of their members is in peril. Brethren, be prompt in whatever is required.

THE Michigan brethren treated the Supreme Lodge right royally. The recipients of the favors of the generous Wolverines will long cherish a kindly remembrance of the stalwart Workmen thereaway.

SOME Recorders are derelict in making monthly reports. During the present term it is hoped that the law will be more strictly complied with. Without such reports it is impossible to keep the records of this office correctly.

WHEN a member desires to sever his connection with the Order honorably, he should always take a final card from his Lodge and preserve not only that but also his beneficiary certificate for future use, should he desire to reunite with the Order, as such people frequently do.

OUR certificates number up to 14,050, and we have about 12,200 Master Workmen in good standing. Of course a considerable portion of this apparent loss is of those who stand temporarily suspended, and perhaps 100 have not yet received the Master's degree. The balance have died or gone from us never to return.

BY an amendment to the Relief Law, made at the late session of the Supreme Lodge, the clause requiring a fund of $1 for each M. W. in good standing to be kept in the subordinate Lodge treasuries was abrogated, so that in the future, when a call is made, the funds may be raised by a draft on the general fund or by assessments on the members as each Lodge for itself shall determine. This simplifies the law and prevents the trouble of looking after a special fund which in the nature of things, would not be called on oftener than about once in a year.

THE *Fraternal Record* relates the following touching incident of a brother member of Union Lodge, No. 21, Sacramento: "It appeared from the report of the Visiting Committee that one of their number was lying dangerously sick in the County Hospital. He is about to die, and realizing the fact he had made confidants of the committee, and desired to place the entire charge of his little estate and his three orphan children—(their mother died two years ago)—in the hands of his Lodge. His affairs appeared to be somewhat mixed, his children were scattered—one in an orphan asylum, the others in families—and the poor dying man did not feel satisfied with the present or future prospects of his business affairs or his childrens. There were no dissenting opinions, and when the Lodge passed a resolution instructing the Master Workman, Foreman and Overseer to take proper steps to have the wishes of the brother fully carried out, and the trustees of the Lodge appointed guardians of the children and administrators for the estate, it was a pleasing sight to behold the expressions upon the countenances of the brethren, indicating their full appreciation of the action." Thus does the Order fulfill its promise. Its deeds of charity are no empty mouthings; but when called upon to protect the orphan, it responds with that alacrity which comes from the knowledge of duty to be performed. Witness the confidence of the dying brother. See how he turns to his brothers in the Order to protect and guide his little ones. And how nobly did they respond! They remembered their pledge before the altar, and threw around the orphaned children the protective shield of the Order. May prosperity attend the brethren of No. 21.

TWELVE deaths in the Supreme Lodge jurisdiction to be paid for in June. Ohio furnishes three; Mississippi, two; Kentucky, one; Maryland, three; Oregon, one; Louisiana, one; Alabama, one.

The Smoking Question Again.

EDITORS WATCHMAN:—I read two articles in the WATCHMAN on smoking in the Lodge-room. I wish to speak in behalf of the wives of members of the A. O. U. W. Some have husbands who do not smoke, and to whom the fumes of tobacco are very offensive; yet they feel it their duty to attend the meetings of the A. O. U. W. Perhaps smokers do not realize how tenaciously the fumes of tobacco cling, or know that the clothing, hair and whiskers of each man will be highly perfumed with smoke, as the result of two or three having smoked in the room where they were.

More than one wife has turned away in disgust on receiving the good night kiss from her husband, who never uses tobacco, but, for the sake of that wife, had attended a Lodge meeting and endured the sickening smoke of the Lodge-room. Two years ago I mentioned to a friend of mine that my husband never wanted to enter the Lodge-room a minute before Lodge commenced, because so many came in smoking. She said her husband had never smoked, but when he returned from the I. O. O. F. Lodge he immediately washed his whiskers thoroughly and changed his clothing, yet could not get entirely rid of the smell of the tobacco smoke.

It is strange that brothers will inflict punishment on other brothers, for their own gratification. More strange that they will smoke in the ante-room when attending meetings of an Order, or degree, where ladies are admitted; yet I know from experience this is frequently done. MRS. O.

"Only Cowards Strike in the Dark."

When we hear whispered the wrong acts of an absent brother, why do we not, in the interests of our noble cause, in solicitous care for the erring brother's family, go to him and gently place before him what we hear?

As all are human, all created liable to temptation and sin, let us, while we stand beware, lest we fall, mindful of what we would need under like circumstances, speak to him, not in censure, but in hope that it is not so—sympathy, if it is—and, above all, confidence, that he may, and will, with divine aid, rise above the evil and live.

Our "protection" is not alone for the "after death" of the body. What wife, mother, sister or daughter would not feel deepest gratitude to the brothers of a dear protector who raised him out of the lower paths of sin to the hights of manly "purity?" There is a "death" of the spirit in which sin destroys gradually every good and noble trait, leaving to dear ones a corpse in life far more terrible to endure than any mere physical death, and needing a "beneficiary fund" which shall help to spiritual and moral prosperity. Many good brothers are forgetful of this, and secretly promulgate the story of wrong; sometimes even adding to it some little spite of their own, causing coldness to meet that brother on every hand, and thus driving him down, father and farther from friends, family, home and God.

Let us be "merciful if we would obtain mercy." "CHARITY."

READ AND PONDER.—In Yerba Buena Lodge on June 25th, C. H. M. Curry, M. W., conferred the last degree on his son, C. F. Curry, aged 23. In other older organizations it has been a common occurrence for father to confer the degrees on his son. We believe, however, this is the first instance in the history of the Order in this jurisdiction. Although our worthy Bro. Curry is a very efficient officer and is known to be quite proficient in the work, he was so overcome that he faltered and made a lamentable failure, as far as giving the work correct was concerned. His emotional expression was more eloquent than any part of the Workmen's ritual.

THE invitation tickets have been issued by Myrtle No. 42, for their third annual re-union, which will be a musical and literary entertainment and ball, to be held at B. B. building on July 29th. We may expect a grand time, in keeping with the past history of this worthy subordinate.

GLASS-COATED TIN PLATES FOR CANNING.—The liability of evil effects from the chemical action of acids and salts, in the substances packed in tin cans, has for a long time been a serious drawback to the canning and packing industry in this country as well as in England, and much study has been devoted to the subject of an improved material. A firm at Dunstable, England, it is said, has invented a method of coating tin-plates with a material which interposes a film resembling glass between the surface of the metal and the fruit or other contents. The insoluble portion of the composition is silicate of lime or fluo-silicate of lime (glass powder), previously acted on by fluoric acid; the soluble portion being silicate of soda and potash. Preferably, that kind of silicate of lime is used which has been produced by double decomposition from polysulphide of calcium, chloride of calcium and hydrate of lime; or, there may be used a silicate of the earthy bases or metals, or precpitated gelatinous silica. The alkali may be fixed or removed by a bath containing a dilute solution of fluo-silicic acid, when fluoric acid has not been used, or a dilute solution of any other suitable acid. To make the composition, mix the soluble with the insoluble silicate in equal proportions, although these may be varied according to the consistency required. The plates are coated with the composition with a brush, or by dipping into a bath. After coating, the plates are dried by heat and are ready for manufacture. This invention furnishes a plate with a surface somewhat resembling glass without the aid of infusion; and this coating, which is perfectly insoluble and unaffected by acids or salts, cannot be separated from the metal, which may be bent or worked in any manner desired, and can thus be made to possess the virtues of both glass and tin.

THE SECOND BRIDGE BETWEEN NEW YORK AND BROOKLYN.—The bridge from New York to Brooklyn, crossing Blackwell's island, is under contract, and the contractors are now busy on the iron work of the pier foundations. The estimated cost of the bridge is $5,000,000; the time fixed for its completion is three years. There will be four piers, one at Ravenswood, another at the coal dock on Blackwell's island, a third on the west side of the island, and the fourth on the New York side, between 76th and 77th Sts. The bridge will be 74 ft. wide, and will be arranged for two sidewalks, two carriage ways and two steam railroad tracks. The span over the water from Ravenswood to Blackwell's island will be 618 ft., that across the island 700 ft., and that over the river to New York 734 ft. Each pier will rest on bedrock, the dip of whose strata at all points is nearly vertical. The Ravenswood pier, only, will stand in the water. One corner, only, of the New York pier will touch the water. The roadway will be 154 ft. above the river at high tide.

ENORMOUS PHOTOGRAPHS.—The claim is made for Australia of having produced the largest photographic pictures in the world. These magnificent specimens of the art—not only in point of size, but in respect also of quality—were taken by Herr Holtermann, of Sydney; they are mounted on an endless band of paper, strengthened by linen, and are nearly 100 ft. in length. Among the subjects are two colossal panoramas of the cities of Sydney and Melbourne, each of about a dozen sheets joined together in one harmonious tone and depth. One picture, printed from a single negative, was five by three feet.

FLOODING THE SAHARA.—Dr. Lenz, recently returned from an expedition across the desert to Timbuctoo, condemns as impracticable the project of flooding the Sahara. In his lecture, which was delivered before the Paris Geological Society, he says that fresh-water fossils are met with in many parts; therefore the desert is not the bottom of a salt sea. The temperature is not as high as might be expected; wild beasts are uncommon. The most formidable enemies are the Touraeg tribes, who have, it is reported, lately massacred the French Trans-Saharan expedition. Per contra to the above, Commandant Roudaire has finished the investigations, which were indicated by the commission of the French Academy, in relation to the filling of the Tunisian and Algerian chotts by the sea. His conclusions are entirely favorable to the project, and would lead to the establishment of an interior sea 400 kilometers (248.55 miles) long and 1,600 kilometers (994.2 miles) in circumference.

A PRIZE OFFER.—The French Society for the Encouragement of National Industry, offers a prize of 2,000 francs, to be given in 1882, for an engine of 25 to 100 horse-power, to burn not more than 700 grammes, 1.54 pounds of good coal per hour per horse-power, and a prize of 1,000 francs for a motor, suitable for small workshops, of the power of from six to 20 kilogramme-meters per second. Similar prizes for a small motor were offered last year, the first being taken by a hydraulic engine, and the second by a gas motor, and it has been decided to offer the same again, in order to secure varied designs. Other premiums are offered for machines for various manufacturing processes; and in 1885, 3,000 francs will be given for the best method of conveying power to a distance.

THE PANAMA CANAL.—Mr. John M. Wilson, United States Consul at Panama, who is now in Washington, says it does not look as though M. de Lesseps ever intends to build a canal there. Nothing has been done thus far. The little party of Frenchmen who are surveying and about 100 negroes constitute the whole native force.

ELECTRIC RAILWAYS appear to be a practical success. The electric railway on which Siemens and Halske, the Berlin electricians, have been for some time experimenting in that city, was publicly opened May 13th, in the presence of the railroad officials and a large number of scientific men. The road runs between the suburbs of Lichtenfeld and Cadettenhause, a distance of six miles. A tram car was fitted up with an electric battery concealed between the wheels, the rails of the track being used as the conducting medium in connection with the principal battery at the station. The trial is reported to have been an entire success, a speed of 18 miles, the highest speed allowed by the authorities, having been obtained. The road is now in regular operation. Meantime, what has become of Edison's electric railway devices which he was long ago to set in operation? While the American inventor has been promising very largely, his European competitors seem to have been fulfilling.

AN EXPERIMENT made in the port of Kiel proves that heavy weights may be readily lifted from the bottom of the sea by means of a balloon. The balloon is made of canvas and metal plates, with an attached cistern containing carbonic acid gas compressed to a liquid state. When made fast to a sunken object, the communication between the cistern and balloon is opened; inflation takes place; the sunken vessel, or whatever else it may be, is lifted, and can be towed away at pleasure. In the experiment at Kiel, an anchor-stone weighing 15 tons, was thus lifted from a depth of 32 ft. The lifting power of a balloon 10 ft. in diameter is said to be more than 100 tons.

"You must admit, Jim Webster, that you stole those pullets," said the Galveston judge to the culprit. "Jedge," responded Jim, "I don't really believe I stole dem chickens. In de fust place, Jedge, nobody saw me take 'em. In de next place they could not be found on my premises, because I had done hid dem chickens under de floor. I can't help believin', Jedge, dat I is innocent as a lamb."

Lodge Locals.

Recorders are invited to correspond. Members may also find suitable reading here for "good of the Order" in the Lodge.

Notes from Upper Country Lodges.

From Blue Canyon, Placer county, Cal. The stranger on arriving at the station on the C. P. bearing the above misnomer could hardly be convinced that a very flourishing Lodge of A. O. U. W. existed there, and, although there is not one store in the place, there is a lively railroad and hotel business done there; and if the visitor to this beautiful mountain retreat should remain there until nightfall, he would then have an opportunity of seeing the fine material from which this Lodge is made up. The brothers nearly all take the WATCHMAN, and agree here, as everywhere, that it is the best fraternal paper in California.

A visit to the A. O. U. W. Lodge at Dutch Flat convinced the writer that the material composing that Lodge is made up of the most substantial business men of the town and surrounding country. Propositions are coming in fast. An example of true devotion to the good work of Charity, Protection and mutual aid, worthy of being imitated by many of our city brethren, might be given in many brothers in the country walking from two to four miles to attend Lodge.

I found the Lodge at Nevada City at a standstill, and the trouble lies in this fact, that there are here, as elsewhere, too many who say that this matter of the A. O. U. W. is only a business matter with them. I usually say to such lukewarm brothers that no business can or will prosper without constant attention, and to leave your business in the hands of someone else all the time it is sure to bankrupt us all sooner or later. Now, if there was nothing more than a business compact to hold us together, I would say to all who think thus, shame, shame on your short-sighted principles. This is a serious subject that should be thoroughly answered, by one competent to do it justice, through the columns of your valuable paper.

While I am speaking of the PACIFIC STATES WATCHMAN I wish to give you a short word of encouragement, and have, with great pleasure, to report that one and all who take the paper and *read* it join in the refrain that it is the best managed family and fraternal paper on the Pacific coast. Yours fraternally, TRAVELER.

Bay City, No. 111, Eureka.

The second anniversary reunion of Bay City Lodge, No. 111, Ancient Order of United Workmen, was held at Pythian Hall, in this city, June 21st. About 100 members and ladies were present, and the occasion was a very pleasant one. Late in the evening all partook of a collation at Haensell's restaurant. No Order in existence on the coast can show a better or more healthy record than the United Workmen. Although only about five years old in California, the Order now numbers 13,000 members. With this membership the number of deaths thus far in the present year has been only 42, and the number since the organization of the Order in California only 168. As a result $336,000 has been paid to the heirs of deceased members—$2,000 at each death. The assessment notice for June shows 10 deaths, but owing to the admirable carried-over surplus plan in the workings of the Order an assessment of only $1 is called for. Bay City Lodge, of Eureka, with nearly 80 members, has been established for two years, but its membership has never yet been broken in upon by death's demand.—G.

New Lodges.

C. F. Hall, Deputy, instituted Porterville Lodge, No. 199, in Tulare county, with 27 members, and installed as officers: S. Fay, P. M. W.; F. E. Stoneman, M. W.; D. O. Hammond, F.; L. J. Redfield, O.; S. W. Gilliam, Rdr.; R. Baker, Fin.; B. M. Alford, Rec.; J. E. Lee, G.; J. R. Crocker, I. W.; J. Mitchel, O. W.; Dr. B. M. Alford, Med. Ex. After the Lodge closed a collation was served. A delegation of members from Visalia Lodge assisted the instituting officer.

San Francisco Lodge Locals.

Friendship Anniversary.

This young and growing subordinate will celebrate its first anniversary on Wednesday evening, July 27th. It is proposed to have a literary and musical entertainment in the Lodge room, after which a fine collation will be spread in the banquet-room. An energetic committee has been appointed, and we may expect a fine celebration worthy of this Lodge of Workmen.

Harmony, 9.

The last term of this "old pioneer" has been one of prosperity. The Lodge meetings have been better attended according to their numbers, perhaps, than any Lodge in the city. Its growth has not been spasmodic, but a steady increase, the degrees being given at almost every Lodge meeting. On June 18th, the M. W. degree was conferred upon six, whose average age was under 34 years, and who were good representatives of the active and industrial class of our city. Adding these to the roll swells their number to 200 M. Ws. The officers are patient, painstaking and zealous in seeing that every precaution is taken in selecting members that shall be worthy of enjoying the protection and care that is thrown around its members, with a fund in the savings bank of nearly $2,000, which is only used in paying sick benefits or relieving the wants of distressed brethren. In a number of our Lodges the secret and ritualistic work is performed better, but in the general working and attention to the membership, there is no Lodge that we know of that excels Harmony, No. 9. From expressions and promises made on this evening, we believe in the coming term there will be a marked growth in membership.

Hercules, 58.

The meeting of Hercules, on June 17th, was one of those pleasant gatherings that this Lodge has been in the habit of holding lately. After the usual routine of business, including the nomination of officers, the Lodge room was thrown open to the families and guests, and the following pleasant and interesting programme was given: Bro. Manzer gave a short address that was appropriate and well-timed; solo, "The Kerry Dance," Mrs. Harry Clark (Prof. Rhind, Organist of Hercules, accompanying on the piano). Mrs. Clark has a sweet, rich and cultivated voice, and her audience enjoyed a rare treat, which was appreciated and heartily encored. W. K. Doherty, M. W. of Burns, and Dr. McLane, of the same Lodge, were called on for a few remarks, who kindly consented, and were received with much favor and demonstrative approval. Prof. John Manning, of Santa Clara college, favored the audience with an artistic violin solo, followed by a solo by Bro. Pariseault. By request, Mrs. Clark favored the audience with a sweet sentimental song that closed the pleasant literary and musical exercises of the evening. Bro. Vining, M. W., who has made an efficient officer and who will end his term of office with the best wishes, respect and esteem of his own Lodge and Workmen who know of his arduous labors in our Order, took occasion to thank his audience and the ladies especially for their presence, and hoping to see them all on future occasions of a like kind, closing by all joining in singing our closing ode. After the adjournment there was a small impromptu dance started that was indulged in with spirit and evident satisfaction.

Myrtle, 42.

On June 18th the J. W. degree was given to one and M. W. to one. The work was done in that correct and masterly manner for which this Lodge has justly the reputation. Under head Good of the Order Bro. Bogart, the organist of Myrtle, sang a song entitled "The Sword of Bunker Hill," which was loudly applauded and responded to a recall in a pleasing song; reading, Bro. Sanborn; recitation, Bro. Barry, P. M. W., which was a very worthy effort. It is a settled fact that the anniversary will be held at B'nai B'rith hall and consist of a literary and musical entertainment and dance, which will take place some time in July, and we can assure our brethren, judging from the past, it will be a recherche affair. Prof. Eastman, elocutionist, being present gave a reading from Mark Twain that produced much merriment; comic recitation, Bro. Morris, which closed a very pleasant and well spent evening. This term of Myrtle will close with prosperity, and the best feeling prevailing among the members. Bro. McIver, the M. W., and each officer in the Lodge have faithfully and creditably filled their positions this term.

Olympic, 127.

The present term of this progressive Lodge has been one of prosperity. Under the efficient administration of its young Master Workman, F. W. Rossbach, the work has went steadily onward. There have been one or more initiations on nearly every evening, and the material introduced has been of the best. Slow and sure have always been the motto of Olympic. As a result, the utmost harmony prevails among the members. The Lodge has one of the most efficient Recorders in this jurisdiction. Always at his post; correct in the duties pertaining to his position; affable and courteous to all, Bro. R. H. Orton has the esteem and confidence of his Lodge. The Financier, W. H. Barkley is always correct and painstaking. "Cool as a cucumber" is a term that can be applied with truthful expression to him. Nothing ever disturbs his equanimity. His companion at the desk, Bro. Holland, Receiver, is regular in attendance at the meetings, and is always on the alert for the Lodge's material advancement. Bro. Fish, For., Keating, O., Blohme, I. W., and Freeman, O. W., have been punctual in attendance during the term, and have performed the work attached to their positions with fidelity. To Bro. Morgan, sitting P. M. W. and member of the Grand Lodge Finance Committee, is due the credit of being one of the best instituting officers in this jurisdiction. His charges are delivered with great *impressement*, and the candidate with any feeling at all must surely have a deeper and more earnest regard for the Order, after the ceremony is concluded. Bros. Dixon, P. M. W., McLaren and Cummins are active and earnest members, their presence always lending an additional interest to the meetings. Composed as Olympic is of such true and earnest brothers, we may expect the future to be one of great prosperity.

Unity, No. 27, Anniversary.

The quarterly meeting of Unity, No. 27, was celebrated in a very acceptable manner by musical and literary exercises, closing with a social dance. Covenant Hall, B'nai B'rith building, was completely filled by an appreciative audience, who had the pleasure of hearing the following programme: Piano solo, Prof. Motchman—a fine effort; introductory remarks, P. T. Hollings, M. W.—well timed and appropriate; solo, Sam. Booth, M. W., of Excelsior. An original musicale on the follies of life that was received with great applause, and for an encore sang a tribute to Unity; recitation, Mr. Benhagan, and for an encore recited "Roger and I." Solo, Mrs. Blake Alverson. A rich sentimental piece that was so well rendered that it was honored with a recall and the presentation of a large and beautiful bouquet. Address, Bro. T. P. Williams, who is known as the Orator of Unity, and on this evening acquited himself with great credit. Duet (comic), Mrs. Blake Alverson and Mr. Sam Booth. This was the funny part of the exercises, and was received with evident satisfaction, and were recalled. Solo ("The Golden Shore"), Miss Linda Hoag. Greeted with much favor, and at the close was presented with a large and magnificent basket of flowers. Song, Mr. Jas. Booth. A very acceptable piece that appropriately closed a rare literary and musical entertainment. The hall was cleared, and spirited dancing indulged in that filled a programme of 15 dances. The several committees were very attentive to their duties, and made this reunion one of the pleasant parties of this season. They are as follows: Committee of Arrangements—C. Nelson, J. Jacobs, A. Montgomery and P. T. Hollings. Floor Manager—E. L. Cotta. Floor Committee—R. F. Williams, B. F. Evans, J. M. Baird, P. T. Hollings, J. Schidt and I. D. Martin. Reception Committee—J. L. Lancing, J. H. Woods, S. Rosenfeldt, T. Blachree, A. McCambridge, G. Winehill, P. Abrahamson and T. P. Williams.

Valley, 30.

At the meeting of Valley on the 15th of June the J. W. degree was conferred on five candidates and four applications received. It is now an assured fact that under the present administration (which has been a successful and highly interesting one) will result in passing a number ahead of the 800 mark this term. It is worthy of commendable notice that this Lodge with its 800 members is carried on with so little friction or disagreement amongst its members. Each one has a pride in its success, probable future, and a settled conviction that Valley No. 30 will gather victories and be crowned with laurels as one of the grandest and best subordinates in our whole land. From the organization until the present time, they have had good officers. Their present M. W., Geo. A. Case, possessing tact, executive ability and large experience, has made this term one of the best in the history of this Lodge. The humble and obscure member, whether in the Lodge-room or not, has been shown that courtesy and painstaking attention that is accorded to the most prominent and gifted brother. Intricate questions and divers interests that were assuming ugly and unsatisfactory shapes have been settled by a few appropriate words delivered in that fraternal manner by Bro. Case, that made all parties feel happy and well satisfied. Having been "faithful over a few," we believe his services and counsels will be called for in other and larger fields of usefulness in our Order. In the coming term there is no doubt that in the principal offices rotation will be in order. Having this in view we may expect the coming term equal in prosperity to any that has passed. The membership is 800; it will be 1000!

Grand A. O. U. W. Picnic.

5,000 People in Attendance.

The fourth anniversary picnic of the Ancient Order of United Workmen was held at Fairfax park, near San Rafael, on Tuesday, June 21, 1881. By common consent, the General Relief Committee, consisting of one member from each Lodge were constituted the committee of arrangements. As organized, Bros. B. J. Triest Ex-Recorder of Washington, is President; W. H. Voorhees, M. W. of Golden Gate, Vice-President; E. M. Reading, P. M. W., of Franklin, Secretary, and G. Winehill, P. M. W., of Unity, Treasurer. After due deliberation they resolved themselves into an Executive Committee to carry out this grand reunion, and their sub-committees are as follows:

General Relief or Executive Committee—(blue ribbon, gold star and fringe)—60—B. J. Triest, Chairman; 4—D. C. Breed; 8—W. H. Voorhees; 9—W. Decker; 14—A. A. Egleston; 19—G. W. Lemont; 27—G. Winehill; 30—H. S. Dearborn; 36—J. F. Stevens; 41—C. Brind; 42—C. C. Gilmore; 44—E. M. Reading; 53—J. F. Fick; 68—L. G. Schord; 73—J. D. Neild; 127—F. W. Rossbach; 136—G. Sanderson; 159—B. F. Ellis; 174—C. W. Nevin; 179—A. T. Corbens; 180—J. H. Cattran; 185—A. V. Thompson.

Reception Committee.—(White ribbon, gold star and fringe). Henry Hoeber, chairman. C. W. Smith, Emil Magner, F. McCann, D. H. Williams, R. B. Sanchez, J. T. Hollings, Wm. Broderick, M. A. Smith, W. F. Cody, J. M. Lyon, J. F. Fairwether, A. J. Vining, R. A. Lindsley, Lee O. Rodgers, E. Rodecker, O. O'Neil, C. E. Brinsmade, S. Rosenfeld, H. Schaffner, A. Parker, J. Waterman, J. D. Thompson.

Floor Director (red, white and blue ribbon, gold star and tassels)—Will. H. Voorhees.

Floor Committee (red and white ribbon, silver star and fringe)—W. P. English, J. T. Kavanagh, T. Wilton, Frank B. May, H. O. Souther, P. T. Hollings, C. Hunt, T. Noble, M. Warschauer, H. F. Morris, J. F. Brown, Jas. Cluff, M. Costa, Gus. Pohlman, S. Fletcher, Richard Cluff, A. D. Hawks, J. Sloan, C. S. Hoffman, M. Keefe, E. Lichau, W. W. Moses.

Committee on Games (red ribbon, silver star and fringe)—C. C. Gilmore, C. Brind, J. D. Nield, J. F. Fick.

Committee on Prizes (lavender ribbon, silver star and fringe)—A. A. Egleston, H. S. Dearborn, Wm. Decker, J. H. Cattran, J. F. Stevens, C. Brind.

Committee on Police (yellow ribbon, silver star and fringe)—J. D. Nield, G. W. Lemont, A. V. Thompson.

The commodious boats of the N. P. C. R. R. were crowded, and the long trains were moved through the beautiful suburban scenery by two locomotives on each train to the park. *Pater familias* groups, and small and large companies were made up intuitively to enjoy their lunch. From an extended observation we believe there was enough food on the ground to have fed an army of the same number two days. The main pavilion was decorated by Bro. McKay, P. M. W., of the firm of Piper & Co., in that artistic manner that is known to them. Five hundred ft. from the pavilion, at the entrance to the grounds, was a long line of flags representing all nationalities.

The music was furnished by Blum's band consisting of 12 pieces, and the satisfaction evinced by the dancers was an evidence that they were pleased with the music given. In fact we heard numerous encomiums passed as to the excellence of the music.

Leaving the City

The first boat from the city left the wharf at 7:10, a number of people desiring to avoid the rush which they anticipated later in the day taking passage. Their action proved a wise one, for each succeeding boat and train were crowded to their full capacity. The second boat left at 8:20; then came the 9:20, 10:30 and 1:45 boat, each landing its loadful of passengers at Point San Quentin, where the cars were taken to Fairfax, passing through the beautiful town of San Rafael.

The trains were made up principally of open cars, there being a few covered cars in the front. On this occasion these open cars added to the enjoyment of the trip. The air was cool and pleasant, and the slight wind was just sufficient to bring to the excursionists the delightful fragrance of blooming flower and shrub. The route from Point San Quentin through San Rafael and on to Fairfax is very picturesque.

Mt. Tamalpias rears its lofty crown toward the sky, while below are the lesser hills, covered with trees and shrubs; and as the train rushes along the base of the hills a succession of ever-changing kaleidoscope views meets the vision. On one side, sleek cattle are peacefully browsing on its rich bottom lands, while in another place, just beyond San Rafael, a hill is cultivated to its very top, its green side contrasting strangely with the brown surface of the surrounding hills. Along the line of road cozy cottages were passed, the occupants fluttering white kerchiefs to the breeze as an announcement of their good will to those on the train.

At the Grounds.

Upon arriving at the grounds the picknickers hied themselves away as their inclinations bent. Some went to the dancing pavilion; others carrying baskets large and small distributed themselves through the grounds, and spread their lunches 'neath the cool-shading trees with which the place is plentifully surrounded. Then came the attack upon the good edibles which they brought, varied by exchanging greetings with friends, and cementing with more binding freindship those who were but slightly acquainted. The merry laughter, the witty jest and repartee showed intense satisfaction, and a spirit to make the most of the day given to enjoyment.

In the meantime the band kept up its flow of music, much to the dancers' satisfaction. The time arriving when the President of the Day—Judge Robert Ferral—was expected to come, several members of the Reception Committee met in the pavilion, and with E. M. Reading, Secretary of the Executive Committee, proceeded to the railroad station. Upon the arrival of the train, the Judge was met by the committee, and its chairman, Henry Hoeber, welcomed him and proceeded to invest him with the badge of his station. The party then proceeded in a leisure walk throughout the grounds, and having been joined by the Orator of the Day—A. G. Booth, P. M. W.—went to the pavilion and took their stations upon the grand stand. On behalf of the Reception Committee, Henry Hoeber, P. M. W., introduced Judge Ferral as President of the Day, who stated briefly the object for which they were assembled, eulogizing the Ancient Order of United Workmen, and stating that as it was the first, so was it the best of all the fraternal societies having adopted its principle as their motto. After the close of the Judge's remarks, the band enlivened the occasion with music, and then the President introduced A. G. Booth as Orator of the Day. Brother Booth delivered his address in excellent style, the many points being well applauded. It will be found in another part of this issue.

After the close of the address, the literary part of the programme was finished, with a few closing words by the President, which were particularly witty in their nature.

It being now about midday, and several members of the different committees having had nothing in the eating line since early morning, an invitation was extended to repair to the place where a bountiful lunch had been prepared. It was got up by a sub-committee of three, L. G. Schord, Chairman. The commit-

tees are mainly indebted for the lunch to the liberality of Frank W. Rossbach, M. W. of Olympic, and proprietor of the San Francisco Packing and Provision House, and Bro. Schord, Chairman of the Committee. Other contributions were made by different brothers whom we cannot recall.

Upon arriving at the place designated, a long table was found spread with a choice cold lunch. At the head of the table sat L. G. Schord, with Judge Ferral, A. G. Booth, Will. H. Voorhees, E. M. Reading, F. W. Rossbach and others in different positions at the festive board. Several ladies were also in attendance, their presence lending a charming variety to the scene. During the attack upon the material things spread upon the table, the intellectual part of the feast was not neglected, short addresses being made by Bros. Schord, Ferral, Booth, Reading, Voorhees and others, the whole being interspersed with the rollicking song of "He's a Jolly Good Fellow," the refrain echoing throughout the surrounding hills, and bringing hosts of people to the spot. The remarks of Bro. Reading were the most extended, he responding to the toast of Bro. Ferral, "The Success of the Day." He paid a graceful compliment to the ladies, without whose co-operation the grand success attained would not have resulted. It is for you, fair ones, that we are banded together. Take away the love which man has for his family, and the Ancient Order of United Workmen would have no existence. He alluded to the good which has been accomplished by the Relief Committee, instancing several cases where brothers had been provided with employment, and citing the fact that this committee had relieved brothers of this jurisdiction in distress thousands of miles away. After the brothers at the first table had finished, their places were immediately occupied by others, and after all had partaken of sufficient to satisfy their wants, the members of the different committees went to their various places.

The Games.

At about two o'clock the order was given for the athletic exercises, and we here give the list of games, together with the prizes and their winners:

The first was a race for members of the Order.—First prize, A. O. U. W. diploma; second prize, box of raisins; third prize, a whip. 1. John Thompson, of Valley. 2. F. W. Rossbach, M. W. of Olympic. 3. Wm. C. Dudley, Noe Valley. This was an exciting race and fairly set the game programme in motion.

Race to All.—First prize, one-fourth ton of coal; second prize, box of tea; third prize, box of soap. 1. Michael Fisher. 2. Joseph Goldman. 3. Chas Hoppe. Some 30 contestants in this race, and as many as four fell, and were down at one time.

Foot Race for Wives of Workmen.—First prize, one album; second prize, one cake basket; third prize, one goblet. 1. Mrs. Theresa Hayden. 2. Mrs. E. J. Lindsey, Harmony. 3. Mrs. H. Jones, Valley. About 35 contestants in this race, and great discrepancy shown in the fleetness of Workmen's wives, as they were scattered all around the track. There was some trouble about the first prize, the lady not knowing to what Lodge her husband belonged, and the prize was held in abeyance.

Since the above was in type, it has been ascertained that Mrs. Theresa Hayden is not a Workman's wife, consequently Mrs. E. J. Lindsey, takes the first prize, Mrs. H. Jones, second, and Mrs. G. Cohen, of Magnolia, third.

Race for boys under 12 years of age.—First prize, pocket knife; second prize, box of tea; third prize, a sheep. 1. Berthold Goldsmith; 2. Eddie Hunt; 3. John Lewellyn. The racing had now reached fever heat, and over 40 boys had joined and made it really enjoyable, some being down, while others scampered to the home base.

Race for girls under 15 years of age.—First prize, napkin ring, butter plate and salt and pepper seller. Second prize, bottle of cologne; third prize, misses' hat (trimmed). 1. Julia Healy; 2. Emma McKenna; 3. Nettie Casement. The usual number entered, the smaller ones being placed in front, and away they went, at least a dozen falling before reaching the home-stretch.

Race for Sitting Master Workmen.—First prize, pair of boots; second prize, grizzly bear skin; third prize, box of Japan tea. 1. Frank W. Rossbach. 2. W. H. Voorhees. 3. Wm. E. Cody. This was an exciting race, a genuine determination being shown to win. The contestants were less numerous, and consequently had a chance to try their speed.

Race for Past Master Workmen.—First prize, pair of gold sleeve buttons; second prize, paper holder (bronze horse statue); third prize, $5 hat. 1. B F. Jacobs, Magnolia. 2. C. S. Hoffman, Memorial. 3. G. M. Lawton, Noe Valley. 4. H. H. Hayes, Valley. This race brought to the front many of our old pioneers, and was closely contested.

Race for Married Ladies (free to all).—First prize, a floor rug; second prize, a silver cup; third prize, pair of gold band shades. 1. Mrs. Lizzie Jordan. 2. Mrs. Wm. Brown. 3. Mrs. Rosa McCloskey. The field being open to all, the track was well represented—fine running, a good many down, but no one hurt.

Race for Master Workmen's daughters between 12 and 20 years of age.—First prize, box of handkerchiefs; second prize, box of papetrie; third prize, bottle of cologne. 1. Hattie Neal. 2. Emma Balding. 3. Florence Thompson. Master Workmen were well represented in their daughters, as there were about 50 contestants, the larger ones being handicapped, and resulted in an exciting race.

Race for Master Workmen's sons from 12 to 18 years of age—First prize, one chromo (fruit); second prize, a sugar sausage; third prize, box of fancy soap. 1. Geo. W. Martin. 2. C. A. Hoppe. 3. S. A. Egleston. The boys started each with a determination to come in ahead, and in their endeavors many embraced mother earth upon the track. The finish was particularly exciting.

Race for Members of the Committee.—First prize, one pair of bangles; second prize, five pieces of abalone jewelry; third prize, silver gold lined cup; fourth prize, one-fourth ton of coal. 1. Frank W. Rossbach. 2. J. D. Nield. 3. A. A. Egleston. 4. A. V. Thompson. This race called forth the best efforts of the runners, but the swift-footed M. W. of Olympic proved too fast, as he won handily.

Then came a race for the other members of the committee who wished to enter. Fifth prize, one dozen preserve jars; sixth prize, two boxes of perfumery; seventh prize, one perfumery bottle; eighth prize, box of toilet soap; ninth prize, pair of baby shoes; tenth prize, pair of baby shoes. 1. D. H. Williams. 2. M. A. Smith. 3. Gus Pohlman. 4. Dr. Rodgers. 5. J. F. Fick. 6. W. Decker. The brothers circled round the track in varying order, each putting forth his best efforts to reach the goal, but those named proved the swiftest, and to them was awarded the prizes.

This closed the game programme, Olympic Lodge, 127, through its M. W., having won the highest honors, and which was carried out in excellent style, the various mishaps to the runners calling forth shouts of laughter. The spectators then dispersed to various portions of the grounds — some to dance, others to lie down under the trees, there to converse with the members of their families and friends. Each train that arrived during the day brought its complement of excursionists, while those who arrived early took their departure in order to avoid the late rush. The ride back to the city was accomplished without accident. Those who were asked how they enjoyed themselves replied unhesitatingly, that it was the pleasantest day they ever spent at a picnic. The character of the assemblage was all that could be desired. We saw nothing within the grounds that could call for censure, everything being quiet, peaceable and orderly. We understand that outside of the grounds some of those disreputable gambling games were carried on, but as it was impossible for the committee to control the highway, they could not interferfere except by moral suasion. The authorities of Marin county owe it to themselves and to the public who patronize this park to enforce the law against gambling. Notwithstanding all that has been said and written upon this subject in the newspapers, and the many cases shown of fraudulent practices, people seem to lose their heads when this deceitful net is spread before them, and the result is in every case a sure pecuniary loss.

Aside from this, the fourth anniversary picnic will long be remembered by the many participants as one of the quietest, most orderly assemblage of people that ever left the city of San Francisco upon pleasure intent.

As a result of the races at the A. O. U. W. picnic, in which Frank W. Rossbach, M. W. of Olympic, carried off two prizes and B. F. Jacobs, P. M. W. of Magnolia, one, we hear it stated that a running match has been arranged in which they will be contestants. As both of the brothers are very swift of foot, and considerable rivalry exists, quick time will no doubt be the result.

The *Canadian Workman* reports, that while the members of other societies were drowned at the time of the accident to the *Victoria*, strange to say, not a single Workman has been heard of who lost his life.

The home-made bread made from flour manufactured by the "Minnesota process," that can be had at Weston's bakery, No. 9 Stockton street, is just delicious, healthful and the kind that every family will use when once they have tested it.

The Grand Central auction store, No. 24 Sixth street, is a good place to buy dry and fancy goods. Sister Jones is the proprietor, and her enterprise in securing new goods from auction daily enables her to give first-class bargains.

We had intended to publish a full and complete list of the donors of prizes to our annual picnic. Being unable to get all the names, we are compelled to defer it until our next issue.

Bro. J. J. Jones, Master Workman of Oak Leaf, No. 35, is dangerously sick with typhoid fever.

Silver Star Lodge, No. 2, D. of H., Temescal, near Oakland, will entertain its friends July 15th.

Two assessments in the Supreme Lodge jurisdiction for June.

Election of Officers, A. O. U. W.

Golden Gate, No. 8.—A. C. Knudsen, M. W.; D. Irwin, F.; J. S. Thomson, O.; T. J. Johnston, Recorder; H. J. Lask, Fin.; I. Wisler (8th term), Receiver; Mark Heywood, G.; J. Hesketh, I. W.; A. R. Lincoln, O. W.; A. Schmitt, Trustee; Drs. W. N. Griswold, P. M. Allan, M. Regensberger, Med. Exs.

Wheaten flour is now made by the "Minnesota process" at the Golden Age flouring mills, in this city. Flour manufactured in this manner contains a larger amount of gluten, is finer, whiter, and contains more richness and nutritive qualities than that made in the old way of grinding and heating the wheat. Bread made from this flour has a closer grain, a finer aroma, and will remain sweet and moist several days longer than that made from common flour. Bro. John Sonday is the city agent and is introducing it with great success. Any one wishing to make an experiment with this flour, by directing a postal to John Sonday, Army building, will be waited upon.

The fifth annual re-union of the ex-residents of Nevada county took place at Shell Mound park June 30th. The programme consisted of literary exercises, music, races and games, and a very pleasant time was had. The President of the association is Geo. W. Dixon, P. M. W. of Olympic, No. 127, and A. A. Crosett is Secretary.

List of U. S. Patents for Pacific Coast Inventors.

From Official Reports for the "Mining and Scientific Press," U. S. and Foreign Patent Agents.

For the Week Ending May 31, 1881.

242,320.—Side-hill Plow—Frank A. Hill, San Leandro, Cal.

How to Dress the Children.

There is no animal I know of born into the world in a greater state of helplessness than the human infant, and none more dependent upon artificial means to keep up the animal heat. It would very soon succumb to the cold if not protected. This is proved by the fact that a very much larger proportion of children die during the winter than during the summer months, although as regards the mortality of the young and middle aged, there is very little difference between those seasons. The older a child gets the better it becomes able to resist cold, but—and I would that mothers would bear this well in mind—not until a boy or girl is well into his or her teens should fostering warmth be looked upon otherwise than as a friend, or cold otherwise than as a deadly foe. Children in the cradle are seldom or never neglected by well-to-do parents, but it is when a child begins to run about, and is able to go out of doors, that mistakes are made about the clothing, which often leads to speedily fatal illnesses, or sow the seeds of future ailments, which render life a misery and a burden, that can be only laid down at the portals of the tomb. Instead of studying warmth and comfort in the clothing of their children, many mothers study only fashion. I speak advisedly, for I have proof of what I aver every day of my life.

It is not my province to tell my lady readers how to cut the patterns for their children's dresses, or even to choose the material from which to make them; but as a medical man it is my duty to remind them that the child who is clothed warmly, cleanly and neatly is far better dressed than one whose attire shows it to be a victim to a votaress of fashion. The one has a chance of turning out a healthy man and a useful member of society, the other has not. To those who are between the ages of 10 and 20 I have to say that, with no desire to advise them to be overclothed, and thus made hothouse plants of, too much attention cannot be paid to keeping them warmly clad. Cold is fatal to the young; warmth is life itself; cold retards the building up of the tissues of bone and muscle, warmth encourages it; cold interferes with the due performance of the functions of the skin, throws extra work on the liver and kidneys, and blunts the nervous energy of the brain itself; warmth has altogether a contrary effect.

Some parents labor under the erroneous impression that they are making their children hardy by allowing them to expose themselves to the deleterious effects of the absence of warmth. To maintain the animal heat in the young it is not necessary that the clothing should be heaped upon them, nor that they be carefully made prisoners of indoors, whenever the day is chill or the winds blow high. The clothing should be light rather than heavy—light and protective; and the material itself should be studied, not the quantity.—*Harper's.*

A NEW road is about completed from Lower Lake to Bartlett springs, which will reduce the distance traveled by stage from 70 to 50 miles.

COOKING BY ELECTRICITY.—Of the many curious things certain to be seen at the forthcoming exhibition of electricity at Paris, not the least remarkable will be the electrical cooking range of M. Salignac. That ingenious gentleman is going to fit up his apparatus in the grill-room of the restaurant, and intends to furnish a great variety of meats which have been cooked by heat generated from the electric current. At the last Paris Exhibition, M. Mouchot roasted mutton in condensed sunshine, and literally turned his spit on the hearth of the sun; but an enthusiastic admirer might say that M. Salignac had far surpassed this in broiling steaks by lightening and warming coffee with the aurora borealis. As a matter of fact, the electric current is as well fitted to produce heat as it is to produce light, and just as electricity will, in all probabilty be made to yield the principal artificial light of the future, so will doubtless it be applied to household heating. The same machines which light the house by night will heat and cook by day, besides performing other duties, such as driving a coffee mill or sewing machine.

THE Italian Government has decided to establish an educational qualification for the right of franchise.

PRESERVATION OF INDIA RUBBER UNDER WATER.—Great losses are often experienced by the users of India rubber tubing, on account of the brittleness which it often acquires in use. A writer in *Dingler's Journal* gives an encouraging account of his success in remedying the difficulty by laying the pipes in water which is often renewed. Even the thickest and stiffest tubes remain soft and pliable without any perceptible diminution of elasticity, and he has been unable to discover any trace of injurious change. For some uses he soaks the pipes in melted paraffine. When they are kept in water they undergo great changes of color, and upon cut surfaces they often appear greasy and bleached, but all the changes seem beneficial rather than otherwise. Thin rubber bands, however, often become so brittle that they can be easily rubbed into small pieces by the fingers.

A BEVY of children were telling what they got at school. The eldest got reading, spelling and definitions. "And what did you get, little one?" asked the father of a rosy-cheeked little fellow, who at the same time was driving a ten-penny nail into the door-panel. "Me? I gits readin', spellin' and spankin'."

Insurance.

THE
NEW ENGLAND
MUTUAL
Life Insurance Company,
OF BOSTON,

All Policies in this Company are Governed by the Massachusetts Non-Forfeiture Law.

The only Company on this Coast Governed by this Law.

This Company was incorporated A. D., 1835, and has accumulated Assets of

$15,000,000.

THIS COMPANY HAS PAID OVER
$150,000 on this Coast
for Policies that had Lapsed from a Few Days to nearly Five Years.

In the above cases the full amount of the Insurance was paid less the overdue premium. Had these policies been in any other company doing business on this Coast, they would have been forfeited.

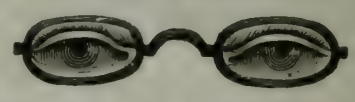
Good Land and Sure Crops.

There has been steady and tolerably rapid advancement made in the growth of a majority of the towns in Colusa, Butte, Tehama and Shasta counties. Especially is this so in the agricultural districts where the land produces at least fair crops in all seasons—wet or dry—as does the land on the Reading Ranch. Those looking for homes in California where diversified farming will pay every year; where wood and water are plenty and easy to be obtained, and other desirable advantages are to be had, should address the proprietor of the Reading Ranch.

Some 14,000 out of 26,000 acres of the grant remain for sale at comparatively low rates, in quantities to suit purchasers, on easy terms. Prices range from $5 to $30 per acre. The tract is between two and three miles wide, with the Northern Division of the C. P. R. R. passing centrally through its entire length. Send postage stamp for an illustrated paper containing information about Shasta County and these lands, to the proprietor of Reading Ranch.

EDWARD FRISBIE,



Anderson, Shasta County, Cal.

Adams' Spring.

"The Best."

By many who have well tested the Adams and other Springs for Dyspepsia, Rheumatism, Kidney, Liver and other kindred diseases, the cool palatable water of this spring is declared to be SUPERIOR. Persons unacquainted, who wish to make sure of striking the best water first, should inform themselves as to the merits of the Adams' Springs by inquiry of those well posted, or by sending to the proprietor for a copy of the thoroughly reliable analysis made of this water, and reference to trustworthy persons, who have practical knowledge of its well authenticated virtues. Situated four miles from Glenbrook P. O., Lake County, Cal., surrounded by beautiful hills covered with Pine, Spruce and other mountain timber. Comfortable accommodations and good board at very reasonable rates. E. R. MOSES, PROPRIETOR.

How Honest Poverty Won.

The subject of our engraving on this page is Herbert Grey. His life illustrates how honest worth wisely directed and a will toward the accomplishment of an honest purpose to make his way in the world succeeded. Commencing at the very lowest round of the ladder of life he ascended step by step until he was met as a peer and equal by the highest in the land. As will be seen from the engraving it illustrates him as a crossing street sweeper. This *gamin* is not a growth of California conditions, but in the large Eastern cities, and especially in London, they are quite common. Many are the records of their noble deeds done in pursuit of this calling—the lives saved, the valuables restored to rightful owners.

City poverty and destitution do not always drive their victims into the stagnant pool of purposeless vice or the destructive current of active crime; some of the noblest hearts and most brilliant intellects have come out of these trials, to make the world better and wiser. But while society is being astonished with these extreme cases, it should not neglect to notice and reward the numerous instances of more humble merit, that emerge from misfortune and destitution to fill useful positions in society, and to nourish the living faith in humanity.

The accompanying cut is a striking picture of one of those cases of the development of true worth from deep poverty and sore affliction. At the age here represented he left the bedside of his dying mother, one of the poorest among the poor women of a large Eastern city, determined to do something in a useful and honorable way toward lifting himself and dear mother out of the rut of poverty. He had heard it declared that "Where there's a will there's a way." He was conscious of the will, but the only way open to him at the time was to sweep the street crossing before the office of a certain citizen of the place.

He did so, and received his immediate reward of a few pennies, which he put to the best possible use. His worth was soon recognized and amply rewarded; and as he ascended from one grade to another in society he gave further proof of his true nobility; thus successfully withstanding the temptations of both poverty and prosperity, still retaining the "will" and forever finding a "way" to do good.

S. T. DODSON, Deputy, installed the officers of Santa Cruz, No. 46, Wm. H. Barnes, G. M. W., acting as P. G. M. W., on the 11th inst. The Grand Master addressed the Lodge on live topics, and exemplified the work.

THE assessment report of the Grand Recorder for the month of July shows but four deaths. This is very gratifying upon a membership of over 12,000. There will be a handsome balance on hand to meet the death loss for August.

QUAKER CITY LODGE, Philadelphia, held its 200th meeting on Wednesday, June 8th, and on the same night the 1,200th man was admitted to membership.

A WELL-KNOWN literary gentleman residing in Boston, whose letters appear weekly in one of our city daily papers, was sent a copy of the WATCHMAN by a friend, and was so well pleased with it that he requested more copies be sent. The compliment is appreciated because of the writer's standing in the literary world, and shows that the WATCHMAN is gaining fame abroad as a representative journal. It has also the effect of increasing the fame of California

THE CROSSING STREET SWEEPER.

Workmen as being members of one of the brightest jurisdictions in the Order, for without their help, we could not possibly succeed as well as we do.

THE officers of Watsonville, No. 45, were installed by Wm. H. Barnes, G. M. W., the work being also exemplified by him. A public meeting was afterward held at the rink, where the Grand Master spoke to an audience that filled the building to its utmost capacity.

AMADOR, No. 133, was visited by Wm. H. Barnes, G. M. W., and E. F. Loud, D. G. M., July 5th. Exemplification of the work and addresses occupied the evening.

SANTA CRUZ, No. 46, will celebrate its anniversary August 15th.

Anniversary.

It appears to us fitting that something be done to commemorate the birth-day of the A. O. U. W. in this State. August 21st, 1875, was organized California Lodge, No. 1. It was an event which at the time created, perhaps, as little sensation as any that had occurred in Oakland, and yet few of such importance has, or ever will happen in the place, or even in the State. The anniversary of that event should be made a holiday for the Order, and we suggest that the Grand Master issue his proclamation setting it apart as a day of Thanksgiving and Praise for the Workmen throughout the jurisdiction. We believe such a step would be hailed with delight by the brotherhood.

THE full and complete returns of the receipts and disbursements of the A. O. U. W. picnic are not all in, but enough is known to warrant us in saying there will be a net profit of over $300. Taking it all in all it was an unqualified success, and reflects credit on the A. O. U. W. Relief Committee.

PUEBLO, No. 168, Sonoma, will hold a public meeting on the 26th.

Lottery Morals.

The press as a moulder of public opinion, has performed several acts and cured many sores upon the body politic, which if they had been allowed to pass unnoticed, would have proved of great loss to the people, morally and financially. There are always gilt-edged concerns floating around the country, which seem to offer inducements for profitable speculation. Of these none are more pernicious in their effects and more demoralizing than lotteries. This has been recognized as a fact all over the country, and the statute books of nearly every State in Union contain laws for their extirpation. Even in Kentucky, where they were legalized by State enactment and brought under the control of State officers, a wide-spread feeling has been engendered that they are a curse to the State, and have done more than anything else to retard its material prosperity. Here in California laws were passed several years ago prohibiting the inauguration of lottery enterprises, and visiting with a heavy penalty all those engaged in their promotion. The wisdom of these laws is apparent, and no well-wisher of his State can be but thankful for the power which put them into force.

There seems to be something in the air of mining centers that makes gambling of all sorts more easy of recognition. The population is unsettled—here to-day and there to-morrow. Those civilizers of the human race, homes, are few and far between. As a consequence, the population resort to those dangerous devices which at once destroy both body and mind. It is in these centers of unrest that lottery enterprises are apt to find a more hearty reception. Their glittering prospectuses charm the unwary with visions of wealth acquired by a lucky turn of the wheel. No thought is given of the after effects; of the heart burnings which ensue when fortune frowns upon them. If they should by some chance win a prize, what is the result? We have never yet heard of a case where money won at the lottery wheel proved of any advantage to the winner. On the contrary, there are numberless cases on record where such winning has proved the curse of the holder of the lucky ticket. The sudden acquiring of wealth has incapacitated him for any honest effort. As it was earned quickly, it would seem that it must pass from his grasp in a like accelerated manner. And while the person is thus rapidly spending the gains which were won at the lottery wheel, vicious personal habits are contracted, and when money is gone, health is broken, and a total wreck is presented to the beholder of what was once, perhaps, the very embodiment of physical manhood.

There is no gainsaying the question of the absolute hurtfulness of these schemes of chance. We are sorry to state the fact that the last Legislature of Nevada passed a law legalizing them for the purpose of replenishing the State treasury. They are not called "lotteries," but the more polite term of "gift concert," is the phrase used. But they are none the less lotteries for all that, as money prizes are awarded to the holders of the winning tickets. A State is supposed to be the conservator of all that is good within its borders. It should be the protector of the people and not the inaugurator of schemes which tend to the moral degradation of its citizens. Let us hope that an enlightened public opinion will put the stamp of its disapproval upon all such schemes. If the State does wrong, let the people walk in the straight path, and not switch off into treacherous by-paths bearing the names of "lotteries" and "gift concerts."

FRATERNAL RECORD.

Masonic.

GRAND OFFICERS.—SAMUEL CRAWFORD DENSON, G. M., Sacramento; CLAY W. TAYLOR, D. G. M., Shasta; MOSES HELLER, G Treas., S. F.; ALEXANDER G. ABELL, G. Sec'y, S. F.

MRS. S. JENNIE MANN still continues in the field organizing New Chapter. She has already instituted more during the last year than ever before, and has several at present under way.

DR. A. G. MACKAY, one of the leading members of the Scottish Rite, is dead. He had filled every position from Entered Apprentice to Sovereign Grand Inspector-General, 33°.

The Masonic fraternity of Watsonville celebrated St. John's day in fine style. The programme consisted of a procession, literary exercises and a barbecue. Leonidas E. Pratt delivered a masterly oration in which he spoke of the beauties and benefits of the Order, what it had done and what it expected to do; also of the age and extent of Freemasonry.

THE Masons of Petaluma have commenced the work of excavating the lot upon which the new Masonic Temple is to stand. It will have a frontage of 70 ft. on Main street by 100 ft. on Western avenue. It will be three stories in hight—the first floor to be divided into five stores, three on Main street, two of which are to be 20x60 ft., the corner store 23x60 ft.; and two stores on Western avenue, 20x70 ft. each. The second floor will be occupied as the Masons' hall and offices. The hall will be 40x60 ft., with 24-ft. ceiling, and when completed will be the finest hall of any country town in the State. The third floor will be occupied by a small hall, a kitchen and a refreshment-room. The entire building is to be fitted up with all modern improvements, and when completed will be an ornament to the town and a great credit to the fraternity.

I. O. O. F.

GRAND OFFICERS.—DAVIS LOUDERBACK, G. M., San Francisco; LEON D. FREER, D. G. M., Oroville; D. M. BURNS, G. W., Sacramento; W. B. LYON, G. Sec'y, San Francisco; H. B. BROOKS, G. Treasurer, San Francisco.

WM. CHILDS, P.G., of Castroville, Cal., has been an Odd Fellow for 53 years.

IN many places in Maine the Odd Fellows paraded on Decoration Day.

GRAND MASTER Davis Louderback will soon visit the Lodges of this jurisdiction.

THE new work is reported to be gradually gaining favor. Many of the old members regard it with disfavor; they can see no beauty in it.

THE Odd Fellows' Literary and Social Club is having interesting meetings. The work of drilling officers in their duties is proving of greet practical benefit.

THE Odd Fellows of Boston paraded at the celebration of the battle of Bunker Hill, June 17th. There is said to have been five hundred uniformed Patriarchs in line.

PINA Lodge No. 3, Tucson, Arizona, headed by the sixth cavalry band, and accompanied by the Masons, Knights of Pythias and A. O. U. W., celebrated the 26th of April at "The Park," where addresses were delivered by Col. F. Stanford and Col. Chas. D. Polston. In the evening the park was beautifully illuminated, and dancing and a concluding banquet were indulged in.

THE I. O. O. F. now has four Supreme Grand Lodges, viz.: In the United States, the German Empire, Australia and New Zealand. It has 48 subordinate Grand Lodges in the United States and four in the German Empire; 39 Grand Encampments in the United States and one in Australia. In the United States, in 1878, there were 5,734 subordinate Lodges; in the German Empire, 41; in Australia, 63; in New Zealand, 20; making a total of 6,859. There were also 880 Rebekah Degree Lodges, composed of members of the third degree and their wives. In 1878 there were 40,568 initiations and the sum of $1,702,744.82 had been spent for the relief of members. The total revenue for the year was $4,516,660.63. From 1830 to December 31, 1877, the following aggregates are pertinent: Initiations 1,064,928; members relieved, 887,882; widowed families relieved, 108,385; members buried, 74,226. The whole amount of relief was $69,235,988.42, and the total membership is 465,466.

Knights of Honor.

GRAND OFFICERS.—DAVID MCCLURE, P. G. D., San Francisco; CHAS. E. TRAVERS, G. D., San Francisco; R. H. WARFIELD, G. Treas., San Fraucisco; W. H. MAHONEY, G. Reporter, office St. Ann's building, cor. Powell and Eddy.

LEONIDAS E. Pratt, Dictator-elect of Anchor Lodge, is a Past Grand Master of Masons and also Odd Fellowship.

MEMBERS have 30 days notice of an assessment—that is, 30 days after issue of notice in which to pay an assessment.

CHAS. E. TRAVERS, G. D., will soon start on a general visit to all the Lodges. Wm. T. Hamilton, G. A. D., and other Grand officers will accompany him.

THE following questions and answers are given in the K. of H. *Reporter:*

Ques. A candidate who has complied with all requirements in a satisfactory manner presents himself for initiation. At the proper time a member objects to his receiving the degree, and gives as his reason that the candidate since his election has upon one occasion at least been badly under the influence of liquor. Now what course is to be pursued? Is he a proper subject for investigation under the law that would reach a member who has taken one or more degrees?

Ans. Under Sec. 6, Art. VI, of the Subordinate Constitution, as it stood previous to the recent session of the Supreme Lodge, it was a question what should be done in such cases. A decision made in 1877 [Sec. 398. Matthias' Digest], made a member who had received the first or second degree liable to trial for offences committed before entering the Order. By this decision it seemed to be implied that an elected member must receive at least one degree before he could be tried on charges preferred for offences committed before he was admitted to the Order. But in some cases it was held that a person who had been balloted for and accepted, was then a member so far as to subject himself to charges and a trial, even before he received the first degree. By the action of the Supreme Lodge at its last session, this section of the constitution has been so amended as to remedy the difficulty by the provision that upon objections being made to a candidate's advancement at any time before taking the third degree, a new ballot shall be taken. This will enable a Lodge to protect itself completely against the admission of a person who has been discovered to be unworthy after his election and previous to his receiving the degrees.

Ques. Is it the duty of the Reporter to present each member his account for dues on or before the last meeting night in the quarter.

Ans. Not unless the Lodge has by by-law imposed such a duty upon him. The constitution prescribes how dues shall be paid and when, and every member is expected to comply with its provisions without special notice to do so.

Knights of Pythias.

GRAND OFFICERS.—S. L. TERRY, P. G. C., Stockton; JOHN H. HARNEY, G. C., S. F.; GEORGE CANTUS, G. Treas., S. F.; A. G. BOOTH, Grand K. of R. & S., S. F.

THE new Division Uniformed Rank is prosperous, new recruits being constantly made to the ranks.

JOHN H. HARNEY, G. C., having visited officially all of the Lodges in this city, Alameda and Marin counties, will soon depart for the interior districts.

NEWS from 913 Market street, Pythian headquarters, is to the effect that great interest is being taken by the members in their Lodges, which is very gratifying to the Lodge officers.

MYRTLE LODGE, No. 16.—F. B May, D. D. G. C., assisted by F. A. Merguire, G. M. at A., A. L. Heiman, D. D. G. C., A. G. Booth, G. K. R. S., T. F. Bachelder, D. D. G. C., Adam Follrath, D. D. G. C., and others, installed the following officers, on Tuesday, July 5, 1881: C. W. Nevin, P. C.; Chas. S. Hoffman, C. C.; A. E Buckingham, V. C.; C. L. Campbell, P.; H. O. Leavitt, M. at A.; G. Winehill, I. G.; R. Young, O. G. After the installation ceremonies, remarks were made under the head of Good of the Order, by Bros. May, Heinan, Bachelder, Bodfish, Follrath, Evans and others. Bro. Booth then arose, and in his usual eloquent manner presented, on behalf of the Lodge, to the retiring Chancellor Commander, C. W. Nevin, a very handsome watch charm, emblematic of the Order. Bro. Nevin responded in a few brief and well-chosen words, thanking the members kindly for this token of their esteem. After this the fourth rank was conferred, and everybody did justice to the collation, which was near at hand. All left, satisfied that Myrtle Lodge was once more on that road to success for which in former years it was so justly famous.

American Legion of Honor.

DARIUS is supreme Commander and "don't you forget it."

A NEW COUNCIL was instituted at Ventura, July 2d, by D. S. Van Slyke, D. S. C.

THE Legion of Honor is meeting with considerable success, several deputies reporting progress.

C. G. BOCKIUS has been deputized by the Supreme Commander to institute the new Grand Council, August 7th.

Order of Chosen Friends.

GRAND OFFICERS.—CHAS. W. BRYANT, G. C., San Francisco; JAMES M. BAIRD, G. A. C., San Francisco; JOHN W. SHAFFER, G. Treas., S. F.; S. DANIELEWICZ, G. Rdr., office 601 California street, S. F.

THIS Order has a membership rapidly approaching 4,000.

THE Chosen Friends has spread to Oregon, some Councils having been instituted there.

THE Supreme Council meets in Detroit, Michigan, on the third Tuesday of October.

NEW Councils are under way by Deputies Haley, American, Morrison and Hamblen.

J. F. PINKHAM, retiring Chief Councillor of Oakland Council, No. 20, was presented with a handsome gold-headed cane after the installation, July 2d. It was the Lodge's token of the esteem in which he is held by the brethren.

Order of the American Union.

WASHINGTON ASSEMBLY, of the Order, continues to initiate new members every Monday night.

THE officers of this new California Order report the receipt of encouraging news from many points in the interior.

ARRANGEMENTS are being perfected for introducing this Order into Arizona, and the States of Oregon, Kansas and Missouri.

MESSRS. BRITTON & REY will have ready in about 30 days hence a handsome lithograph benefit certificate for the Order.

MR. PRESCOTT, Deputy, has visited points in Marin and Sonoma counties, and is about to visit many other points in upper California. He predicts the institution of at least a dozen Assemblies within three months.

Native Sons of the Golden West.

GRAND OFFICERS.—FRANK J. HIGGINS, D. G. Pres., San Francisco; H. CLAY CHIPMAN, G. P., Sacramento; GEORGE. B. BALDWIN, D. G. P., Marysville; HENRY LUNSTEDT, G. Sec'y, San Francisco.

THE Grand body is called and Parlor, the subordinates, Parlors.

THE new work and ritual, as improved by the last Grand Parlor, is now out.

A NEW Parlor is to be organized at Placerville by Past President H. W. Taylor.

H. C. CHIPMAN, Grand President, is making arrangements to start on a general tour of visitation.

THE election and installation of officers have been the principal work of this Order since the late session of the Grand Parlor.

THE Order is composed of young men who have been born on this coast, and they are taking hold of the work with energy and spirit.

MARYSVILLE PARLOR will celebrate admission day, the 9th of September, with true native glory, inviting the co-operation and participation of all Parlors. The committee has already made the most elaborate arrangements.

F. D. RYAN, President of the Sacramento Parlor, writes that his term is beginning most auspiciously, six initiations last week and six this week. The Parlor has now over 100 active, energetic and zealous members. In Sacramento the grass evidently does not grow—under their feet. Their enthusiasm seems to have infected the neighboring towns.

GRAND LECTURER, A. F. Jones, last week visited and addressed California Parlor. After exemplifying the work of the Order, he said: "Ours is a glorious legacy, the imperishable fame, the honorable name, the glorious deeds of the pioneers of California, and lastly the land of our birth, with its beautiful and thrilling memories clustering around our hearts, its institutions incubated in their brains, nursed in their arms, projected and pushed to their present exalted state by their energy, pluck, intellectual stamina and indomitable will. Let us so educate and improve our minds and our moral and physical natures, that we may be qualified to creditably and successfully assume the grave responsibilities of the care of the institutions of our country. Let us then esteem and cherish their honored names, and teach our children to venerate them and emulate their glorious examples.

Patriotic Order Sons of America.

GRAND OFFICERS.—C. L. WELLER, State President, S. F.; A. K. HELLIS, State Sec'y, S. F.; DR. E. L. WILLARD, Asst. State Sec'y, S. F.

THE next session will be held at Trenton, N. J., in two years.

THE National Camp of the Order met at Portland, Me., June 21st, the delegate from this coast being I. A. Heald.

THE reports of Secretary and Treasurer give a flattering account of the present and prospective growth of the Order.

ONE of the most important changes made in the constitution is a clause allowing any commandery member to be a delegate to the National Convention; before only Past Presidents were eligible.

I. A. HEALD is at present visiting his friends and relatives in the Eastern States. At latest accounts he was in Washington, and will leave for this coast the latter part of July. His business (machine and model works) is being conducted by his partner, Mr. Banks.

THE following officers were elected: Isaac H. McDonald, of Portland, Me., National President; C. L. Weller, of San Francisco, Cal., National Vice President; Harry B. Hendley, of Cincinnati, O., National M. of F. and C.; Henry J. Stager, of Philadelphia, Pa., National Secretary; T. B. Wobbe, of Brooklyn, N. Y., National Treasurer. The installation of officers was conducted by Past National President J. K. Helms, of Pennsylvania.

THE present session being the first time delegates from Maine and California met in National Camp, I. A. Heald, delegate from this State, procured a bottle of water from the bay of San Francisco and united it with the waters of the Atlantic. It was intended that it should be symbolical of that union and harmony which should exist to build up the fraternity into one continuous chain and an unbroken front from ocean to ocean. I. A. Heald made a very neat speech upon the occasion, which was responded to by the President, Isaac McDonald, of Maine. One of the prominent features of the session was the presentation to Delegate Heald, of this State, of an elegant gold badge, mounted on blue velvet. The badge combines the emblems of Camp and Commandery, and is in the form of an enameled shield, surmounted by an eagle and other figures. The reverse side of the shield bears the following inscription: "Honor to whom honor is due. Presented to Bro. I. A. Heald, by the brethren of the National Camp, Portland, Me., June, 1881, in token of his eminent services to the order." The presentation speech was made by the National President, and Mr. Heald, though taken completely by surprise, responded in a feeling address.

Selections.

A NEW Grove of Druids was instituted at Bodega, July 9th, by Noble Grand Arch Maginnis.

THE next annual session of the Grand Council Improved Order of Red Men, will be held at Santa Cruz, July 26th, at 8 P. M.

RED MEN, on a visit to this city, will find their library, 320 Post street, worthy of a call. It has been lately much improved.

WE have received No. 1, Vol. 1, of the *Wampum Belt*, devoted to Redmanship, and published by Chas. H. Litchman, at Marblehead, Mass. A very pretty little paper.

GEO. B. KATZENSTEIN, Grand Secretary of the Grand Lodge of Good Templars of this State, and also Worthy Grand Templar of the G. L. of the U. S., will be given a reception in this city on the 19th inst.

WM. H. BARNES delivered an address before Court Occidental, Ancient Foresters, on Friday, July 8th, on the history, aims and progress of this fraternity. He stated its membership to be 556,000, with 4,588 Courts, having assets of $13,957,915, and a yearly payment for relief purposes of $2,221,000. The increase of the Order last year was 10,709. It is young on this coast, although originated, in 1745, in England, and established in nearly every civilized country in the world. A literary and musical programme followed the address.

Suspicious Life Insurance Cos.

We have maintained against all comers that the too general custom among a certain class of life insurance companies of endeavoring to avoid the payment of their policies, on the plea that they were issued under a misapprehension of facts as to the physical condition of the party insured, was working serious and lasting injury to the life insurance business both to the companies and their patrons, and the correctness of our position is becoming more and more apparent day by day. A life insurance company that first makes a contract and then refuses to comply with the conditions to which it has subscribed, until forced to do so by the decree of a court, not only materially assists in placing the brand of swindler upon itself but does a great deal to destroy public confidence in other companies that are more honestly conducted. As a rule the people will do well to stand aloof from a life insurance company that goes into court and contests the payment of one or more policies. It may be that policies are sometimes obtained on a misrepresentation of the state of health of the applicant, but such cases are not of frequent occurrence, and when they do occur it is the fault of the company which has it in its power to subject the applicant to the most searching medical examination. The advice of Polonius to Lærtes about being slow to get into a quarrel, but being once in to make it lively for his opponent, will serve as a line of action for life insurance companies. They should be careful about making contracts, but having once entered into them, they should stand by them. In 19 out of 20 cases where payment of the policy is refused, the courts decide against the company and compel it to keep its contract. The United States Circuit Court for the State of Massachusetts, has just held that the Equitable Life Insurance Society must pay $20,000 due on two policies issued on the life of Charles G. Patterson, which sum the company refused to pay on the ground that Patterson was afflicted with a pulmonary disease of some kind when the policy was issued. Though the evidence showed that he did spit blood at the time, the court wisely and justly held that the company must comply with the conditions of the contract.—*Golden Era.*

A GOOD sewing machine is a household necessity. Bro. P. McCann, who has had a large experience in repairing sewing machines, has opened a fine store and shop at No. 27 Sixth street. He buys or exchanges all kinds, and if parties wish, will rent any kind at a small rental per month. Parties desiring any repairing done, needles, or anything in this line, will find a reliable man at No. 37 Sixth street, near Market.

California.

California is a peculiar land in a peculiar clime. California is a problem yet unsolved. Some of the factors seem to be discerned; others are still out of sight. Intellectually eccentric, socially unripe, morally undefined, our future, as a people, is a puzzle to philosophers. Our plant life is a treasure-house of novelties to the botanist; our zoology from the fish in the wave, the mollusk on the shore, the insects that devastate orchard and field, defoliate the foot-hill oaks or bore the Sierra pine, is *terra incognita* to the naturalist. Our meteorology defies the prophet at whose call fifty millions Americans beyond the mountains, fly the coming storms. Our industry is a youth whose present growth foreshadows an Hercules in strength; a Proteus in range of acomplishment. With her sky unknown, her soil almost untried, her manufactures just born and her people determined and yet bewildered by the novelty of the conditions and materials which surround them, California is indeed a mystery to herself and to the world at large.

Such being, in very outline, our place among the things which are, it is little wonder that California is often misunderstood and sometimes misrepresented. Even those who know California best know her but in part; no single man knows California wholly, even in her present state. Passing the California chapters in the sciences which have hardly their introductory paragraphs written, there is no one who knows wholly the single branch of our industry known as California agriculture—a branch with a thousand twigs and unnumbered leaves. This fact should be borne in mind by the thousands abroad who are prone to judge of California by the reports of individual successes or failures which come to their eyes or ears. In believing either the good or evil things which are said of our State, it should be understood that good might be evil and evil good, if either were moved up or down a valley, from hillside to plain or from coast to mountain.

Occasionally there is a man with keen observation and wide grasp of deduction who, even during a short acquaintance with our State, appreciates our conditions and sets them forth in language fitting their character. Such a one is Bishop E. O. Haven, who, writing to an Eastern journal (the *Christian Advocate*), thus freely chats of California:

California is the most mysterious of all the States I have yet seen; and I have traveled, more or less, in all but three. No brief description can give any adequate view of it. The encyclopedia pictures are, as usual, monotonous and cadaverous, while the sketches by travelers often fall into the error of representing the whole as like some little spot that happened for a time to fill the eye. California is full of contradictions. To those who wish to study it before seeing it we would recommend two precepts, namely: 1. Believe all that you read and hear about it. 2. Believe nothing that you read and hear about it; for all is probably true of some place, and nothing is true of a majority of the places. It is 700 miles long, north and south, and nearly 200 east and west—an immense nation of itself. It is a land of mountains, some perpetually snow-clad, and of valleys and plains, in most of which snow is never seen—except at a distance—a land, some of which is as barren as Sahara, and which yet could furnish several Egypts fully as fertile as the original valley of the Nile; a land of corn and honey and wine; of oranges, lemons, plums, apricots, peaches, almonds, and English walnuts and apples; of potatoes and beets, and squashes and melons; of treeless and grassless prairies and dense jungles, and shrubs and trees that began to grow before the times of Noah, and seem never to have found a stopping-place; a land of coal and silver and gold; of grizzly bears, coyotes and gophers, and of men and women from all parts of America and Europe, and not a small sprinkling from Asia. Take it for all in all, it seems about impossible to write what is not true about it. Still we will not try, but, as usual, endeavor to keep within the limits of fact.

One can see at a glance that California has mountain ranges extending crookedly north and south, with valleys and plains of various width between them. These are crossed by numerous passes and river courses east and west. Over all blow the west winds from the ocean, dropping their showers on the valleys and plains, and their snows on the mountains in the winter, and their water on the mountains in the summer.

Sometimes in your travels you will find yourselves sweeping over immense plains like those of Illinois and Texas, only not like the former in being actually boundless to view, nor like the latter in the border of forest trees, but terminating in mountains on one side clad in snow. These plains sometimes will be covered with fenceless wheatfields, the most prolific anywhere to be seen; in others, roamed over by cattle; in others, arid and useless; in others, broken into numberless orchards of every kind, and small farms; in others, covered with patches of forest; in others, narrowed down into valleys; in others, broken into hills and vales. The kind of agriculture suited to one place would be utterly useless in another.

Thus, California, with the usual variety of soil, becomes just about the most mixed up and infinitely various country of its size probably anywhere on the round earth. It is most of all like ancient Palestine, the Holy Land, only it is more than 50 times as large! Think of that—material enough to make 50 Palestines, and yet the one Palestine is giving character to the world! California ought to be able by and by to govern at least 50 continents.

We have indulged in a long quotation. We could not make it less, nor would we either, for these are facts which should be prominently set before the world. And if it be added that what Bishop Haven has written with chief reference to our agricultural conditions could be as well said, though in different words, of the varied character and development of all our resources and all our industries, the one who seeks to know California from a perusal of recorded facts or from a flying visit, may appreciate the problem which he attacks. California is great and is destined to be greater far. The tendencies now exerting their full force upon our people are of a most salutary kind. There has been a wonderful sweeping away of fallacies during the last few months and years. The real is putting to flight the unreal at every point. The shoutings of the demagogues have sunk to hoarse whispers and a busy people no longer listen. The fever for speculation has run its course, and the large on paper has been broken up into a thousand littles.

Highland Springs.

These springs are charmingly and fortunately situated among the sunny and airy high lands of Lake county, 27 miles northeasterly from Cloverdale (the nearest R. R. station), and eight miles south from Lakeport, the county town. Five hundred and twenty acres are embraced in the premises, which include a dairy, vegetable, stock, hay and grain farm. The springs were first brought to public notice about 12 years ago. At times, 100 to 200 boarders and campers have been quartered here. There are ample and finely shaded camping places. A pleasant grove adjoining the commodious hotel and cottages contains fine croquet grounds, lounging hammocks, and rural seats in shady nooks. The springs and a clear stream are close by. Warm, tepid and cold water baths, from natural and medicinal springs, are supplied free to boarders. A pouring stream and shower bath, of tepid, mineral water, is one of the most decidedly beneficial as well as enjoyable features of the bathing department.

We are aware of no more justly celebrated springs in California. Across the foot-bridge, which spans the creek a few steps from the hotel, is the "Magnesia spring." It has a large flow of tepid water, which, although slightly disagreeable to the taste, is decidedly agreeable to the health of many. A little further along is the "Magic spring," the water of which is slightly warm, but sufficiently impregnated with magnesia, soda, lime, iron and other ingredients, to render it tolerably palatable. This is freely drank by visitors, especially before eating. It has made remarkable cures from rheumatism, kidney and nervous diseases, and there are many who will bear decided testimony to its wonderful restorative powers. It supplies a large flow of water for the "pouring" and other baths. The "Dutch" spring comes out of a rock a little further down the creek, about 50 rods from the hotel. This gives a small volume of cooler water, highly charged with iron, etc., with a slight after taste, resembling coal-oil. This is also a choice spring and the favorite of many. Most extensively patronized is the Soda spring, situated on the opposite side and more nearly in front of the hotel. Its water is almost universally popular with both pleasure and health seekers. It is also renowned for its curative qualities. Large quantities of it have been bottled and distributed far and near to those who, from time to time, have become acquainted with its restorative virtues and palatable taste. It holds its strength and flavor in a remarkable degree when transported, and ought, in time, to become a popular drink abroad. While it is necessary for persons to visit these springs in order to fairly realize the advantages of the place, it is pleasant for the writer to be able to say that the proprietress, Mrs. Astoria C. Goods, succeeds admirably in rendering to her numerous and worthy class of guests pleasant and homelike accommodations, in a degree affording general satisfaction to them and credit to herself.

"Highland" post-office, located in the hotel, is a real convenience. Mails arrive in 10 hours from San Francisco daily, via Cloverdale. Visitors by this route have 27 miles of staging over a grand and picturesque route. They can return via St. Helena mountains and Calistoga, if they desire further views of wonderful and delightful scenery in Lake and Napa counties.

JOURNALISM.—President Garfield, in his address before the Ohio Editorial Association, at Cleveland, said: "It belongs to the honor of the press to have developed within the past few years as gallant a body of men, of as bright intelligence as the world knows in any profession—men who have illustrated what heroism is by bringing from remote and dangerous quarters those items of intelligence that do so much to enlighten the world. Two forces are needed to improve, enlarge, and ennoble the sphere of journalism. The first rests with us who are outsiders. If by all the means in our power, we can make the people so intelligent that they will only patronize the best and worthiest journals within their reach, we shall have done our part. And if on your part you do so enlarge the sphere of your work, and increase its intelligence and justice and force, that ignorant and weak men will not want your journal—and only the worthy and honorable will deserve it—between you and us, the profession of journalism will go in no noble inprovement, bettering that growth, and increasing the security of liberty in your country."

THE real estate agency established by Bro. W. Lindsey, in 1858, and located at No. 9 Geary, is one of the reliable houses of this city. Anyone wishing to buy or sell real estate, have rents collected or rent houses, will find this the place to get information in city or country.

WE take pleasure in calling attention to the wholesale provision house of Nordbruch, Witzel & Co., 324 Clay street, near Battery. Having had large experience in this line, our genial brothers can be relied on as intelligent and square dealers.

READERS desiring to purchase anything in the line of hats, caps, etc., especially at this time in the way of straw or summer hats, would do well to examine the extensive line of Bro. C. Herrmann, the hatter, 336 Kearny street, near Pine.

Water as a Part of Diet.

Many persons drink ordinarily as little water as possible, and none at all at meal times, because they suppose that water dilutes the gastric juice. Experiments, however, show that dilution does not diminish the digestive power of the gastric juice, and further, that water alone, as well as solid food, awakens its secretion.

A paper, read by Dr. Webber, of Boston, at a meeting of a learned medical society, took the ground that water, used moderately at meals, is beneficial, and that a large class of people drink too little.

The result is, if too little water is drank—especially if the person eats heartily—the perspiration and the kidney secretions are diminished. Not only they, but the waste of the system which can be removed only in a state of solution, is not eliminated with sufficient regularity and fullness, and the system becomes gradually clogged by it. The accumulation is slight from day to day, but in time unpleasant symptoms are developed.

These symptoms are of an indefinite character—discomfort, even pain, sometimes in one place and sometimes in another, constipation and unhealthy hue of the skin.

"Patients," says Dr. Webber, "who drank no more than a pint of water a day, have told me that they were not thirsty. They were surprised when told to drink more. Those who have followed this suggestion, in the course of a week have developed thirst, and drank as many as three pints of water a day."

We may add that water taken into the stomach is at once rapidly absorbed by the blood vessels. A bowl of well-seasoned broth as a first course is specially helpful to the above class of patients. A large quantity of ice-cold water is harmful to any one.

Dr. T. C. Duncan, in his book entitled "How to Get Plump," shows the necessity to the human system of frequent draughts of water. The Doctor says that "few people appreciate the fact that water constitutes in the normal human subject about 70% of the entire weight of the body. The water which thus forms a part of the animal frame is derived mainly from without. It is taken in the different kinds of drink, and also forms an abundant ingredient in the various articles of food. Water is abundant in the blood and secretions, where its presence is indispensable in order to give them the fluidity which is necessary to the performance of their functions. Water is therefore an essential ingredient of the fluids, for it holds these solid materials in solution and enables them to pass and repass through the animal frame. Water is also an ingredient of the solids—muscles, tendons, cartilages, bones, teeth, glands, skin, etc. If the water of tendons, skin, etc., be evaporated they become yellowish in color, shriveled and unfit for performing their functions. This accounts for the sallow appearance of lean people. With these facts before us, continues Dr. Duncan, we can readily understand why a person who does not take much water except in food is lean. Lacking the necessary fluidity, the functions are all performed with difficulty. Many cases of dyspepsia are due to lack of water. Many cases of headache can be relieved by increasing the fluidity of the blood. Many a case of functional palpitation of the heart can be mitigated by increasing the volume of the circulating fluid with an extra pond of water. I generally order a half-pint of water to be taken four times a day, early in the morning, about 10 A. M., about 4 P. M. and before retiring. I forbid cold water to be taken at meals, for the reason that the stomach is then at its highest functional activity, and cold lowers its temperature and retards digestion. Warm fluids, like milk and water, facilitate digestion.

PROF. H. C. EASTMAN, Teacher of Elocution and voice culture, 611 Post street, offers his professional services to persons wishing to cultivate their voice in elocution or music. Any one suffering from stammering or impediment in speech can be benefited by placing themselves under his instruction. Bro. Eastman has had a large experience in his specialty in this State and Nevada as one of the most successful teachers. At our Lodge entertainments and celebrations he frequently consents to recite or instruct in his art. It is always a treat to listen to his extraordinary and highly-cultivated oratorical efforts.

POINT REYES' BUTTER DEPOT.—Bro. J. P. Davenport has associated himself with Mr. A. H. Stinson, who is one of the largest manufacturers of the celebrated Point Reyes' butter, and established stalls 13, 14 and 34 Center Market, corner of Dupont and Sutter, where they will sell butter direct from this celebrated dairy. To make this a popular resort they have added eggs, cheese, honey, choice potatoes, etc., etc., and will deliver goods free to any part of the city.

ONE of the cheapest and most reliable places to get watches and jewelry repaired is at Bro. S. F. Purdy's jewelry store, No. 16 Fourth St., near Market.

ANY one wishing tinning, gas-fitting, plumbing repairing of stoves, grates, boilers, etc., will do well to call on Bro. A. H. Mower, 334 Sixteenth St., near Valencia.

Grand Recorder's Statement for June.

We condense from Grand Recorder Pratt's Financial Statement for June the following leading figures:

WARRANTS ISSUED.

225, Salary, H. G. Pratt, G. Rdr		291.65
227, Supplies, F. Kroger, & Co		$ 31.40
228, Contingent, C. H. Haile, G. Rvr		25.00
229, Contingent, Wm. H. Barnes, G. M		100.00
230, Expense, David Farquharson		50.00
232, Supplies, Wm. B. Hardy		5.70
232, Expense, Wm. B. Hardy		9.00
235, Contingent, Postage, H. G. Pratt, G. Rdr		19.30
235, Contingent, Expense, H. G. Pratt, G. Rdr.		17.30
235, Exchange, H. G. Pratt, G. Rdr		2.95
235, Contingent, Supplies, H. G. Pratt, G. Rdr		1.35
Total amount warrants issued, G. F		$ 553.65

SPEED AT WHICH WINGS ARE DRIVEN.—The speed by which some wings are driven is enormous. It is occasionally so great as to cause the pinions to emit a drumming sound. To this source the buzz of the fly, the drone of the bee, and the boom of the beetle are to be referred. When a grouse, partridge or pheasant suddenly springs into the air, the sound produced by the whirring of its wings greatly resembles that produced by the contact of steel with the rapidly-revolving stone of the knife-grinder. It has been estimated that the common fly moves its wings 330 times per second, that is, 19,800 times per minute, and that the butterfly moves its wings nine times per second, or 540 times per minute. These movements represent an incredibly high speed even at the roots of the wings; but the speed is enormously increased at the tips of the wings, from the fact that the tips rotate upon the roots as centers.—*Fraser's Magazine.*

MINHO PEASANT GIRLS, PORTUGAL.—Nowhere among the peasants of any nation that we have seen in person or in picture have we met more barbaric brilliancy of costume than at a meeting of Minho country girls in holiday attire. The flashing colors of the very full, many-pleated stuff petticoats, the immaculate white sleeves and dark bodice, with its embroidered border, the gay kerchiefs over the dark locks and about the neck, and the profusion of filigree jewelry, a little gold being hammered out so as to go a great way, and expanding itself into cobwebs of delicate tracery, waffle-iron earrings as large as the palm of a man's hands, and several pairs worn at once, the entire corsage covered with a cuirass of chains, hearts, crosses, and other ornaments, make up a *tout ensemble* which even Solomon in all his glory would have found it hard to rival.—*Harper's Magazine.*

SIGN OF DEATH.—Dr. Chiappoli stated that he has frequently noticed in patients, apparently far from death, an extraordinary opening of the eyelids so as to give the eyes the appearance of protruding from their orbits, which was invariably a sign that death would occur within 24 hours. In some cases, when only one eye is wide open while the other remains normal, death will not follow quite so rapidly, but it does take place in a week or so. It is easy to observe this phenomenon when the eyes are wide open, but when, as is generally the case the eyes are half shut and only open from time to time, and it will be advisable to fix the attention of the patient on some point of light in order to see the change. Chiappoli is utterly at a loss to explain this symptom of approaching dissolution, and ascribes it to some diseased state of the sympathetic nerve.

THE business attending the consolidation of the *Record* with the WATCHMAN having been concluded after our first forms were printed, we are unable to furnish the subscribers of the *Record* a full 16-page paper, but herewith send the last 8 pages.

PACIFIC STATES WATCHMAN.

A. O. U. W. Home Paper.

Issued on the 1st and 15th of each month.
At No. 202 Sansome Street, San Francisco, Cal.

Subscription (in Advance), $2 a Year.

Favorable to Advertisers.

By consolidating the large subscription lists of the *Pacific Workman* with the Pacific States Watchman our advertisers gain an unusually great advantage. We doubt if any one weekly newspaper has ever been circulated to as many different readers on this coast, as have been served heretofore by the *Workman* and Watchman together. Certainly, no other periodical is now patronized by a better class of industrial, professional and business men. In fact, our subscription list (like the A. O. U. W., still increasing), embraces many of the foremost business and representative men throughout the towns and cities of the coast.

We have pride in making our paper "clean and handsome," and first class in all respects—to the benefit of both our readers and advertisers.

ADVERTISING RATES.

One Square (¼ inch), per issue	$ .75
One Square per month	1,25
Two Squares, per issue	1.50
Two Squares per month	2.50
Obituary notices and resolutions (with 25 copies post-paid for friends of deceased) per sq. (¼ inch)	50

☞For reading notices, extraordinary display, special advertising and choice places permanently, extra rates will be charged. Reasonable reduction will be made for large and long-continued advertisements. No extra rates for the space occupied by engravings.

OFFICIAL RECOMMENDATION.

[*Resolutions adopted by Grand Lodge of Cal., Feb. 3, 1881*]

Whereas, the Pacific States Watchman, the pioneer A. O. U W. advocate on this coast, without official aid, has long rendered able and valuable services for the good of our glorious organization, we earnestly recommend that our Lodges and the brethren individually patronize the Watchman as liberally as circumstances will justify.

Entered at San Francisco P. O. as second-class matter.

San Francisco, - July 15, 1881.

A. O. U. W. Lodges as Bankers.

The rapid growth of our A. O. U. W. Lodges has brought with it comparatively large sums of money. Many of them have used surplus funds to pay assessments, and each one of them has donated, from time to time, sums of money to assist a brother in distress. Of late, however, a new practice has been inaugurated, that of loaning money to brethren, not only to assist them in some necessity, but to set them up in business. After a careful survey of the results of this practice, we are convinced that it is creating dissatisfaction and jealousy, and if continued, will bring disaster and ruin to any Lodge that sets itself up as a banker to loan money at will by a majority vote of the members present. A number of our Lodges, profiting by the experience of the past, have incorporated into their by-laws a provision that no loan shall be made to any one of its members, of general Lodge funds. In the ideas advanced here, we do not mean to draw the strings on the general fund so tight that true charity shall not be dispensed as long as there is a dollar in the general fund, or even go so far as to levy a small assessment on each member to relieve a worthy distressed brother. If a brother needs assistance for the necessities of life for himself or family, help him by a donation and let that end the matter. If one brother is set up in business from the general fund, all should be who may desire to avail themselves of this easy road to prosperity. If this practice is to become a part of our system, we fear that there will be a run on the bank that will end in disaster, ruin and crimination.

To Patrons and Business Men.

In the consolidation of the *Fraternal Record* with the Pacific States Watchman we have added to our large list of subscribers those of the *Fraternal Record*, which will make the Pacific States Watchman one of the most desirable papers for advertisers published in this State. Our circulation is general throughout the Pacific coast, a small circulation in many of the Eastern States and among all fraternal and beneficiary societies. As a family and fraternal paper, patronized by a select class of citizens, we offer a portion of our columns to the public, with our increased circulation, without any advance in rates.

An excellent literary production read before a recent meeting of Gold Hill Lodge, No. 2, Nevada, is unavoidably laid over till our next issue.

The Fraternal Feature.

That protection to our wives and families is the chief object and aim of the A. O. U. W. nobody will seriously dispute. That in this it has proven a grand success is beyond demonstration to the contrary. This success has come through the fraternal features of the organization, but so prone are men to lose sight of this fundamental fact that we find it constantly necessary to iterate and reiterate the fact—to give line upon line, precept upon precept, and example upon example. No one pretends that Masonry or Odd Fellowship could exist with the principle of fraternity eliminated. It is the foundation on which alone they rest. This is no more true of them than of the A. O. U. W., and yet how few there are who realize the full force of this important truth? The proof of our position can be substantiated by any one who will seek practical examples. Those Lodges in which fraternity is most sacredly cherished, where the ceremonies are most strictly observed, and the "work" performed in the most precise and workmanlike manner, are invariably the most successful and prosperous.

And yet, with these facts plain before our eyes, we see in our members, in our Lodges, Subordinate, Grand, and even in the Supreme Lodge, a constant tendency to lose sight of what is most important, and fritter away time and endeavor, on things of trifling importance to the Order, while the chiefest matters, to use a homely expression, are dismissed with a "lick and a promise." It was so at the late session of the Supreme Lodge. The session lasted seven days. Look over the proceedings and see how little was done of real importance to the Order; and yet it was an industrious body that lost no time in its work—it simply wasted precious moments on trivial matters, giving little or no heed to those which should have had the first place in its consideration. True, a little was accomplished in the way of perfecting our ritual and unwritten work, thanks to the California delegation, but more was left undone that ought to have been accomplished. We ought to have had a magnificent Grand Lodge degree; the Degree of Honor ought to have been endowed with the elements of success or eliminated altogether from the Order; and our installation and burial service ought to have been revised. We dislike to find fault, but knowing how important are these matters and how little consideration it was possible to get the Supreme Lodge to give them, we submit that we have a right to find fault, and to lift up the voice of earnest Workmanship against this trifling with the most holy things of our temple.

After all the Supreme Lodge is not so much to blame as the membership in general. It is but a representative body. It necessarily to a great degree is but the expression of the brotherhood in general. The stream may be great, and deep and grand, but it is only water—and not more pure or good than the little springs whose aggregate make up its mighty volume. Reform in the matters we speak of must come from the fountains from whence the chief body has its source. We are justly proud of our jurisdiction. We are proud that her voice has been potent to give nearly all the real reforms of which the Order boasts since she had a place in its councils, and this is because we have cherished fraternity. It has built us up and still sustains and prospers us as no other jurisdiction has been builded or prospered. It has given us a more glorious record than any other jurisdiction can boast, and it is potent to sustain us in our proud position.

A Brother Workman, in renewing his subscription, says: "I find the Watchman a first-class fraternal paper, and well worthy the support of every member of our Order, and that I shall in the future, as I have done in the past, always say a good word for the Pacific States Watchman." This is one of the many kind words which the brothers give to us, and it shall always be our endeavor to merit their confidence and esteem.

Keystone Lodge, No. 64, Oakland, moved into a fine new hall in California Medical College building, 1015 Clay street, between Tenth and Eleventh, on July 1st. A committee was appointed at the last meeting to provide monthly entertainments.

To the Patrons of the Fraternal Record.

Brethren:—We have disposed of the *Fraternal Record* to the proprietors of the Pacific States Watchman, which paper will be supplied to you for the unexpired term of your subscription to the *Record*.

While we regret this severing of our business relations with those who so generously subscribed for the *Record*, we feel that we have acted judiciously and done that which will result in supplying them with one of the best fraternal papers on this coast, one conducted by a house amply able to fulfil their agreements, and we think it will prove as attractive and interesting as the *Record* could have been. Having been invited by the publishers to continue our contributions to the general society columns of the consolidated journal, our friends may expect to hear from us as heretofore in promoting their several interests.

All subscriptions unpaid at this date, and other outstanding accounts, and communications intended for publication in any of the departments, should be addressed to Pacific States Watchman, 202 Sansome street, S. F.

Yours fraternally
J. W. Kinsley & Co.

San Francisco, July 13, 1881.

To Our Readers.

Believing it to be for the permanent interests of the friends and patrons of both the *Record* and the Watchman to consolidate the subscription lists of the two journals, we have entertained the proposal of Bros. Kinsley and Jephson, and shall use our best endeavors to carry out to the entire satisfaction of every patron the arrangement above mentioned.

The consolidation gives us encouragement to work with new zeal and increases our power to make a more valuable and influential fraternal journal than we could otherwise furnish.

The space devoted to the different fraternal societies, will be extended without depreciating any of the other popular departments of our paper. By the aid of additional patrons and able contributors, we are confident of making the Watchman more than ever before valuable to its readers, and render it still more creditable to the intelligent and progressive community it represents.

We cordially invite the contributors of the *Fraternal Record*, and its many worthy friends and supporters, to lend us their support in advancing the cause we mutually espouse. We also invite the aid of new correspondents and agents from all quarters of the fraternal field.

Watchman Publishing Co.

San Francisco, July 13, 1881.

Bro. Geo. Hottua, of Bernal Lodge, No. 19, an officer in his Lodge for the last two years, has been in attendance on every Lodge meeting but one during that time.

Grand Recorder's Department.

Headquarters of Grand Lodge, A. O. U. W., Rooms 40 and 41, St. Ann's Building, corner of Eddy and Powell, San Francisco. H. G. Pratt, G. R.

Wm. C. Flint, Esq., 216 Sansome street, San Francisco, is Chairman of Committee on Laws and Supervision. All By-Laws, or amendments to same, should be sent directly to him.

Don't send us mutilated coin or currency. It is not bankable, and we can only dispose of it to some broker for what it will bring, and then charge the difference back to the Lodge sending it.

Hereafter regular monthly reports will be insisted on from every Lodge in the jurisdiction. It is impossible to keep our records correctly without them. Brethren, remember that whatever is worth doing at all is worth doing well.

If Deputies and Recorders would read the Watchman carefully they might save themselves and this office a world of bother. While the matter printed in this department is not official in a technical sense, still it ought to be regarded as sufficient to direct attention to the law on matters referred to herein, which will be found as stated to be. We write to instruct, not to mislead.

It may be well to call the attention of our membership to the fact that, under the decision of the Grand Master, no claim of an administrator or executor will be recognized on a beneficiary certificate payable "subject to will" or "subject to order" where no will or order has been made. The payment then will be made to whomsoever the Grand Lodge or Grand Master may deem justly entitled to receive the money, there being no one legally entitled to claim it. The loss will be adjusted solely on grounds of equity and fraternity, and payment made accordingly.

Recorders will please bear in mind that we have but two kinds of cards, "clearance cards" and "final cards." A clearance card shows a clearance of dues up to a certain specified time, which is stated on the card, and gives the member the privilege of joining another Lodge within such time, provided all his assessments have been paid, which fact must be ascertained from the Lodge granting the card, before he is admitted to another Lodge as a member. A clearance card does not sever a member's connection with his Lodge. That is not done till he legally becomes a member of another Lodge. Previous to such time he should be treated, in all regards, the same as any other member, so far as his rights and liabilities in his Lodge are concerned. The *granting* of a clearance card should not be reported to this office, but if a member transfers his membership that fact should be reported, giving the name and number of the Lodge to which he went or from which he came, with date of the transaction. A final card is the written evidence that the member has honorably severed his connection with the Order, having paid all claims against him up to date of issuing the card, and surrendered all claims of whatever kind upon the organization. This matter should be reported, as in the case of the transfer of membership.

Lodge Locals.

Recorders are invited to correspond. Members may also find suitable reading here for "good of the Order" in the Lodge.

Blue Canyon, 184.

C. B. Patrick, D. D. G. M. W., writes us that this Lodge has succeeded nicely during the term, and expect fruitful results during the coming one.

Butte, 114.

Editors Watchman:—Our Lodge is in a flourishing condition. We meet on Monday night of each week, and have a membership of 35. The attendance averages about 18 nightly. We have five members who cannot reach us. We were honored by a visit from Bro. Kingsley on Monday, June 27th, who gave us some very useful suggestions, and complimented us very highly on our attendance and our work. We are well up in the work, and have good, interesting meetings, always something for the Good of the Order. Our election of officers passed off very pleasantly, most of the incoming officers being elected by a unanimous vote. We are always glad to see any Grand officer or visiting brother. More anon.—Yours, fraternally, R. C. Hunter, P. M. W.

El Dorado, 118.

Editors Watchman:—The following is a brief statement of the business of this Lodge for the past term: Number of members at the beginning of the term, 38; admitted during the term, 12; the largest gain was in the month of March, seven applications being received and accepted. The Lodge has under consideration a proposition to celebrate the second anniversary of its organization, which occurs on the 29th inst. I noticed, some time ago, an item in the Watchman, stating that a Lodge in Iowa, I think, had photographs taken of all the officers since its organization. Now, I want to say that this Lodge has the photographs of all its charter members except one, S. F. Chapin, now of Enterprise, No. 17, he having removed too soon to get his picture taken; but there is room in the frame for it, if he will forward it to the Lodge—all framed and hanging in the Lodge-room. There is now a standing resolution to the effect that when the members have cabinet pictures taken, the Lodge will frame and hang them alongside of the charter members.—H. B. G.

Fresno Lodges.

A. J. Pedlar, D. D. G. M. W., writes as follows: Both Yosemite and Wahtoga Lodges, of this (Fresno) county have grown during the past term, and other additions are soon to follow. As an indication that Fresno is growing in population, I cite the fact that Yosemite Lodge had four accessions by card during the past six months.

Hearts of Oak, 61.

This Lodge, writes S. Osterhout, Recorder, meets in A. O. U. W. hall, West Berkely, on Wednesday evenings. It is progressing steadily, good will and harmony prevailing.

Laurel, 134.

Editors Watchman:—Having never seen any communication from Laurel Lodge, No. 134, in your columns, I thought that perhaps a few words might not be amiss. Our Order in this community is flourishing "like the green bay tree." We have almost doubled our membership during the past six months, and have several applications now on hand. Up to this time, there has not been a single death among our membership. Until the past term we held our meetings

semi-monthly by dispensation; but for the term just passed we have met once a week, our application for dispensation to meet twice a month having been disregarded.—FOREMAN.

Lakeport 34.

Lakeport No 34, we are glad to learn, is prosperous. J. B. Baccus, of the Lower Lake *Bulletin* entertained his fellow members with some interesting remarks at a late meeting. Thirty-four has a devoted member who travels 30 miles to meet his Lodge. Some others come from 15 to 20 miles. We learn from our friend H. A. Oliver, P. M. W., who is County Clerk and one of the solid citizens of Lake County, that during Brother Daley's administration as M. W., since January last, the number of members in good standing have been increased from 33 to 47. A class of four are ready for the M. W. degree. All assessments in 1881 above $1 a month have been paid out of the general fund, accruing from monthly dues of 50 cents.

Mission, 56.

EDITORS WATCHMAN:—Mission Lodge, No. 56, takes pleasure in answering to the semi-annual roll call with increased numbers and quickened interest. With its third year almost completed it has steadily advanced to a membership of 69, without the loss of a member by death, suspension, or expulsion. The monthly calls for relief are promptly answered, showing confidence in the investment. "Let us stand together," seems to be the watch-word. The discipline is good; any dereliction or neglect of officers is promptly pointed out by the proper committees, and care taken that it does not again occur. This was notably the case in the last semi-annual report of the Finance Committee, who, with keen scent, and unwinking eyes, scrutinized the books, and made even small errors, that will sometimes, from absence of the elected officers, occur, however capable the substitute, loom into glaring proportions. The report provoked a discussion, to dispose of which a number moved to reject the report, which motion was happily voted down, and another, to defer action for a week, carried. By that time all little discrepancies and neglects will probably be remedied. We have good material—strong and varied—men who deal in sober facts, and those from whose lips fierce and fiery philipics burst; those whose speech flows in smooth numbers, and a not inconsiderable background of solid listeners who, when judgment admonishes or sleep oppresses, call for the main question and mercilessly silence debate. H. Dusterberry, Chairman of the Alameda Board of Supervisors, a popular and faithful man, who loves his country, his Lodge and Shakspeare, is now M. W., and we expect a prosperous term under his management. After the installation, on the evening of the 2d, a hearty, sensible banquet, without confections, seasoned with mirth and wit, was served by the phlegmatic host of the Mission, Chas. Steyer, at which E. M. Reading, of San Francisco, Israel Horton, D. D. G. M., of Livermore, made speeches, eliciting responses from several members of Mission Lodge. Mission Lodge pays $10 a week sick benefits; during the past six months $190 has thus been applied, in most cases with an eagerness that must have been most gratifying to the recipients. How long this can be done, with dues at one dollar a month, remains to be seen; but the disposition animating the brethren is, according to the Arabian injunction from the Koran: "Thou shalt not only give alms to thy brother, but thou shalt do for him whatsoever thou canst."—P. M.

Redwood, 25.

EDITORS WATCHMAN:—We can echo the response you receive from all portions of the State, that our Lodge is in a very prosperous condition. We are making a few members, enough to keep us bright in the work. It is highly gratifying to notice the promptness with which the members pay their assessments, the Financier's voice never sounding better than at the close of each month's business for the term, he stated, "No delinquent M. W." Promptness in the payment of dues and assessments saves the officer much labor and keeps the standing of our Order where it now is, at the head of fraternal societies. With the present efficient head of our Lodge, we look for a healthy increase of members during his term. As for the WATCHMAN, well I do not think you can complain of Redwood Lodge, No. 25. We all either take it or manage to get it to read. It gives us information about the Order we can glean from no other source.—Fraternally, G. H. B.

Redwood City, July 10, 1881.

Red Bluff, 69.

S. P. Freeman, Recorder, reports the Lodge doing finely, a great deal of interest being manifested in the work.

Santa Barbara, 172.

Thos. R. Dawe, D. D. G. M. W., writes: Our Lodge is prospering, adding new material almost every night. I believe it generally conceded that No. 172 is the "bon ton" Lodge of this jurisdiction, not in numbers but in good material.

Sacramento, 80.

Geo. B. Katzenstein, Recorder of No. 80, reports the Lodge as having a membership of 164, showing a steady gain in membership and finances.

San Rafael, 24.

EDITORS WATCHMAN:—We have a good Lodge here of 46 members. Admitted 16 last term and are steadily increasing. There is one point in law which puzzles me considerably. A candidate for membership can only be rejected by ballot or physician's report. Now, it seems to me that if the whole, or a majority of the investigating committee report unfavorably, it is only idle ceremony to ballot. It looks to me as if that ought to reject without ballot. I should like to see it answered through the WATCHMAN. I am much pleased with the WATCHMAN. As Recorder I have gained a great deal of information from it.—Fraternally, TH. HANSEN. [A ballot has to be taken upon the report of the committee. It sometimes happens that events will be brought to the attention of the Lodge which will change an unfavorable report of the committee, and the committee will themselves vote in favor of the candidate.—EDS. WATCHMAN.]

Keystone, 9, D. of H.

Wm. H. Barnes, G. M. W., assissted by E. F. Loud, D. G. M., and J. Steinmetz, Deputy, instituted Keystone Lodge, No. 9, D. of H., at Amador City, on the 5th, with 35 charter members, and installed Mrs. J. R. Johns, P. W. S.; Mrs. J. F. Parks, W. S.; Miss A. Peyton, S. of H.; Mrs. S. Love, S. C.; Mrs. M. A. Mitchell, S. N.; Miss Hartwick, Sec.; Mrs. Gregor, Treas.; G. Gregor, O. W.; J. F. Parks, I. W.; J. R. Tregloan and J. R. Johns, Advisers; Mrs. Tregloan and Mrs. E. Lewis, Maids of Honor.

San Francisco Lodge Locals.

Installation Ceremonies.

The officers elect of Washington Lodge, No. 60, were installed by Bro. Smith, D. D. G. M. W., assisted by H. E. Prince of Sts. John, acting as P. G. M. W., H. Wolfsohn, of Washington, as G. F., and J. W. Kinsley, of Sts. John, as G. G. The installation was performed in an unexceptional manner, the service being given letter perfect, without the aid of the ritual, in that dignified and impressive manner that is known to him as an efficient officer. A vote of thanks was tendered the Grand officers for their attentive and courteous duties in installing the officers. Several questions of importance came up, and were ably discussed by the different brethren present. Under head "Good of the Order," Bros. Smith and Kinsley made some able and instructive remarks, calling up reminiscences of the early history of our Order and benefits derived by being a member of this grand organization; followed by Bro. Wolfsohn in a few remarks on the early history and triumphs of Washington Lodge, No. 60. Bro. Eastman gave a recitation that was received with much favor.

The newly elected officers of Friendship, No. 179, were installed on July 6th by Bro. Caleb Brind, D. D., with Bros. Falkenstein, of San Francisco, Cody, of Magnolia and Harrold, of Friendship, assistants. The ceremonies of installation were performed with quick dispatch, when the Grand Lodge officer hied away to install the officers elect of San Francisco, No. 4. This honored pioneer has a set of very efficient officers, and it is understood that there will be a large increase in membership. The Guide, Bro. A. D'Elom, has served eight terms and enters on his ninth. San Francisco, No. 4, the oldest city Lodge, with a membership of 132, has never lost a member by death, nor has any one who has been a member died. Following still a careful and conservative policy, its membership is made up of a number of our leading citizens. She has a record and a seemingly charmed existence ahead of any Lodge in this jurisdiction.

Caleb Brind, D. D. G. M., installed the officers of Spartan Lodge on July 1st, with a Grand Lodge as follows: G. Falkenstein, P. G. M. W.; E. Danforth, G. F.; H. Shoemaker, G. O.; J. Davis, G. G. After the installation, Wm. S. Hout, P. M. M., was the recipient of a handsome set of silver spoons and forks. The gift was a token of the esteem in which he is held by the members, and also of the worthy manner in which he presided during the last term.

Caleb Brind, D. D. G. M., installed the officers of Magnolia on July 11th, G. Falkenstein acted as P. G. M. W., S. Weintraub as G. F., J. O. Jephson as G. O., and J. Davis as G. G. The hall was completely filled, and the installation services were performed with precision and dignity without the aid of the ritual. After the installation services the M. W. degree was conferred upon two brethren by the newly-installed officers, Bro. Warshauer, the M. W., giving the work in a perfect and very dignified manner, for which he received several very merited compliments. This was one of the interesting meetings of this year.

The officers of Noe Valley were installed by A. A. Egleston, D. D. G. M. W., assisted by Chas. Haughton as P. G. M. W., John McIver, of Myrtle, as G. G. The ceremony of installation was performed by the D. D. in a very creditable manner, after which he addressed a few words to the Lodge. Several visiting brethren were present, among whom was Bro. Wm. Decker, M. W. of Harmony, who made a few remarks to the Lodge. The M. W. of Noe Valley was called on, and responded in a few and well-timed words. Several of the other brethren also spoke. All present seemed to enjoy themselves, and went home pleased with the evening so well spent.

The officers elect of Unity, No. 27, were installed by Caleb Brind, D. D. G. M. W., assisted by the following P. M. W. acting as Grand officers: G. Falkenstein, P. G. M. W.; G. Winehill, G. F.; J. F. Hollings, G. O., and J. Davis, G. G. The ceremonies were conducted in fine style, the Deputy dispensing entirely with the book.

The officers of Olympic, No. 127, were installed Tuesday July 5th, by W. H. Smith, D. D. G. M., assisted by Prince E. Hilton (of Hercules) as P. G. M. W., J. W. Kinsley (of Sts. John), as G. F.; J. O. Jephson (of Sts. John) as G. O., and T. A. Farless (of Fidelity) as G. G. The ceremonies were conducted smoothly and evenly, and at the close a vote of thanks was passed to the Grand officers. Very excellent speeches were made by all the Grand officers and some visiting brethren. A very pleasant session was held, the Grand officers contributing in no small degree, by the merit of their addresses, to make the evening profitable.

The installation services of Myrtle were performed by T. W. Shaw, D. D. G. M. W., assisted by Ellis, P. M. W. of Bay View, in that quiet, dignified and correct manner that his large experience in society business enables him to perform. The degrees were conferred on two candidates, after which a general talk was indulged in. Bro. Shaw opened the programme, followed by Bros. Ellis, J. D. Thompson, Gilmore, Barry, McIver and others. After the Lodge was closed, the "third degree" was conferred by passing around the Havanas.

The officers of Harmony, No. 9, were installed in their respective places on July 2, by H. H. Mayhew, D. D. G. M. W., with the following assisting as Grand officers: John R. Fishbeck, of Harmony, as G. P. M. W.; Geo. B. Palmer, of Harmony, as G. F.; W. Z. Whitten, of Harmony, as G. O.; L. B. Schord, of Burns, as G. G., and Chas. D. Coon, of Yerba Buena, as G. W. The J. W. degree was conferred on four, and several applications read. Harmony, No. 9, has a good set of officers, and we may expect this term to be one of prosperity.

The officers elect of Memorial were installed by H. H. Mayhew, D. D. G. M. W., on July 11th, Bro. Booth of Excelsior acting as P. G. M. W., and Bro. John Blohm as G. G. This young Lodge starts out with an efficient set of officers. Harmony and a friendly feeling and unity of purpose to increase the membership to 100 this term are prominent features.

Bro. A. A. Egleston, D. D. G. M. W., installed the officers of Bernal on July 11th. There was a large audience in attendance of their own membership, also a goodly number of visitors. The following officers assisted: Bros. Haughton as P. G. M. W., G. M. Lawton as G. F., J. D. Thompson as G. O., A. V. Thompson as G. G., and Jas. Watterman as G. I. W. It was a grand meeting and the services were in keeping with the reputation of our Bro. Egleston as one of the efficient officers of our great organization. A commendable feature was that the efficient D. D. gave the prescribed ritual letter perfect from memory. After installation, speeches and congratulatory remarks were indulged in by members of Bernal and visitors.

The officers elect of Hercules, No. 53, for this term, were duly installed in their several offices on July 1st, Bro. Smith, D. D. G. M. W., assisted by Bros. P. E. Hilton, of Hercules, as P. G. M. W.; Morrison, of Hercules, as G. F.; T. A. Farless as G. G. The installation was performed with dignity, correctness and quick dispatch. There were a goodly number of brethren present, including several visitors. The installation services were followed by a general clapping of hands and a unanimous vote of thanks to D. D. Smith, for the able manner in which he had performed the services. Under head, "Good of the Order," Bros. Smith, D. D., and T. A. Farless, of Fidelity, addressed a few congratulatory and well-timed remarks to the brethren. Bro. Carroll, M. W., was called, and made a short speech that was received with much favor, followed by Bros. Manzer, F.; Congdon, O.; Hilton, P. M. W.; Fick, I. W.; Miller, Guide, in remarks that were appropriate to the occasion, and all seemed happy and contented.

Franklin, 44.

At the last meeting of Franklin No. 44, a committee of five was appointed to take into consideration the celebration of their anniversary which will occur on or about the 1st of August. We have no doubt that the old pioneer will give an entertainment that will be pleasurable and profitable both to Lodge and guests. A very commendable feature of this Lodge was the punctual attendance of her officers at the last term. The roll shows but one absentee in all the whole term, and that but for one night.

Magnolia, 41.

EDITORS WATCHMAN:—I take pleasure in writing you concerning one of the subordinate Lodges, that is thriving and is second to none, Magnolia, 41, though it is not mentioned every Sunday morning in the Fraternal Society column of the *Call*. One reading that journal would hardly think there were 22 Lodges in this city striving hard to not only make their Lodges a success, but the entire Order. We are pleased to read your journal, as it is impartial and deals with all alike. Magnolia will celebrate its third anniversary on July 14th, by an invitation party, and have been more general than most of the Lodges in the city by sending tickets to all Lodges of the Order here, as well as the entire press of the city. For the first year it was a question if this Lodge could exist, as it had but 40 members, but fortune favored her, and by the introduction of a few new young members about that time, before another term of six months, the Lodge had 100 members; at its second anniversary it had 137 members, and now, its third anniversary, has 183, having gained 28 during the last term of six months. But six members have ever been suspended from the Lodge for non-payment of dues, which is remarkable, the dues being $1 per month besides the assessments. Our Lodge pays sick benefits of $10 per week, and has been fortunate enough to have had to pay out only $200 for sick benefits. We have $2,500 in bank, being more money than any Lodge of the Order in the State. Besides, this Lodge pays $50 towards funeral expenses. I intended giving you a list of newly elected officers, but it appears already in your issue of July 1st. Our Recorder, Financier, Receiver and Outside Watchman seem to have been elected several years ago, to stay in office as long as they desire to serve the Lodge, they being very efficient in their respective places. Magnolia is composed largely of young men, and a visit would be pleasantly spent with them.—ANON.

Social and Literary Entertainment of Noe Valley.

On Tuesday, 28th June, this young and progressive subordinate had a very interesting meeting. After the election of officers, the following programme was happily rendered to an over-crowded house: Piano duet, Miss Sadie Welman and Miss Laura Jordon; remarks by A. A. Egleston, D. D. G. M. W.; recitation, Miss Mamie Madson; piano solo and encore, Mrs. Dr. W. P. McDermot; reading, J. D. Thomron, M. W.; recitation, Miss Cynthia Souther; song, Miss E. S. Coon, Mrs. McDermot accompanying on the piano; scientific lecture, A. D. Jordon; song, Miss Mamie Souther; reading, comic, Chas. D. Coon; reading, comic, G. M. Lawton. This closed a very pleasant and enjoyable affair, that was under the guidance of Bro. A. V. Thompson, Recorder, after which dancing was indulged in until a late hour, all agreeing that this was one of the best socials of the many this season.

Aurora, 8, D. of H.

This bright young Lodge of the Degree of Honor, has now passed through all the essentials needed to a successful administration of affairs, the brothers and sisters are becoming more acquainted, and consequently happy meetings will hereafter be the rule. One of the most commendable features of this Lodge, and which deserves and has received the praise of all its members, is the thorough, efficient, and painstaking manner in which the presiding Sister of Honor, Mrs. Dunn, assisted by Mrs. Holland, S. of H., and Mrs. Rossbach, S. of C., perform the duties attaching to their positions, especially the ceremony of initiation. We take it as a shining example to their brothers to perform their duties correctly. At present the sisters have the floor. The meeting held July 12th, was devoted principally to the initiation of candidates. After which a recess was declared, and social converse ruled the hour, interspersed with music and singing; also, a recitation in laughing style, by Bro. S. F. Freeman, O. W. The Lodge was then called to order, and adjourned to the next meeting night, all, no doubt, well pleased with an evening so profitably spent.

Silver Spray, 3, D. of H.

The officers elect of Silver Spray, D. of H., were installed by E. F. Loud, D. G. M. The services were performed with creditable dispatch, and the meeting proved one of considerable interest. Geo. A. Case, P. M. W. of Valley, presented a costly bouquet to Sister E. McLeod, P. W. S. of H. Miss Nettie Thompson, W. S. of H., was also presented with a large and beautiful basket of flowers. The attendance at the meeting was one of the largest of the season. After the installation a grand supper was given, the material things of which were donated by the ladies of Silver Spray. Magnolia Lodge being in session, an invitation was sent them to be present, which was accepted, and 50 of the brothers were in attendance. Everything passed off pleasantly and harmoniously, and the unanimous verdict was that the Sisters of Silver Spray have one of the brightest D. of H. Lodges in the State.

WE had the pleasure of meeting Bro. E. Reinhart, of Salinas, in Triumph Lodge. He said there was no abatement in the interest of our Order in his section. In the same Lodge we met Bro. Fred Ahrens, a P. M. W. of Kansas, who has joined Triumph Lodge.

THANKS to the brethren of Magnolia for tickets of invitation to their third anniversary party.

THE brethren of Watsonville had a public meeting July 12th.

FURNITURE.

New and second-hand at auction prices, at H. Schellhaas' auction and commission house, Eleventh street, Odd Fellows' building, Oakland, Cal.

Nevada Elections.

ALPHA, No. 1, Eureka.—EDITORS WATCHMAN: We are moving along slowly; 20 initiations for the past term, and start off with three this term. The officers-elect are as follows: A. E. Shannon, M. W.; E. J. Butler, F.; W. E. Taylor, O.; I. C. C. Whitmore, Rdr. (re-elected 5th term); H. T. Hoadly, Fin.; W. Pardy, Rvr. (re-elected 5th term); J. E. Fryer, G.; C. Yager, I. W.; Phil. McMillian, O. W.; E. Bertrand, long term, Trustee; G. H. Thome, Med. Ex. Fraternally yours, I. C. C. WHITMORE.

STOREY LODGE, No. 3.—EDITORS WATCHMAN: At a regular meeting of this Lodge, held July 1, 1881, the following officers were installed by Grand Master J. V. McCurdy: J. L. Martin, P. M. W.; J. C. Harlow, M. W.; J. H. Hubbs, F.; W. B. Shepperd, O.; A. F. Mackay, Rdr.; H. M. Zartman, Fin.; M. E. Cavin, Rvr.; P. Brannan, G.; Geo. W. Pelletrean, I. W.; J. Seamon, O. W.; Thos. Reynolds, Trustee; B. Robinson, Med. Ex. Owing to the dull times the Lodge is not as prosperous as we would like to see it, but we are taking in new members about as fast as they have dropped out this last term. I think we will do better this term than last.—Most respectfully yours, in C. H. & P., H. M. ZARTMAN, Fin.

THE DUTIES OF A MASTER WORKMAN.—Bro. C. E. Carroll, Master Workman elect of Hercules Lodge, No. 53, upon the conclusion of the installation ceremonies, delivered the following stirring words as to the duties and responsibilities of a Master Workman:

BROTHER WORKMEN:—The duties, responsibilities and honors attending the position of Master Workman of Hercules Lodge, No. 53, are of such a character that they will demand of myself the best efforts of my life. Our Ritual very appropriately defines us as the trustees of a fund for our future widows and orphans, and as such, to guard it well. By your kind favor, you have selected me to preside in your councils and deliberations for a term of six months, following in the steps of my worthy predecessors. To act well our part as an integral part in this grand organization is among the highest duties, and will bring with it the highest honors. I ask you, brothers, to help me in making and keeping the fair name of this noble subordinate unsullied and as bright as she has been in the past. It will necessarily follow that I will be called upon to make rulings and decisions, which will be untrammeled, impartial and for the right as I may see it. If mistakes occur, as no doubt they will, pass judgment in charity, attribute them to inexperience, and those of the head and not of the heart. With tremulous hands I take this gavel with the hope that when my turn expires I shall leave it with honor and credit to the Lodge.

GEORGE FETHERSTON, Recorder of Enterprise Lodge, No. 17, San Jose, met with a very severe accident at Alum Rock on Thursday, June 30th. We learn from the *Pioneer* that his family had been camping above the springs in the canyon, and were on their way home. The buggy was packed quite full leaving but little chance to hold on. The horse had just started off of a little raise in the ground into the road, when he must have shied, thus throwing Mr. F. one way, his wife the other and his little boy under the horse's feet, over the dash-board. Mr. F. still retaining hold of the reins, was dragged some 50 ft. under the buggy, before the horse stopped. His right side was badly bruised, and his boy's face was considerably scratched. Excepting a bad shaking up, no serious injury will result; although it was a miracle they escaped so fortunately, as the country is very rough and rocky where they were thrown out.

A NOTABLE CALIFORNIAN INVENTION.—Bro. G. Rudolf, 107 Stockton, favorably known as a manufacturer of pianos in this city for a number of years, has lately brought out a new *upright* that seems to have improvements that place it ahead of all others. The iron frame and mechanism of the piano is entirely independent of the frame and the sounding board; is supported by cross ties and bolted to it. The rest-plank being iron, the only chance for expansion is in the wire. The Rudolf upright is 7⅓ octaves, patent double repeating action, and pronounced by several musical critics as possessing extraordinary musical excellencies. This invention has cost years of study and a large outlay of money, still we believe our genial brother will be well paid for the success he has attained.

THE Mobile restaurant and oyster saloon, No. 6 Fourth St., kept open all night by Bro. Franciscovich, is one of the popular resorts for epicures and those wishing choice refreshments.

ALAMEDA No. 5 will celebrate its anniversary on Tuesday, July 19th.

Workmen Guarantee Fund Association.

Additional $1,000!
Additional $1,000!
Additional $1,000!

FOR MEMBERS of the A. O. U. W. ONLY.

ADMISSION FEE, $3.00; ANNUAL DUES, $2.00.

Probable Cost to Each Member, about $8 a Year.

The object of this Association is to afford an additional protection of $1,000 to families of deceased members of the Ancient Order of United Workmen.

To become a member the applicant must be a Master Workman in good standing in his Lodge, under 50 years of age, and in sound bodily health. No re-medical examination is demanded though the Association reserved that right, and when necessary the applicant must pay the Examiner's fee.

There are no Lodge meetings to attend or Lodge dues to pay. There is no sinking fund, consequently the members have the benefit of every dollar received.

No Director receives any remuneration for services rendered.

The admission fee includes the first assessment of $1, which assessment is levied, and made payable on the death of a member, and disbursed on the same principle as the Beneficiary Fund of the Ancient Order of Un ted Workmen.

The Association is governed by a Board of Directors elected annually by the members. It is endorsed by Hon. Roderick Rose, Past Supreme Master of the Order in the United States, also by W. H. Jordan, M. T. Brewer and C. W. Taylor, Past Grand Masters of California, H. G. Pratt, Grand Recorder, C. H. Haile, Grand Receiver, C. C. Terrill, P. Peck and E. H. Morgan, Finance Committee of the Grand Lodge, all of whom are members, and cordially recommend the Association to the support of the Brothers throughout the State.

The average cost of this additional $1,000 to the $2,000 already pledged by the Order, will be about $8 per year or less than 20 cents a week.

Resolutions of Respect.

[IN MEMORIAM.]

To the Master Workman, Officers and Members of Ione Valley Lodge, No. 141, A. O. U. W.—BROTHERS: Your Committee, appointed to draft resolutions of respect to the memory of the wife of Bro. Benjamin Hopper, respectfully submit the following:

On Wednesday, June 15, 1881, at her home in Ione, Mrs. Mary Hopper, wife of Benjamin Hopper, passed away after a short but painful illness. Mrs. Hopper's spotless life and warm heart had endeared her to a large circle of friends and acquaintances, and her loss is deeply felt in this community; therefore

Resolved, That this Lodge extends to Bro. Hopper and the motherless children, in this great sorrow, its fullest sympathy, and bids them look with hope and confidence to a happy reunion beyond, where all is peace, and quiet must forever reign, assured that their loss is her eternal gain.

Over the home which her life so blest
The darkening shadow of death is cast;
She is gone from earth to a blissful rest,
All the trials of life are past.

Resolved, That a copy of these resolutions be presented to Bro. Hopper and family, and a copy sent to the PACIFIC STATES WATCHMAN and county papers for publication.

H. D FORD,
G. H. DUNLAP,
H. F. HALL. } Com.

"A. O. U. W. Diplomas."

EVERY MEMBER CAN HAVE ONE.

Each and every member of the A. O. U. W., who wishes a really artistic Certificate of Membership, should not fail to procure, without delay, one of "Adler's Diplomas," lithographed in five colors; size, 19x24 inches, with space for photograph of the holder. It is a fine ornamental picture, and distinguishes you as a member. Any Brother desirous of obtaining a perfect copy of the best issue can do so by applying to the WATCHMAN PUBLISHING CO., No. 202 Sansome St., S. F. P. O. Box 2361. Price, postpaid, $1, in cash or postage stamps.

☞It is an ornament for your room, as well as expressive and pleasing to yourself and friends.

Sewing Machines.

Several first-class styles, good as new, will be sold at a bargain. Call on, or address H. F. D., at this office.

The Shipwreck.

Those who "go down to the sea in ships" have a pretty hard time of it sometimes; but their hardest time is not, strange to say, with the sea, but with the shore. As long as they have plenty of sea room they are usually all right. It is mainly where, on a lee shore and with the rocks close aboard, that there is the most danger. This feeling must have been in the breast of the main-top-man of the sea song, who, when the gale was roaring, said: "Lord bless them unhappy folks ashore now." He felt that he was safer out at sea than if he were ashore among the "chimney tops."

Shipwrecks are not now, however, so common as formerly. The fostering care of the governments has furnished all the headlands and dangerous places with lights, whistles or fog horns, and the banks with bell boats, whistling buoys, etc. Moreover, there are life stations at all specially dangerous points on the coasts, so in case vessels get ashore, the lives of the men are not always sacrificed.

On our own Pacific coast we seldom hear of shipwrecks. Most of those which have occurred have been at the mouth of the Columbia river, or at the entrance of San Francisco bay.

Our engraving depicts a sad scene after a storm. The proud ship, dismantled and a miserable wreck, lies high among the treacherous rocks, gradually, but surely being pounded to pieces by the never-ceasing billows. To a sailor no sight is more saddening. To the dweller by the shore, it is too often one of delight, for to them come supplies of winter fuel and rich pickings of flotsam and jetsam.

A DISMANTLED SHIP LYING ON THE LEE SHORE.

GRAND RECORDER PRATT will pay a visit to the brethren of Keystone Lodge in their new hall in California Medical College building, 1015 Clay street, between Tenth and Eleventh, Oakland, on Tuesday, August 9th. He will present a statement of his impressions of the business of the recent Supreme Lodge session, and will give many unpublished accounts of the meetings. A cordial invitation is extended to the brethren to be present.

Two assessments in the Supreme Lodge jurisdiction for July.

Distinctive Journalism.

One of the peculiar features of modern journalism is the many newspapers devoted to special callings. Almost every trade, society, business institution and profession has its representative in the press. In fact it would seem that every line of human endeavor must have its special advocate in order that it might succeed. When anything new is brought before the public the promoters seem to recognize that prosperity cannot be attained without prominently bringing before the public its merits. Thus a class of journalists have sprung up who are devoting their best thoughts and efforts for the carrying out of the special lines of duty in which they are engaged.

The field in which the daily and special journalist is engaged is entirely different. The eidtor of a daily has everything that may occur in a busy world as a subject for comment. It will be noticed that politics form a never-ending theme for discussion with daily journalists, and which line of thought is foreign to the purposes of a special journal. The editor of such a paper must confine his writings to the elucidation of the truths which form the basis of the special duty in which his journal is engaged. Thus it is that one finds it harder to make a paper of this sort attractive to readers, because this very specialization will not allow him to choose his subjects for comment among everything that may happen.

Now we think this fact of specialization in journalism is of advantage to the people. The old saying "jack of all trades, master of none," as applied to the mechanical professions, might find its counterpart in an editorial writer who can string out superficial ideas that are widely at variance with the truth. Agriculture, mining, fraternal societies, commercial interests and almost everything else have their special advocates. The men engaged upon them are generally devoted to the enunciation of the principles which their papers are trying to bring before the public. They study the foundation facts which underlie the callings they represent, and from the circumscribed nature of their pursuits are more apt to give truthful statements. They have a deeper and wider knowledge of their subjects than a miscellaneous writer, because they are engaged in one particular line of thought, and hence are able to give to their special readers a much more truthful statement of facts than is possible for the general writer to present.

We look upon it as one of the most healthy signs of a glorious profession—this specialization of newspapers. While, as we have said, it is harder to present a creditable paper to readers on account of not having a variety of topics for treatment, and the difficulty of sustaining interest thereby increased, this very limitation will prove a source of good both to the people and journalism.

PUEBLO LODGE, No. 168, Sonoma, was visited by Grand Master Barnes and Grand Recorder Pratt on July 27th. A first-class literary entertainment was provided, speeches made, and the whole crowned with a sumptuous banquet, at which mirth and jollity prevailed. No. 168 is a thriving subordinate.

THE Grand Master will pay a visit to Dixon Lodge, No. 50, Wednesday, August 3d. We can assure our brethren who have not had the pleasure of hearing him address an audience, of a rich treat.

Items of the Order's Stability.

There are several occurrences in our Lodges, small in themselves, but pregnant with deep meaning as to the future of the A. O. U. W. When we see a father a member of a Lodge of the Masonic fraternity, or of Odd Fellowship, or of other purely fraternal organizations, we do not wonder much, for they are old, and their worth are commended to the sons of those who are members. In fraternal beneficial organizations, however, both on account of their novel features and recent institution, the fact that a father recommends his son to become a member may be taken as a proof of their intrinsic worth. No father worthy of the name would be likely to have his children members of an organization which had no merit, and was not likely to stand the test of time. We are led to these remarks by the fact that Bro. P. Fischer, an old-time member of Harmony, No. 9, the third Lodge organized in this city, has induced his son, Joseph Fischer, aged 24, to become a member of Magnolia, No. 41. The young man has just been initiated, and we hope, as time whirls on, that his son, or sons, will be members of our great fraternity.

Not only in the city, but also in the country, does it give us pleasure to put on record facts of this nature. Our representative at Stockton tells us that Bro. J. H. Hornage is a member of Stockton Lodge, No. 23, and sitting in the same Lodge-room is his son, Bro. H. S. Hornage, aged 24. Let the roll be called in all Lodges, and such pleasant facts as these be brought to public attention.

IT was resolved at the late session of the Supreme Lodge that the true intent and meaning of Section 10, Article VIII, Constitution of Supreme Lodge, is that all members suspended under said section cannot be reinstated in any other way or manner than that the member so suspended must pay the amount of arrears to the Financier of his Lodge, and that at the next stated meeting of the Subordinate Lodge the Financier shall report the receipt of such arrears, and the same shall be made a matter of record.

OAKLAND LODGE, No. 2, has elected one of its members to furnish items of the Lodge's progress occasionally for the WATCHMAN. This is a good idea. Let other Lodges profit by the example.

THERE were 61 beneficiary certificates issued in the jurisdiction of Iowa during the month of June, and $16,000 paid to heirs of deceased members.

Home Miscellany.

The Lender's Dream.

The lender sits in his down-east shade,
And dreams of the freaks by fortune played;
Of the blooming West, and the twelve-per-cent.
That promised bread, and a sweet content.

He dreams of the incomes o'er and o'er,
That came as prompt as the tide to shore;
Of the blessings breathed on the brawny arms,
That cradled gold from his mortgaged farms.

He dreams of the drouth and a draining purse,
Where his income flowed like a footless verse;
Of the locust-clouds that settled down,
And sacked the fields as a foe a town.

He dreams of the blight and the blizzards' wrath,
And the scattered homes in the cyclone's path;
Of the vanished fruits of the toiler's hand,
And a fortune lent on a faith of sand.

Anon he dreams with a startled sigh,
Of the fickle past, and the by-and-by;
Of the by-and-by with its calm and gale,
And his loan-bought lands by the league for sale.

How Simon Peveritt Got Married at Last.

Master Westley, clerk and sexton in the small village of Woodham, was one winter's morning sitting by his cheery fireside, watching alternately the rain, fiercely beating against the latticed window panes, and the brisk movements of his active little daughter, as she moved to and fro, busy about her household work. Presently she came in, bringing a hat, great-coat, and umbrella, observing: "You will be wanting these soon, father. It is nearly 11 o'clock." She had hardly said this, when a loud knocking was heard at the outer door, followed by the abrupt entrance of a little middle-aged man in a state of great excitement, his face red, his hair rumpled, his boots splashed with mud, and his coat dripping with wet.

"Why, Simon, what on earth's the matter?" said the clerk. "You don't look much like a bridegroom."

"Bridegroom! No!" the little man exclaimed with bitter emphasis. "Master Westley, you'll hev to tell parson I can't get married to-day."

"Why, how is that?" asked the clerk.

"I can't get Mary up," quoth the indignant and disappointed lover. "I've been rattlin' at her door, and throwin' stones at the winder, and shoutin' till I'm as hoarse as a rook; and I'm nearly wet through with the drippings from the husens [the eaves of the house]; but I can't get she up. She only jest put her head out of the winder for a minute, to tell me 'twor no good for me to stand hocketting [making a great noise] there; for she'd never take the trouble to put on her best things, and go out in that powerin' rain jest to marry me."

"Why, Sim! this is rather a bad beginning for people about to marry—isn't it? I'm afraid the gray mare will be the best horse in your team—won't she?" said the kindly old clerk, with a merry twinkle in his knowing brown eyes. "However, I'd better go and tell Mr. Howard, or he will be putting his surplice on for nothing. Shall I say to him that perhaps the wedding will come off to-morrow, if the weather is finer, Mary will get up in time?"

"If she don't," vowed Sim, glaring vengefully, "she shall never hev another chance. I'm fairly sick of her tricks. We've been keeping company this 20 year and more, and now she don't know her own mind a bit better than a mawther [young girl] in her teens. But I won't stand it no longer. She ain't going to treat me like a dog, or a mat for her to wipe her feet on. There's Widow Biggs would hev me any day, and *glad;* and a nice comfortable woman she is too. The wedding-ring shan't lie long in my pocket for want of a wearer. And there, Master Westley," said poor Sim, almost in tears over his frustrated plans and disappointed hopes, "I'd meant this to hev been a reg'lar jolly day. I'd got in a barrel of beer, and a spare-rib of pork, and we wor going to hev parsties and frawns [pancakes], and a mort of good things beside, to make a reg'lar spree of it; and now, it's all knocked on the head, and everybody knows I'm made a fool of into the bargain."

"Cheer up, Sim?" said Master Westley. "It is aggravating, I'll own; but Mary isn't a bad sort, though she has rather a cruggy (crusty) temper. She has been very true to you; and it would be a pitty for two such faithful lovers as you've been, to part over a little tiff at last. I believe Mary is jealous of the little widow. You know people did say once you were rather soft on her."

"It was a big story," burst out Sim. "She tried to hook me, but I never gave her no encouragement."

"Didn't you walk with her from church last Sunday? I heard that you did and carried little Joey all the way home; and kissed him when you put him down at his mother's door."

"Well, he axed me to give him a kis, so I couldn't do no other wise. There was no harm in that, sewerly."

"Certainly not. Only, you see, as Mary lives just opposite, and saw it all, she very likely thought you'd be better engaged kissing her, instead of hanging round the widow's door. Depend upon it, she's jealous; and she's got a highful spirit of her own, and is acting like this to make you think she doesn't care whether she has you or no. If she thought there was real danger of losing you, she'd come round in a minute, as tractable as you like."

"But how can I make her think so?"

"Well, you won't be doing any work to-day, and it's dull tiffling [idling] about doing nothing. Take and brush yourself up smart, and go and have a chat with Mrs. Biggs. Take some oranges and sweets for Joey. Don't look at Mary's house; and mind and make a grand show of petting and kissing the boy in front of the window, where she can see it all. She'll be more jealous than ever. But if she doesn't marry you to-morrow, I'll eat my head."

"Ah, Master Westley, you're a deep one, you are!" said Simon, regarding his astute adviser with admiration. "But it don't fare to be ezackerly jonuick [straightforward] to dew so; and I ain't fond of smarmin' babies over with kisses. Still, if you think it will bring Mary up to the scratch, I'll e'en try it. If it don't, marry Sukey, I *will*, without any more shilly-shallying."

Master Westley then started for the rectory; and Sim paid his visit to the widow. He remained in her snug little house some time, and must have acted his part uncommonly well, for he had hardly reached home again, when he was visited by his old sweetheart. That eccentric spinster, ignoring her own wayward conduct that day, attacked Sim with a storm of reproaches, accusing him of fickleness and falsehood in forsaking her for "that sly, carneying, little widder; and after keeping company with me for so many years!" she plaintively added.

"No," said Sim, stoutly; "'twor no fault 'o mine. I was ready to do *my* part this morning. It was you as run word. But I'll eat humble-pie no longer. If you don't want to hev me, I know one as does. I'll marry you to-morrow, if you like. If you don't, I'll never ax you again!"

Mary was a tall, black-eyed, comely looking spinster of 40 or more, reputed to have a hot temper and shrewish tongue; but for once she kept both in check. It was evident that Simon meant to be trifled with no longer. Moreover, she could not help secretly admitting that he was right, and admired his spirit and manly determination. It would never do to let so good a fellow and so faithful a lover fall a prey to a designing widow—not to mention the humiliation she would have to endure!

Next morning, the rain-clouds had all cleared off, and a bright sun poured its rays through the old church windows on Mr. and Mrs. Simon Peveritt as they walked from the altar-rails into the vestry, to enter their names in the parish register. Sim, with a broad grin on his face, laboriously executed a big black X as "his mark," informing the rector that he was "a sawyer by trade" and that his "owd gal had been of age this 20 years!" after which he turned to his friend the clerk, with a knowing wink, and said in an under-tone "We did it well between us, didn't we? Mary was up at six this morning, and hed to wait for *me!* I've got the whip-hand, to begin with; and I promise you I won't give up the reins again." Then he added in a louder tone, as they were about to leave: "Now, Master Westley, you must come and help we eat the wedding-dinner. The pork and apple-suss will be none the worse for waiting a day; and my Missus and me'ull make you as welcome as flowers in May. There won't be happier folks in Woodham. And, Master Westley, you shall have some of the finest logs in my timber-yard, to keep up your fires this winter. I am not the man to forget a good turn or an old friend."

The Mistake of Mothers.—Thousands of mothers slave, grow prematurely old, forget and neglect their own accomplishments, and drag themselves about as mere appendages, something between a nurse and a housekeeper to a daughter too young to realize or appreciate the sacrifices made for her. It is every person's business to make morally, mentally, physically, all of themselves possible, and this settling down at 35 and 40 into an old woman and taking a back seat that the daughters may shine is a mistake, and defeats the very end sought. There's often altogether too much done for children, and the chief result is that of making them helpless, dependent creatures. Mothers to-day are saying, "I don't care for myself now, so that Effie or Nettie get their full quota of accomplishments," when, if that mother went on building herself up on the basis of her own matured experience, and ceased to sink and absorb herself so completely in Effie and Nettie the world with which she came in contact might be profited. Society needs matured women as live, potent factors, and the shining should not be left entirely to fledglings. Were there time and space a word would be said here in this matter for the old man, too, though he is more apt to take care of himself.

The baby didn't feel pretty good anyway, poor little thing; the car was cold and the road was rough and everybody else was cross and glum, and the baby had only one way in which to express its emotions, so it cried. And how it did cry! Twenty-eight miles of it, and no sign of a let up, and the tired mother just smothering it with baby talk and rocking the little thing in her arms. Presently a testy-looking man, an old bachelor if there ever was one, turned in his seat and snarled, "Can't you shut that child up?" The light that gleamed from her eyes was dangerous, as she hugged the baby a little closer, and fired back at him, "I can shut you up a great deal quicker." The howl of approbation went up all over the car and he "shut up."

To the Girls.

What are you doing, my dear girls, to help along this great, bright world of ours? Toward what path are your feet tending? To what goal in the far distant future do your thoughts turn? What is your aim in life? There have been earnest-souled women who have done great and good deeds in humanity's cause, or have won with pen, pencil and chisel, undying honors, and written their names in never-fading letters upon fame's glittering page; and these, not scions of noble stock, but honest, self-made women of the soil, who, through long days of labor and nights devoid of ease, have raised themselves to a high position by the mere force of their sterling qualities with native energy and strength of character. It cost something! Ah, yes. Fortune seldom comes at your beck; if you sit down with folded arms to woo the fickle goddess, you will very likely sit there to the end of the chapter. Rouse yourselves, gird on your armor, go forth with confidence and hope, make up your mind to work, and work with a will, throw mind and soul into your pursuit, for whatever is worth doing at all is worth doing well; the reward may be long in coming, you may sometimes grow faint and weary, and may fail more than once, twice or thrice, but never give up, try again and again; let every defeat nerve you to fresh contest. Girls, whatever your lot in life, do your best; whatever your work, it is worthy of best efforts. In climbing the mountain's rugged side, take care that there be no unwary steps, no sudden fall from rectitude into chasms of moral vice; lend a helping hand now and then to lead a weaker companion along the rough places, improve each golden moment of opportunity, catch the good within your reach. Do not spend your time in vain regrets for any mistakes you have made, but set yourselves to work to repair it; she who waits for an opportunity to do much at once may breathe out her life in vain and idle wishes, and regret at the last moment of her life her worse than useless endeavors in not accepting the present instead of looking into the far future, for a more glorious and exalted sphere. Let every stroke tell, let every step be a firm mark along your onward jurney, footprints that will remain long after you have passed to the other shore; and let whatever will be your aim, above all else, strive to make your life strictly upright, pure and honorable; be everything that is thoroughly womanly, helpful, charitable, tender toward your fellows; a living, breathing lesson to all around; and a golden anthem that shall ring golden chimes of joy and love throughout all eternity.—*Mrs. F. G. Church, in Western Rural.*

The Dress of Women and Children.

Since the reform underwear for ladies and children has come into use, there is a slight under-current of common sense creeping into the mind of the average woman. They follow the style, and make outer garments higher in the neck, longer in the sleeve and skirt than formerly. But the limbs of both women and girls are insufficiently clad, and not kept warm, as men's and boys' are, and consequently there is entailed a list of diseases and weaknesses that are usually laid at the door of *sex*, when all physicians know and proclaim that the female sex is by far the hardiest, enduring more privations, discomforts and abuses than the male sex, with less fatal results. More male children died, according to New York statistics some years ago, than females, in proportion. While few men could undergo the tight lacing, cramped feet and hands, cold extremities and the uncomfortable fashions of women's wear, without being, like her (provided they live through it), victims to "general debility," "nervous prostration," and a host of general ailments which now apparently belong to the female sex—produced by improper dressing from youth up. Do you doubt it, my sisters?

I lately saw in the paper that a Paris doctor gives it as his opinion that thousands of children die in Paris annually from "bare arms, necks and legs." A London physician told the same story, viz., "improper dressing of children," as the cause of great mortality among them, blaming the mothers for not using more sense in such matters—instead of *following* fashion they should *make* it; while the *Scientific American*, in a little article headed "Hogs vs. Babies," thinks it is a pity that babies have not a market value, like hogs. "A death rate among the pigs, less than one-third the death rate among children, in our large cities, moves the Government to costly investigations of the cause and to diplomatic correspondence with foreign nations; while produce exchanges get excited on the subject, and all the newspapers join in the discussion. The babies die by the thousand in New York and other overcrowded cities, and all over the country, and scarcely any notice is taken of the fact."

I believe it is time for the mothers of our land to try to solve the great question, "How to save our children from disease and death," and bring them into healthy competition with hogs.—*Jewell.*

Magazine for Jolly People.—Dr. Dio Lewis, the well-known apostle of hygiene, has begun a new literary venture entitled *Dr. Dio Lewis' Monthly for Jolly People.* Edited by Dr. Lewis, and published by the Eastern Book Co., Boston, Mass., at $1 per year. It is copiously illustrated and the articles are entertaining and mirth provoking.

Duties of Life.

"Life is real. Life is earnest, and the grave is not it's goal." So says the grand old poet. Life is what we make it. Then we should be up and doing, making the best of everything that we can, filling our various stations in life, as noble men and women, putting on the armor of strength to fight the battles of life bravely. Who has ever accomplished anything by idly repining, bemoaning their situation as worse than others? Who cannot look around and see conditions worse than theirs? We should realize that life is a duty which we cannot shirk, if we would leave behind a name worthy to be loved. It is true that life is short, but in the given space we may do much that is good or bad. Many, to-day, in many ways, are seeking the favor of the world; many gathering princely fortunes. I often wonder if they ever pause and think how many of God's children will suffer by their gain, and then I wonder again if they think who will be the gainer on the final reckoning day. Life duties are around us on every side. Let us take them up as best we can. To-day, when skepticism and so much immorality are poisoning the hearts of our youths, we should feel that life is not a dream, but a living reality. Some author has said: Life is not a brief sojourn, but a continued existence. Every act we do casts its shadow upon the future; every thought is a link in binding us to eternity; every moment is a seed, whose garnering shall be our immortal destiny.

Oh, mothers of this great land, let us wake up and feel that much is depending upon us! The babes at our breast, who look to us now with such trusting love, will in a short time stand before the world as men and women. I think if mothers would study to gain their children's love and put before them good books, and strive to make home pleasant instead of filling their minds with so much silly show and dress, we would have better men and women. It is the children who will soon take our places. Then the grandest duty for us is to patiently and lovingly guard them. Let us then look at life as we should, striving to be happy, and making others so; feeling that it is a duty we owe to God, to our fellow-creatures and to ourselves to be ever-active workers in all that tends to elevate and better the cause of humanity. And at last, when our summons shall come, we can feel that in some hearts, at least, we will be kindly remembered.—*M. J. C., in Rural Press.*

Water for Babies.

I was one day called upon to visit a sick little one in a family residing near my office. The babe I found in apparent good health, but crying and struggling in its mother's arms as though suffering from excruciating pains.

The mother informed me that the child seemed desirous of nursing continually; and that to quiet it, she had given it the breast as often as the crying commenced. When that did not soothe the little one, a dose of Mother Somebody's cordial had been administered.

"My good woman," I inquired, "when did you last give your baby a drink of water?"

"I don't remember," replied the lady; "I seldom let him drink water. Does he need it?"

"Need it? Why shouldn't he need it as much as you? This child is suffering from thirst—nothing more."

I called for cold water, gave the infant a few teaspoonfuls, and it was relieved of all its troubles, stopped crying and sank peacefully to sleep in its mother's arms.

Let this be a reminder to mothers and nurses. Infants who nurse at the breast may often suffer as much for want of water as adults who eat more solid food. Often when he cries, it is only thirst which causes it.

Do not, then, dose it with the poisonous "soothing syrups" or nursing cordials, or press it to the breast, which it will eagerly grasp, expecting to satiate its burning thirst; but, filled to the brim with its natural food, it cries on harder than ever.

Use a little discretion. The poor little one cannot tell its wants; if it could, it would often cry: "Water! water!"—*Exchange.*

Girls at Football.—Twenty-two young women, eleven of them English and eleven Scotch, played an international game of football in England. The teams appeared in a costume essentially similar to that worn by male football players, consisting of jerseys, knickerbockers, stockings, boots, and a "cowl," with a sort of sash depending from the waist—the Scotch teams wearing blue jerseys and red sashes, and the English, red jerseys and blue sashes. Most of the players were well built, athletic looking girls, and the teams looked exceedingly picturesque in their bright and tastefully arranged costumes. Some retained such feminine ornaments as frilling, bracelets, etc., but others, with arms bare to the shoulder, entered into the game with all the enthusiasm of boys. The Scotch lassies won.

Say, mister," said a man, as he entered the office, "is the editor in?" "Yes," replied that overworked individual, looking over his glasses. "Well, I thought you was the chap. I wanted to tell you about a boy of mine; you ought to have him; he's just the fellow you ought to have on your paper; he's the darndest fool I ever see."

For our Boys and Girls.

Our Puzzle Box.

Geographical Enigma.

I am composed of 31 letters.
My 6, 13, 8, 16, 20, is a city in Africa.
My 12, 18, is a European river.
My 17, 1, 7, 28, 21, is a town in Illinois.
My 26, 18, 5, 2, 21, 4, is a mountain in New Hampshire.
My 3, 9, 13, 10, 3, 29, 25, is one of the United States.
My 20, 31, 30, 2, 1, 26, 11, 8, 23, 21, is a city on the Pacific coast.
My 24, 31, 6, 23, 27, 1, 20, is a cape on the American coast.
My 19, 22, may be obtained in Newfoundland.
My whole is a nation and the country in which it is found. DICK N. S.

Letter Changes.

1. Change the initial of a place of rest and form a color.
2. Change the initial of a domestic animal and form in what manner.
3. Change the central of a crime and form a male relative.
4. Change the central of a receptacle for grain and form a cake.
5. Change the final of a curse and form a bar.
6. Change the final of a domestic animal and form a traveling vehicle. O. G.

Syllable Puzzles.

1. To ponder; a measure of wood; small insects.
2. A contemptible dog; an extremity; signified. OLD JOE.

Riddle.

It is inanimate, but essential to all life. It is invisible, yet it creates things of beauty. It is being constantly formed, yet has existed throughout all ages of time. It extends over the whole world, and its influence is felt throughout all lands. Its powers are manifold. It carries our commerce; it drives our manufactories; it shields us from cold, and promotes our corporeal welfare. In its normal state it is a quiet though potent agent of good; but once aroused it sweeps across the land, carrying death and destruction in its progress. It is our greatest friend, though never seen, and seldom appreciated. Were it taken from us even for a few brief moments only, we should droop, languish and die. What is it that is of such moment, and yet seemingly so unimportant?

Decapitations.

1. Behead a portion of the foot and leave a fish.
2. Behead small animals and leave a congealed substance.
3. Behead a period of time and leave a part of the head. AUNT HANNAH.

Boys Who Were Housekeepers.

Do not be afraid of a little house-work boys, if there is a need-be for it. It will never hurt your manliness in the least and may be almost a life-preserver to a weary, feeble mother.

Willie Radcliffe's mother, up in Maine, was taken sick in harvest time. He was but 12, and there were three little ones younger still. Mother was sick some six weeks, and Willie did all the house work. He made the butter, baked the bread, and even went into pies, and cooked for a lot of threshers, and farmer's folks tell me that they have wonderful capacities in the way of eating. But Willie carried the ship through safely, until mother was at the helm, and I know you will vote him a brave little boy.

I knew another young man whose mother was feeble, who had to mix up her bread and sweep out the house, when he came in from his regular work, and thought nothing of making his own coffee and cooking his steak in the morning before he went out. He has been married these 10 years and the folks tell me that Lizzie has the nicest, kindest husband to be found anywhere. He makes a good living, too, at his trade, and they are a very happy little household. House-work did not make him in the least effeminate. He is a man among men, and never paraded his domestic attainments, though not at all ashamed of them.

It is not pleasant, in general, to have a man fussing about the kitchen-work when there is no need of it. Most women can work better without such help; but it is an excellent thing in a man to know when his strength would be of service, and then have the willing heart and hand to render it.

Jo T—— was a small boy, about six. Jo's father said, and Jo standing in his presence, "How is it Jo, the cherry tree has a limb broken off?" Jo is hurt. Jo has lost his shoes. Shoe tracks go right up to the tree in question. Jo's shoes are by the trunk of the tree, and barefoot tracks are away from the tree. How is it? Jo hears it all; then said: "I think plenty of mice are up in the barn, what do you think?" Now, what is the conclusion? Jo must be somewhat absent minded.

"MOTHER," remarked a Duluth girl, "I think Harry is going to propose to me." "Why so, my daughter?" queried the old lady, laying down her spectacles, while her face beamed like the moon in its fourteenth night. "Well, he asked me this evening if I wasn't tired of living with such a menagerie as you and dad."

Humorous.

Chips.

A COMMERCIAL paper informs us that "eggs are going down." This is a ridiculous statement, for are not eggs always going down?

ONE of the greatest trials of a young lady's life is when she tries to get a half-gallon foot into a quart shoe.

OLEOMARGARINE is sold by the grocer, who tells you it is just from the cow. And so it is, but the cow is dead.

"FAREWELL" is the title of a poem sent in from Ohio yesterday. It is a good thing that the gifted authoress said good-bye to the little gem, because she will never see it again.—*Chicago Tribune.*

A LADY in Albany has a little dog called Sport. She has taught him a number of tricks and this among them. She will say: "Sport, which would you rather be, a dead dog, or a member of the legislature?" Instantly he will throw himself down, stretch himself out, close his eyes and be, to all appearance, dead.

"DOCTOR," said a lady patient, "I suffer a great deal with my eyes." The old gentleman adjusted his spectacles, and with a Socratic air replied, "I do not doubt it, my friend; but then you ought not to forget you would suffer a great deal more without them."

A NEWLY married lady, who, as in duty bound, was very fond of her husband, notwithstanding his extreme ugliness of person, once said to a witty friend: "What do you think! My husband laid out 50 guineas for a large baboon, just to please me!" "The dear little man!" cried the other. "Well, it's just like him!"

A GALVESTON school teacher asked a new boy: "If a carpenter wants to cover a roof 15 ft. wide by 30 broad with shingles 5 inches broad by 12 long, how many shingles will he need?" The boy took up his hat and slid for the door. "Where are you going?" asked the teacher. "To find a carpenter. He ought to know that better than any of we fellers.'

A FAMOUS lawyer, having been so for more than a quarter of a century, was accosted by a man, who said: "I have a boy whom I want you to take and make a lawyer of." "How old is he?" said Mr. —. "He's 18 years old, stout and rugged; he's got a pair of lungs like a bellows," replied the father. "Has he any other qualifications?" "Yes, sir, he's got the one great qualification of all," said the father; "he's the confoundest liar in our town. I thought when I heard you in the court-room just now that it wouldn't take very long for Sam to come pretty nigh up to you."

Household Hints.

CROQUETTES OF TURKEY.—To each half-pound of meat allow two ounces of ham or bacon, one ounce of butter, one tablespoonful of flour, the yelks of two eggs and some bread crumbs. The smaller pieces of turkey, that will not do for a fricassee, answer very well for this dish. Mince the meat fine with ham or bacon in the above proportions; make a gravy of the bones and trimmings, seasoning it well. Mince some parsley, put it into a stew-pan with some butter, add the flour, mix well, then put in the mince and about half a pint of gravy made from the bones. When just boiled, add the yelks of two eggs. Cool the mixture, then shape it in a wineglass. Cover the croquettes with bread crumbs and fry them a delicate brown. Put small pieces of parsley stems for stalks, and serve with rolled bacon cut very thin.

MACARONI PUDDING.—Take two and a half ounces of macaroni with a pint of milk and the rind of half a lemon in a saucepan. Let it simmer gently, until the macaroni is tender. Then put it in a pie dish, leaving out the peel. Mix a pint of milk with three eggs; stir them well together, adding two tablespoonfuls of brandy, and sugar to taste. Pour the mixture over the macaroni; grate a little nutmeg over the top. Bake in a moderate oven for half an hour. To make this pudding look nice a paste should be laid around the edges of the dish, or a layer of preserves or marmalade may be placed on the macaroni. When this is done omit the brandy.

IMPROMPTU SHORTCAKE. — These delicious, easily made shortcakes are especial favorites. Take 1½ cupfuls of sour milk, adding salt, and soda to neuralize the acidity. Stir with a spoon, adding enough flour to make a batter that will easily run, but considerably thicker than batter for buckwheat cakes. Then stir in four tablespoonfuls of drippings. Bake 10 minutes in a long pie tin with a brisk fire. Split and spread with some kind of canned fruit or preserves, and eat with plenty of cream, flavored with nutmeg.—*Gussie Thomas, in Country Gentleman.*

STUFFED STEAK.—This makes an excellent substitute for the expensive roast. Select a good round steak, pound, season with pepper and salt, cover with a nice dressing of bread crumbs, roll up and tie tightly with twine. Pour a little hot water into the dripping-pan, add a spoonful of butter, put in the steak and bake, basting frequently.

TO KEEP PRESERVES.—Apply the white of an egg with a brush to a single thickness of white tissue paper; with which cover the jars, lapping over an inch or two. It will require no tying, becoming when dry inconceivably tight and strong, and impervious to the air.

Health Column.

Importance of Sleep.

There is no fact more clearly established in the physiology of man than this, that the brain expends its energies and itself during the hours of wakefulness, and that these are recuperated during sleep; if the recuperation does not equal the expenditure, the brain withers—this is insanity. Thus it is that in early English history, persons who were condemned to death by being prevented from sleeping, always died raving maniacs; thus it is also, that those who are starved to death become insane; the brain is not nourished, and they cannot sleep. The practical inferences are three:

1st. Those who think most, who do most brain work, require most sleep.

2d. That the time "saved" from necessary sleep, is infallibly destructive to mind, body and estate.

3d. Give yourself, your children, your servants, give all who are under you, the fullest amount of sleep they will take, by compelling them to go to bed at some regular, early hour, and to rise in the morning the moment they *awake of themselves;* and within a fortnight nature, with almost the regularity of the rising sun, will unloose the bonds of sleep, the moment enough repose has been secured for the wants of the system. This is the only safe and sufficient rule; and as to the question *how much sleep any one requires*, each must be a rule for himself; great nature will never fail to write it out to the observer, under the regulations just given.—*Journal of Health.*

DECAY OF THE TEETH.—The acids which cause the decay of the teeth are conveyed in the secretions of the gums and the mucous membranes of the lips and cheeks, and the usual points of attack are in the interstices and the grooves in the facial walls of the teeth. The calculary nature of the saliva is antagonistic to the acids, and preserves the teeth from their dilapidating influence. Teeth are protected from disease by the following conditions: Their regular shape and order, that the situations for the deposit of acids be as few as possible; the conservation of the teeth from noxious influences by constant brushing; the healthy structure of the tooth itself, and of the mouth generally. Heider observes that the yellowish white teeth are less subject to the attacks of caries than those of a bluish shade, the enamel of the former being much harder, and the molars have been found to contain more mineral substance than the incisors.

IS IT SO?—A foreign scientific journal remarks, as a curious physiological fact, that although open-air life is so favorable to health, yet it has the apparent effect of stunting the growth in early youth. Thus, while the children of well-to-do parents, carefully housed and tended, are found to be taller for their age than the children of the poor, they are not so strong in after years; the laborer's children, for instance, who play in the lonely country roads and fields all day, whose parents lock their humble doors when leaving for work in the morning, so that their offspring shall not gain entrance and do mischief, are almost invariably short for their age; the children of working farmers exhibit the same peculiarity. After 16 or 18—after years of hesitation, as it were, the lads shoot up, and become great hulking, broad fellows, possessed of immense strength. According to these statements, it would seem that indoor life forces the growth at the wrong period, and thus injures. Is it so?

HELP THE CHILDREN GROW ERECT.—William Blaikie, the author of "How to Grow Strong and How to Stay So," spoke before the Brooklyn Teachers' Association recently on "Physical Education." "I want" said he, "to see if in an informal talk we can't hit upon some way in which we can bring the physical education of school children down to a practical basis. Our children who are healthy and buxom when they begin school work, come out pale, sickly, and with round shoulders. If you require the children under you to sit far back on a chair and to hold their chins up you will cure them of being round shouldered, and the lungs and other vital organs will have free and healthy play. Another sample plan is to have the children bend over backwards until they can see the ceiling. This exercises for a few minutes each day will work a wonderful transformation. If a well-qualified teacher could be employed to superintend the physical development of the children the best results would be seen.

CAUSES OF PIMPLES.—Pimples are occasioned by the torpid state of the skin, or, in other words, by the inability of the skin to perform its proper functions. The cause of these pimples is, therefore, neither more nor less than an obstruction of the pores of the skin; the perspiration being allowed to accumulate, the mouths of the pores become clogged, irritation ensues and a pimple arises. The only way to be rid of them is to allow the skin to do its own work by preserving it in a healthy condition and keeping the system in good order. The following ointment is recommended: Take an ounce of barley meal (the finer the better), one ounce of powdered bitter almonds and a sufficient quantity of honey to make them into a smooth paste. If you are taking medicine for the blood adopt our advice and place yourself in the hands of a competent physician.

Worth Knowing.

GREEK HONEY.—The most celebrated honey of Greece is the Hymettian honey, also called Thymari honey, because it has the flavor of thyme, which grows plentifully upon and about Mount Hymettus in Attica, south of Athens. This honey was already celebrated in classic times, and has preserved its reputation to the present day. It is exported to England in tin cans. The common kind of honey is called Riki (from Erica), because domestic species of Erica happen to be very common in localities where bee-culture is carried on, and their flowers are a great attraction to bees. Upon the island of Eubœia, in mountain glens, near Karysto, there existed in former times large tracts covered with wild-growing roses and blackberries. The honey obtained from bees feeding upon the flowers of these plants had a peculiar and distinct odor of roses, and was known as rose-honey. But since those plants have been eradicated this kind of honey has ceased to exist. Honey is usually put up in goatskins and sold at the rate of about 20 cents the okka; in good years even for less.—*New Rem.*

MOTH PREVENTIVE.—A correspondent of the *Furniture Gazette* recommends the following remedy for exterminating moths in carpets and furniture: After some years of experience with the troublesome pests, says the writer, I found a sure preventive of moths in pitch paper, the same as roofers use. The moth will live and grow on cayenne pepper and tobacco, while I never could see that the use of these articles kept the moth miller out. The plan for the furniture dealer or housewife is to cut the paper in slips and place about the room, under and behind sofas, chairs, etc.; this should be done as early as the middle of April, and in warm climates earlier. If the dealer wishes to make parlor suits moth proof, he should place on the inside of backs of chairs and seats, small strips of pitch paper, and rest assured that the miller will not select these places to deposit eggs. It is the miller that is the foundation of all the mischief.

A SIMPLE METHOD FOR TOUGHENING GLASS, says a Leipsic paper, is to place the article in a suitable iron pot, which is then to be filled with cold water, enough common salt being added to form a saturated solution. The whole should next be gradually raised to the boiling point and kept there for at least 20 minutes; the pot and contents may then be taken off the fire, etc., and allowed to cool down very slowly—preferably by burying in sand. When the articles are eventually taken and cleaned it will be found that they will resist blows and changes of temperature far better than they did previously.

GLASS WEAVING, according to report, seems to be gradually working its way into practical value. We have, from time to time, for several years, heard of experimental efforts in the production of articles of dress or domestic use from woven glass, but now we read that a Pittsburg firm is manufacturing fabrics that are strong, cannot be ripped or torn, and are cheaper than those woven from linen, cotton or silk. A large tablecloth of variegated colors, with ornamental borders and fringed edges, is on exhibition in New York city, which can be washed and ironed like the ordinary articles.

SILVERING MIXTURE.—A German scientific journal furnishes the following process for the instantaneous coating of copper or brass objects with silver without difficulty: Mix 3 parts of chloride of silver with 20 parts of powdered cream of tartar and 15 parts of powdered common salt. Moisten a suitable quantity of the mixture with water, and rub it with a piece of blotting paper upon the metallic object, which must be thoroughly clean. The latter is afterward rubbed with a piece of cotton upon which precipitated chalk is dusted, then washed with water and polished with a dry cloth.

TO REMOVE MORTAR STAINS FROM BRICKS.—Bricklayers make use of spirits of turpentine, and also of vinegar, for the purpose of removing mortar stains from pressed brick fronts, the materials being carefully applied with a sponge or rag. Any acid, applied in the above manner, in very dilute form, would answer the purpose. Vinegar being a very dilute acetic acid, is probably as good a recipe as can be given.

BLACKING PIANO-FORTE KEYS.—A good black ink is as effectual as any stain to blacken the sharps of a piano. It is, perhaps, not generally known that, though made of ebony, these keys always require staining, as true ebony is rather brown than black, and full of a yellowish grain. Old keys are probably saturated with grease; they should therefore be treated with potash first.—*English Mechanic.*

TO CLEAN PRESERVE JARS.—Sweetmeat jars or bottles may be cleaned without scraping them, by pouring into the jars hot water and a teaspoonful or two of pearlash. The contents which remain sticking to the sides and bottom of the jar will be disengaged by the pearlash and float loose in the water.

HARD OR SOFT WATER.—To ascertain if water is hard or soft, procure a small quantity of soap dissolved in alcohol, and let a few drops of it fall into a glass of the water to be tried; if the water becomes milky it is hard; but if little or no milkiness results, the water may be said to be soft.

FRATERNAL RECORD.

MASONIC.

Officers of the Grand Lodge.—SAMUEL CRAWFORD DENSON, G. M., Sacramento; CLAY W. TAYLOR, D. G. M., Shasta; MOSES HELLER, G. Treas., S. F.; ALEX. G. ABELL, G. Sec'y, S. F.

Widow's 's Home.

In a recent conversation with the Grand Master we found him as much interested as ever in the matter of an Orphan's Home. He will probably recommend immediate action thereon in his message. As yet we have not heard that the committee have taken any action in the matter.

It will be remembered that at the last session of the Grand Lodge Bro. Samuel C. Denson, then Deputy Grand Master, introduced the following resolutions, which were adopted:

Resolved, That this Grand Lodge will, as soon as practicable, establish some comprehensive and efficient institution for the relief and support of widows and orphans of deceased Master Masons.

Resolved, That a special committee of three be appointed to investigate the subject, with instructions to report at the next annual communication a plan for the establishment and maintenance of such an institution under the auspices of the Grand Lodge.

The following were appointed as the special committee: Past Grand Masters N. Greene Curtis, George C. Perkins and Wm. H. Hill.

From the make up of the committee we fear there will not be much advancement made at the coming session, as Bro. Curtis is and has been quite sick and almost unable to sit up for months, Gov. Perkins has his time wholly occupied with official duties, and Bro. Hill is opposed to the plan.

We trust, however, that these brethren may find time to prepare a report, even if it is not as elaborate and detailed as they might wish to have it, as the subject matter is an important one and should be set in motion this year. It cannot be consummated at once, it will take time to mature plans and arrange details, and as the Grand Lodge meets but once a year, it may drag along many years unless some definite action looking to its institution be taken at once. We sincerely trust that the subject will receive the consideration it justly deserves.

WATSONVILLE.—The expenses of the recent Masonic celebration foot up about $1,000. Ten sheep, two hogs and two large beeves were roasted for the barbecue dinner. Among the visitors on the occasion we noticed Bros. Shaw and Baldwin, of Hollister, who took in the dance, and were, on account of their beauty of form and graceful dancing, the envy of our boys. C. W. Waldron of the *Sentinel*, G. W. Hursh of the Santa Cruz *Transcript*, and Senator Hill of the Salinas *Index* attended the barbecue.

COMMENTS.—The Supreme Lodge A. O. U. W. has adopted a resolution abolishing the use of the square and compasses as working tools and emblems of that Order. This is done, recognizing the time-honored use of those emblems by the Masonic fraternity, the A. O. U. W. not wishing to appear under the necessity of borrowing or counterfeiting Masonic emblems. We regard the change as a good one.—*Redding Independent*.

WORSHIPFUL MASTER WM. MANNING, of Escurial Lodge, No. 7, Virginia City, was in our city last week, looking up his stolen property. His jewelry store was robbed the week before, and parties supposed to be the thieves have been arrested here.

SINCE the reduction of fees for degrees from $100 to $50 and the entire abolishing of the affiliation charges by California Lodge, No. 1, it has had many accessions to its membership.

SCOTTISH RITE Masonry is enjoying quite a revival, large numbers having taken these degrees of late. Grand Commander Charles F. Brown is a worker.

Order Eastern Star.

Officers Grand Chapter.—JEROME BANKS, Gr. Patron, Red Bluff; MRS. S. JENNIE MANN, Gr. Matron, S. F.; MRS. ADDIE E. WOOD, Gr. Sec'y, S. F.

CALIFORNIA Chapter, No. 4, of which Mrs. M. E. Hentrich is Matron, is having a season of prosperity. Their last meeting on July 14th was quite an interesting one. The degree was conferred on five candidates in a manner that called forth compliments from visitors. An adjournment was had to the banquet-room, where the sisters had provided a fine collation, after which guests and members spent a pleasant hour in listening to a short impromptu programme, consisting of a solo by Mrs. C. O. Swanberg; recitation, Miss J. Drucker; solo (operatic), Miss Amelia Altshuler; and several spirited dances closed an enjoyable evening.

IVY CHAPTER, No. 4, held a grand meeting in their hall, Shiels' building, on Tuesday evening, July 19th. There was a large attendance, including the visit of a delegation from Oak Leaf Chapter, No. 8, Oakland, numbering 15. Three candidates were initiated in a manner that reflected credit on the officers and called a deserving compliment from the Grand Matron, Mrs. Jennie S. Mann. An adjournment was had to the banquet-room, where a fine collation was in waiting, at which the choice edibles and ice cream were dealt out by the fair hands, and in huge quantities. At the conclusion of the banquet, Chas. E. Bishop, on the part of the Oakland delegation, responded in a speech of thanks for the kind and liberal manner in which they had been entertained. W. A. Robertson, Patron of Ivy, in his happy manner, welcomed their guests from Oakland and San Francisco, and the ladies of his own Chapter for their zeal and labors. A very enjoyable evening was closed with a lively dance in the main hall.

Knights of Pythias.

Grand Officers.—S. L. TERRY, P. G. C., Stockton; JOHN H. HARNEY, G. C., S. F.; GEORGE CANTUS, G. Treas., S. F.; A. G. BOOTH, Grand K. of R. & S., S. F.

[Communicated.]

Friendship.

What is friendship? It is said to be the corner stone of nearly all secret societies. Webster defines it as a noble and virtuous attachment, springing from a pure source; personal kindness; a reciprocation of good offices, and, in fact, a mutual desire to help and defend each other.

The Order of Knights of Pythias has laid its foundation on this principle, and every member has bound himself, by the most solemn asseverations, to practice this principle so long as life shall last. Are these obligations generally observed? I ask every Knight of Pythias to be his own catechist. What is your answer?

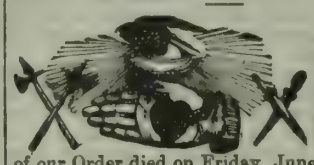
Man by nature is, or ought to be, a social being. Are you? Do you love to recognize a brother knight whenever or wherever you meet him? These are important interrogatories, and if you find that you fail in coming up to the true standard of these principles, be just and remember your obligation.

Should friendship be confined to your brothers only? I say no. Many of your brethren have wives and daughters; some have mothers and sisters. Should we not, as true knights, remember them with our choicest examples of friendship?

My brethren, our Order is assuming a grand and noble standing in the community, and if the principles on which it is founded be carefully nurtured, observed and practiced, it will become one of the grandest and most useful institutions for the amelioration of the condition of mankind in the world. Otherwise, should selfishness be the rule, and the principles of friendship, charity and benevolence be the exception, it will go down to the catacombs from whence we resuscitated it, and sleep the sleep of centuries again.

Next to putting in practice the beautiful lessons taught in our ritual, the growth and perpetuity of the Order depends on the selection of high-minded, honorable and live men to fill the prominent positions. No better evidence of this can be adduced than the astonishing impetus and forward movement of the Order that has taken place all along the line in this jurisdiction since our esteemed brother, John H. Harney, became the head of the Order in this State. He is truly what we may call a live man; puts on no unnecessary airs, is socially pleasant with all, and from the amount of time and talent he is devoting to the welfare of our Lodges we predict for him a bright page in the history of our noble Order. But we would be unmindful of our obligations to our genial and efficient Grand Master-at-Arms, Brother F. Merguire, together with the assistance of his beautiful and accomplished lady, in promoting the interests of the Order, if we omitted to make honorable mention of them. This is inaugurating a new feature among us. Do not be jealous, lady friends, but go and do likewise, and we promise you the hand of true fellowship. The field for your labor in the interest of humanity is extensive, and the influence of a woman is said to be worth that of seven men and a half. May we have it? Yours respectfully,

J. P.



A NEW Lodge is about to be started in Oakland. The list may be found at the Philadelphia restaurant on Broadway, near Eleventh street. Past Chancellor F. W. Spiars has charge of the document and all who desire to become members should leave their names. The charge for a charter member is only $10, just half what it is usually. There are already three good enterprising Lodges in Oakland. All that is wanted to put Pythianism on the pedestal it should occupy among the sister Orders is a hall of its own.

ADAM FULLRATH, District Deputy, is engineering for two new Lodges, one at Haywards and the other at Livermore.

I. O. O. F.

Grand Officers.—DAVIS LOUDERBACK, G. M., San Francisco; LEON D. FREER, D. G. M., Oroville; D. M. BURNS, G. W., Sacramento; W. B. LYON, G. Sec'y, San Francisco; H. B. BROOKS, G. Treasurer, San Francisco.

Death of George W. Race, P. G. Sire.

Through private sources it is announced that this distinguished Past Grand officer of our Order died on Friday, June 17th, at New Orleans, La., where he has been a successful practitioner of law for many years, and acquired a competence that enabled him to live comparatively independent of the constant and daily toil and struggle so common to human life. He was a high-toned gentleman, yet affable to all, without reference to their station and condition, provided they were such as maintained their self-respect. He was a leading member and communicant of the Episcopal church, and frequently a representative in important conventions.

George W. Race, P. G., was admitted to the Grand Lodge of the U. S. as an accredited Representative from the Grand Lodge of Louisiana, at the session of 1853, held in Philadelphia. At the session of 1854 he was elected Deputy Grand Sire. In 1855 his Grand Lodge returned him as Representative, and he continued to act as such during the session, serving as chairman of the Committee on Petitions, after his installation as D. G. Sire. In 1856, the Grand Sire being absent by reason of illness, D. G. Sire Race opened and presided during the session, and was honored by the adoption of a complimentary resolution. At the opening of the session in 1857 he was installed as Grand Sire, and served until the close of that of 1858.

Bro. Race was not present again in the Grand Lodge until 1869, when the session was held in San Francisco. He was also present at the Chicago session in 1871, at Atlanta in 1874, and Philadelphia in 1876; since which time he has not been in attendance. His demise will be regretted by a large circle of social and fraternal friends, and by none more than the older members of the Sovereign Grand Lodge.

THE Odd Fellows of Wheatland are now making brick for their proposed new hall to be erected this fall; probable cost $900, to have a large store underneath. The Order there is quite strong and growing rapidly. There is talk of starting a new encampment at Wheatland when they get into the new hall, which will be about New Year's.

AT a public installation of Roseville Lodge, there was a large attendance, and District Deputy Hainy of Lincoln gave good satisfaction in the beautiful installation ceremonies.

THE visitors to Excelsior Degree Lodge express themselves much pleased with the work as performed by the new officers, all agreeing that the change was a most happy one.

GRAND PATRIARCH WM. T. GALLOWAY has nearly completed his circuit and has visited nearly all the encampments of the State. He has made a most efficient officer.

C. A. BRIDGEFORD, Noble Grand of Colusa Lodge, spent a few days in our city last week, stopping while here at the Russ House.

GRAND MASTER DAVIS LOUDERBACK is soon to start on a tour of visitation among the Lodges of the State.

Knights of Honor.

Grand Officers.—DAVID MCCLURE, P. G. D., San Francisco; CHAS. E. TRAVERS, G. D., San Francisco, R. H. WARFIELD, G. Treas., San Francisco; W. H. MAHONEY, G. Reporter, office St. Ann's building, cor. Powell and Eddy.

Unless some relief is afforded this Order in the matter of paying beneficiary claims more promptly, one of two things will surely be done. Either the plan of having separate beneficiary jurisdictions, similar to the A. O. U. W., will be urged, or secession from the Supreme Lodge by the Order in California. The claim of Mrs. Cunningham, widow of Thomas H. Cunningham, who was shot April 22d, has not yet been paid, and assessment No. 85, just levied, does not provide for the payment of any claims arising later than April 23d. The membership are perfectly willing to pay their assessments promptly if called upon, and hence this does not appear to be any valid excuse for the long delays in paying death claims. The Supreme Lodge officers had better observe "the hand writing on the wall," and respond to the appeal forwarded to them by the Lodges in this city; otherwise there will be trouble.

GRAND DICTATOR TRAVERS is an earnest, energetic officer, and he is desirous of accomplishing a good work during his term of office, and to that end he asks the various subordinate Lodges to stand by him in going a little outside of the law and employing a Grand Lecturer, or organizing officer, to devote his whole time to traveling, instructing Lodges and forming new ones, said officer to receive a salary of $125 per month, and have all expenses paid.

AURORA LODGE, K. and L. of H., installed the following officers: Mrs. L. A. Rapp, Past Protector; H. K. Cummings, Protector; Mrs. F. J. Williams, Vice-Protector; Mrs. L. J. Wheelock (3d term), Secretary; Miss M. E. Watson, Fin. Secretary; C. E. Baker (5th term), Treasurer; Mrs. M. E. Levi, Chaplain; G. H. Williams, Guide; Miss Ella Faulkner (2d term), Guardian; J. H. Crocker, Sentinel.

ROYCBIV CHOSEN FRIENDS

Grand Officers.—CHAS. W. BRYANT, G. C., San Francisco; JAMES M. BAIRD, G. A. C., San Francisco; JOHN W. SHAFFER, G. Treas., S. F.; S. DANIELEWICZ, G. Rdr., office 601 California street, S. F.

ACCOMPANYING notices of Assessments Nos. 8 and 9, the Supreme officers issued the following appeal, dated Indianapolis, July 1, 1881: At a regular meeting of the Executive Committee, held June 28, 1881, the levying of Assessment No. 9, fixing the date July 10, 1881, was ordered. It was thought best that a special circular should be issued, requesting and directing a prompt payment of Assessment No. 9, for the reason that already enough deaths were before us to consume the entire amount of cash arising from Assessments Nos. 8 and 9, neither of which have been paid into the Supreme Treasury. Upon motion of C. D. Pearson, Supreme Medical Examiner, I was directed to issue this as the sentiments of that body.

I would suggest that you, as officers, urge the payment of Assessment No. 9, bearing date of July 5th, by your members, and that the Treasurer be instructed to at once forward No. 8 to the Supreme Treasury, on receipt of this notice, if the same has not been done. Four Councils of this date have paid No. 8.

The manner in which this can be accomplished is by calling a special meeting for the payment of assessments, and authorizing the Financier to go direct to all of the members, with an explanation of the urgency of the case, and collect Assessment No. 9, or get their consent to have the same paid from the Reserve Fund as a loan. Another plan which will enable the Treasurer to immediately forward the money for No. 9 is by loaning the whole amount of your Reserve Fund for the use of Assessment No. 9. This, however, will apply only to the older Councils, as the new ones will have but little of that Fund. This will enable the Supreme Treasurer, within the next 30 days, to cancel the larger proportion of the death claims, if not all of them, and will also give to each member the full 30 days in which to pay Assessment No. 10 to the Financier.

Now, kind friends, recollect that, although you may not be aware of the fact, the Chosen Friends deserve great credit for their promptness in paying past death losses to the widows and orphans. This is a fact, and each and every member of this, our noble Order, deserves equal credit for the same.

To be brief and explicit: You will be prompt in the payment of Assessments Nos. 8 and 9, as the deaths are already before us and waiting payment, and remember when you are paying these assessments that they will not be laid away for future deaths, but they will be delivered to the rightful owners as fast as received.

No one should become discouraged over this matter, for the same may never occur again, as two-thirds of the deaths reported were caused by accidents, and you can readily see for yourselves that $16,000 of these losses occurred in the month of June, therefore compelling us to make this immediate demand. Upon the back of each assessment notice is given the name and amount of the deaths not mentioned in the calls for Assessments Nos. 8 and 9, issued by the Supreme Recorder.

Trusting and hoping this will be received and promptly attended to, I am

Yours in F., A., P.,

EMI KENNEDY, Supreme Treasurer.

Attest: W. B. LINN, Secretary of Executive Committee.

Good Templars.

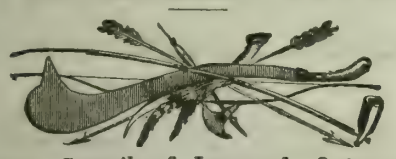
Officers of the Grand Lodge. ROBERT THOMPSON, San Francisco, G. W Chief Templar; MRS. H A. MAYHEW, Red Bluff, G. W. Vice Templar; DR. I. S. HALSEY, Vallejo, G. Treas.; GEORGE B. KATZENSTEIN, Sacramento, G. Sec'y.

MONDAY, July 18th, the Order in this city celebrated the 30th anniversary of the Order by tendering to George B. Katzenstein, of Sacramento, a grand reception.

The hall was elaborately decorated with flowers, bunting and mottoes. Upon the stage, immediately in front, was a fine picture of Mr. Katzenstein, and suspended over it were the words "Welcome to the Right Worthy Grand Templar of the World." The following was the programme:

Opening remarks, Dr. R. H. McDonald (President Pacific Bank, Chairman); opening

ode; invocation, Rev. D. E. Bushnell, G. W. C.; harp solo, Miss Inez Carusi; address of welcome, Robert Thompson, G. W. C. T., of Cal.; response, George B. Katzenstein, R. W. G. T.; song, "O Loving Heart," Miss Anna L. Kelly; piano solo, Rigoletto, Miss Inez Carusi; address, Rev. C. S. Haswell, P. G. W. C. T.; piano solo, Miss Inez Carusi; recitation, Mr. Walter Leman; address, Mrs. E. P. Stevens, G. L.; song, "The Woods," Miss Anna L. Kelly; harp solo, "Home, Sweet Home," (by request) Miss Inez Carusi; closing ode; closing prayer, Rev. D. E. Bushnell, G. W. C. The above was followed by a social reception, in which all present were invited to participate.



The hall was densely packed, and a very pleasant evening was passed by all who were favored with the opportunity of being present. Many Lodges in the interior were represented by large delegations, particularly Vallejo Lodge.

A most pleasing incident (or accident) occurred during the evening, known only to a few. The exercises were held in the main hall of the B. B. building, and those sitting nearest the door were amused at seeing a large posse of policemen, with brass buttons glaring in the gaslights, clubs and revolvers in hand, rushing by the doorkeepers and demanding admission to the hall. No sooner had they got fairly inside than one was heard to remark, "They are quiet enough here," and they soon after retired.

It turned out afterward that there was a convention of politicians holding a session in the basement of the building, and as some of the participants were disposed to use "knock-down arguments" a messenger had been dispatched for police to quell what threatened to be a row. Without stopping for specific orders, the gallant defenders of the "under man in a row" rushed to the B. B. building, and seeing the brilliant light and hearing frequent applause, supposed as a matter of course they were on the right scent. They arrived at the convention, as such officers generally do, after the disturbance had subsided.

Improved Order of Red Men.

Officers of the Great Council. EUGENE LEHE, Great Sachem, Stockton; J. A. FILCHER, Great Senior Sagamore, Auburn; J. F. PINKHAM, Great Junior Sagamore, Oakland; HENRY A. CHASE, Great Prophet, S. F.; H. S. WINN, Great Chief of Records, S. F.; ADAM SMITH, Great Keeper of Wampum, S. F.

Great Council of Improved Order of Red Men.

Sixteenth Great Sun Session.

The Great Council of California met at Santa Cruz on Tuesday evening, July 26th, at 8 o'clock P. M.

The following were appointed a Committee on Credentials: C. L. Wiggin, W. M. Betts, and J. O. Hector.

After a short recess they reported the following as entitled to seats: Eugene Lehe, Great Sachem; J. A. Filcher, Great Senior Sagamore; J. F. Pinkham, Great Junior Sagamore; Henry A. Chase, Great Prophet; H. S. Winn, Great Chief of Records; Adam Smith, Great Keeper of Wampum and Great Representative; Grove L. Johnson, Great Representative; George W. Whitlock, Great Sannap; Charles E. Spencer, Great Mishinewa; G. S. Farley, Great Guard of Wigwam; J. H. Josselyn, Great Guard of Forest; Past Great Sachems, Adam Smith, Davis Louderback, J. H. P. Wentworth, B. F. Josselyn, Charles L. Wiggin, Grove L. Johnson, Geo. B. Katzenstein and Henry A. Chase, and the following delegates: Manhattan Tribe, No. 2, Somersville, David Spowart, Wm. Prosser and H. E. Dillingham; Hiawatha, No. 3, San Francisco, E. Silverstine, M. Leisen, H. Barber and J. H. Lemon; Manzanita, No. 4, San Francisco, P. S. Glassford, John Blake, Wm. Jones, J. H. Hannaford and H. W. Geary; Irataba, No. 6, San Francisco, Chas. L. Wiggin, F. F. DuRose and Henry A. Chase; Miantanomah, No. 9, San Francisco, Davis Louderback, J. F. Pinkham, C. W. Horton and E. A. Clough; Pohonachee, No. 10, San Francisco, Wm. Betts, F. Condon, E. H. Larkin and John Smith; Pocahontas, No. 11, San Francisco, A. Andrews, I. G. Gardner, F. A. Hornblower, S. Milleken and J. P. H. Wentworth; Sotoyome, No. 12, San Francisco, L. Silver, F. Brandt, J. H. Josselyn and B. F. Josselyn; Consumnes, No. 14, Sacramento, Geo. B. Katzenstein, Nelson Wilcox, Arend Schaden and J. P. Counts; Minnehaha, No. 15, Santa Cruz, A. M. Peterson, John H. Dennett and George I. Hall; Montezuma, No. 18, Stockton, Eugene Lehe, J. L. Mowbray, W. S. Fowler and E. Hickenbotham; Samoset, No. 22, Vallejo, M. G. Winchell, J. W. Williams and J. G. Smith; Metamora, No. 24, Redwood, G. W. Green, G. Plump and G. H. Jacobus; Red Jacket, No. 28, Sacramento, C. E. Spencer, R. H. Pettit, J. W. Willem and James McCaw; Oneida, No. 31, Dutch Flat, John Nicholls, John Johnson, S. E. Swenson and James T. Staples; Weiner, No. 34, Grass Valley, Thomas Martin, Nicholas Morcum, J. D. Thomas and Herman Uphoff; Iroquois, No. 35, Stockton, S. Kaiser, Geo. S. Edwards, W. M. Deming and C. A. Campbell; Tuscarora, No. 36, San Francisco, F. Lundemann, V. Acker and M. A. Fromert; Sioc, No. 37, Chico, J. W. Chamberlain, W. S. B. Wilson, J. L. Geiger and J. H. Empire; Owasso, No. 39, Sacramento, Grove L. Johnson, R. B. Harmon, E. B. Olsen, J. H. Crone and Frank N. Fish; Red Cloud, No. 41, Sacramento, J. D. Hector, E. C. Hopkins, C. H. Holton, J. G. Miller and O. N. Conkrite; Yuba, No. 45, Marysville, Samuel Garber, J. C. Kingsbury, William Brogden and J. E. Boorman; Seneca, No. 47, North Bloomfield, G. S. Farley; Delaware, No. 48, New Castle, J. A. Filcher, B. Mitchell, E. W. Culver and A. G. Abbott; Wyoming, No. 49, Nevada City, Sam'l Clutter, Geo. M. Hughes, H. C. McKelvey and W. Scott; Ieka, No. 53, Yreka, F. G. Hearn, A. H. Burrows, E. H. Schofield, C. J. Munro and E. Ranons, which report was accepted.

The following Long Talks were then presented:

The Long Talk of Eugene Lehe, Great Sachem, congratulates the Order upon its present healthy appearance, and the fact that dissension is of but rare occurrence in the Order. He has visited all the Tribes in the Reservation with the exception of Manhattan Tribe, No. 2, located at Somersville. He speaks of the courtesy received from all the Tribes; that his object was to inform the Tribes as to what was being done in the different hunting grounds of the Reservation, and to exemplify the unwritten work of the Order. He found the Tribes well up in the work; peace, harmony and financial, as well as numerical prosperity, prevailing in their midst. The remaining portion of the Long Talk is under the following heads: Appeals; Dispensations; Decisions; Resignations and Appointments; Circulars Issued; Charter Surrendered; Consolidation of Tribes; Official Bonds; Reports of District Deputies; Endowment Fund; State of the Order; Honored Dead; Communications and Recommendations.

The Long Talk of the Great Chief of Records, H. S. Winn, is very encouraging. He reports the Order as being in really a better condition to-day than it has been for the past five years. The progress has been steady and solid—the result of vigorous vitality. The annual report to the Great Council of the United States for the Great Sun, ending December 31, 1880, shows a decrease of but seven members, being 225 less than the prior Great Sun. The decrease during the past Great Sun has been but 29. The condition of the Wampum account shows the total amount received to be $2,506.54; disbursements, $1,758.05, leaving a balance on hand of $748.49. A valuable table of statistics is presented, showing the membership, finance, etc. The total number of Tribes is 26; membership, 1,560; expended for sick benefits, $5,490; funeral benefits, $1,864.25; other relief, $1,365.26; expenses, etc., $13,751.15; for property purchased, $4,560.73; Wampum on hand, 1st Buck Moon, 390, $9,108.03; total assets, 1st Buck Moon, 390, $60,459.80.

The Long Talk of the Great Keeper of Wampum, Adam Smith, gives the receipts at $2,506.54; disbursements, $1,758.05.

The Long Talk of the great Representatives, Grove L. Johnson and Adam Smith, who attended the last session of the Great Council of the United States, Boston, Mass., which kindled its council fire on the 14th Sun of Corn Moon, Great Sun of Discovery, 389 (Sept. 14th, 1880), states that the session was pleasant and harmonious. Some of the State Great Councils show an increase in membership, while others report a decline. The decrease was owing to the financial depression, which prevailed about five years ago. The Long Talk contains a summary of the most important laws and decisions enacted by the Great Council. The next session of the Great Council will be held at Annapolis, Md., September 13, 1881.

The long talks were referred to a committee consisting of C. L. Wiggin, M. G. Winchell and S. Garber, for distribution.

The hours of meeting were fixed at 10 to 12, 2 to 5, and at 8 in evening.

The Committee on Printing reported that they had awarded printing for present session to Joseph Winterburn & Co.

The Great Council then took a recess until Wednesday morning.

Wednesday Morning Session.

Great Council called to order at 10 o'clock by the great Sachem.

Great Sachem Lehe appointed the following regular Committees for the session:

Appeals and Grievances—Grove L. Johnson, J. P. H. Wentworth, J. L. Counts, E. H. Parkin, G. Plump, M. G. Winchell.

Legislation—Geo. B. Katzenstein, R. H. Pettit, Fred. Brandt, Wm. Brogden and F. G. Hearn.

Laws and Usage—Benj. F. Josselyn, A. M. Peterson, J. L. Mowbury, R. B. Harmon.

State of the Order—Ed. Culver, W. W. Cowell, Wm. Jones, Geo. M. Hughes and Samuel Garber.

Finances—I. G. Gardener, W. M. Betts, J. B. Douglass, W. S. Fowler and John Nicholls.

Charters and Petitions—H. C. McKelvey, H. S. Gray, V. Acker, J. H. Dennett and J. W. Chamberlain.

Correspondence—H. S. Winn, F. G. Hearn, F. A. Hornblower, J. O. Hector and E. B. Olser.

Printing—H. S. Winn, S. A. Clough and W. M. Deming.

Union of Orders—Adam Smith, Geo. B. Katzenstein, Davis Louderback, C. Holton and B. Mitchell.

The Committee on Distribution made their report recommending appropriate reference of subjects contained in Long Talks.

The several standing Committees made their reports of business entrusted to them during the year, which were accepted.

The Great Council then took a recess until 2 o'clock P. M.

The afternoon session of Wednesday was consumed in considering reports of committees.

The appeal case of Wm. Youngs *vs.* Red Cloud Tribe, No. 41, was debated at length, and the action of the Tribe sustained.

The decision of the Great Sachem in the appeal case of Crawford *vs.* Miantonomah Tribe, No. 9, was sustained.

A special vote of thanks was tendered to Past Great Sachem, Davis Louderback, for services rendered in protecting the interests of the Great Council.

The Committee on Laws and Usage to whom were referred the decisions made by the Great Sachem, reported, approving of all decisions. The report was adopted.

Several reports were made on proposed amendments to Constitution of subordinates.

Thursday forenoon the following were elected: Great Sachem J. A. Filcher; Great Senior Sagamore J. F. Pinkham; Great Junior Sagamore C. E. Spencer; Great Prophet, Eugene Lehe; Great Chief of Records H. S. Winn; Great Keeper of Wampum, Adam Smith; Great Representatives to the Great Council of U. S., Henry A. Chase and Grove L. Johnson; Great Trustees, Davis Louderback, B. F. Josselyn and J. H. P. Wentworth.

The first business in order Thursday afternoon was the raising up (installation) of great chiefs. The Great Sachem elect appointed the following: Great Sannap, A. M. Peterson; Great Mishinewa, A. Andrews; Great Guard of Wigwam, R. H. Pettit; Great Guard of Forest, I. Silver.

The ceremony of raising great chiefs was performed by Past Great Sachem, Benj. F. Josselyn, assisted by Past Great Sachems, Grove L. Johnson, C. L. Wiggin, Geo. B. Katzenstein, Henry A. Chase and Past Sachems, P. Milleken and Wm. M. Belts.

The Great Sachem appointed the following standing Committees for the year.

Appeals and Grievances—Grove L. Johnson, J. P. H. Wentworth, J. W. Willem, J. W. Chamberlain, Samuel Garber and S. A. Clough.

On Legislation—Geo. B. Katzenstein, Fred. Brandt, R. B. Harmon, B. Mitchell and W. S. Fowler.

On Laws and Usage—Benj. F. Josselyn, Wm. M. Belts, J. L. Mowbury, H. W. Gray and F. A. Hornblower.

On State of the Order—Charles L. Wiggin, F. G. Hearn, Geo. M. Hughes, J. O. Hector and M. G. Winchell.

On Finance—I. G. Gardener, John Nicholls, G. W. Green, M. Liesen and J. G. Miller.

Charters and Petitions—H. C. McKelvey, W. W. Cowell, J. H. Dennett, V. Acker and G. S. Farley.

Correspondence—H. S. Winn, O. N. Conkrite, Ed. Culver, J. H. Hannaford and E. B. Olser.

Printing—H. S. Winn, S. Milleken and Wm. Deming.

The retiring Great Sachem, Eugene Lehe, was then presented with an elegant gold-handled cane by Past Great Sachem, Charles L. Wiggin, in behalf of the delegates to the Great Council.

San Francisco was determined upon as the place for holding the next Great Council.

The Great Sachem appointed the following Deputies: District No. 1, T. Wilson; No. 2, W. H. Fisks; No. 3, J. H. Hannaford; No. 4, H. C. Dillingham; No. 5, J. P. Counts; No. 6, G. I. Holt; No. 7, J. L. Mowbury; No. 8, R. W. Burton; No. 9, M. Preble; No. 10, J. Nicholls; No. 11, A. A. Smith; No. 12, Wm. Brogdon; No. 13, J. W. Chamberlain; No. 14, F. G. Hearn.

After which, the Great Council fire was quenched in ample form.

"FROM OUR OWN REPORTER." we give quite a full account of the proceedings of the Red Men. It is the intention of the publishers of the WATCHMAN to continue this practice at other annual meetings of different Orders, as they may occur from time to time.

Native Sons Golden West.

Grand Officers—FRANK J. HIGGINS, D. G. Pres., San Francisco; H. CLAY CHIPMAN, G. P., Sacramento; GEORGE B. BALDWIN, D. G. P., Marysville; HENRY LUNSTEDT, G. Sec'y, San Francisco.

CALIFORNIA PARLOR, No. 1, will celebrate the day by a grand ball at Ixora hall on Mission street. This Parlor is celebrated for its parties, and (if invited) we shall expect to enjoy this as we have others.

NATIVE SONS' CELEBRATION.—Marysville Parlor, No. 6, N. S. G. W., propose to celebrate the anniversary of their Admission Day on September 9th. The details of the celebration have not yet been settled. An excursion train is to be run from Sacramento to this city, bringing visiting members of the Order from Stockton, Oakland and San Francisco, and an excursion from Oroville is also contemplated.

IN reference to the celebration of Admission Day by the Native Sons of Marysville, September 9th, the *Record-Union* says: "The delegations from San Francisco, Oakland and Stockton will be expected to come to Sacramento on the evening of the 8th, and leave here with the Sacramento delegation on the morning of the 9th by special train. A large number of friends, beside the delegation, will go from this city."

THE Grand Secretary this week received the application for a charter from the Native Sons of Placerville, El Dorado county. The names embrace the best element of that city, mostly of the good old pioneer stock, and "worthy sons of worthy sires", judging from the enthusiastic, patriotic fervor that eagerly seeks to be enrolled under the golden banner of the natural guardians of the institutions conceived, nourished and reared by an illustrious ancestry. In the early part of August the new Parlor will be duly instituted and consecrated by Grand President, H. Clay Chipman.

BRO. JAMES RILEY, of Sacramento Parlor, last week visited California Parlor. He said that the up-country Parlors were enjoying the greatest prosperity under the inspiring influences of the persistent and intelligent enthusiasm of energetic, self-reliant young men. He said the celebration of Admission Day in Marysville would be under the tri-partite management of Marysville, Sacramento and Oroville Parlors, and had no doubt that under the management of such energetic workers as Presidents J. C. Venter, Frank D. Ryan and A. F. Jones the celebration would surpass any attempt of the kind ever witnessed in Yuba county. President A. C. Lutgens; Past Grand President, F. J. Higgins; Grand Secretary, H. Lunstedt and Past President John H. Grady also addressed the Parlor, after which the Parlor adjourned.

American Legion of Honor.

COUNCILS should make returns and pay the per capita tax prior to August 10th. The penalty for neglect is suspension.

THE several Councils of the State are rejoicing at the prospect of soon having a Grand Council of California. Canvassing for officers is now in order, and the opportunity is being improved by many.

DARIUS WILSON, present S. C., desires it distinctly understood that he is not a candidate for re-election. Nearly a year ago he nominated Dr. Jacob Roberts, of Philadelphia, Pa., for the position, and expects that he will be elected.

THE next annual meeting of the Supreme Council, A. L. of H., will be held at 34 Essex St., Boston, commencing Tuesday, August 23, 1881, at two o'clock P. M. Representatives from Grand Councils will not be admitted unless in possession of the annual password for Grand Councils.

WE have from time to time mentioned the names of such candidates as have been prominently mentioned for some of the leading offices in the Grand Council, without especially recommending or endorsing them. The name of H. C. Hinman, as we go to press, is given us as a strong man for Grand Commander; also that of O. C. Wheeler. Both of the gentlemen are residents of Oakland, and the latter is also urged by his friends as a good man for Supreme Representative.

The liveliest contest appears to be over the office of Grand Secretary. Miss Abbie E. Wood, who has so long and so faithfully served the Grand Chapter of the Order of Eastern Star, of this State, as its Grand Secretary, is being strongly urged for the position, and as the Supreme Secretary is a lady, it will appear eminently proper that she shall be elected. Her competitor is a gentleman named Field.

ANOTHER new Council was instituted on the 2d ult., at San Buenaventura, by Deputy Supreme Councillor D. S. Van Slyke, to be known as Ventura Council. The following are the officers: Commander, Dr. C. L. Bard; Past Commander, E. S. Hall; Vice Commander, Waldo Porter; Orator, Ed. Warner; Secretary, F. P. Shaw; Collector, J. P. Thieler; Treasurer, W. J. Walton; Guide, S. W. Grabel; Sentinel, J. A. Conaway; Chaplain, W. G. Adams; Trustees, W. J. Walton, C. L. Bard, W. G. Adams; Medical Examiner, C. L. Bard; Warden, F. B. Dennis.

A NEW Council was instituted in this city on Wednesday evening last, composed of many of our prominent society friends. Among the prominent names are those of Mr. Thos. H. Caswell, Grand Secretary of the Grand Chapter of Royal Arch Masons, Mrs. S. Jennie Mann, Grand Matron Order Eastern Star, Dr. F. F. Lord, of Phœnix Council, No. 18, Chosen Friends, and others. Dr. C. S. Haley was the instituting officer, and the Council starts life with about 30 members.

THE Charter Oak Livery Stable, 775 Market street, kept by Bro. O. C. Mundell, and connected by Telephone 5,105, is the place to board horses or to get a turn out.

A. O. U. W. Directory.

Cards inserted in this list at the rate of 25 cents per month payable semi-annually in advance. If errors or omissions are noticed, please write the office direct.

CALIFORNIA.

OFFICERS OF GRAND LODGE.

CLAY W. TAYLOR, Past Grand Master Workman Shasta
W. H. BARNES, Grand Master Workman....San Francisco

DISCOLORED BRICK WALLS.—The white saline substance that "comes out" upon brick walls, and which has been a source of annoyance to a great many, may, according to the *American Architect*, be remedied. In reply to a query on the subject, it says: The "saltpetering" of brick-work can generally be prevented by adding oil to the mortar at the rate of a gallon to the cask of lime. If cement is used in the mortar, an additional gallon of oil must be allowed for each cask of cement. Linseed oil is generally employed, but any kind that does not contain salt will answer. The incrustation, once formed, can be removed with hot water, or by the muriatic acid generally used for cleaning down brickwork, but it will reappear again by exudation from the interior of the wall, and usually leaves a permanent black, or brown stain.

DO NOT DELAY.—Send us your subscriptions promptly Don't let any break occur in your subscriptions to the Watchman. Every live Workman needs every number of the paper, and we need his assistance to print as valuable a journal as we strive to for the special benefit of its patrons and the general good of the Fraternity. Send the cash direct, or, if more convenient, hand it in with your dues to the Financier and we will allow him for trouble and expense of remitting.

THE RECORDERS of all Subordinate Lodges are requested to correspond and act as agents in securing subscriptions for the Watchman. We will pay liberal rates for services rendered. Remember, Brothers, that you can accomplish a mutual benefit to the Order and ourselves.

BY TELEPHONE.—Subscribers, advertisers and other patrons of this office can address orders, or make appointments with the proprietors or agents by telephone, as we are connected with the central system in San Francisco.

BRO. JOSEPH GIUSTI'S OYSTER, CHOP, AND CHOWDER HOUSE, 105 California Market, for ladies and gentlemen, is the place to get an oyster cocktail, or a meal fit for a king. His customers always feel happy after partaking of his good cheer. His parlors are open night and day.

A Magnificent Depot.

The New Edifice Erected by the Chicago and Northwestern Railroad.

Full Description of the Structure—Its Size, Style, Cost, etc.

As the Chicago and Northwestern railway company was the first Eastern railroad to reach the Missouri river, to form a connection with the Union and Central Pacific railroads, and to open an agency in San Francisco, it seems well for us now to call the attention of our readers to the fact that this great corporation has recently completed and has just occupied in Chicago one of the most magnificent passenger stations that has at any time been built by an American railroad.

It is situated on the north bank of the Chicago river, its main front being on Wells street, and having another front on Kinzie street. This location is right in the heart of the business portion of the city, and is quite close to all of the leading Chicago hotels, and about equidistant from all of the depots carrying passengers from Chicago to Eastern points. We quote from a recent number of the Chicago *Evening Journal:*

"The new passenger depot of the Northwestern Railroad, on Wells street, is now ready for occupancy, and although no day has been set for the formal opening some roofing work having yet to be completed—it is certain that but a very short time will elapse ere the throngs of suburban residents living along the line of the road and other travelers, will be made happy by the much-desired extension of accommodations, the lack of which has been borne so cheerfully during the long winter. Already some of the chief officers of the road have moved their headquarters into the new building, and it seems, therefore, appropriate to acquaint the public at this time with some of the general features of the structure, the construction of which has been watched with interest by a very considerable section of the population.

The Location

At the corner of Wells and Kinzie streets, is central and prominent, and commands the attention very readily from several important avenues of passenger traffic in the city. Mr. W. W. Boyington was the architect and supervisor of the work of construction, and he has succeeded in erecting

A Splendid Edifice,

Elegant in design and very conveniently arranged for the purposes intended. Its cost will be about $250,000. It will be a light and airy structure, for it is open on all sides, Kinzie and Wells streets being on two sides, and the Chicago river on a third. There are really

Three Buildings,

The main one, forming the front and facing Wells street; the long baggage-room building back of this; and the express building at the most westerly end, and separate entirely from the rest. There is besides a large iron, wood and slate shed on the south side.

The Exterior

Design of the structure is that of the modern 'Queen Anne,' and is carried out in St. Louis pressed red brick, with trimmings of olive-colored sandstone from Lake Huron and a darker stone from Lake Superior. The octagonal towers surmounting the north and south ends are 100 ft. high. Over the main entrance the middle tower is carried to the hight of 175 ft, and has a flag-pole extending 35 ft above the top of the spire, which is surmounted with a gold ball, and a weathervane in the shape of a locomotive, 7 ft. long. From the weathervane to the sidewalk is 200 ft. One of the sections of the tower below the spire is designed for a clock, the four illuminated faces of which will be 8 ft. in diameter. President Keep has ordered a very fine time-piece to be placed in this tower.

The Main Front

Is 188 ft. on Wells street and 67 ft. on Kienzie; and is three stories and a basement, the latter being on a level with the track platform, which is 17 ft. below the viaduct roadway. To adapt the building to so great a variation in grade and meet the various demands for use has finally been mastered to the satisfaction of all concerned.

The front contains some bold and very artistic stone carving. In the gable pediments flanking each side of the tower, are represented a buffalo, with a mounted Indian in chase, and an engine and a train of cars going round a curve. These bold bas-reliefs are each 8x8 ft. The facade is also relieved by gables between the towers, and the cornices of these, as well as of the larger pediments, just referred to, are terminated by grotesque gargoyles effectively cut from stones weighing several tons each. There are many other prominent stone cuttings and artistically executed brick work, making the building altogether a subject for study and admiration. The main entrance to the building on Wells street is 15 ft. wide. It opens upon a broad, half-landing stairway 20 ft. in width, by which the track-platform story is reached. Entering the main door, the traveler may turn to either hand and enter the main

Waiting-Rooms

Which occupy nearly the entire front of the building. The main waiting-room is 150x65, and is 18 ft. high. The walls are painted in oil, a subdued gray color, joined to a ceiling handsomely frescoed in bright tints. The floor is laid with polished maple, while the room is finished in black walnut with oak wainscotting. Squares of stained glass fill panels above the deep-set windows, from which a pleasant view is obtained of Wells street and the shipping of Chicago river.

Adjoining the waiting room and overlooking Kinzie street, there is a large, well-lighted dining-room, 60x20 ft. in size, with pantries and store-rooms beyond, supplied with every utensil belonging to the modern kitchen. This floor also contains the ladies' toilet room, the news and fruit stand and men's lavatory, the Pullman Palace Sleeping Car office, Western Union Telegraph and the main ticket offices. A wide stairway leads from the waiting-room to the second story, which is divided into 22 rooms, entered from a middle corridor.

The third story is divided into five rooms that will be used for various purposes.

The Tracks

Can be reached by the main entrance and by an entrance on Kinzie street. On the track floor are additional waiting rooms for ladies and gentleman, refreshment counters, etc. The lower waiting-room is 160x70 ft. in width, and is finished in oak. The arrival and departure of trains can be seen through large glass doors. There is a side room for the use of emigrants, passengers, and a dining room and lunch counter for their accommodation. A noticeable improvement is at once seen in the broad platform at the side, where all

Baggage

Is received and checked, then carried back through a large doorway to the long baggage-room, which extends 217 ft. along Kinzie street. The baggage building is 25 ft. wide and three stories high. The express building beyond is 150x15 ft., and one story high. On the south side of the depot are nine tracks, which are covered by an iron and glass roof, 450 ft. long and 100 ft. wide, and supported by three rows of iron columns.

In the Decorative Work,

Which forms so important a feature in a public building of this character, the new Northwestern depot stands pre-eminent in respect to beauty of design and perfection of finish. The frescoing has been done in the latest and most approved styles of modern decorative art, and shows admirable taste in the harmonious blending of the colors, producing an effect at once vivid and pleasing, and at the same time restful to the vision. The stained and ornamental glass work contains some elaborate designs, and forms a noticeable feature of the new building, reflecting the highest credit upon the artists, both as to the designing and the execution of the work. All these decorations are of an enduring character, and will not soon be affected by the ordinary wear and tear.

It is designed at an early date to light the new station by

Electricity,

And, with 69 arriving and departing trains daily, it will be one of the busiest, as well as handsomest, railway stations in the city."

INTERIOR VIEW OF A CHICAGO & NORTHWESTERN R. R. DINING-CAR.

This great corporation adopts no half-way measures. Some four or five years ago it placed Pullman hotel cars on its California line. These attracted much of the best and first-class travel across the continent to them, and it has so constantly flowed in this direction that these cars have become too small to accommodate its many patrons. Its management has been in doubt how to meet the wants of its patrons. It could not, of course, resort again to the wayside eating house, it could not run hotel cars enough to satisfy the wants of its patrons. But one resource was left for it, and that was to adopt "dining cars." It is now building, and about the first of June completed, and began to run them between Chicago and Council Bluffs, four Imperial Palace Dining cars, that have been very appropriately named the "Brunswick," "Delmonico," "Leland" and "Illinois." Persons who have seen these cars say they are the finest, most capacious and best arranged of any that have yet been built. They were built at the company's shops and from plans of its own adoption, so that it is believed that they will fill all the requirements of the most particular traveler. Full and luxurious meals will be furnished at 75 cents each. With the completion of its new central passenger station in Chicago, these new Imperial Palace Dining cars and the many improvements the Chicago & Northwestern railway has adopted, it is plain that its popularity must increase, and with this increase its traffic also must largely increase. It does not require a prophet's eye to see that it will very soon, if it does not now, require a double track all the way from Council Bluffs to Chicago.

The above illustrations will give to our readers some idea of this new passenger station and of the dining cars referred to above. The representative of this great corporation on the Pacific coast is Bro. J. Meredith Davies, P. M. W., a gentleman noted for his energy and push. Having been in railroad service for over 15 years, most of the time as General Passenger and Ticket Agent, he is thoroughly familiar with all the leading lines of the country—a "railroad encyclopedia"—hence capable of giving correct information to all parties intending to make an overland trip. We are assured that he will gladly give all desired information. He may be seen at his residence, Lick House, or Overland Ticket Office, Oakland ferry.

CHICAGO & NORTHWESTERN RAILWAY DEPOT, CHICAGO.

THERE was joy on the farm when Ben, the oldest boy, came back from college in his sophomore year, and the village was proud of him. "Cheese it, cully," he said when he met an old friend, the son of a neighbor who joined farms with his father; "cheese it, cully; shove us your flipper; clench daddles, pardy. How's his nibs, and what's the new racket?" And his proud old father said: "It was just worth mor'n twice't the money to hear Ben rattle off the Greek just like a livin' language."

A PAINTER who was well acquainted with the dire effects of the law had to represent two men—one who had gained a lawsuit and another who had lost one. He painted the former with a shirt on and the latter naked.

Pure and Impure Water.

If there is any one subject connected with the household which requires more attention than another, it is that of pure water for man and beast. Every medical man knows that impure water is a fertile source of disease in human beings, and innumerable outbreaks of a typhoid nature have been distinctly traced to this cause. Many of the diseases in cattle have their origin from the impure water which they are compelled to drink. In many localities in this country a "mud hole" or "sink" filled with partly stagnant water is the only source of supply for farm animals during the long hot summer, and it is no wonder that diseases of various kinds follow such treatment.

There does not exist two sets of sanitary principles, one affecting human beings and the other the beasts of the field. Impure water, imperfect ventilation, dirt and damp, exercise injurious influences on the health of our domestic animals just as these agents do in the case of human beings. Every practical man should therefore seek to remove these sources of evil as speedily as possible.

Machinery and tools for obtaining good pure water have, of late, been perfected and simplified, so that there is no reason why every man should not have an abundant supply, both for household and stock, no matter where he is. Thousands of large land owners would be justified in purchasing the necessary machinery and tools for prosecuting their own work in this direction; and people with small places in the country would find it to their interest were they to club together and purchase the necessary outfit for sinking wells convenient to house and field. In the cities there are men who sink these wells for a specified price per foot, where the geological peculiarities of the section are known.

KEEP THE LIFE PURE.—An Arabian princess was presented by her teacher with an ivory casket, exquisitely wrought, with the instruction not to open it until a year had rolled round. Many were the speculations as to what it contained, and the time impatiently waited for when the jewelled key should disclose the mysterious contents. It came at last, and the maiden went away alone and with trembling haste unlocked the treasure; and lo! reposing on delicate satin linings, lay nothing but a shroud of rust; the form of something beautiful cold be discerned, but the beauty had gone forever. Tearful with disappointment, she did not at first see a slip of parchment containing these words: "Dear pupil—May you learn from this a lesson for your life. This trinket, when enclosed, had upon it a single spot of rust; by neglect it has become the useless thing you now behold, only a blot on its pure surroundings. So a little stain on your character will, by inattention and neglect, mar a bright and useful life, and in time will leave only the dark record of what might have been. If you now place within a jewel of gold, and after many years seek the result, you will find it as sparkling as ever. So with yourself; treasure up only the pure, the good, and you will ever be an ornament to society and a source of true pleasure to yourself and your friends."

A CAT'S LONG JOURNEY.—A gentleman in this city had presented to him a Maltese cat with four young nursing kittens, by a former friend, living 14 miles out in the country. This cat and her kittens were placed in a close-covered basket inside of which was a blanket in which they were wrapped, and the whole then covered with a thick rug. The basket and its contents were then brought in a wagon to this city, the distance stated. The cat and her kittens were kept in a room in their new home, and carefully watched, fed and petted for seven days she appearing to be wonted and content. On the morning of the seventh day she and her kittens were seen at their new home for the last time, and were missed very soon after. The following day she appeared at her old home with all her kittens. She did not return by the road, the way she came, as she was seen by several persons going through the field with a kitten in her mouth. Allowing 30 hours to have elapsed between the time she was last seen at her new home and the time she was first seen at her old home, she must have traveled a distance of 112 miles carrying a kitten one-half the same distance.—*Bangor Letter to Forest and Stream.*

SOAP BARK FOR CLEANING BLACK GOODS.—For removing spots and dust from black goods of all kinds, a decoction of soap bark has given the best satisfaction of anything we have tried. In fact, we would not be without it. Buy a a few cents worth—to be had of any druggist—break into bits, steep a while in a little more than water enough to cover, strain, and it is ready for use. Brush the goods free from dust, dip a piece of black cloth into the decoction, squeeze out and rub the soiled parts. If a thorough renovation of the article is desired, rip apart, brush from it every particle of dust, and with a cloth dipped into the decoction wipe off each piece, folding it up as you proceed. Then with moderately heated irons, smooth and press the goods upon the *wrong* side until dry. As for silk, we perfer to fold it and place under a heavy weight until dry instead of ironing. Of course, the goods should be but dampened with the liquid.—*R. New Yorker.*

PACIFIC STATES WATCHMAN.

A. O. U. W. Home Paper.

Issued on the 1st and 15th of each month.
At No. 202 Sansome Street, San Francisco, Cal.

Subscription (in Advance), $2 a Year.

Favorable to Advertisers.

By consolidating the large subscription lists of the *Pacific Workman* and *Fraternal Record* with the Pacific States Watchman our advertisers gain an unusually great advantage. We doubt if any one weekly newspaper has ever been circulated to as many different readers on this coast, as have been served heretofore by the *Workman*, *Record* and Watchman together. It is certain that no other periodical is now patronized by a better class of industrial, professional and business men. In fact, our subscription list embraces many of the foremost business and representative men throughout the towns and cities of the coast.

We have pride in making our paper "clean and handsome," and first class in all respects—to the benefit of both our readers and advertisers.

ADVERTISING RATES.

One Square (¼ inch), per issue	$ .75
One Square per month	1,25
Two Squares, per issue	1.50
Two Squares per month	2.50
Obituary notices and resolutions (with 25 copies post-paid for friends of deceased) per sq. (¼ inch)	50

☞ For reading notices, extraordinary display, special advertising and choice places permanently, extra rates will be charged. Reasonable reduction will be made for large and long-continued advertisements. No extra rates for the space occupied by engravings.

OFFICIAL RECOMMENDATION.

[*Resolutions adopted by Grand Lodge of Cal., Feb. 3, 1881*]

Whereas, the Pacific States Watchman, the pioneer A. O. U W. advocate on this coast, without official aid, has long rendered able and valuable services for the good of our glorious organization, we earnestly recommend that our Lodges and the brethren individually patronize the Watchman as liberally as circumstances will justify.

Entered at San Francisco P. O. as second-class matter.

San Francisco, - August 1, 1881.

Nevada Items.

Word comes to us from Brother David Thorburn, Grand Recorder of Nevada, that the new jurisdiction is progressing finely since the formation of their Grand Lodge.

The encouragement given them by the Supreme Lodge, in annexing to the jurisdiction of the Grand Lodge of Nevada the territories of Utah, Idaho and Montana, will have a tendency to spur those brethren on to renewed energy and zeal, for with those districts, in addition to their own undeveloped territory, thoroughly worked up, they may with reasonable prospects hope to have a separate beneficiary jurisdiction of their own within a year or two.

Bro. D. F. Fox, of Gold Hill Lodge, No. 2, has been appointed Deputy Grand Master for the jurisdiction, and will very soon start on an organizing tour through the southern portion of the State, visiting Mason's valley, Aurora, Candelaria, Grantsville and other places.

The Lodges now in existence there are all reported as doing well, adding steadily to their members.

Lucille, No. 8, has doubled its membership within six months. Gold Hill, No. 2, has upon its roll 137 Master Workmen.

A. F. Mackay, Recorder of Storey Lodge, No. 3, Virginia City, reports that the Watchman is becoming a popular paper on the Comstock and beginning to be much read by quiet people.

Bro. S. Friedman, member of Alpha Lodge, No. 1, Eureka, Nevada, has been visiting our city. We learn from him that Alpha, No. 1, has 150 members and growing very fast, and it is also the leading organization of this thriving town.

An amendment to the Supreme Lodge Constitution was adopted at the late session as follows: That until July 1st, 1882, and no longer, members suspended for non-payment of assessments may by a vote of two-thirds of the members present at a stated meeting of their Subordinate Lodges be reinstated by paying a sum equal to the amount charged by such Subordinate Lodges for conferring of the degrees upon an applicant, and by otherwise complying with the laws applicable to the laws for the reinstatement of members.

Notes and Comments.

That the *Fraternal Record* should be merged in the Watchman, seems fit and proper. The field was not broad and rich enough for both to work in with profit. While we trust that the ends of fraternal effort will be more completely met by this union, still it is proper to say that the individuality of the Watchman will in nowise be changed, unless it be in the direction of a wider scope in the fraternal field, if that be possible. The A. O. U. W. has always looked with reverance on the older fraternal societies, seeking the ways of wisdom and strength from their history and experience. It has looked to them as a son looks to a father. Those younger in years than itself, and especially those of similar aims and objects, it regards as a father regards his children. On the one hand, it entertains the sentiment of filial piety, and, on the other, paternal affection. But of the many children, all are not equally promising, nor equally meritorious. It never was, and never can be so. Some have in them the elements of a grand and noble manhood; some the seeds of early decay and death. To draw a correct distinction, we may not be able. Some will live and some will perish. The strong of to-day may be the weak of to-morrow, and *vice versa*. The fittest will survive. Meanwhile, all may justly claim a proper share of our love and friendly regard.

Entertaining these kindly feelings toward all fraternal societies, we may yet be permitted to say that the Ancient Order of United Workmen is held up before the world as the purest and most perfect model of its kind. Thoroughly republican in its form of government, rich in experience in a field before untrod, methodical, precise and exacting in its business features, generous in all its impulses, peerless in the promptitude with which it discharges all its financial obligations, it is an organization of which the nineteenth century may well be proud.

Primarily, the A. O. U. W. was organized for the benefit of the common people. To meet the assessments necessary to guarantee $2,000 to the beneficiaries of its members, together with the ordinary charges for dues, is as much as the ordinary citizen can well spare of his means to do. And no man should deprive himself of the real necessities and comforts of life that those who come after may have in abundance of the things for which he suffered. Keeping these facts steadily in view, the A. O. U. W. has refused to build up what might even seem to be a privileged class in its membership, who could, by reason of greater wealth, secure a greater degree of protection for those dependent upon them. There is, perhaps, no society under the sun, where positive equality is so steadfastly maintained and exemplified as in the A. O. U. W., and no society in which a greater diversity of callings in life are represented in its membership.

Experience has demonstrated that the cost of carrying assurance is so much less in a fraternal society than in a life insurance company, that we find large numbers of well-to-do people who desire more in this line than can be furnished in the A. O. U. W. Those who so desire, and can afford it, we commend to the tender care of other like organizations. We recommend all to the careful consideration of our members. Some promise much more than we—some less. One fact all should remember. Every promise made by a beneficial fraternity can only be redeemed in dollars and cents. Hence, those that promise much must gather much from the membership, and those that promise little need gather but little. None can do any more for the money it costs than the A. O. U. W., for it furnishes assurance at net cost. No mutual society can do any better than that; others may do as well.

We are pained to see that some of the children seem inclined to run after false gods, and base their hopes for permanence on the few, and not on the many, forgetting that civilization in its highest form is a necessity for the existence of such societies, and that civilization and despotism are incompatible. Time will remedy this, but at the cost of the life of some, no doubt.

Grand Master Barnes is putting a great amount of effort into his administration, and with excellent results. Notwithstanding the fact that at the last session of the Grand Lodge the minimum fee for degrees was put at $13, so that with a dollar deposit for the beneficiary fund and a dollar for the beneficiary certificate the entire cost of admission to the Order cannot be less than $15, our membership additions have averaged up to the present time 300 a month. Moreover, great care is exercised that only fit material be accepted, insomuch that nearly 20 per cent. of all applications are rejected either by the physicians, Lodges or the Grand Master, and a decreased death-rate will no doubt be the result. For a long time we have been going along steadily, with one assessment a month, with the prospect that during the balance of the term the average will not be far different; so we have every reason to feel abundantly satisfied in this regard.

Mechanics' Fair.

The Mechanics' fair will open on the 2d of August, and promises to be the most important exhibition ever held in this city. The improvements made in the pavilion, the interest taken by the mercantile, mechanical and promoters of art in applying for space is beyond any previous year at the opening of this leading attraction of this city. A number of our leading merchants have fitted up stands for exhibiting their goods, that have cost thousands of dollars. The art gallery will be larger in extent and variety than heretofore, and it will be the pride of our city. The able managers, profiting by the experience of the past, have left nothing undone to make this notably the leading attraction with both residents and visitors from abroad, for August and the first part of September.

The *Mechanics' Fair Daily* will be published by Messrs. Dewey & Co., which will make the 12th volume. It will be spicily illustrated—useful inventions, notable buildings and select caricatures will be set forth upon its pages; and it will be printed in the building on each evening and circulated free. Our brother Workmen may rest assured that a week spent in this city in connection with the attractions, and useful information to be gathered from a study of improved machinery and labor-saving inventions, will be one of the most pleasant and profitable periods of their lives. While here, we hope they will not forget to visit our Lodge meetings, and cultivate a closer acquaintance with our city Workmen.

As showing the value of the beneficiary money received by the widow of a departed brother, we cite the fact that upon the death of Bro. David J. Saddlemire, of Stockton (who was a member of our Order and also of the Workmen Guarantee Fund), his estate was found to be in an insolvent condition, and it is owing to the money received from these organizations that his widow was enabled to pay a mortgage upon the farm. The simple recital of such noble deeds is sufficient. Comment is unnecessary. The replenishing of the "widow's cruse" is our aim, and nobly does the work progress.

The Rev. M. S. Levy, a P. M. W. of Mt. Hamilton Lodge, No. 43, San Jose, who, for 10 years past, has been a popular and highly appreciated pastor at San Jose, has accepted the charge of the First Hebrew Congregation of Oakland. He will enter upon the discharge of his duties on the first of August. Thereby Oakland gains and the A. O. U. W. brethren of San Jose will loose one of the brightest and most eloquent speakers of the Order in this State.

A bit of strategy was played on the brethren of Magnolia when they accepted the invitation of the sisters of Silver Spray as reported in our last issue. After the good things had been partaken of, about 20 of Magnolia's sons were induced to join the D. of H., and thus became members of Silver Spray.

Many of our city Lodge officers take a pride in being punctual in attendance at the meetings. We may mention the fact that Frank W. Rossbach, sitting P. M. W. of Olympic, No. 127, has went "through the chairs" from Guide to his present position and has never missed a Lodge session. A worthy example for many of our young men under 30 years of age to follow.

We met Bro. W. H. Crowell, of Lodi Lodge, No. 108, in Stockton. He reports his Lodge in a flourishing condition, having 32 M. W.

From Grand Master Workman.

Circular to Subordinate Lodges.

Office of Grand Master Workman,
A. O. U. W. State of California,
525 Montgomery St., San Francisco.

To the Subordinate Lodges of California.

Dear Sirs and Brothers:—I desire to call your attention to the following legislation of the Supreme Lodge:

1. That until July, 1882, *and no longer*, members suspended for non-payment of assessments may by a vote of two-thirds of the members present at a stated meeting of their subordinate Lodges, be re-instated by paying a sum equal to the amount charged by such subordinate Lodges, for conferring of the degrees upon an applicant, and by otherwise complying with the laws applicable to the reinstatement of members.

2. The law requiring assessments of 25 cents a month for four months to raise a special relief fund, has been repealed. As money for this purpose may be needed by the Supreme Lodge, it will be called for and can be raised after said call. Lodges having a surplus on hand for this fund can vote it into their general fund to save a complication of accounts.

3. The compasses and square in the M. W. degree have been abolished, and the language in reference to them on pages 21 and 22 of Ritual, is to be stricken out, and in its place the slips furnished by the G. R. are to be inserted. No emblems are to be placed on the altar in the M. W. degree. The Master Workman will remove the compasses and square from his badge, and substitute the cross gavels.

In addition to the above, I respectfully call your attention to the following:

1. The carlessness of brethren in making their beneficiary certificates payable "to will" or "order," and failing to make such "will" or "order" has caused much trouble. *Legally*, such certificates are payable *to no one* at their death. In several cases, where it has been shown who the entitled heirs were, the money has been paid to them, but much contention and labor would be avoided *by complying with the law* and *naming the person or persons* to whom the money is to be paid.

2. The $2,000 is not "personal property" of a deceased brother, unless the beneficiary certificate reads "payable to my estate." Where a brother dies, failing to give specific directions as to whom the money shall be paid, no claim of an "administrator" on said $2,000 as "personal property" will be admitted or recognized.

3. The deputies are empowered by the G. M. W. to install the officers of Lodges, examine said officers in the work, collect the tax, etc., and are under bonds. P. M. W. of Lodges are not authorized to install, excepting when authorized by said deputy, or when said officer neglects his duty. It is neither beneficial nor proper for a Lodge to install itself, when it can possibly be avoided; therefore, Lodges will communicate with their deputies on this subject, previous to installation.

4. The law gives to deputies the authority to grant dispensations for "public display," and by "public display" is meant any public gathering where the name of the Order is used, or the regalia of the Order worn, such as open meetings, entertainments, balls, parties, picnics, etc., under the auspices of Lodges or Committees of Lodges. It is proper that the officials of the Order should have a fraternal supervision of all such proposed gatherings, and, therefore, when you desire to have such, you will apply to your deputy for a dispensation for same.

5. I again call to your notice the strong grounds taken by the Grand Lodge on the subject of intemperance. We are having deaths from this evil quite too often, and the habits of some of our members are not adding to the reputation of either the Order or themselves. The holding of public gatherings in the name of the A. O. U. W., in halls, gardens, or other places, where bars are especially opened because of such gatherings under the auspices of the Order, is not only a violation of law, but detrimental to our membership and to our good standing before the world. I earnestly ask the aid of all true Workmen to free our institution from this evil.

It is with pleasure I congratulate the Order on its continued increase of membership, and wish to your Lodge prosperity, harmony and success.

Fraternally Yours,
Wm. H. Barnes, G. M. W.

A brother editor writes: Allow me to express my appreciation of the Watchman, which I always read with pleasure. I see by your last issue, which I have just received, that you have absorbed the *Fraternal Record*, which consolidation I trust will be to your advantage.

W. A. Brace, Foreman of Vallejo Lodge, No. 75, visited Valley Lodge, No. 30, July 20th. He reports his Lodge in a flourishing condition, with a membership of 95.

Dr. O. L. Gordon will act as our local agent for the Watchman in Santa Cruz until further arrangement. The brethren are invited to transact business with him, and we trust that they will make him realize that he holds a live commission; at the same time, no good will and energy will be spared at this end of the circuit to furnish a paper worth double the subscription price.

Grand Recorder's Department.

Headquarters of Grand Lodge, A. O. U. W., Rooms 40 and 41, St. Ann's Building, corner of Eddy and Powell, San Francisco. H. G. Pratt, G. R.

Wm. C. Flint, Esq., 216 Sansome street, San Francisco, is Chairman of Committee on Laws and Supervision. All By-Laws, or amendments to same, should be sent directly to him.

About a dozen semi-annual reports are still due from various Lodges. They should be sent in with the least possible delay.

Jewels for the badge of Master Workman can be ordered from this office. The price will probably be about 50 cents, but possibly something less.

On the 1st of July we had 12,374 Master Workmen in good standing. Up to the time of writing this (July 28th) we have written 14,229 beneficiary certificates. Nearly 2,000 have died, withdrawn, or been suspended or expelled. The entire disbursements of the Order in this State aggregate about half a million dollars.

We never allow applications for beneficiary certificates to lie without attention a single day if it is possible to avoid it. Recorders who do not hear promptly from such papers should lose no time in giving information of the fact, or of any other fact that may seem to indicate any dereliction of duty on the part of this office. We do not intend that any just cause of complaint shall lie at our doors.

As many of our Lodges have changed Recorders, it may not be amiss to say that remittance reports do not answer for monthly reports. The former are to accompany all remittances, and the latter to be made on the first of each month. The object of the one is that we may know how to apply moneys remitted, and to know that the amounts are correct; and the other that our records may be kept to correspond with those of the various Lodges. This is a matter so important that compliance with the law in this regard must be insisted on.

Notes from Amador Lodges.

Editors Watchman:—The fact that Amador county Workmen have seldom received mention in your columns, and that the Watchman is published for the entire Order, must be my excuse for asking space for a communication. The Order in this county is about two years old, and as in the State elsewhere, its progress has been rapid. We have six Lodges, numbering nearly 300 members. Within the past two months renewed interest seems to have been taken by the brothers in all parts of the county, and I believe every Lodge has in that time received additions to its membership. We are determined that the principles of our Order shall be carried out, so far as the power is in us. Of late it has been our object to cultivate more thoroughly the fraternal features of the society, and to that end several fraternal visits have been paid.

Jackson Lodge having paid visits to Sutter Creek and Amador Lodges, the members of those Lodges on the 15th instant returned the visit, on the occasion of the installation of our officers, who were installed by D. D. G. M. W., Jacob Steinmetz, the following being their names: Geo. Moore, P. M. W.; N. T. Littlefield, M. W.; B. H. Schacht, F.; I. N. Dewitt, O.; A. B. Sanborn, Rdr.; A. J. Bales, Fin.; E. Muldoon, Rvr.; Geo. C. Folger, G.; P. Kelly, I. W.; Silas Penry, O. W.

At the conclusion of the installation ceremony, under the head of "Good of the Order," able addresses were delivered by the visiting brothers and by members of our Lodge. After the adjournment of the Lodge, the members repaired to the Central hotel, where a fine supper was served, followed by a number of appropriate toasts and responses. This feature of the entertainment was the crowning one, *i. e.*—the literary feast, though the physical feast received no scant praise.

The membership in this county is composed of the best material, and as a brother Junior Workman remarked of those assembled at the installation, it was the finest body of men ever assembled in the county. I do not mean to assert that all the good men of the county are in the Order, for there are many outside, and it is to bring these in we are now working. Those who are members feel that we have a "good thing," and we desire to share it with good and true men whenever we can find them, and I am confident that the end of the year will find our roll considerably lengthened. S.

Jacksonville, Cal., July 17th.

The Supreme Recorder reports the total membership of the Order in May at 99,556. It must be considerably over 100,000 at this date.

Encouragement.

To the Publishers Pacific States Watchman—*Dear Sirs:* I am under obligations for the supplement to your issue of July 15th. While regretting the discontinuance of the *Fraternal Record*, I can but express my conviction of the desirability, and, I think, necessity of a publication, in San Francisco, devoted to the interests of *all* the fraternal and beneficial organizations instituted on the Pacific coast, and I desire to express my full approbation of the consolidation of the *Fraternal Record* and Pacific States Watchman, for the reason that I believe it better; that all the societies, of the kind stated, will derive more ultimate benefit from the publication of some *one* journal, which will devote a due and proper space to each, than the several organizations can possibly derive from an illy-supported publication, representing one Order or organization only.

We are all working for the same end, however various our means of attaining it; and for that reason, if for none other, we should not divide our forces. "In union there is strength."

I trust that, although your paper has, heretofore, been devoted more especially to one particular Order, you may give as full a share of your space to each Order having the attainment of the same objects in view, as our noble Bros. Kinsley and Jephson have endeavored to give in their issues of the *Fraternal Record*.

Bespeaking success for the Watchman., I remain fraternally yours, E. W. Hewitt.

[Thanks to our correspondent for his kind wishes in behalf of our enterprise. It shall be our endeavor to give each society a due allowance of space in the "Fraternal Record" department of the Watchman. We believe, as our correspondent says, that, by having all societies represented in one paper good result will follow, not only to the societies themselves, but taking a higher plane, to the people also. They are all ministering to the living necessities of man, and their bounties shall go on when the grave has closed over the protector. Why should we not extend to all a share of the influence which we hope the Watchman possesses? Will not such a course surely benefit rather than detract from the Workman's cause? We trust our friends will help us in our work, and report such items of news as may come to their notice. Bear in mind our usefulness to any Order must be measured largely, not only by its members and their zeal and active work, but also by their readiness in furnishing us information of the same. There is another point in this connection which has often been impressed upon us. It is that there are many members of the A. O. U. W. and other Orders who belong to more than one fraternal society, and while they would like to know what is going on in them, have not the time nor money to subscribe for and read separate papers representing each. They would like to take some one journal which, while it would give them all the fraternal news they desire, will also prove of interest to the other members of the household, both old and young. We have always carried this idea out in the conduct of the Watchman, and the numerous commendations received have been very pleasant to us.—Eds. Watchman.]

Edward Weihe.—The death is announced of Bro. Edward Weihe, who was Recorder during the last term of Dixon Lodge, No. 50. He was a well-known German citizen of that town. He died at the German hospital in this city, his body being afterward taken to Dixon for interment. The funeral took place from German Lutheran church. Rev. Carl Taubner of Sacramento officiated, and the religious services were in German. Montezuma Lodge of Odd Fellows, Dixon Lodge, A. O. U. W., and the Dixon Fire company, of all which societies the deceased had been a prominent member, were in the procession; Herman Eppinger acting as Marshal of the Odd Fellows Lodge, A. R. Story of the Workmen, and V. J. Hohman of the Fire company. It was the most imposing funeral in town for a long time. Bro. Weihe was a native of Herford, Westphalia, and was educated for the ministry, a profession which his father and grandfather had both followed before him; but he preferred to enter mercantile pursuits. In 1850 he came to California, and after five years spent in mining and four more in business in San Francisco and Stockton, he opened a general merchandise store in Mokelumne Hill, which he conducted for nine years. About 1870 he settled in Dixon, where he lived ever after. The departed brother is greatly missed by his brethren of the A. O. U. W.

There are 10 deaths to be paid for in July in the Supreme Lodge jurisdiction. The States in which they occur are as follows: Ohio, 6; West Virginia, 1; Kentucky, 2; Maine 1. The above deaths in Ohio all occur in Cincinnati.

The Needs of Civilization.

The following essay was read before a recent meeting of Gold Hill Lodge, No. 2, Nevada, by Bro. H. W. Hand: Change is the law of nature; variety the condition of creation. Every hill, every valley, every ray of light that glitters, every planet in its orbit, every wind that blows, everything that lives and breathes, testifies to this fact. Go where you will, observe what you may, take the countless leaves of a summer forest, note their growth and changes, and you will find none of to-day what they were yesterday. Observe the clouds as they rise above the horizon, tinted by the rays of a burning sun, displaying in magnificent splendor all the colors of the solar-spectrum; observe them as pile upon pile they lie, extending as it seems far into the illimitable, yet no two are alike.

Every nation has had its period of birth, growth and decline, which is the result of laws as inevitable as time, as immutable as space, and as certain as death. But nations, as the individuals composing them, look with dread and even horror upon the fatal day that is to terminate their temporal existence, and it is the object of one and all of them to prolong such existence as far as possible; but during their career questions of no little importance present themselves for consideration, and they are the questions of demand and supply. Upon these depend the welfare and prosperity of nations, and whenever the demand exceeds the supply the nation must retrograde; but whenever the supply equals or exceeds the demand, it will flourish and stand as the mighty shores of rock against the tidal waves of oceans.

We have here a nation of free united people; a country whose resources are almost inexhaustible. A land whose utmost extremities are connected by bands of iron, upon which rolls the wealth of nations, and wires of intelligence upon which flash, with the speed of lightning, the messages of civilized man. A country whose every hill and valley are productive of untold fortunes; whose flag, cleansed by the stars and stripes, baptized in patriotic blood and washed in patriotic tears, throws its protecting shadow around each of us, as we occupy but humble positions in life; a country whose people enjoy more liberty than all the kings, czars and emperors of the Old World. Yet, we have our demands and must have our supplies; our supplies in the past were bountifully administered, and we prospered; fire and sword have often been resorted to, yet we are the better and further advanced in the scale of humanity. In 1861 powder and lead, and men to use them, were in demand, and bravely were they supplied. Now we are at peace with all the world and the wheels of progress are rolling on faster than ever before; but what do we need to continue to flourish, to maintain our reputation, to improve our resources and to sow the seeds of liberty for future generations to reap? Is it wealth, or pleasure, or power, or fame? No! all we need is elevation, this is our demand and must be supplied, as change is as certain as death. We must either go up or go down; we must either elevate ourselves, or we will degrade ourselves. The plant by the seaside will never bloom unless nourished by the dew-drops, and cheered by the dazzling light of the sun. Neither will a nation prosper unless aided by its people, and illuminated by its intellect. We, therefore, need better teachers, and a better attendance in our public schools; better order, and fewer infants in our colleges; more religion, and less hypocrisy in our churches; better judgment, and less partiality in courts of justice; more brains, and less jawbone in the heads of our great men.

Brains, pure, unadulterated brains, must rule this world and not the teeth and fangs of selfishness. We need men who love liberty and hate slavery; men who will tell the truth for the sake of the truth; men who will do right because it is right; men who will stand up, and in the midst of danger fight for the right, with fire and sword, and pen and talent. Justice and right is more than the almighty dollar. Men who love their country, their flag and their fellow men; men who will stand as firm as the rock of ages, and as stern as the mighty hills in the conflict of opinion in the fields of political treachery.

We need more Platos to proclaim to the world a higher and purer morality. We need more Galileos to demonstrate to the world, not the roundness of the earth, but the flatness of its heads. We need more Wm. Lloyd Garrisons, not to free 4,000,000 of slaves doomed to physical labor, but to free ten thousand times ten thousand mental slaves who never enjoyed the emotion of thought nor breathed the air of liberty; who never had an original idea, and never dared to express it if they had. Thought is the life-blood of this nation, and can only be purified by expression. Its course, therefore, should not be impeded by fanatics, nor its purification stayed by ignorant silence. It was thought that clothed the native savage in his jungle. It was thought that brought from the flinty bosom of the earth beneath these hills the treasures of shining, glittering gold. It was thought that, through the instrumentality of a Franklin, brought lightning from the clouds and assigned it to the use of man. It was thought that built the monstrous locomotive to draw its enormous burdens from shore to shore. It was thought that built the ship to sail in unknown seas, that gave her lungs of iron, breath of fire, voice of thunder and arms of steel. It is thought that guides her as she plows the trackless main. Oh! it is thought that carries upon her lofty wings the emblem of our liberty and the epitaphs of all our mighty dead.

We need more thought and more truth—truth, more sacred than all the world beside, to which we should consecrate our acts, our honors and our lives. From its fountains we should drink, and at its altars we should worship. We need men who know that truth is divine, that it is eternal, that it is immortal; men who know that truthful men only are loyal citizens. Every thief, every robber, every pirate and every murderer is a liar, and every liar is a traitor. It is truth that inspires man with the noblest aspirations. It is his knowledge of truth that places him above the brute creation and crowns him with the scepter of power that wields the destiny of nations. We need men who know the truth, who love the truth, men who will stand by the truth amid the cry of war, the din of battle and the roar of conflict until every field shall be won, and the whole human race shall be but one great, grand cathedral, whose spire of truth shall kiss the starry heavens, and whose walls of space, penetrated by every morning sun, shall but reflect the image of a yet brighter and a better day.

Grand Presentation.—During the festive occasion of the celebration of the third anniversary of Magnolia, at B. B. hall, July 14th, Bro. John Hoesch, Floor Manager, called a halt and introduced B. F. Jacobs, P. M. W., who in a few eloquent words reviewed the struggles, history and growth of Magnolia Lodge, and, in connection therewith, the services and devotion of Jacob Davis, P. M. W., who has been honored as M. W. two separate terms. He then presented him with a costly silver cake basket, card receiver and bouquet holder. Engraved on card receiver and cake basket was the following: "Presented J. Davis, P. M. W., by Magnolia Lodge, No. 41, A. O. U. W., July 14, 1881." Bro. Davis received these souvenirs, and in a true spirit of gratitude happily responded. What added zest to the occasion was the fact that Bro. Davis and wife had been kept in ignorance of their designs; and his brother Workmen, by innuendos, worked upon their feelings unwarrantably during the evening. Altogether, it was a pleasant affair with a happy termination.

From Committee on Laws and Supervision.

Editors Watchman:—I have received a set of proposed by-laws with the names of Henry Hall, E. J. Perez and H. L. Howe signed thereto, as "Committee on By-Laws." No seal is attached to the papers, and the laws are not attested by the Recorder of the Lodge. Our committee has acted upon the proposed laws, but have no information as to what Lodge they belong. Will you please invite the Lodge claiming them to communicate with

Wm. C. Flint,
Chairman Com. on L. and S., 216 Sansome St., San Francisco.

We have received from the publisher, Bro. C. H. M. Curry, P. M. W., a handsome diploma. It is a credit to California artists, and was executed by J. Vallance Gray, the printing being done by Bancroft & Co. As an ornament to a room and an heirloom to the family of a Master Workman, its artistic excellence commends it.

Franklin, No. 44, will hold an entertainment at Ixora hall on or about August 1st. This hall has the reputation of having one of the best dancing floors in the city. The music ranks with the first dance music, the proprietors being first-class musicians. They take a pride in the assemblages that meet there, and only first class entertainments are allowed.

The Pacific States Watchman, the organ of the A. O. U. W. on this coast, has a large circulation among the members of this city. It is one of the most complete fraternal journals in this country.—*Oakland Times.*

Dr. J. A. Miller, formerly of Oak Leaf Lodge, No. 35, Oakland, has settled in Stockton and resumed the practice of his profession.

FURNITURE.

New and second-hand at auction prices, at H. Schellhaas' auction and commission house, Eleventh street, Odd Fellows' building, Oakland, Cal.

New Department added, with a full line of Gents' Furnishing Goods. Our usual variety of Novelties in Millinery and Fancy Goods and Ladies' Furnishing Goods.

Kid Gloves a Specialty.

BLONDE HAIR CHANGED TO BLACK.—At a meeting of the Biological Society, held at the Smithsonian Institution last evening, Dr. D. W. Prentiss read a paper entitled, "Notes on the Action of *Pelocarpus pennatifolius* in Changing the Color of Human Hair." Prof. Prentiss' paper recorded a very remarkable case of the change in color of the hair of a lady patient in this city who had been treated several months for blood poisoning with jaborandi, a Brazilian plant used in medicine. This medicine, which is given to produce sweating in certain rare cases, was first given to the patient in subcutaneous injections in December last. At that time, and previously, her hair was a light blonde, but within about two weeks a change toward a darker color was perceptible, which increased until, in the middle of January, the hair became of a chestnut brown color. In May the color was nearly a pure black, which it still retains, although there is slightly apparent tendency to return again to a lighter color. As this is the only recorded case of this plant (which is not, however, in common use) having produced any perceptible change in the color of human hair, it becomes a matter of interest to know how this change was brought about and how often it might accompany the use of this remedy. A microscopic examination shows the hair to contain a greatly increased quantity of pigment matter, and scientists now await with interest the results of future growths to ascertain whether they will retain their old color or retain that newly acquired.—*Washington Post, June 4th.*

CANAL FROM THE BLACK TO THE CASPIAN SEAS.—The Russian engineers are renewing the project of a canal between the Black and Caspian seas, an idea which was formed in the times of "hoar antiquity." Plans for making a connection between the Volga and the Don were drawn up in the reign of Sultan Selim, and are preserved yet—somewhere. The great mass of water in the river Terek attracted the attention of M. Daniloff, the Russian engineer, owing to the great hight of the river, nearly 500 ft. above the level of the Black sea. The volume of water is from 175 to 554 cubic meters per second. Four branches will complete the junction of the Azof and the Caspian, and the Don and the Volga.

ALEXANDER MACKAY, Manufacturer and Importer, 1110 & 1112 Market St, S. F.

Rival Methods.

A good deal of attention is now given in New York to the different methods of producing the electric light. The *Times* says a serious objection to the use of the dynamic machine, used for the purpose of producing the light, is the fluctuation in the intensity of the blaze, due to causes which seem to be insurmountable. The use of steam power to generate electricity seems impossible from vibrations in the density of the light. But it is now claimed that by using batteries instead of dynamo-electric machines, a steady and non-varying light can be obtained. The claim which the *Times* speaks of seems pretty well established. The *Times* adds: "Batteries, or cells, as sources of power, ought to be less costly than the machines now in use, and their employment could be universally practicable where the machines would be beyond the reach of most people. If, in addition to the advantages of cheapness and availability, the electric light can be made perfectly steady in volume and luster, a great step will have been made toward securing a perfect artificial light.

A CRITIC, dropping into a studio in Paris the other day, stopped before the portrait of a lady on the easel, and remarked: "It is very nicely painted; but why did you take such an ugly model?" "It is my mother," calmly replied the artist. "Oh! pardon a thousand times," said the critic in great confusion. "You are right; I ought to have perceived it; it resembles you completely.

SEA-GOING CASUALTIES.—The percentage of reported casualties to existing sea-going vessels, taking the mean of six years, 1872 to 1877 inclusive, is, for sailing vessels, 19.86, and for steamers 47.83. These casualties include collision, stranding, leakage and others.

Workmen Guarantee Fund Association.

Additional $1,000!

Additional $1,000!

Additional $1,000!

FOR MEMBERS of the A. O. U. W. ONLY.

ADMISSION FEE, $3.00; ANNUAL DUES, $2.00.

Probable Cost to Each Member, about $8 a Year.

The object of this Association is to afford an additional protection of $1,000 to families of deceased members of the Ancient Order of United Workmen.

To become a member the applicant must be a Master Workman in good standing in his Lodge, under 50 years of age, and in sound bodily health. No re-medical examination is demanded, though the Association reserves that right, and when necessary, the applicant must pay the Examiner's fee.

There are no Lodge meetings to attend or Lodge dues to pay. There is no sinking fund, consequently the members have the benefit of every dollar received.

No Director receives any remuneration for services rendered.

The admission fee includes the first assessment of $1, which assessment is levied, and made payable on the death of a member, and disbursed on the same principle as the Beneficiary Fund of the Ancient Order of United Workmen.

The Association is governed by a Board of Directors, elected annually by the members. It is endorsed by Hon. Roderick Rose, Past Supreme Master of the Order in the United States, also, by W. H. Jordan, M. T. Brewer and C. W. Taylor, Past Grand Masters of California, H. G. Pratt, Grand Recorder, C. H. Haile, Grand Receiver, C. C. Terrill, P. Peck and E. H. Morgan, Finance Committee of the Grand Lodge, all of whom are members, and cordially recommend the Association to the support of the Brothers throughout the State.

The average cost of this additional $1,000 to the $2,000 already pledged by the Order, will be about $8 per year, or less than 20 cents a week.

San Francisco Lodge Locals.

Anniversary of Friendship.

The first anniversary of Friendship, No. 179, was fittingly celebrated by a literary and musical entertainment and supper on July 27th, in Charity hall, Shiels' building. This being their meeting night, the business of the Lodge was passed with quick dispatch, amongst which was the receiving petitions for the degrees for eight. The efficient Master Workman, Bro. Chas. Creighton, had canvassed for the committees in his own mind, and in a very short time the gavel fell and the doors were thrown open to a large and select audience of ladies and gentlemen that completely filled the hall, there being no standing room left. The following programme was commenced by an address of welcome by Dr. J. G. Jewell, Med. Ex. of Friendship, in a short, well-arranged and appropriate speech that was well received: Overture, piano, Prof. R. L. Yanke, of Burns Lodge. This was a fine specimen of high art music that received a merited applause. Baritone solo, E. W. Reuling, of Friendship, "Oh, Loving Heart Trust On"—a pleasing effort that called forth rapturous applause, which was kindly answered by Bro. Reuling; recitation, "Roderick Dhu and King James," Henry Benhayon—a masterly effort—and for an encore recited a scene from Shakespeare; piano solo, Miss Carrie Millzner—an artistic effort that delighted her audience, and at the close was presented with a beautiful bouquet; contralto solo, Mrs. Blake Alverson, who on this occasion acquitted herself with that usual pleasing excellence and called for a hearty encore, and at the close was presented with a large bouquet; harmonica solo, Mr. G. E. Davis—a musical wonder that was listened to with almost breathless silence and was heartily encored; banjo solo, Mr. Patten, a very acceptable performance; piano solo, Dennis Foley, the blind pianist, who seemed, like "Blind Tom," a wonder as a musician, and at the close received a hearty encore. The frequent encores had, in the first part of the programme, consumed so much time that Dr. Jewell, master of ceremonies, requested their discontinuance. Part Second.—Instrumental duet, violin and piano, Mr. Kendrick and Prof. R. L. Yanke, which was a rare musical treat; vocal solo, "Keep the A. O. U. W. Over the Door," Prof. Yanke accompanying on the piano. This song seemed to be a favorite with the audience, being applauded at the end of each stanza, and at the close the little girl was presented with a magnificent bouquet. Vocal duet, Mrs. Blake Alverson and Bro. E. W. Reuling. As they were both fine singers, the blending of their voices called for well-deserved applause. Basso solo, Wm. T. Bourne; zither quartette, California Zither Club, Julius Molser, leader; this was one of the finest performances of the evening, and could only be appreciated by those who had the pleasure of hearing this unique and artistic effort. Soprano solo, Miss Kate Finnigan, sister of Bro. Finnigan, Foreman of Friendship. This young lady has a sweet and highly cultivated voice, and although not known as a professional, is equal to the best in the city. As she rose and fell in sweet cadence on the title of her song, "Say Not Farewell," it was a fitting close to one of the best musical and literrary entertainments that has been given by any Lodge of Workmen. The large audience was invited to the banquet-room, where Mrs. E. Northrup, 232 Jessie street, caterer, had prepared a very choice collation of all the good things, not forgetting the national dish, ice-cream, in abundance. The brethren of Friendship, from the congratulations received, seemed somewhat elated over the success of their first anniversary. Starting one year ago with close to 100 members, they have justly earned a position as Grand subordinate in this great organization.

Burn's Monthly Social.

This honored Lodge held its monthly social in Pythian Castle on Thursday evening, July 28th. The hall was well filled with ladies and gentlemen and young people. The programme was opened by a few congratulatory remarks by Robt. Wilson, M. W. Prof. Yanke, one of our leading musicians, and member of Burns, favored the audience with an overture on the Piano. Bro. Wm. C. Flint, Chairman of Laws and Supervisions, made a grand speech that was acceptable, and received hearty applause. Piano solo, Miss Belle Burson, daughter of Bro. Burson. A curiosity shop of musical instruments was brought in, and Messrs. Winent and Rhein (professionals) amused the audience in their quaint and inimitable performances. Recitation, T. C. Maher, of Burn's Lodge. Irish song, by Bro. Pohlmann, of Burn's Lodge. Song and accompaniment, by Mrs. Walter Malloy. Recitation, "Bingen on the Rhine," by Miss Wilson. Song and accompaniment, by Mrs. Manning. Recitation, "Anthony's Oration Modernized," by Bro. C. H. Wilson. Dutch comic song, by Bro. Pohlmann, accompanied by Mrs. Walter Malloy. Banjo solo, by Pete Winent, with encore. Thus closed a very successful Lodge entertainment, and in keeping with the standing of Burns as a live subordinate.

Harmony, 9.

As indicated in our last issue, this old pioneer has started on the new term under favorable auspices. On July 15th, the M. W. degree was conferred on five in a manner that reflected credit on the new officers. The M. W., Bro. Wm. Decker, was very correct in the work, and showed tact and ability in dispatching the business of the Lodge. After the usual routine of work and a happy recess, Bro. Wm. Decker, M. W., presented his Lodge with a full set of funeral regalia, consisting of rich sashes and an ornamented and gilted wand. Bro. D. C. Fox, P. M. W., made the presentation speech in a few neat and well-chosen words that were received with much demonstrations of applause. The Guide received them, and L. J. Henry, P. M. W., on the part of Harmony, responded in warm and complimentary expressions of gratitude for so appropriate and fitting a gift of the M. W., Bro. Wm. Decker. Bro. Blight, Foreman, moved, and it was unanimously carried by a standing vote, that the thanks of this Lodge be given to Bro. Wm. Decker for this appropriate gift, and that an engrossed copy of the resolution be presented to him; after which Bro. L. G. Schord, P. M. W. of Burns Lodge, and D. V. Thompson, P. M. W. of Noe Valley, gave a few well-timed remarks that were well received. Bros. Rich, Roach, Geo. Hottua, of Bernal, also addressed the Lodge, after which Z. T. Whitten, P. M. W., recited "Barbara Fritche," closing with a solo by Prof. H. C. Eastman, Organist of Harmony.

Magnolia, 41.

The third anniversary of Magnolia was celebrated with great *eclat* at B'nai B'rith hall, on Thursday evening, July 14th, by a magnificent ball. Elaborate preparations had been made in decorations, and a large and highly pleased audience of spectators and guests were in attendance. The hall was in fine dress, with evergreens, hanging baskets, exotic plants and pleasing devices, one of which was the name of Magnolia, each letter set in a star, on the front of the platform. Suspended across the rear part of the hall, in golden letters, were these words: "WELCOME. MAGNOLIA, No. 41, A. O. U. W." At half past nine o'clock, Rosendorn's band commenced the exercises with a grand march, Bro. J. Davis, P. M. W., and wife leading a company of youthful appearing gentlemen and beautiful ladies, richly and tastefully dressed, that completely filled the hall. The exercises were conducted with decorum, without coldness, and all seemed to be in the highest enjoyment. A programme of 14 dances, including extras, brought this very successful part to a close at a late hour. One very pleasant feature of the evening was the attention shown by the members of Magnolia to see that their guests were properly cared for. The several committees filled the respective duties assigned to them to the letter, and were the recipients of a number of compliments during the evening. We herewith give the several committees: Committee of Arrangements—W. E. Cody, M. Warshauer, Jacob Davis, A. N. Levy, Jacob Gans. Reception Committee—Sam Weintraub, John Tyler, Luke Stark, B. Mish, John Rafferty. Floor Manager—John Hoesch. Floor Committee—B. F. Jacobs, Simon Cohn, H. P. Terry, C. C. Keene, Wm. Samuels.

Sts. John, 73—Presentation.

The meeting on Thursday evening, July 21st, was one of more than ordinary interest. A circular had been sent to each member requesting his presence on business of importance. After the usual routine of business the principal subject was ably discussed, and resulted in its indefinite postponement; after which Bro. H. C. Eastman, organist of Sts. John, and others entertained the Lodge with recitations and short speeches.

On July 28th, this conservative Lodge had an interesting meeting under head, "Good of the Order." Bro. J. E. Purdy, of Sts. John Lodge, in his inimitable manner, called Chas. J. Periam, P. M. W., to the altar, and presented him with a beautiful P. M. W. gold badge. The letters, C. H. P. on the upper bar, from which is suspended the Holy Bible. Fastened to and hanging from the Bible is an emblem of the seal of the Lodge made from the finest abalone shell. The shield has enameled on it the letters, A. O. U. W.; on the cross bar are these words: "P. M. W., Sts. John Lodge;" on the back are engraved these words: "Presented to Bro. Chas. J. Periam, P. M. W. of Sts. John Lodge, A. O. U. W., in token for his faithfulness in office and our esteem for him as a brother. July 1, 1881." This magnificent souvenir was manufactured by R. W. Jackson, 614 Market street, manufacturer of abalone shell jewelry and works of art. A committee of two were appointed to invite the members of Golden Gate Lodge, then in session, to join the members of Sts. John in the banquet room, where the celebrated caterer, Chas. F. Seaburg, 331 Jessie street, had prepared a magnificent banquet, that was topped off with ice cream from the "Maison Dore." This grand collation was a free gift on the part of the present officers of Sts. John, and was indulged in by their numerous guests—among whom was Bro. A. Lowenthal, of Bay City, Eureka—with apparent satisfaction. The whole company then adjourned to the Lodge-room, and Bro. E. F. Loud, D. D. G. M., presided over the meeting. A pleasant evening was spent after the cigars had been passed around, in the following impromptu programme: Song, J. O. Jephson, P. M. W.; R. E. Chapman, P. M. W., recitation; E. Lewis, P. M. W., of Golden Gate, and known as the father of the Order in San Francisco, some appropriate remarks; J. N. Prather, M. W., a fine vocal solo, Chas. G. Ewing accompanying on the piano; comic solo and encore, Martin Kelly; Scotch recitation, Chas. G. Ewing; vocal solo, Bro. Jas. Swift—a fine, artistic performance; piano solo, Harry J. Lask, P. M. W.—a choice selection, well rendered; Scotch recitation, Bro. Fletcher, Foreman of Sts. John; remarks, Bro. J. E. Purdy; recitation, Wm. B. Smith, D. D. G. M. W. A long-to-be-remembered gathering of Workmen was brought to a happy close by all joining hands and singing "Auld Lang Syne."

Hercules Monthly Social.

The entertainment committee of Hercules, No. 53, consisting of Bros. Manzer, Hastings and Bergeman, presented at their regular monthly social on July 15th, the following programme: Opening address, L. M. Manzer; violin solo, Master Mayer, with piano accompaniment by his sister—a fine performance; recitation, Nellie Hastings, daughter of B. Hastings, Rvr.; recitation, Lola Todd; duett, Miss Hattie Paul and Miss Nonie Northey, receiving a hearty encore, Miss Northey sang "Come Again;" piano solo and encore, Miss Ruby Manzer, daughter of Bro. L. M. Manzer; recitation, Miss Georgia Paget; piano solo, Mrs. J. L. McKee; specialties, Gus. Pohlman, Recorder of Burns Lodge, who is always pleasing and entertaining; warbling on harmonica, Master Owens; specialties, and music with flower pots and violin, Frank Bean, of Golden Gate. This was a very interesting, unique and pleasing performance, and received well deserved applause. Duett, Mrs. A. C. Higgins and Miss Emily Maxon, and being heartily encored, Mrs. Higgins responded by singing "Cows in the Corn." Their large hall was crowded with members and their families and invited guests, who were delighted and highly entertained. These monthly socials have become a very pleasant feature in the Western Addition, and will be continued. It is whispered that the next one will be one of varied excellence, and those who wish a seat will have to come early.

Silver Spray Presentation.

Mrs. Ellen McLeod, P. W. S. of H., was the recipient of a jewel belonging to her station, at the hands of the members of Silver Spray, on installation night. The badge is in the shape of a heart; on one side is the coat-of-arms of California, on the opposite is engraved "presented to Mrs. Ellen McLeod, P. W. S. of H., by the members of Silver Spray, D. of H." Below is the letters W. W. T. Q. E. It is a magnificent badge of solid gold, and the presentation speech was made by W. F. Norcross, proprietor of the *New Age* in an appropriate manner, and was gracefully received and happily responded to by the worthy recipient.

Oakland Lodge Locals.

Oakland, No. 2.

EDITORS WATCHMAN:—At its last meeting, Oakland Lodge, No. 2, feeling its ability and also desiring to comply with the regulations of the Order, ordered the purchase of the new regulation badges. This we think a step in the right direction, as uniformity of badge or regalia is greatly to be desired in any Order. Our Lodge is moving along satisfactorily to ourselves. Harmony prevails between its members, and hence we have pleasant meetings each week. By the way, during the past official term we have conferred degree or degrees almost every night of the term. This was done without any special effort to obtain candidates. There is one fact of which this Lodge is proud. We pay sick benefits of $10 per week, and yet we have over $1,100 at interest; and better than all, the fund increases steadily. Now we do not boast of this, but we are not ashamed of it. If any other Lodge with a membership of 137 can beat it, we are glad of it.—A. H. P.

Lodge Locals.

Recorders are invited to correspond. Members may also find suitable reading here for "good of the Order" in the Lodge.

Amador Lodges.

J. Steinmetz, D. D. G. M. W., installed the officers of Amador, No. 133, July 12th; Banner, No. 131, July 13th; Golden Star, No. 144, July 14th; Jackson, No. 138, July 15th. The names of officers have already been printed. He reports the Lodges in the county as in a very prosperous and healthy condition, and constantly increasing in membership. They have now 280 Master Workmen in good standing in the county. The meetings are well attended and the Lodges visit one another frequently, and the best of feeling prevails; in fact, every Workman feels an interest in our beloved Order.

Carquinez, 90.

The newly elected officers of Carquinez Lodge, No. 90, were installed in their respective positions on July 7th by J. M. Wilson, D. D. G. M., assisted by the following brothers of Mt. Diablo Lodge as Grand Officers: M. Kirsch, P. G. M. W.; H. Shuey, G. F.; E. M. Frollet, G. O.; Everett Grant, G. G.; F. Webb, G. W. Carquinez has a good set of officers, and no doubt will increase in membership this term.—J. M. WILSON, D. G. M. W.

Mount Diablo, No. 91.

The newly elected officers of Mount Diablo Lodge were installed on July 1st, by J. M. Wilson, D. D. G. M., W. S. Urmy acting P. G. M. W., and Thos. Johnson as G. G. This is the banner Lodge of the county. It has 53 members, and still a prospect of a considerable increase during this term. Sixteen new members were taken in last term. The Lodge is composed of the very best men in the county. We are now building a hall 36x60 ft. and tw stories high, which, when completed, will be the finest hall in the county. Should any brothers of the sister Lodges come this way, we would be pleased to have them call on us. We meet on Friday evening of each week. We also have a Degree of Honor Lodge here with a membership of 37. It meets on the first and third Tuesday evenings of each month, and is well attended every meeting.—J. M. WILSON, D. D. G. M. W.

San Pablo, 86.

The officers elect of San Pablo Lodge, No. 86, were installed in their respective places on July 9th by J. M. Wilson, D. D. G. M., assisted by M. Kirsch, P. M. W.; Thos. Johnson, G. G., of Mt. Diablo. This Lodge is prospering. They expect to add several to their present membership during the term. After the installation we attended a party given by the Lodge. Several members from other Lodges were present and all had a good time.—J. M. WILSON, D. D. G. M.

Smartsville, 119

EDITORS WATCHMAN:—Many of the officers of this Lodge, Smartsville, No. 119, A. O. U. W., being on the Fourth of July committee and having a great deal to do before and after the Fourth to make our celebration a success, was the cause of our not installing our officers until July 19th. We had a fine attendance, and were honored with a goodly number of the members of Spenceville Lodge, who kindly assisted us in our installation, Bro. John T. McConnel acting as installing officer, and Bro. Graves as Grand Guide. After the installation a collation was served and the brothers enjoyed themselves for an hour in partaking of refreshments. After the Lodge was again convened, under the head "Good of the Order" our actions were criticised by the visiting brothers, and it is hoped it will have the effect of brightening up the members. In the wee small hours of morning we closed in due form, all well pleased in attending the installation of the officers of Smartsville Lodge, No. 119, A. O. U. W.—J. K.

Stockton, 23.

Stockton Lodge, No. 23, is in a prosperous condition. On July 22d, their regular meeting was well attended, over 35 being in attendance. The usual routine of business was dispatched in detail and with particular care. The M. W. degree was conferred on one in a very creditable manner in many respects, the secret work being nearly correct. This being the first work of the new officers, any small discrepancies we are satisfied will be remedied soon. Under head "Good of the Order," Bro. J. W. Miller, P. M. W. of Oak Leaf, made one of his grand speeches, followed by Bro. Lissenden, P. M. W. Bro. Beard, a gifted singer, at request, favored the Lodge with a song. Our representative has added 28 new names to the subscription list of the WATCHMAN. He reports the Lodge as being composed of a happy, earnest and sociable lot of men. No. 23 has nearly 200 members, and nearly all of the first-class men of Stockton are members. The talent in the Lodge is of a high order, both in a literary and musical sense. The Lodge's membership is mostly made up of residents of Stockton, but now the farmers of the interior of San Joaquin county are becoming interested, and are beginning to send in their applications. Stockton, No. 23, seems to have a bright future before it.

Watsonville, 45.

EDITORS WATCHMAN:—Grand Master. Wm. H. Barnes, came up to Santa Cruz and Watsonville and installed the officers of Watsonville Lodge, No. 45. After the installation ceremonies were over, the Lodge marched to the rink, where a large audience was entertained by Grand Master Barnes for more than two hours, who gave an eloquent speech, together with recitations and singing. We have a quartet club that rendered some pieces very beautifully, under the direction of J. W. Linscott. Bro. Barnes is a host in himself, and the fraternity has an able advocate in him. The audience here, one and all, say that they had never had so fine a treat.—S. T. DODSON, D. D. G. M.

New Lodge.

Navarro Lodge, No. 200, was instituted by Geo. H. Bowman, D. D. G. M. W., July 23d, with the following list of officers: E. C. Foushee, P. M. W.; Fred. A. Walton, M. W.; Eugene Peeples, F.; John H. Ekroth, O.; Wm. T. Wallace, Rdr.; Chas. A. Linscott, Fin.; John Humphries, Rvr.; Jacob Studebaker, G.; Jas. S. Stewart, I. W.; Jas. Nelson, O. W. The Lodge starts with 18 members.

KELLETT & MCMURRAY, plaster decorators and whiteners, No. 763 Market street, this city, and 470 Twelfth street, Oakland, are leading business men in their line. The firm has had great experience, and are well known for the promptitude with which they perform their work. Bro. McMurray is a P. M. W. of Valley Lodge.

BRO. HENRY L. HARRIS, 1021 Mission street, of Bunn's Lodge, as a Carpet Renovator, is the boss in his line. By a new process, carpets can be restored to original beauty and brightness. Dust, dirt, grease and smoke taken from the carpet without being removed from the floor. Carpets beaten and laid.

ONE of the oldest shirt manufacturing establishments in this city is that of S. Silberstein, 108 Sutter street. Our worthy brother has obtained quite a reputation for the superior excellence of his work.

Election of Officers, A. O. U. W.

BERKELEY, No. 10.—Chas. H. Silliman, M. W.; P. R. Boone (P. M. W.), F.; Welles Whitmore, O.; Frank Howard Payne (P. M. W.), Rdr.; R. C. Huston, Fin.; C. F. Gompertz, (P. M. W.), Rvr.; Allan Shorkley (P. M. W.), G.; W. P. Durfee (P. M. W.), I. W.; S. C. Clark, O. W.; Thos. F. Graber (P. M. W.), Trustee; Drs. Payne and Burdick, Med. Ex.

TRINITY CENTER, No. 195.—J. H. Carter, M. W.; J. Coyle, F.; S. Borden, O.; Jno. W. Shuford, Rdr.; Samuel Hubbell, Fin.; Geo. Dack, Rvr.; Henry Gates, I. W.; A. Sandford, O. W.; A .P. Haskins, G.; J. Carter, Trustee; Dr. J. C. Montague, Med. Ex. Reported by J. W. Shuford.

DEL NORTE, No. 183.—Crescent City. H. A. Peeples, M. W.; M. V. Jones, F.; John Duffy, O.; G. Curtis, Rdr.; W. H. Woodbury, Fin.; Edward Yates, Rvr.; Jere Duffy, G.; J. D. Pomeroy, I. W.; Geo. Marhoffer, O. W.; L. F. Cooper, Trustee; J. T. Thorwarth, Med. Ex. Reported by John Duffy.

ASBESTOS.—This mineral, which is fast coming into general use as a new conductor of heat, has been generally adopted by all manufacturers of engines, boilers, etc. The fiber and all its products are unaffected by fire, heat or acid, and therefore becomes invaluable for loose packing, for pumps, valves, stems, etc. It is also particularly suited for steam-heated bearings. It is applied like cotton-waste and, in consequence of its great saving in oil, is the cheapest packing known, being absolutely indestructible. Asbestos patent fiber board is manufactured from pure asbestos fiber in sheets 42x44 inches and ⅛ to ¼ inch in thickness. Its greatest merit is in preventing radiation of heat and condensation of steam. It is also light, flexible, elastic, clean, and much preferable as a covering on pipes to all classes of cements and compounds in use. It will not char, crack or crumble, either from heat or vibration, and can be readily removed and easily restored by using care in its handling. While the cost appears more per square foot than cement or felting, there is such a saving in its circumference measurement, and such a gain in the saving of fuel and steam, that its price is amply returned in the satisfaction its work affords. It is commended for the lining of partitions and floors of buildings to prevent dampness. It is also especially suited for covering chimneys, rendering all parts of a house equally comfortable and free from kitchen heat in summer. One of the most important uses to which asbestos is put is that of the patent fiber lining, which meets the long prevalent demand for hair felting, which is so apt to char and crumble. This is only 1-32 of an inch thick, yet it does its work perfectly, and while it adds scarcely any weight to the pipe, secures the hair felting from all harm, and renders it secure for use for years. Asbestos cement is also useful in house furnaces, and its cost is quickly returned in the saving of fuel and increase of heat. The best asbestos in the world is put up by the Asbestos Patent Fiber Co. of Philadelphia, Pa., and Bro. B. S. Hill, No. 317 Mission street, San Francisco, who is the agent of the company here, carries a large stock of all the different preparations put up by the company, and all in want of any of the different kinds of asbestos should call on Bro. Hill, who will be found to be a most pleasant gentleman to deal with.

BRO. B. F. JACOBS, P. M. W., of Magnolia, 41, has embarked in a new field of journalism. He will publish hereafter a trade journal, to be known as the *Dry Goods Reporter*; size, 28x42, and published weekly, on each Friday. Thus far he has met with flattering success, and no doubt his known energy and push will make this one of the live journals of our city.

ONE of the finest and cheapest grocery stores in this city is owned and carried on by Bro. C. C. Butt, at the southwest corner Stevenson and Nineteenth streets.

BRO. J. H. CROSS, proprietor of the Mansion House, Stockton, knows how to keep a hotel. His fare is first-class and charges reasonable.

FOR pure country milk try the Belmont Dairy, No. 3 Boardman street. Bro. J. W. Collins is the proprietor.

A GOOD place to buy coal and wood is at 927 Market street. Bro. Jos. Goril is the proprietor.

REPORTS from Willows, No. 115, Colusa county, state that this Lodge is healthy, though moving very slow.

MECHANICS' FAIR

Opens August 2d, 1881.

Resolutions of Respect.

[IN MEMORIAM.]

HALL OF STOCKTON LODGE, No. 23, A. O. U. W., Friday, July 15, 1881.

To the Officers and Members of Stockton Lodge, No. 23, A. O. U. W., of California.—DEAR SIRS AND BROTHERS: Your committee, appointed to prepare resolutions relative to the death of our brother, D. J. Saddlemire, respectfully submit the following:

WHEREAS, In the divine economy all men are subject to the laws of nature, which are eternally fixed, and when the day arrives and the allotted number of days allowed to each individual member of our Order has been reached, and our Great Grand Master says it is finished, cease thy toils below and assume a higher and more respectable position there, there is weeping among the friends and brethren; and

WHEREAS, The command has been given to remove from among us, by death, Bro. D. J. Saddlemire, an honored and esteemed member, who departed this life at Tracy, Cal., July 1, 1881; therefore be it

Resolved, That we remember with pleasure our association with our deceased brother; that we will ever cherish the highest regard for his example and for his honor and integrity, which caused him to be honored by all who knew him.

Resolved, That we mourn the loss of our brother so taken by the hand of death while in the prime of his life's experience, and that we hereby tender to his esteemed wife and family, in this their great loss of husband and father, our sincere condolence.

Resolved, That these resolutions become of record on the regular minutes of our Lodge; that a copy be forwarded, properly engrossed, by the Recorder of our Lodge to the bereaved wife and family; that the charter be draped, and that a copy be forwarded to the *Daily Independent*, of this city, and the PACIFIC STATES WATCHMAN for publication.

J. M LARUE, G. LISSENDEN, E. LEHE. } Com.

[IN MEMORIAM.]

HALL OF OAK LEAF LODGE, No. 35, A. O. U. W., OAKLAND, CAL, July 19, 1881.

WHEREAS, It has pleased the Supreme M. W. of the universe, in his infinite wisdom, to call from our midst our beloved friend and brother, Samuel Bell; and while we bow in humble submission to him who is the giver of every good and perfect gift, yet we, Oak Leaf Lodge, No. 35, A. O. U. W., desire to express our keen sense of the loss sustained by the death of our brother; therefore, be it

Resolved, That, in the death of Bro. Bell, Oak Leaf Lodge has lost a true Workman, the community an honest and upright citizen, and his family a kind and indulgent husband and father.

Resolved, That we tender our heart-felt sympathy to the family of our deceased brother, in this their hour of affliction.

Resolved, That the charter of this Lodge be draped in mourning for the period of 30 days in his memory.

Resolved, That these resolutions be spread in full upon the minutes of this Lodge, and that the Recorder be instructed to transmit a copy thereof to the family of deceased, also to the PACIFIC STATES WATCHMAN for publication.

Fraternally submitted, in C., H. and P.

D. S. HIRSCHBERG, S. G. TUCKER, C. K. ROBINSON. } Com.

M. S. BAKER, Recorder.

[IN MEMORIAM.]

HALL OF CALIFORNIA LODGE, No. 1, A. O. U. W., WEST OAKLAND, July 26th, 1881.

To the Officers and Members of California Lodge No. 1 A. O. U. W.:

SIRS AND BROTHERS:—We, your Committee, appointed for the purpose of drafting resolutions of respect to the memory of the beloved wife of Bro. E. W. Berry, Master of this Lodge, most respectfully submit the following:

WHEREAS, It has pleased Almighty God to take unto himself the beloved wife of Bro. E. W. Berry (Master of this Lodge), we feel it right and proper to pay a fitting tribute of respect to the memory of our beloved Sister; therefore, be it

Resolved, That in the death of the wife of our beloved Brother, we deeply sympathize with him and his dear little children in this their sad affliction, and pray that he may be spared to raise and educate them in the fear and love of the Supreme Ruler.

Resolved, That this Lodge tender to him and his motherless little ones its sincere and heartfelt sympathy in this their great affliction; and be it further

Resolved, That these resolutions be spread in full upon the records of this Lodge, and that the PACIFIC STATES WATCHMAN be furnished with a copy for publication.

W. H. WILKINSON, THOS. H. ORGAN, H. G. PRATT. } Com.

W. H. WILKINSON, Recorder.

CHEAPEST PLACE to buy NEW and SECOND HAND MACHINES. All kinds rented, $2.50 per month. Repairing done. Satisfaction guaranteed. All kinds of Needles 25 cents per dozen. P. McCANN, No. 27 Sixth Street, (Singer Office) San Francisco.

Mechanics' Fair Daily.

"A Valuable Publication."

BY AUTHORITY OF BOARD OF MANAGERS OF THE MECHANICS' INSTITUTE FAIR FOR 1881.

During the season, the MECHANICS FAIR DAILY is the BEST AND MOST IMPORTANT ADVERTISING MEDIUM IN SAN FRANCISCO. While open, the Fair is THE LEADING ATTRACTION with both residents and visitors from abroad. Thousands attend daily, seeking and obtaining information. While thus in an investigating mood, the "great public" are more ready than at other times to receive evidences of the superiority of goods and inventions, and the claims and advantages offered by professional and active business men.

The DAILY will be printed on superior California made paper, in the presence of THOUSANDS OF VISITORS during every evening of the exhibitions, and DISTRIBUTED FREE, "fresh from the press," in IMMENSE NUMBERS.

This is our 12th volume. It will be well illustrated, spicily and ably edited, and, like all preceding volumes, it cannot fail of being EXCEEDINGLY POPULAR WITH OVER **100,000** EXHIBITORS AND VISITORS, and EXTRAORDINARILY PROFITABLE to advertisers in its columns. Our most enterprising, first-class business representatives will continue its principal patrons.

The DAILY possesses continuously a great advantage over all other desirable periodicals, from having, in large numbers, a new set of readers for each issue, aggregating an immense number from the most thrifty and intelligent portion of the community. Receiving it somewhat as a novelty, they are likely to peruse its entire contents; pass it around the home circle, and frequently send it to interested parties elsewhere.

Advertisements will be received at reasonable rates. It will be of advantage to patrons to secure the spaces wanted without delay.

Advertisements will be received by the publishers through telephone (No. 75) or we will send our business representative on request by telephone or postal card.

N. B.—The only official Catalogue of the Fair, during the exhibition, will be published complete in the columns of the FAIR DAILY, under authority of the Board of Managers.

DEWEY & CO., PUBLISHERS.

MINING AND SCIENTIFIC PRESS Office, No. 202 Sansome Street, S. F.

P. S.—None but our firm has a right to contract for and publish, post, or circulate, in or about the fair, the advertisement of a second or a third party. Having paid (to the welfare of the Mechanics' Institute), for this privilege, we shall maintain our rights, under our contract with the Board of Managers, for the protection and benefit of all our patrons in the FAIR DAILY. Solicitors for advertisements to be circulated in the fair, without our authority, should be avoided by business men for their own benefit.

"A. O. U. W. Diplomas."

EVERY MEMBER CAN HAVE ONE.

Each and every member of the A. O. U. W., who wishes a really artistic Certificate of Membership, should not fail to procure, without delay, one of "Adler's Diplomas," lithographed in five colors; size, 19x24 inches, with space for photograph of the holder. It is a fine ornamental picture, and distinguishes you as a member. Any Brother desirous of obtaining a perfect copy of the best issue can do so by applying to the WATCHMAN PUBLISHING CO., No. 202 Sansome St., S. F. P. O. Box 2361. Price, postpaid, $1, in cash or postage stamps.

☞ It is an ornament for your room, as well as expressive and pleasing to yourself and friends.

The Corinthian Canal.

French enterprise promises to undertake the accomplishment of a third great engineering feat in cutting a canal through the Isthmus of Corinth, which both in ancient and modern times, has formed an obstacle in the way of commerce between the Adriatic and the Ægean. General Turr, a well-known French geographer, has received a concession from the Greek government to carry out this design, and M. de Lesseps has promised such assistance as can be spared by one whose attention is monopolized by the more difficult and extensive scheme of Panama. When it is remembered how obvious the improvement effected by such a canal must at all ages have been to those enterprising peoples whose direct concern has been and still is the trade between the Adriatic and the Ægean and Black Seas, the only matter of surprise is that the operation has been so long deferred.

When the power of Corinth was at its prime, it was the one drawback to its happiness, the single element of weakness in its prosperity, that it was compelled to have two separate harbors—one for the Gulf and the other for the Ægean. With the view of mitigating, as far as possible, the inconveniences that arose from this circumstance, the Corinthians constructed across the isthmus a polished roadway, over which vessels could easily be hauled, and, from the purpose with which it was built, it was called the Diolcos. After Corinth was destroyed by the Roman General Mummius (B.C. 145), and restored by Julius Cæsar, the Emperor Nero bestowed some notice on the once favored city, and devoted his attention to the question of cutting a canal through the isthmus. The ruins of the works which he caused to be erected are still shown.

It is said that Nero wished himself to strike the first blow, or as we should now say, lay the foundation stone; but a mutiny detained him in Rome. The work then languished, and either want of money, as reference to Suetonius would suggest, or the difficulty of piercing the hard rock led to the abandonment of the design. The Emperor Justinian, who was imitated at later periods by the Eastern Emperor Emanual, and also by the Venetians, erected fortifications across the isthmus, but no one attempted to renew Nero's abandoned canal. The fortifications did not avail to protect Corinth against either the Herulians or the Goths, whereas the canal would have added greatly to the welfare of that city and of the neighboring peoples. It is appropriate and auspicious that the formation of a modern Kingdom of Hellas should be so speedily followed by an attempt to perform one of the few tasks neglected by antiquity. With the cutting of a canal through the isthmus, more will have been done to restore the prosperity of Corinth than has been even so much as attempted since the age of the Cæsars.

PREHISTORIC FINDS.—While working the lead mines in the province of Segovia, some 70 miles west of Madrid, Spain, an immense cavern was found, containing, upon an argillaceous deposit and in the midst of stalagmites, 500 skeletons of men and women. Besides 10 well-shaped and perfect skulls of prehistoric type, there were chipped stone and quartz implements and fragments of rude pottery. In France, in the lower tertiary beds near Rheims—which were considered nearly, if not quite Azoic—Dr. Lemoine has discovered fossil remains of an extremely interesting fauna, comprising numerous new species, and even some new genera, of mammals, birds and reptiles. Many of these species exhibit characters intermediate between those of types which have been heretofore described.

A REMARKABLE worm has been deposited in the library, Santa Barbara, by Henry Cooper. It has alternate sections of transparent emerald, and shines in a dark room like an electric jewel

Artificial Seasoning of Timber.

A German piano manufacturer, Herr C. Rene, of Stettin, claims that the experience of a number of years has shown the superiority of a method of seasoning timber artificially, introduced by him. In his plan he makes use of the property of oxygen, particularly of that ozonized by the electric current, to artificially season the timber. The first impulse to experiments being carried out in this direction, was given by the well-known fact that wood which has been seasoned for years is much more suitable for the manufacture of musical instruments than if used soon after it is thoroughly dried only. Mr. Rene claims that instruments made of wood which has been treated by his oxygen process possess a remarkably fine tone, which not only does not decrease with age, but, so far as experience teaches, improves with age as does the tone of some famous old violins by Italian masters. We are further told that the sounding boards made of wood prepared in this manner have the quality of retaining the sound longer and more powerfully. A number of pianos manufactured at Mr. Rene's works and exported to the tropics several years ago, have stood exceedingly well, and seem in no way affected by the climatic dangers they are exposed to. While other methods of impregnating wood with chemicals generally have a deteriorating influence on the wood fibers, timber prepared by this method, which is really an artificial ageing, becomes harder and stronger. The process and the apparatus consists of a hermetically closed boiler or tank, in which the wood to be treated by the process is placed on iron gratings; in a retort placed by the side of the boiler and connected to it by a pipe with stop valve, oxygen is developed and admitted into the boiler through the valve. Provision is made in the boiler to ozonize the oxygen by means of an electric current, and the boiler is then gently fired and kept hot for 48 or 50 hours, after which time the process of preservation of wood is complete.

A SUBSTITUTE FOR DOORS.—A new substitute for doors—hanging curtains—seems to be rapidly coming into vogue in New York, which is described as follows: This contrivance is more and more displacing doors in New York residences. Take down the door, and across the top of the doorway place a rod of wood. Black walnut or oak is best for the purpose, and there should be a knob at each end. The curtain is suspended by rings, which slide on the rod. Wooden rings are most fashionable, but metal will do, though noiser. Let the curtain be long enough to escape the floor by four or five inches, but fill out this space with a heavy upholstery fringe, sewed on the bottom. In that way you will have a good circulation of air, while the weight of the fringe, will keep the curtain from blowing out too fully for purposes of privacy. The curtain may be of medium light weight, but it should be either lined or doubled; also decorated with embroidery or bands of material contrasting in color with that of the curtain itself; or it may be adorned with both bands and embroidery. You can, if so disposed, put on other decorations in the form of embroidered sunflowers, cat-tail grasses, club ruches, poppies, palms, or any other device that you may choose. You may even aspire successfully to a pair of long-legged cranes. The cost of cotton plush, imitation tapestry, and two strips of cloth will be about $10 for a double doorway of ordinary size. Plain canton flannel would reduce the expense to half that. An entrance-way of this description dresses a room wonderfully.

A SHOE FOR THE PLAINS.—A very peculiar shoe, the sole of which projects three-fourths of an inch beyond the upper leather, has recently been designed by a firm of shoemakers at Brocton. The shoe is especially adapted for traveling over Western prairies where the edges of the grass are like saw blades in their cutting propensities. Over two hundred cases have already been turned out, and orders are on hand sufficient to last all summer.

Manilla.

We have chosen for the illustration of this page a picture of Manilla, a seaport town of the island of Luzon, capital of the Spanish settlement of the Philippines, on the river Passig, near its mouth, on the bay of Manilla. This city has suffered severely from the frequency of earthquakes; the last, in 1863, nearly destroyed the town, on which occasion over 2,000 lives were lost. The bay and harbor of Manilla are excellent, and the river Passig, upon which it stands, is navigable for ten miles. The trade of Manilla is chiefly with the United States, Great Britain, Australia and China. The principal exports are sugar, hemp, coffee, rice, cotton, copper and cochineal. The imports are chiefly woven goods, lead, iron ware, silks, nankeen, etc. "Manilla hemp" derives its name from being a product of the Philippine islands, and being exported from Manilla. The population, including the suburbs, is about 150,000.

A SCENE IN MANILLA, A SEAPORT TOWN OF THE PHILIPPINES.

GOOD accounts are heard from Bay View Lodge, No. 159, South San Francisco. The brethren, though somewhat isolated, have interesting meetings, and we learn from brothers who have visited them, that they are all good speakers. Three other societies meet in the same building.

Help the Boys and Girls.

There is an institution in San Francisco which is performing, in a quiet way, a vast amount of good. We allude to the Boys' and Girls' Aid Society. It is organized for the purpose of aiding our boys and girls who are parentless, or what is often worse, deprived of wise home counsel and control, to become worthy men and women. It is said that there are parents who, instead of being wise in speech and prudent in action, are addicted to the vice of profanity and intemperance before their children, thereby instilling into their youthful minds the seeds of vice, which may in after years work their moral and physical ruin. It is to rescue these and the homeless little ones that the society has been organized. At the present time it has more little children under its care than at any period in its history. It is an object which appeals forcibly to every honest man and woman who has the interests of society at heart. The well-to-do portion of the community should encourange the society as much as possible. This can be done in several ways. Contributions can be made of money, clothing, books, papers, etc.

The society was organized seven years ago, and the manager reports that the past year has been an important one. The cry of the children for help at present comes louder and stronger, and the question has forced itself upon society, "Where will the end be?" During the past year the society has worked more closely to its original object. They have endeavored to reach homeless and friendless boys and girls, who would otherwise be street vagrants. They have sent into the country many who might be a reproach to society. They have ameliorated the condition of more than 100 children of poor homes, who have daily thronged the rooms of the society. Who can say that inestimable good has not resulted?

Members are admitted upon the payment of 25 cents, and 10 cents per month dues. If the applicant is without money, which is often the case, work is given to earn the necessary amount. They hope by this to cultivate a spirit of independence, and give the youth a feeling of interest and ownership in the society. Boys and girls of nearly all nationalities and religious beliefs are coming in from all sections of the city, some making daily visits for their baths and books. This society is also called upon to take care of children whose mothers obtain their livelihood by days' work.

A very important feature is the library and reading-room, which contain at present 2,100 volumes, besides illustrated papers, magazines and periodicals of different kinds. The manager, Mr. J. H. Baker, to whom much credit is due for the successful administration of affairs, says a great point is gained in favor of reform and the salvation of a boy if his mind is kept busy, which is undoubtedly true. Another important branch of their work is the bathing department, which the boys patronize with great eagerness, 4,832 baths having been given the last year, or an average of 18 per day. After the bath and good rubbing with a crash towel, a rush is made for the gymnasium, where they are soon warmed and invigorated by the exercise upon the bars, rings, ladder, etc.

A sewing-school for little girls has also been inaugurated, and is in successful operation, having at present about 300 members. The girls are required to come neat and clean, and the lesson of cleanliness taught on one day each week has resulted in keeping them tidy during the remainder.

A savings bank is also connected with the institution, and the vice of money-wasting has received a check, and a sense of property inculcated. During the last year 95 boys and girls deposited $495.70. Prizes have been offered by friends to the boys saving the most money, which has led to a commendable emulation.

From this brief synopsis of the doings of the society, it will be seen that it is performing a useful work in the reformation of the youth of our city. It has been supported by the voluntary contributions of our leading citizens, and it is to be hoped that the efforts of the society will hereafter be still more generally promoted.

WE have received a copy of the proceedings attending the recent formation of the Grand Lodge of Nevada, from Grand Recorder Thorburn. The principal items appeared in our issue at that time. The next session will be held at Winnemucca, second Monday in May, 1882.

NOE VALLEY LODGE, No. 185, will give its usual monthly entertainment on the 23d. A report of its last social will be found under "Lodge Locals."

THERE will be a union meeting of the Lodges of Sonoma county at Santa Rosa, August 24th. R. Press Smith, D. D. G. M., will be present.

Home Miscellany.

The Golden Wedding.

Wake up, wife!—the black cloak of night begins to fade,
And far in the east the Morning his kitchen fire has made;
And he is heating red-hot his stove of iron-gray,
And stars are winking and blinking before the light o' day.

Mind you what I was doin', just fifty years agone?—
Brushin' my Sunday raiment, and puttin' my best looks on;
Clothin' myself in courage, so none my fright would see—
An' my coward heart within, the while, was pounding to get free.

Ten mile wood an' bramole, an' three mile field an' dew,
In the cold smile of morning I walked to marry you;
No horse had I but my wishes—no pilot but a star;
But my boyish heart it fancied it heard you from afar.
So through the woods I hurried, an' through the grass an' dew,
An' little I thought o' tiring, the whole of my journey through:
Things ne'er before nor after do so a man rejoice,
As on the day he marries the woman of his choice.

And then our country wedding—brimful o' grief an' glee.
With every one a-pettin' an' jokin' you and me;
The good cheer went and came, wife, as it sometimes has done
When clouds have chased each other across the summer sun.

There was your good old father, dressed up in weddin' shape,
With all the homespun finery that he could rake an' scrape;
And your dear-hearted mother, the sunlight of whose smile
Shone through the showers of tear-drops that stormed her face the while.

Also your sisters an' brothers, who hardly seemed to know
How they could muster up courage to let their sister go;
An' cousins an' schoolhouse comrades, dressed up in meetin' trim,
With one of them a-sulkin' because it wasn't him;

An' there was the good old parson, his neck all dressed in white,
A bunch o' texts in his left eye, a hymn-book in his right;
An' the parson's virgin daughter, plain an' severely pure,
Who hoped we should be happy, but wasn't exactly sure;

And there was the victuals, seasoned with kind regards and love,
And holly wreaths with breastpins of rubies, up above;
An' there was my heart a-wonderin' as now such things could be,
An' there was the world before us, an' there was you and me.

Wake up, wife! that gold bird, the Sun, has come in sight,
And on the tree-top perches to take his daily flight.
He is not old and feeble, an' he will sail away,
As he has done so often since fifty years to-day.

You know there's company coming—our daughters an' our sons;
There's John, and James, and Lucy, an' all their little ones;
And Jennie, she will be here, who in her grave doth lie
(Provided company ever can come from out the sky).

And Sam—I am not certain as he will come, or not;
They say he is a black sheep—the wildest of the lot.
Before a son's dishonor, a fathers love stands dumb;
But still, somehow or other, I hope that Sam will come.

The tree bends down its branches to its children from above—
The son is lord of the father, and rules him with his love;
And he will e'er be longed for, though far they be apart,
For the drop of blood he carries, that came from his father's heart.

Wake up, wife! the loud sun has roused the sweet daylight,
And she has dressed herself up in red and yellow and white;
She has dressed herself for us, wife—for our weddin' day once more—
And my soul to-day is younger than ever it was before.

—*Will Carleton.*

GETTING UP IN THE MORNING.—The way to get up in the morning is just to do it promptly. The moment you are called, decide at once to rise. Do not wait until mother's gentle voice is tired, and sister Lucy has determined that she will not call you again, and father comes to the foot of the stairs and calls very seriously: "William! Ebenezer! Rebecca!" and you feel that you must rise in a hurry. Do not put off getting up until you can hardly take time to match buttons and hooks, and you cannot find which strings belong to each other, and suspenders snap, and buttons fly off boots, and things are generally crooked. When first you rise, let your thoughts go to God in thankfulness that you are alive and well, and ready to begin another day. Then wash from head to foot with a sponge and cold water, and dry yourself with a rough crash towel, or take a rub with a stiff flesh brush. You will feel quite warm and glowing after this exercise, which is the better for being rapidly performed. Dress so neatly and entirely, to the last touch of shoe polish and the last flourish of the hair-brush, that you need think no more about your dress all day. Be sure to attend to your teeth. They are good servants, and have so much work to do that they deserve to be carefully looked after, not with irritating powders, but with a clean brush, pure water, and occasionally a dash of white Castile soap.—*Young People.*

A DRYGOODS clerk, who had the most outlandish way of walking, had to go to a distant part of the store to find some goods which a party of feminine customers desired to see. "Walk this way, ladies," he called, as he swung himself off. "But we can't walk that way," cried a pert miss; "we never learned that style, you know."

A YOUNG lady, bearing the aristocratic cognomen of Jardine, recently deserted her lover, because in an impassioned sonnet he made her name rhyme with "sardine."

The Three-Toothed Rake.

I suppose the girls of Millburn would all resent the imputation, if I should say that any of them envied little Phebe Bird when she set up housekeeping with Ridgway Dayton, on the finest farm the country afforded, in a house that was in thorough repair and fully furnished. It was an establishment to be proud of, and people said if that young couple did not prosper it would be their own fault.

"There, Ridge," said Uncle Aleck, "is your farm, and stock, and house all paid for, and now I shall do no more for you. If you don't hoe out your row, you'll have to starve. I am going abroad, so I shan't be coming around to advise you and scold you, and I expect it will come pretty tough with you for awhile. But Phebe is a sensible girl, I am happy to say, and I think I leave you in pretty good hands."

Ridge secretly felt rather pleased at the prospect of being "left," but he did not say so. Uncle Aleck was an excellent man to provide, but he was a little sharp in his way, as the young man had occasion to know at times in his juvenile years. The old gentleman himself had been reared under a system which might be formulated in the couplet—

"A boy, a dog and a walnut tree,
The more you thrash them, the better they be."

The system had been greatly toned down in the case of his orphaned nephew, but Ridge thought it strict enough.

His choice of a wife had pleased his uncle as well as himself, for Phebe was a very domestic girl as well as a cultivated one, and it was the general verdict that "both had done well." Still Aunt Cynthia did tell Ridgway she wished he "had got a wife who would make him stand around a little more."

"Oh, she'll make me stand around enough," laughed Ridge. "You need not be concerned about that."

"She'll have need to," said Aunt Cynthia, nodding her head sagaciously. She had known his manner of life from his youth up, and said he was always a very good boy if he only had a steady hand with him to keep him in order. But Ridge believed "aunts and uncles never did appreciate a fellow." Now it was worth while to have the worshipful direction of such a sweet, appreciative little soul as Phebe Bird, and he did think himself a lucky fellow, and he was.

A stout, capable hired man was engaged at the outset, who understood his business, and, appropriately, received good wages. So the cares of life sat very lightly on the young farmer's shoulders, though he felt the responsibility of Atlas when he shouldered the world, having not only his own, but his wife's domain to look after.

Just when the serpent entered into this little Eden could not distinctly be told. I have no doubt he "wired in and wired out," among the vines and shrubbery of that "first garden," for sometime before he presented himself to our first mother.

If Ridgway was a little exacting and very particular, Phebe was very self-sacrificing and painstaking; so there was little jar in the machinery. He thought strict order and system about work a very excellent thing—for other people—especially for a man's wife. Breakfast at 7, dinner at 12 and supper at 6, always on the table at the minute, was his standard, but, of course, if he could not be on hand just at that time, it was only necessary to keep things hot and at their best for a half or three-quarters of an hour, and it would be nice for her to fill up the time with sewing, or some little thing of that kind. It need not be lost time to her by any means. Of course a man's work is the important work of the world always.

Ridge, from his inexperience in household affairs, had imbibed a theory that if a woman is but economical, it costs "next to nothing" to support such a small family "on a farm." He was astounded at the cost of sugar and coffee and tea and the dozens of little outgoes every week. It must be there was something wrong somewhere. All his pet theories were getting knocked in the head. In vain Phebe mildly reasoned with him; showed him how long supplies could reasonably be made to last; proposed retrenching on cake for tea, but, of course, he would not hear of that. He liked cake. She never spoke of retrenching on cigars, though some women would. But all her "argufying" was without avail.

"A man convinced against his will
Is of the same opinion still."

Somehow, the more Ridge thought about it, the more convinced he was that his wife could hardly be a wise manager. He was disappointed because the money did not pile up quite as he expected. That was another demolished theory which considerably set him back. But then he remembered an old saw which says, "a man must ask his wife's leave to thrive," and he was somewhat comforted. Phebe was young. She might yet be induced to change her manner of doing business. Perhaps he had been too indulgent himself, and had provided too lavishly for the supposed wants of the household. He might, and indeed he must, turn over a new leaf. In other words, he would tighten the thumb screws a little and see if the effect on his victim would not be salutary.

Phebe had grown very reluctant to ask for what was really needed in the house, so sure was she of that adverse criticism so intensely humiliating to a woman of fine nature. If water will wear a stone, so will perpetual petty fault-finding eat away all home happiness. If Phebe had been more self-asserting in the start it would have been far better. She could have educated the young man into a reasonable householder. But, instead, she took a very wrong course, and, by dressmaking in over hours, contrived to earn a little money. This went to eke out the scanty allowance her husband thought so munificent for the expenses of "so small a family."

When supper was over Ridge harnessed up and drove to the village in his fresh cool suit, to get the evening mail. It would have been a rest and refreshment to Phebe to go too, but there was the supper to clear away, the milk to set, little Aleck to care for, and Ridge would have thought all things going to wreck and ruin if she should so desert the ship.

"Uncle Aleck is at home, Phebe!" said Ridge one evening in great excitement, as he returned with a letter. "He is coming on here next week. Now I need not tell you how important it is for all of us that we make a good impression upon him. My uncle is a good man, but he has his peculiar notions. He was always lecturing me on economy. If he gets the impression that we are living extravagantly, he may cut me off with a shilling. Try to have little Aleck at his best, and, if possible, keep him from crying. We must study to provide his favorite dishes, for he always feels crusty if his meals do not please him. I have laid by a little money, though not half what I expected—our living expenses have been so high; but I know Uncle Aleck will be gratified to know I have saved even a little."

"There are a number of things we need," suggested Phebe, wearily. "I suppose your uncle will always prefer white sugar in his coffee, and it is much the best for everything. We have none. And the coffee pot is so leaky I can hardly make coffee in it; and the teakettle is a great trouble for the same reason. They really ought to be mended."

"And the same of half the tinware in the house, I suppose," he said with a lofty smile, as he lighted his cigar.

"It is very true," said Phebe, with no smile either.

"Now, don't it seem to you, Phebe," he said, argumentatively, "that three years is a very short time for tinware to last? I think my Aunt Lucinda has pieces she bought 40 years ago."

"Tinware is not what it used to be."

"I know women say so, but after all it depends a great deal upon the way it is used." Whereupon followed a discourse on the use of pans and basins, that was supposed to effectually settle the question about the necessity of her particular stock being mended.

This modern Pharaoh still persisted in demanding bricks without straw; so with the very scantiest resources, Phebe set about preparing for the dreaded visit. She would have liked a little girl to help take care of baby, but her husband objected on principle. It might look extravagant to Uncle Aleck, and the board of such a girl would be more than her wages.

It was a beautiful day in June, and the country at its best, when Uncle Aleck came. He gave his nephew a hearty hand-shake, and looked over his added pounds of avoirdupois with laughing eyes.

"Farm life hasn't worn you down, I perceive," he said, as he stepped into the buggy.

The supper was excellent, the house like a new pin, baby sweet and fresh in clean, white tucker, and there was only one shadow that those keen grey eyes detected, and that was the worn and faded look of the young mother. It filled him with solicitude, and gave him real pain as he feared his young niece might be in failing health, and his poor boy be left early with only a memory and a pictured face, as he had been these many long years. One thing which had so drawn him to Phebe, was her resemblance to that little ivory-painted picture he bore with him over land and sea. He wondered if there was not a cause for her pallid cheek that might yet be discovered and remedied. Full of this intent, he kept a sharp lookout from under his shaggy eyebrows, as he walked around the premises. The farm was kept up to a state of high thrift and neatness by the hired man, and Ridgway got the credit of it. But indoors there was a scrimped, unhandy look about most of the working implements, which did not escape observation. He saw Phebe tinkering her tins with bits of twine drawn into the holes, and he heard Ridge expostulating with her in the kitchen about some supplies she needed. He sat through a Monday in the cosy sitting-room, where he could hear her toiling at the wash-tub, and hurrying to get up the meals, while she attended to the neglected baby when she could catch a moment's time. His indignation was at white heat by night, and he felt that he could have caned "that graceless scamp," his nephew, with pleasure, for permitting such a state of affairs.

They walked out after tea and looked at the growing crops, Ridgway feeling unusually well satisfied with himself and all his doings.

Uncle Aleck's first remark hardly chimed in with this sentiment.

"Didn't it ever seem to you, Ridge, as a rather one-sided arrangement that you should have a stout man to help you out-of-doors, and your wife no help at all indoors? 'Turn about is fair play.' Suppose now that you try the business for three years alone, and let her have the help."

"Oh, uncle," expostulated Ridge, "there is steady work for two men on this farm the year around."

"And steady work in the house for two women; and yet you have let a young, delicate wife carry it on single-handed, and, as far as I know, have never remonstrated with her on the slow suicide she was committing. Such havoc as three short years have made! It ought to make a man ashamed, if his feelings are not ironclad, to so overwork a woman he has vowed to love and cherish."

Ridgway reddened at his uncle's plain-dealing, but he was not disposed to admit that he was the one so much to blame.

"I tell you uncle, Phebe has not the faculty of getting along with her work that some women have. It takes her longer than it need to to get every meal. I am sometimes almost surprised."

"It certainly does take her longer than it need to. I have plainly seen that, and now, young man, I'll teach you a lesson. You are to rake hay to-morrow, I believe. I'll fix you a rake, and I'll see you use it." And the irate old man smashed all but three teeth out of a good rake and handed it over to his nephew. "There's your implement, and I'll come out and see how you get on with it. There'll be no shirking, either. Everything I have seen of your in-door home conveniences has been just of that order. Your wife works with a three-toothed rake from morning till night. It is good to be saving and lay up money, but not if you must grind it out of the dearest to you. No more new rakes for you until I see a different order of things in the house! Let Phebe make out a list of all she needs as we are together this evening, and then do you draw a check and foot the bill."

"Why, uncle, you never kept house. You know nothing of a woman's demands. It would sweep every cent I have."

"Let it sweep then. Money gotten dishonestly as that was had better go to the place it was stolen from. You have been robbing your wife of her life-power, her health and her happiness these three years. It is time you begin to make reparation. I have preached economy to you, it is true, but I never preached dishonesty. If you can't keep your wife in a decent way, break up and let Phebe go back to the good home she came from. You can go into a store in the city and make your own living."

What a desolate picture it was! Leave his pleasant home, his wife and boy, and take up with the old solitary lodgings in a boarding-house! He felt lonesome at the bare suggestion! Uncle Aleck went on.

"I should like to give your wife this piece of advice: The next time you even hint about what is needed in the housekeeping, and what is not, and suggest retrenchment here and a cutting off there, I want her to walk out and give orders to the hired man; tell him how much grain he must give the horses, how much salt to the sheep; how he must scrimp the wheat when he sows it, and the corn when he plants it. She may tell him to tie up the broken harrow with a string, and not go to the expense of getting it mended, and shall insist on his going ahead if the plow handle is broken—it is too trifling a thing to stop the work for that. All the fault I find with Phebe is that she did not do this long ago. If she had given you a good setting down on the start, and taught you to mind your business, it would have been a blessing all around."

It was pretty plain dealing, but it was a great eye-opener to the young man. He sat upon the piazza for an hour in the moonlight and thought, and thought. Whatever his meditations were, one thought was uppermost—he must gain ground with Uncle Aleck or his chances were slim. That little talk had, as Mark Twain would say, "knocked more conceit out of him than a fit of seasickness." "Humble pie" may not be very palatable, but it is sometimes just the diet to bring one around right. Slowly and soberly the young man "came to himself," and then the foremost thought was—"What a wretch I have been. Can Phebe have a spark of love or respect left for me?"

There must have been something good in the youth, or that loyal heart could not have held fast in her affection for him through thick and thin, as she had done. Uncle Aleck's visit was a godsend to her. He saw a new order of things established in the house, and hung up the three-toothed rake in a conspicuous place in the barn as a standing object lesson. Phebe scarcely knew how to get meals in her renovated kitchen, but her face was as bright as her new saucepans.

Phebe soon won back her roses, and went about her duties blithe as a singing bird. She would always laughingly head her husband off whenever he began to allude to the old times, and "set down naught in malice," but charged the whole to "our youth and inexperience."

When Uncle Aleck came back the next year to the christening of the "little Caroline" he made out to her the deeds of some valuable property, and added a codicil to his will in which the ivory picture was bequeathed to this namesake of the fair lady who, to him, was always young and beautiful.—*J. E. McConaughy, in Country Gentleman.*

AN Oil City man who suspected that his servant girl was in the habit of using kerosene for kindling, put just a taste of nitro-glycerine in the oil-can as a test. Contrary to expectation, nothing happened, but a day or two later the girl came around and asked him to subscribe something towards buying a new stove for her poor old mother, as the old one had fallen to pieces.

My first is in bone, but not in meat.
My second is in burn, but not in heat.
My third is in bark, but not in wood.
My fourth is in fine, but not in good.
My fifth is in white, but not in brown.
My sixth is in dress, but not in gown.
My seventh is in well, but not in smart.
My eighth is in sour, but not in tart.
My ninth is in wish, but not in crave.
My tenth is in bold, but not in brave.
My eleventh is in echo, but not in sound.
My whole we like to get around. JENNIE.

Easy Problem.

Each member of the class being required to construct a problem, Johnny B presented the following:

There is a number consisting of two figures; the figure in the units place being the greater. If the number be divided by the sum of its figures the quotient is four; but if the figures be transposed and the number which results be divided by a number greater by five than the difference of the figures, the result becomes six. What is the number? CEPHA.

Syllable Puzzle (Birds and Animals.)

1. To injure and a metal.
2. To falsify and a preposition.
3. Darkness, a preposition and a tempest.
4. A color, an article and degraded.
5. Very small and to betray. O. G.

Word Square.

1. An individual article.
2. A weed.
3. Formerly.
4. To measure. DICK N. S.

Concealed Motto.

One word is concealed in each sentence, the whole forming an oft-quoted maxim of a man renowned in the history of our country.

1. We are urged to look not upon the wine when it is red.
2. Be assured of a person's guilt before condemning him.
3. Know whereof you speak; many a man has been ruined by a careless word.
4. We must creep ere we can hope to walk or leap. OLD JOE.

Answers to Last Puzzles.

GEOGRAPHICAL ENIGMA.—Argentine Republic, of South America.

LETTER CHANGES.—1. Bed, red. 2. Cow, how. 3. Sin, son. 4. Bin, bun. 5. Ban, bar. 6. Cat, car.

SYLLABLE PUZZLE.—1. Con-cord-ance (ants.) 2. Curtail-me (a) nt.

RIDDLE.—Air.

DECAPITATIONS.—1. Heel, eel. 2. Mice, ice. 3. Yea, ear.

Little by Little.

"Uncle," said Tom one day, "it seems to me your things don't look as well as they might." They were in the garden; and "the things" the boy had his eye on were the currant bushes.

"I don't expect they do," replied his uncle; "I'm no great hand at a garden. Well, sir, what can you improve?"

"I can try on the currants," said Tom. They want to be trimmed out, the dead wood cut off and the right suckers trained. Don't you ever dig around them and put ashes on the roots?"

His uncle had never done those things; did not know that they ought to be done. He thought, he said, "currants took care of themselves."

"But they can be cared for," said Tom, "and do all the better."

"Suppose you try, boy," said his uncle.

His uncle did not believe much would come of it, but he had reason to change his mind. Much did come of it. All at once, it seemed to him, for time goes fast with an old man, his bushes were loaded with fruit, fine large currants, such as the garden had not seen for many a day, if ever before. People, when they walked in the garden, exclaimed: "What splendid currants you have!"

"That boy knows how to take care of his gold dust," said his uncle to himself, and sometimes aloud.

Tom went to college, and every account they heard of him he was going ahead, laying a solid foundation for the future.

"Certainly," said his uncle, "certainly. That boy, I tell you, knows how to take care of his gold dust."

"Gold dust!" Where did he get gold dust? He was a poor boy. He had not been to California. He never was a miner. Where did he get gold dust? Ah! he has *seconds* and *minutes*, and these are gold dust of time, which boys, girls and grown-up people are apt to waste and throw away. Tom knew their value. His father, and minister, had taught him that every speck and particle of time was worth its weight in gold, and his son took care of them as if they were. He never spent them foolishly, but only in good bargains; "for value received" were stamped on all he passed away. Take care of gold dust.

Bright and Cheerful.

"Why, mother, how bright and cheerful you look to-night! What has happened?"

"I feel very happy, my dear, because my little boy has tried to be good all day. Once, when his sister Katie teased him, and he spoke quick and cross to her, he turned round a moment after, of his own accord, and said he was wrong, and asked her to forgive him. I believe I should grow young and never look tired or unhappy again if, every day, my little boy and girl were as thoughtful, unselfish and loving as they have been to-day."

Here's a grand secret for you, little one. And now that you know how to make mother happy, may you keep her face always full of sunshine.

Humorous.

Chips.

SOME people are so nervous that they cannot even rest assured.

WHAT is the most becoming dress for the earth? The skirt of a wood.

MEN are naturally charitable, but they have a bad habit of feeling everywhere for the poor except in their pocket-books.

THE Louisville authorities have resolved to put down rowdyism, even if they have to arrest every policeman on the force.

A WESTERN humorist, who is courting a girl named Furlong, says it is an eighth of a mile around her waist. He must be a rood fellow.

ONE of the greatest trials of a young lady's life is when she tries to get a half-gallon foot into a quart shoe.

"MY WIFE," remarked Fitznoodle, "is fairly crazy over the spring fashions. She's got the delirium trimmins."

A KIND writer says: "You can trust a man who loves a horse or a dog." A livery stable man has tried it, and finds there is no money in it.

THE *Graphic's* farm editor says: "Soak cats well in a bag tied at the mouth and plant them deep to prevent their scratching up the seed."

THE mad dog which jumped over a six-ft. fence to bite a man's leg must have felt terribly mortified and disgusted when he found it was wooden.

A LADY in Albany has a little dog called Sport. She has taught him a number of tricks and this among them. She will say: "Sport, which would you rather be, a dead dog, or a member of the legislature?" Instantly he will throw himself down, stretch himself out, close his eyes and be, to all appearance, dead.

WHY is a cow's tail like the letter F? Because it is the end of beef. Here's another quite as bad. Why is an egg like a colt? Because it is not fit to use until it is broken.

CHOICE brands of French wines are now largely made from glucose and beets, and some of the best French brandy is made from grain and potatoes. Hoopskirts and oyster cans are said to make a very superior article of cider.

MEMBERS of the Baltimore police say they saw the comet at 1:50 on the morning of June 20th, and it is thought the Mayor will remove them for being awake at such an unseasonable hour.

Household Hints.

PEACH MARMALADE.—Pare, stone and weigh the fruit; heat slowly to draw out the juice, stirring up often with a wooden spoon. After it is hot, boil quickly, still stirring, three-fourths of an hour; add the sugar, allowing three-fourths of a pound to each pound of fruit. Boil up well for five minutes, taking off every particle of scum; add the juice of one lemon to every three pounds of fruit, and the water in which one-fourth of the peach kernels have been boiled and steeped. Stew all together for 10 minutes more, stirring to a smooth paste. Put it up hot in air-tight cans, or, if you prefer to put it in glass jars, put it in them when nearly cold, and put white paper on the top of each jar.

MUTTON COLLOPS.—Cut some very thin slices from an underdone leg of cold roast or boiled mutton. Sprinkle over them a little pepper and salt, and roll in beaten egg, then in bread or cracker crumbs, and fry quickly in melted butter. Take out and stir in a dessertspoonful of flour mixed thoroughly with cold water; add to the butter; stir in the remains of the gravy of the meat; simmer gently for 10 minutes, and turn over the collops. Serve at once. An excellent lunch or tea dish.

FRICASSEE OF ONIONS.—Peel two or three dozen of the very small, round, white onions; sprinkle them with salt, let them remain for half an hour, then roll them upon a cloth to dry them slightly, and dredge with flour; throw them into a stewpan in which you have melted two ounces of fresh butter, toss them over a gentle fire for five minutes, drain the fat from them, add a pint of rich milk, minced lemon peel, white pepper, salt and butter. Simmer for 10 minutes and serve in the sauce.

FRIAR'S CHICKEN.—Quarter two or three chickens, clean them thoroughly, and place in a stew pan with a pint and a half of boiling water. Add a few sprigs of parsley, or half a chopped onion, some pepper and salt, and simmer slowly until the meat is very tender. Just before serving beat up three eggs to a froth and stir into the gravy. Serve very hot.

GERMAN CUSTARD SAUCE.—Four yelks of eggs, two ounces powdered sugar, grated rind of lemon, a glass of sherry and a little salt. Beat it sharply over a slow fire until it assumes the appearance of a light, frothy custard. It is a good sauce.

AMERICAN CORNED BEEF, according to Mr. Wigner, in the *Analyst*, is twice as valuable as an article of diet as fresh boneless beef, and that the cooked ox tongues contain less salt and more nutritive matter than the dried tongues usually sold in European markets.

Health Column.

Finger Nails.

Our finger nails grow out about three times a year; they should be trimmed with scissors once a week, not so close as to leave no room for the dirt to gather, for then they do not protect the ends of the fingers, as was designed by nature; besides, if trimmed too close at the corners, there is danger of their growing into the flesh, causing inconvenience, and sometimes great pain. The collections under the ends of the nails should not be removed by anything harder than a brush or a soft piece of wood; nor should the nails be scraped with a penknife or other metallic substance, as it destroys the delicacy of their structure and will at length give them an unnatural thickness. We are not favorably impressed as to the cleanliness of a person who keeps his nails trimmed to the quick, as it is often done to prevent dirt gathering there; whereas, if a margin were allowed, it would be an index to the cleanliness of the hands, from which the collections under the finger nails are made. Leave a margin, then, and the moment you observe that these collections need removal, you may know that the hands need washing, when they and the nails are both cleaned together.

Most persons are familiar with those troublesome bits of skin which loosen at the root of the finger nails; it is caused by the skin adhering to the nail, which, growing outward, drags the skin along with it, stretching it until one end gives way. To prevent this, the skin should be loosened from the nail once a week, not with a knife or scissors, but with something blunt, such as the end of an ivory paper cutter; this is best done after soaking the fingers in warm water, then pushing the skin back gently and slowly; the white specks on the nails are made by scraping the nail with a knife at a point where it emerges from the skin.

Biting off the finger nails is an uncleanly practice, for thus the unsightly collections at the ends are kept eaten clean! Children may be broken of such a filthy habit by causing them to dip the ends of their fingers several times a day in wormwood bitters, without letting them know the object; if this is not sufficient, cause them to wear caps on each finger until the practice is discontinued.—*Hall's Journal of Health.*

SOME NEW FACTS ABOUT RABIES.—It is known that M. Pasteur is directing his attention to the subject of rabies. The virus of that disorder, of course, exists in the saliva, but M. Pasteur has now proved that it does not exist there only. The brain substance also contains it, and, used to inoculate healthy animals, will reproduce the disease as effectively as the saliva. Matter from the medulla oblongata and the frontal portion of one of the brain hemispheres and the liquid of the brain have been thus employed with success. Again, one of the greatest difficulties in researches on rabies arises from the uncertainty of development of the evil after inoculation or a bite, and the long time of incubation. M. Pasteur is now able to communicate the disease surely, and to shorten considerably the time of incubation. His method is to inoculate directly the surface of the brain, having recourse to trepanation, and using as inoculating matter the cerebral substance of a mad dog as pure as possible. In that case the first symptoms of rabies appear infallibly in a week or two, and death ensues in less than three weeks. In these researches, of which we may expect to hear more shortly, M. Pasteur has the co-operation of MM. Chamberland, Roux and Thuillier.

THE EUCALYPTUS AS A HOUSE PLANT.—Prof. J. L. Budd thinks the Eucalyptus Globulus, which has done such wonders in arresting malarial disease on the fatal Roman Campagna and in other places, acts not only by the immence transpiration from its leaves, which soon distil the juices of the soil, but from actual antiseptic emanations, and by the absorption of deleterious gases. Wounds are healed, and foul sores purified by an application of the leaves. He advises their growth as a house plant, and says that a plant of his in an eight-inch pot, three years from the seed, remains at about five ft. without losing its large, handsome leaves.

KILLED BY A SPIDER.—On Tuesday of last week, says the Boston *Post*, of a recent date, Chas. H. Jellison, son of Frederick Jellison, of Biddeford, Me., was bitten by a black spider, from the effects of which he died. On Tuesday morning, when the boy came out of his room, he informed his mother a spider had bitten him. But little notice was taken of the bite, which was just over one of his eyes. It commenced to swell, and Friday they called a physician. At this time the boy's face was very much swollen; he was delirious, and his pulse had arisen to 160. He died on Monday morning.

HOW TO TAKE QUININE.—Half a grain of quinine in two ounces of milk produces no disagreeable taste in the mouth, and this same quantity (half a grain) in a glassful of milk is scarcely perceptible. This is an easy method of administering quinine to children and delicate patients who object to the bitter taste which it leaves in the mouth.

Worth Knowing.

WHY WOOLEN FABRICS SHRINK.—The fibers of wool and certain kinds of hairs, are toothed or jagged at the edges, the teeth (or imbrications) pointing upward—that is, from the root to the point. When subjected, therefore, to compression or friction these fibers, being free to move only in one direction by reason of these asperities of surface, have a great tendency to unite and lock together. This explains the peculiar capability possessed by wool, of felting, and also the shrinking of fabrics of wool. In the latter case, the excessive rubbing to which they are subjected causes a matting or binding together of the ultimate fibers, which causes shrinkage; and this is intensified by changing the goods from hot to cold water, which is usually practiced, as the contraction of the fibers which this causes is itself a felting process. For washing woolen articles, it is recommended to place them in warm water, never in cold; and if changed from one water to another, they should go from hot to hotter. They should be cleansed with as little and as gentle friction as possible. The fibers of cotton and linen are straight and smooth, and possess none of the surface roughnesses that characterize the structure of wool, hence they do not shrink in washing.—*Manufacturer and Builder.*

IMITATION AMBER.—Considerable quantities of beautiful objects of artificial amber are now being produced in Vienna. The substance employed in its manufacture is chiefly colophony or resin, obtained by decomposition of turpentine, though several other ingredients are used to give it the requisite qualities. The imitation is said to be perfect, and the production has even the electric properties of true amber. Ingenious manufacturers have even introduced into the substance foreign bodies, insects, etc., to make the similarity more striking. Natural amber requires a temperature of 285 deg. to 287 deg. C. to fuse it, while the imitation becomes liquid at a much lower temperature.

WATERPROOF CEMENT.—For a waterproof cement, the following has been given: Boil one lb. of best glue in two quarts skimmed milk instead of water. This will be proof against damp or moisture. Another good cement for this purpose is made by boiling a pound in weight of linseed oil, stirring in quicklime till a good thickness, then pour out on a flat slab or tin plate, keeping in the shade; the cakes will become hard, and are easily melted like common glue.

CARE OF SAWS AND CHISELS.—A saw or chisel which has been used in unseasoned wood should be carefully wiped and oiled, otherwise it contracts rust and wears away fast. A new file should not be put upon the scale of cast-iron or unannealed steel, and a file kept for brass or bronze should not be used on a harder metal. Back saws for cutting iron and other metals are often ruined in inexperienced hands. If drawn forward and back too rapidly they heat and lose their temper, when they becoms almost useless.

TO CLEAN SMOKY WALLS.—Brush them with a broom, then wash them over with strong pearlash water, and immediately rinse them with clean water before the pearlash is dry. When dry, give the walls a thin coat of freshly-slacked lime, containing a liberal proportion of alum dissolved in hot water Finish with whiting and good size. Be careful not to apply the size distemper till the lime-wash is dry, as the latter will destroy the strength of the size, if the two come in contact while wet.

CEMENT FOR GUTTA-PERCHA.—To make a cement for joining gutta-percha belts, the following has been given: Melt two parts of common black pitch to one part of gutta-percha. Make ready the two ends of belt to be joined; heat them by holding a red hot iron over them; then smear both ends with the hot cement; stick them together and apply a heavy pressure for several hours.

FOR KINDLING.—Pine cones are said to be very generally used in Europe for kindling coal fires. When dry, they are readily ignited with a match, and are free from dust and insects. Two of them are enough to start a fire of wood, and a handfull suffices to start a coal fire. The hint might be made useful where bituminous coal is the common fuel and pine cones are abundant.

HOLES may be bored in porcelain by means of an ordinary machine drill. The drill is kept moist with oil of turpentine, and caused to revolve rapidly by taking one twist of the string of a bow about, and drawing the bow quickly backward and forward, after the manner of using a saw, while the head of the drill is held in position by a loose oiled brace.

PERFUMED CAMELLIAS.—A gardener at Naples holds out the hope that in the near future the camellia will rival the rose in fragrance as well as in beauty. After years of experience he has succeeded in producing a camellia with a delicate perfume. It is of a pale rose color, and the gardener hopes to obtain before long fragrant white blossoms.

FRATERNAL RECORD.

MASONIC.

Officers of the Grand Lodge.—SAMUEL CRAWFORD DENSON, G. M., Sacramento; CLAY W. TAYLOR, D. G. M., Siskiyou; MOSES HELLER, G. Treas., S. F.; ALEX G. ABELL, G. Sec'y, S. F.

BOSTON COMMANDERY, Knights Templar, is already moving for an excursion to San Francisco, at the triennial in August, 1883. The cost is estimated at from $250 to $350 each, and a committee will immediately begin to receive monthly deposits towards the amount which may be withdrawn at any time prior to June 1, 1883. Other Templars who wear the black are invited to join them. Arrangements will be made to take ladies, and they will undoubtedly receive many attentions on the way. This will be an excellent opportunity for all New England Templars who wish to come.

IT IS NOT generally known that Mastai Ferretti, Pope Pius IX, was initiated in a Sicilian Lodge in his college days. At that early date, however, there was no prohibition by the Church of Rome, either in the common law or any of its precepts, against its members belonging to Masonry. It is also asserted that when his Holiness was a missionary on the river Plata, and then known as Brother Mastai Ferretti, he frequently visited Lodges there, and his signature is still, or was lately, preserved in the archives of one of the subordinate Lodges of the Argentine Republic.

A COLORED gentleman was busily engaged in sawing some wood for a Southern gentleman. The "man and brother" had a large Masonic breastpin on his shirt bosom.

"Do you colored Masons affiliate?"

"Don't fillyate wuff a cuss."

"What's the matter?"

"Dunno boss, but I'se tried it. Dar is a barkeeper in this town what toted dis here berry same emblem. I was in distress; hadn't had a dram all dat mornin'. I cum in an' gib de distress signal."

"Did he respond?"

"He didn't respond right. He made a motion at de doah wid one hand, and reached under de bar. I made de sign once moah, and he fetched me between de shoulders wid de bung starter, jess as I was gettin' out de doah."

THE Masonic Board of Relief of San Francisco, had the proceeds of the Mechanic's fair for both day and evening on Aug. 11th. The Olympic Club added much to the interest of the occasion by their voluntary exhibition.

SHOULD President Garfield live, H. R. H. the Prince of Wales, will confer on him the "Grand Cross of the Temple," an order which only one person on this continent has ever been honored with.

MRS. ABBIE E. WOOD, Grand Secretary Order Eastern Star, has opened an office for the transaction of her official business, at room 1, Shiels' building, 32 O'Farrell St.

KING SOLOMON'S LODGE No. 260, conferred the entered apprenticed degree on three candidates at their meeting, Aug. 8th. They will all be passed Aug. 15th.

RETURNS to the last session of the Grand Lodge of New York show there to be in that jurisdiction 715 working Lodges, with 73,000 affiliated members.

THE Grand Lodge of Pennsylvania has decided to celebrate its sesqui-centennial anniversary, June 24, 1882.

Order Eastern Star.

Officers Grand Chapter—JEROME BANKS, Gr. Patron, Red Bluff; MRS. S. JENNIE MANN, Gr. Matron, S. F.; MRS. ABBIE E. WOOD, Gr. Sec'y, S. F.

KINGSLEY Chapter was instituted with 17 charter members, at Ukiah, on Saturday evening, Aug. 6th, by Special Deputy, Mrs. Carrie A. Kingsley, (for whom it was afterwards named). The following officers were installed: Worthy Matron, Mrs. M. E. P. McCowan; Worthy Patron, Walter L. Bransford; Assistant Matron, Mrs. Emma M. Metzgar; Conductress, Mrs. Sarah M. Osborn; Assistant Conductress, Mas. Caroline R. King; Secretary, Mrs. Georgia Hagans; Treasurer, Mrs. Mary J. Cunningham; Warder, Mrs. Annie Charlton; Adah, Miss Mary E. Wheeler; Ruth, Mrs. E. C. Sturtevant; Esther, Mrs. Alice M. Bransford; Martha, Mrs. Winnie A. Cliff; Electa, Mrs. Clarissa A. Green.

CRYSTAL CHAPTER was instituted by S. Jennie Mann, Worthy Grand Matron, assisted by J. F. Kinkade, at Auburn, with Julia Lubeck as Worthy Matron; J. G. Bisbee, Worthy Patron; Mary Fulweiler, Associate Matron; Chas. H. Graham, Secretary; Chas. J. Hellewig, Treasurer; Lizzie Willis, Conductress; Angie Severns, Asst. Conductress; Julia Holle, Adah; Mary A. McGuire, Ruth; Minnetie Bisbee, Esther; Esther T. Holle, Electa; Jno. R. Winders, Warder; John M. Fulweiler, Chaplain.

LILY OF THE VALLEY CHAPTER, O. E. S., of Watsonville, will give a basket picnic at Porter's grove, Wednesday, August 31st, that date being the anniversary of the founding of the Order. Delegations are expected from Chapters at Salinas, San Juan, Hollister and Santa Cruz.

THE Order was never in a more prosperous condition, and there are prospects of several more Chapters in the near future.

I. O. O. F.

Grand Officers—DAVIS LOLOBACK, G. M., San Francisco; LEON D. FREER, D. G. M., Oroville; D. M. BURNS, G. W., Sacramento; W. B. LYON, G. Sec'y, San Francisco; H. B. BROOKS, G. Treasurer, San Francisco.

THE organization of the Wildey Association at Chicago, is a very worthy and commendable move, and all prominent members of the Order wherever located should join it. The objects of the Association are to maintain a permanent organization of Odd Fellows, for the purpose of commemorating in an appropriate manner the birth of Thomas Wildey, the founder of Odd Fellowship in America, and in other ways as wisdom may direct of promoting the general interest and welfare of the order. The fee for membership is the sum of one dollar; and the annual dues are a like sum of one dollar. Any Odd Fellow in good standing may become a member of the Association on the payment of the sum of one dollar to its Secretary. The officers are President, W. H. Crocker; Vice President, J. C. Smith; Secretary, Hervey Sheldon, Jr.; Treasurer, John Snitzer; Marshal, Victor Girardin; Directors, Thomas Sutton, Louis Kestler, J. L. Barnum, S. A. Miller, and J. Ward Ellis.

THE Odd Fellows of Brownsville and vicinity had a grand picnic on the 26th ult. Chas. Foss was President of the day, Rev. S. Kinsey delivered the oration. The celebration of the day was not concluded at the grove, for by 9 o'clock in the evening many were tripping the light fantastic in the Odd Fellows' hall at Brownsville. The carpet was removed, and the smooth, waxed floor underneath was all that lovers of the dance could wish for. The music consisted of violin, cornet, banjo and melodeon, and served the purpose as well as any brass band could have done. A light supper was served in the room directly beneath the hall.

THE Grand Lodge of Ohio is making extensive arrangements for the next meeting of the Sovereign Grand Lodge at Cincinnati, September 19, 1881. A grand procession and unveiling of the monument erected to the memory of Odd Fellows who have died in Ohio, residents of other States, will be an important feature. W. W. Morrow of this city and Grove L. Johnson of Sacramento are the representatives elect to the Sovereign Grand Lodge from the Grand Lodge of California.

IN view of the late enactment by the Grand Lodge of Missouri, the Grand Master decides that a Lodge can pay for sick benefits per week only one-half the amount charged per annum for dues, any provision in their by-laws to the contrary notwithstanding.

IN Missouri there are 339 Lodges, with a membership of 14,575. Last year they paid out $5,483.30 for burial of the dead; $4,887.95 for the education of orphans; $10,499.45 to widowed families; $21,315.85 for relief of members.

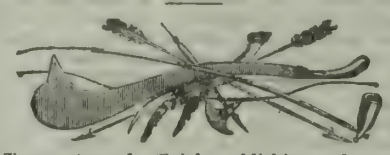
A NEW Lodge is soon to be organized at Cherry Creek. The brethren have sent East for their regalia and paraphernalia. They expect to have everything in readiness for institution by the 20th inst.

THE officers of Oso Lodge, No. 110, of Bear valley, installed for the ensuing term we learn to be as follows: N. G., Henry Peard; V. G., John Repetto; Sec., E. M. Rice; Treasurer, M. Newman.

ILLINOIS has 500 Lodges, in which there was a gain of 2,076 the last year. They paid for relief $61,964.21, and their assets, if divided between each member, would amount to $90 each.

THE time for preparing and delivering plans and specifications for the new Odd Fellows' building in this city, has been extended to October 1st.

TEMPLAR REBEKAH Degree Lodge gave a grand anniversary party at Ixora hall, in this city, on Wednesday evening last, August 10th. It was a great success.



MYRTLE REBEKAH DEGREE LODGE of Vallejo paid a fraternal visit to the Suisun Rebekahs on Friday evening, August 5th.

PRESIDENT GARFIELD is and has been for years an active and zealous Odd Fellow.

UKIAH LODGE, No. 174, is to build a new two-story fire-proof brick building.

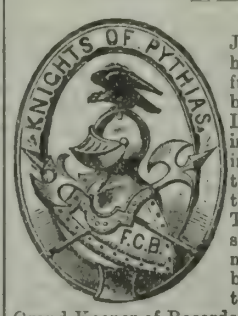
Improved Order of Red Men.

Officers of the Great Council—J. A. FILCHER, Great Sachem, Auburn; J. F. PINKHAM, Great Senior Sagamore, Oakland; C. E. Spencer, Great Junior Sagamore, Sacramento; EUGENE LEHE, Great Prophet, Stockton; H. S. WINN, Great Chief of Records, S. F.; ADAM SMITH, Great Keeper of Wampum, S. F.

THE custom of officials publishing order papers has extended to the Red Men, the Great Incohonee, Charles H. Litchman, of Salem, Mass., has started the *Wampum Belt*. We wish him success, yet believe the principle to be wrong.

THE Oregon Great Council has elected the following Great Chiefs: Great Sachem, David Cronemiller, of Jacksonville; Great Senior Sagamore, Ben L. Norden, of Portland; Great Junior Sagamore, Geo. T. Baldwin, of Linkville; Great Chief of Records, Ward S. Stevens.

THE Red Men's Endowment Fund Association held their annual meeting last Tuesday evening, and elected officers for the ensuing year.



GREAT SACHEM, John A. Filcher, of Auburn, spent a portion of last week in this city on business for the Order.

THE Big Injuns of Louisiana are talking of kindling a Great Council fire in that reservation.

THERE are 6,500 Red Men in Philadelphia.

Knights of Pythias.

Grand Officers.—S. L. TERRY, P. G. C., Stockton JOHN H. HARNEY, G. C., S. F.; GEORGE CANTUS, G. Treas. S. F.; A. G. BOOTH, Grand K. of R. & S., S. F.

GRAND CHANCELLOR, John H. Harney, is having a most successful term. There have been more new Lodges instituted within his term than during any corresponding time in the history of the Order in California. The old Lodges also show a large increase of membership, as found by the semi-annual returns in the hands of Grand Keeper of Records and Seal, Booth.

WE are in receipt of the proceedings of the eleventh session of the Grand Lodge of New Hampshire, recently held at Suncook, in that State. Seventeen Lodges were reported with a membership of 1,297, and 16 Past Grand Chancellors, and 264 Past Chancellors. Total receipts, $6,753.06. Disbursements for relief, $2,120.53. Cash on hand, $7,150.26. Among the decisions of the Grand Chancellor, we find the following: Question.—Can a sick brother, who has been wholly unable to follow his usual occupation for the space of one year, or been otherwise disabled, legally collect a benefit for more than 25 consecutive weeks in any one year? Answer.—Yes. The Supreme Lodge requires all subordinate Lodges to pay benefits of at least one dollar per week, during one sickness, be it one month or one year.

THE Library Committee of the present year has shown more than usual activity in looking after the interests of that valuable adjunct to the Order in this city. Many valuable additions have been made, and more are promised. The committee is contemplating a substantial increase, by way of financial assistance from an entertainment soon to be given at one of the theaters in this city.

THE citizens at the Western Addition of this city are taking the initiatory steps toward having a new Lodge in that section. John Martens has the list, which has already nearly enough names thereon to organize. It will meet at Hamilton hall, corner of Geary and Steiner streets.

TWENTY-EIGHT candidates in one evening! How is that for work? Such was the case, however, in Ivanhoe Lodge, No. 5, of this city, a few evenings since, and the amplified third was conferred on them. Certainly, this looks as if Pythianism was on the increase rapidly.

THE brethren of Fort Worth, Texas, on the 9th ult, laid the corner stone of a Pythian Temple—the first building of that kind in the world owned and controlled entirely by the Knights of Pythias.

CHICAGO has 14 Lodges, five uniform rank divisions and five endowment sections.

Knights of Honor.

Grand Officers.—DAVID MCCLURE, P. G. D., San Francisco; CHAS. E. TRAVERS, G. D., San Francisco, R. H. WARFIELD, G. Treas., San Francisco; W. H. MAHONEY, G. Reporter, office St. Ann's building, cor Powell and Eddy

A San Francisco Knight Explains the Situation.

EDITORS WATCHMAN:—It has been suggested to me by several Knights of Honor that your remarks in the "Fraternal Record Department" of your issue of August 1st, prophecying a separate jurisdiction of the Knights of Honor for this State, or secession from the Supreme Lodge by the Order in California, would work far more injury to the Order than would the reported delays in the payment of a few death benefits. To my personal knowledge, candidates, who had promised to join the Order before reading your article, have since refused to join—alleging as a reason that they do not desire to join an Order having a State jurisdiction, and expressing a feeling of alarm at the possible prospect of the Order here seceding from the Supreme jurisdiction. The same feeling of alarm exists, I know, among members of the Order.

I trust your remarks were not inspired by any feeling inimical to the success of the Order.

Last month, as you are doubtless aware, the various Lodges in this city, by committee, sent a memorial to the Supreme Dictator, setting forth some of the delays which had occurred in this State in the payment of death benefits, inquiring the cause thereof, setting forth the injury such delay was working to the Order here, and asking him to correct the evils complained of. I fully concur with the objects of the memorial, and trust and believe our Supreme officers will be able to make full explanation and afford ample redress, but I cannot help thinking that, had the committee so endeavored, it might have found the reason for a large share of the delay nearer home.

The death benefit of Thomas H. Cunningham, deceased April 22, mentioned in your article, was provided for by assessment No. 83, which was levied June 12, and called to the Supreme Treasury July 1, 1881. There can be no doubt that the warrant for the benefit was drawn, even if it had not reached here, at the time the memorial was sent. Otherwise some mistake must have occurred.

In the last few notices of assessments, the Supreme Reporter remarks that "the noncompliance with General Law No. 16, on the part of Grand and subordinate Lodge Reporters, is causing great delay in the payment of death benefits, thereby creating much complaint," and on some of the notices he adds: "We have some notices on file, awaiting compliance with the law before we can pay them."

General Law, 16, requires subordinate Lodge Reporters to forward to the Grand Reporter a full death notice, *in addition to the one sent to the Supreme Reporter*, and also requires that the Grand Reporter shall, immediately on receipt of such notice, notify the Supreme Reporter of the death. The order or warrant for the benefit cannot be issued until the Supreme Reporter receives both notices.

We have had two deaths in our Lodge, and both of them have been paid within two months after the death notice was forwarded, which is, I believe, as soon as the Supreme Lodge expects to pay, at this distance.

Some Lodges may not be aware of the fact that the death notice will not be accepted by the Supreme Reporter unless made out on the blanks furnished by the Supreme Lodge, and bearing the seal of that Lodge, and some Reporters have been unable to procure these blanks from the Grand Reporter, and they cannot, under the law, procure their supplies direct from the Supreme Lodge.

To my mind there are three causes which have operated toward delay in the payment of death benefits in this State, namely:

1. Neglect or failure on the part of the Grand and Subordinate Lodge Reporters to forward all the notices required by law.

2. The length of time involved by our remoteness from Supreme headquarters.

3. Delay in the Supreme Reporter's office, which, at this time, may be safely attributed, in a great measure to the great pressure of business since the recent session of the Supreme

Lodge, and to the duty, not yet completed, of making a complete record of every member of the Order, and filling out over 100,000 benefit certificates.

The first can be remedied here by a careful compliance with the law; the second cannot be well overcome; and I trust the third may be remedied at no distant day, and that the Supreme Dictator will make provision for the prompt dispatch of business in the Supreme Reporter's office.

The memorial referred to will undoubtedly bring forth a reply from the Supreme Dictator, and explanations from the Supreme Reporter; and while not desiring to appear in the *role* of an apologist for either of them for any real or fancied dilatoriness, I can but consider it fair and just to await an answer from them before threatening "secession" as a mode of remedying what may be explained to the satisfaction of all, if we exercise a little patience and forbearance.

Many of us don't belive in a separate jurisdiction, and I hope none of us in "secession;" but at another time I may, with your permission, give reasons why a separate jurisdiction of the Knights of Honor would not be wise or desirable, even for the State of California.—JUSTICE.

American Legion of Honor.

Officers of Grand Council OSGOOD C. WHEELER, Grand Commander, Oakland; MRS. ABBIE E. WOOD, G. Sec'y., office room 1, Shiels' building, 32 O'Farrell St.; J. N. BESSE, G. Treas., Watsonville.

Organization of the Grand Council of California.

Pursuant to instructions from the Supreme Commander of the American Legion, all past Commanders within this State were requested to meet at Shiels' building, No. 32 O'Farrell, on Monday, August 8th, for the purpose of organizing a Grand Council for the State of California.

The meeting was called to order by C. G. Bockius, Deputy Supreme Commander, who appointed H. K. McJunkin, H. C. Hinman and George W. Knox a Committee on Credentials. After a short recess the committee reported the following as entitled to seats.

Pioneer Council, No. 54, Sacramento, J. M. Henderson and J. C. Tubbs; Chico, 55, Chico, J. S. Jackson and C. A. Beesley; Golden, 118, San Francisco, C. S. Haley and Lee O. Rodgers; North Star, 122, Yuba City, G. W. Alberti; Alta, 147, San Francisco, E. J. Fraser and W. S. Bronn; Union, 168, Oakland, J. E. Blethen and H. C. Hinman; Myrtle, 187, San Francisco, C. G. Bockius and J. L. Fields; Oakland, 192, Oakland, O. C. Wheeler, James Dodds and W. M. Haynie; Unity, 194, Oakland, A. G. Anthony and W. S. Snook; Yosemite, 196, Stockton, Eugene Lehe and H. M. Larue; Center, 197, Oakland, T. F. Jenkins and J. F. Pinkham; Equality, 207, San Leandro, C. E. Palmer; Nevada City, 234, Nevada City, E. W. Charles and James Rapp; Petaluma, 244, Petaluma, O. F. Westoner and L. H. Patty; California, 250, San Francisco, E. W. Haines and J. Merritt; Bohemian, 261, San Francisco, D. McClure and Julius Perrault; Dixon, 272, Dixon, G. W. Knox and William McBain; Columbia, 335, San Francisco, C. W. Bryant and Oscar T. Shuck; Coleman, 451, San Francisco, J. S. Coleman; Santa Rosa, 459, Santa Rosa, H. S. Wilson; Pacific, 474, San Jose, A. P. Murgotton; Washington, 480, San Francisco, C. E. Blake; Mispah, 478, San Mateo, L. D. Morse; Lakeport, 482, Lakeport, H. F. Childs; Alameda, 492, Alameda, E. T. Barnes; Ukiah, 496, Ukiah, Barton Dozier; Occident, 502, San Francisco, H. K. McJunkin; Santa Cruz, 506, Santa Cruz, A. T. Hinds; Gavilan, 553, Salinas, M. Hartwell; Excelsior, 559, San Francisco, George T. Emerson; Shasta, 582, Shasta, Aaron Bell; Golden West, 547, W. H. Davis; Golden Star, 548, Louis Ehrlich; Metropolis, 640, San Francisco, James Waterman; Vista, 636, Manchester, R. H. Cuthbeston; Westaria, 535, Hollister, I. J. Sherman; Obispo, 538, C. J. Russell; Mystic, San Francisco, Mrs. Abbie E. Wood; Acacia, 541, Watsonville, J. N. Besse; Wheatland, 652, Wheatland, John Landis; Golden Shore, San Francisco, J. W. Kinsley; Safety, Los Angeles, C. C. Cheesbro.

The report was accepted, and the companions therein named were admitted to seats. The Councils were then called upon to pay $10 each toward expenses of instituting a Grand Council. The next business was the election of officers, which resulted as follows: Grand Commander, Osgood C. Wheeler, of Oakland; Grand Vice-Commander, George W. Alberti, of Yuba City; Grand Orator, G. W. Knox, of Dixon; Grand Secretary, Mrs. Abbie E. Wood, of San Francisco; Past Grand Commander, C. G. Bockius, of San Francisco; Grand Treasurer, J. N. Besse, of Watsonville; Grand Chaplain, Barton Dozier, of Ukiah; Grand Guide, Alex. P. Murgotton, of San Jose; Grand Warden, Louis Ehrlich, of San Francisco.

Grand Sentry, John Landis of Wheatland; Grand Trustees, Aaron Bell of Shasta, J. C. Blackmer and T. J. Curtis; Finance Committee, Oscar T. Shuck, Joseph W. Kinsley and H. C. Hinman.

The officers were then installed by C. G. Bockius, Deputy Supreme Commander, assisted by W. M. Haynie, acting as Grand Guide.

The sum of $100 was appropriated, one-half each for the Supreme Lodge and Deputy for the Organizing Officer; $50 was paid to J. L. Fields, temporary Secretary.

J. L. Fields, B. Dozier, J. C. Tubbs, Lee O. Rodgers and W. M. Haynie, were appointed a committee to district the State for the appointment of deputies.

A. P. Murgotton, Aaron Bell, C. S. Haley, G. W. Knox and C. G. Bockius were appointed a committee to report a Constitution for the Grand Council.

A seal furnished by the Supreme Commander was adopted.

The per capita tax of subordinates was fixed at 80 cents.

The salary of the Grand Secretary was fixed at $500 per year, with an allowance of $150 for office rent.

The bonds of the Grand Secretary were fixed at $1,000, and those of the Grand Treasurer at $2,000.

Representation to the next Grand Council was fixed at one representative from each subordinate. San Francisco was selected as the place for holding the next session of the Grand Council.

The Grand Commander appointed the following standing committees: On Appeals and Grievances—C. S. Haley, J. W. Kinsley and Aaron Bell; Returns—J. L. Fields, J. C. Tubbs and C. C. Cheesebrough; Laws—C. G. Bockius, Lee O. Rodgers and G. W. Alberti; Mileage—A. P. Murgotton, John Landis and Aaron Bell; State of the Order—George T. Emerson, A. J. Hinds and C. E. Blake.

O. C. Wheeler was elected Representative, and A. P. Murgotton Alternate to the Supreme Lodge.

The following Deputy Grand Commanders were appointed: J. S. Coleman, H. K. McJunkin, J. L. Fields, J. W. Kinsley, and Lee O. Rodgers for San Francisco; C. C. Cheesebrough, Los Angeles; J. F. Freeman, Gilroy; John Landis, Wheatland; J. M. Henderson, Sacramento; A. Hartwell, Salinas; A. J. Hinds, Santa Cruz; Aaron Bell, Shasta; George W. Knox, Dixon; J. A. Besse, Watsonville; and A. P. Murgotton, San Jose.

After thanks to officers and remarks by several present, the Grand Council adjourned to meet on the third Tuesday in May, 1882.

THE Grand Secretary has taken an office at room 1, Shiels' building, 32 O'Farrell St.

BOHEMIAN COUNCIL, No. 261, celebrated its anniversary by a high jinks in the banquet hall of Shiels' building on Wednesday evening, August 3d. After the regular Lodge session the members, together with a number of companions and invited guests, repaired to the festive scene where an elegant table was laid, loaded with Pomona's choicest gifts and other toothsome and palatable viands. The joyous occasion was opened with some excellent remarks by the Commander of Bohemian Council, Dr. Younger, who stated the object of the meeting and invited all to be merry and spare not the feast prepared. Addresses were made by Deputy Commanders, Bockius and Fields, each sketching briefly the many good points in the Order, and complimenting Bohemian Council on its prosperity. Short remarks were also made by companions Boruck, Curtis and others. Songs and recitations served to while away the happy pleasing hours, and when midnight tolled its solemn dirge nearly all had departed. This Council is one of the most progressive and lively in the city. The membership is composed of some of our leading professionals and business men. The progress attained the past year has been very satisfactory, and the spirit is among the members to make it the leading Council in the city.

ROYCBIV CHOSEN FRIENDS

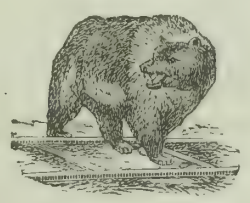
Grand Officers.—CHAS. W. BRYANT, G. C., San Francisco; JAMES M. BAIRD, G. A. C., San Francisco; JOHN W. SHAFFER, G. Treas., S. F.; S. DANIELEWICZ, G. Rdr., office 601 California street, S. F.

PROTECTION COUNCIL, No. 21, Oakland, gave an interesting musical and literary entertainment on Tuesday evening, August 9th. The Committee on Arrangements, Bros. Jeffries, Morgan and Horswell, had prepared the following programme, which was well carried out: Organ solo, Prof. N. Le Noir; vocal trio, Messrs. Knowles, Reed and Horswell; recitation, J. J. Porter; duet, Mrs. Knowles and Mr. Lloyd; recitation, Geo. L. Morgan; quartette, Messrs. Reed, Horswell, Healy and Knowles; vocal solo, Mrs. Moreton; quartette, Messrs. Reed, Horswell, Healy and Knowles; then came "The Star Spangled Banner," sung by the entire Council. A collation had been prepared, of coffee, cake, etc., and the Council and its friends waxed merry at the table. Dancing was then indulged in by many members of the company. This Council is in a prosperous condition. It was organized in March, 1881, and at present has a membership of 230. There are nearly as many sisters as brothers in the Council. Meetings are held on every Tuesday evening in A. O. U. W. hall. It was the second Council organized in Alameda county.

GOLDEN STATE COUNCIL, No. 40, organized by Dr. S. American, D. G. C., was instituted at Temescal last Thursday evening by C. W. Bryant, G. C., assisted by S. Danielwicz, G. R., Dr. S. American, D. G. C., and A. H. Hanson, C. C. of No. 17, and the following officers were installed: H. Vandre, P. C. C.; E. J. Sayers, C. C.; A. S. Sayers, V. C.; A. Pease, Rdr.; Prof. H. B. Jones, Fin.; L. P. Lusk, T.; Sister L. Vandre, Prelate; A. J. Neace, Marshal; J. McDonald, Warden; W. P. Wilson, Guard; Jas. McCue, Sentry. There were 33 charter members. D. G. C., Dr. American expects to institute another Council this week.

ROBERT HODGKINSON, Deputy Grand Councillor of the Order of Chosen Friends, instituted a Council in Benicia, July 29th, with 33 charter members, and installed the following officers: Alfred Dalton, C. C.; Anson Bodley, V. C.; John Binnington, Rdr.; Valentine Newmark, Fin.; James Ewing, T.; Valentine Newmark, Med. Ex.; Mrs. S. M. Bodley, Prelate; Mrs. K. Phillipson, Mar.; Mrs. A. Sexton, Warden; Mr. T. Bohlen, Guard; Mr. G. W. Seathe, Sentry.

A NEW Council will be organized in this city on Thursday evening next. Dr. W. F. Morrison has the charter list, which is already quite large and is composed of a select company.



THERE have been eight withdrawals from Phœnix Council, lately, yet they have a goodly number left.

A COUNCIL of Chosen Friends was organized at Brownsville, on Thursday evening, Aug. 4th.

PROF. J. W. ANDERSON has been chosen Prelate of Phœnix Council, No. 18.

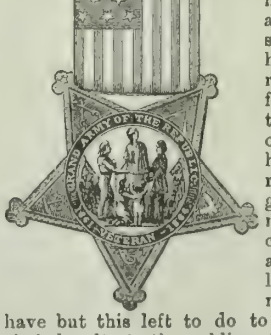
Native Sons Golden West.

Grand Officers. FRANK J. HIGGINS, D. G. Pres., San Francisco; H. CLAY CHIPMAN, G. P., Sacramento; GEORGE B. BALDWIN, D. G. P., Marysville; HENRY LUNSTEDT, G. Sec'y, San Francisco.

Institution of Placerville Parlor, No. 9.

Grand President of the N. S. G. W., H. Clay Chipman, assisted by a delegation of 10 members from Parlor No. 3, instituted Placerville Parlor, No. 9, last Saturday night, August 6th. The party left Sacramento early Saturday morning in the Transfer Co.'s conveyance, "Queen of the Valley," drawn by four superb horses, and reached Placerville by 3:30 P. M., where they were enthusiastically met by the members constituting the new Parlor. After a rest of a few hours, an impromptu party was arranged and given in honor of the visitors, which was attended by the youth and beauty of Placerville, and was remarkable for its selectness on such short notice. The Sacramento boys were the "lions" of the occasion, and maintained the reputation of Parlor No. 3 in point of dancing. The Olympic Hall was secured for the party through the efforts of Chas. Zwisler, who was untiring in his efforts for the comfort of the visitors. The hour of 11 P. M. having arrived, the festivities ceased, and the gentlemen who were to be instituted as a Parlor, assembled together, under the charge of Mr. R. Alderson, and proceeded to the I. O. O. F. Hall, where they were duly installed, with impressive ceremonies, by H. C. Chipman, Grand President, assisted by the following-named brothers of Sacramento Parlor, No. 3: Fred. B. Houston, as P. G. P.; Herbert W. Taylor, as D. G. P.; J. W. Reynolds, as G. Sec'y; Albert Clark, as G. Treas.; W. D. Dunleavy, as C. Marsh.; Wm. Showler, as G. I. S.; J. Giamalli, as G. O. S. Fourteen charter members were instituted as members of the Order, and in the main consist of prominent public officers in the county. After the instituting ceremonies were concluded, the following officers were installed: R. Alderson, President; Geo. H. Burnham, 1st V. P.; Fred. Phelps, 2d V. P.; Chas. R. Brewster, 3d V. P.; J. Eric Polhemus, R. Sec'y; Clark Howard, Fin. Sec'y; N. C. Kohn, Treas.; Matt. M. Hall, Marshal; Wm. Miller, S. G. Louis, Geo. Hilbert, Executive Committee. After the conclusion of the ceremonies, President R. Alderson thanked the visiting brethren for their able assistance. G. P. Chipman then gave them much sound advice as to the manner of procedure to procure success in the future, and a general history of the Order from its foundation up to the present time, its future possibilities, and the good it is doing in drawing the Native Sons together in a fraternal body and keeping green the glorious history of our wonderful State. Other remarks were made by Past President F. B. Houston, J. W. Reynolds, W. D. Dunleavy and H. W. Taylor. The latter, among other remarks, treated upon the rapid growth of the Order throughout the State, its principles, objects, etc.; the good El Dorado county had done for the State; of her vast mineral and agricultural resources; of her prominent men brought forward to fame and eminence, and especially her early history, of which he spoke with fervor; and as a native of the county, he felt a deep interest in her future. He concluded with a glowing peroration of the future prosperity of Parlor No. 9. Sunday, the day was spent in visiting the various places of interest, the mines, etc. Upon the invitation of the Misses Mary and Gracie Reynolds, the visitors partook of an excellent "chicken dinner," such as is only gotten up in the country. Wit and mirth flowed freely, and if neatly worded compliments were pleasing to the two little beauties, they were amply repaid for their kindness. Shortly after 5 P. M., the party started on their return, and after a delightful drive by moonlight, reached Sacramento at 2 o'clock Monday morning.
C. E. PARKER, Treas. Parlor No. 3.

PRESIDENT JOSEPH BECHT, of Oakland Parlor, visited California Parlor last Thursday evening. He said that Oakland Parlor was enjoying satisfactory progress and prosperity, initiating four members last week. Past Presidents J. E. McDougald, Harvey Fairchild, John H. Grady, F. G. Wisker, C. Maginnis and H. Lunstedt also spoke under "Good of the Order."



CALIFORNIA PARLOR ball on the 9th prox. promises to be one of their most brilliant of their popular dances. We acknowledge the receipt of a ticket of invitation.

THE Marysville ninth of September celebration is energetically attended to by the Committee. Major Jones, Grand Lecturer, will deliver the oration.

THE Grand Secretary complains that the Parlor Secretaries do not send the semi-annual returns, notwithstanding the penalties.

Grand Army of the Republic.

Officers of the Department of California.—C. MASON KINNE, Com., San Francisco; W. F. ELLIS, S. V. C., San Jose; J. M. DAVIS, J. V. C., Oakland; W. A. ROBINSON, A. A. Gen., San Francisco; O. B. CULVER, A. Q. M. Gen., San Francisco; J. W. STAPLES, Inspector, San Francisco.

ASSISTANT ADJUTANT GENERAL, W. A. Robinson, has had the address delivered by Rev. Comrade Asa S. Fiske printed in pamphlet form. It makes a very readable document, and should be in the hands of every comrade. There is a full text for a lecture on every page of it. We append his closing. After referring to the glorious record made by his deceased comrades, he admonishes the living thus: "Now, my comrades, we have but this left to do to vindicate our and their loyalty to the sublime thought, this Government, this nation for manhood—for this highest type of the absolute integrity in manhood. It is harder to live grandly than to die grandly. Let us now achieve this, to live the thing we championed, and for which these died; to illustrate this manhood which our experiment of liberty is to foster. If we do not that, we fought and they died in vain. We can only vindicate their nobleness by our own, their integrity by our own. They were but as we. We must be peers of the nobleness we boast for them. The rebel lead did not choose only the nobler and leave the meanest. What they were we are. So we live not unto ourselves, but to the fame of these dead. Let us not blaspheme their glories. Their invisible ranks summon us; their voices, inaudible but to our soldier honor, call us; their graves, every one a solemn appeal, compel us to the high ambition of illustrating them. Nothing is becoming in us but the highest, most perfect and absolute manhood—christian manhood. In the great fight for that, may every living comrade's character and every dead comrade's memory inspire you. May the Holy Spirit help you, the dear Savior give you grace, the Heavenly Father empower you for victory. When men weep over you as dead, may all heaven rejoice over you alive forever more in the glory of a transcendant beauty among the radiant ones who have gone before."

THE Assistant Adjutant General reports a greater gain for the last three months, and also for the last six months, than ever occurred before within same space of time since the organization of the Order on this coast.

DEPARTMENT INSPECTOR, J. W. Staples, has just returned from an extensive trip through the southern part of this State and Arizona, where he has done good work in advancing the cause of the Grand Army.

THE proposed semi-annual meeting of the State Department has been abandoned, owing to a manifest indifference thereto by interior Posts.

A. O. U. W. Directory.

Cards inserted in this list at the rate of 25 cents per month payable semi-annually in advance. If errors or omissions are noticed, please write the office direct.

DO NOT DELAY.—Send us your subscriptions promptly Don't let any break occur in your subscriptions to the WATCHMAN. Every live Workman needs every number of the paper, and we need his assistance to print as valuable a journal as we strive to for the special benefit of its patrons and the general good of the Fraternity. Send the cash direct, or, if more convenient, hand it in with your dues to the Financier and we will allow him for trouble and expense of remitting.

SUPREME LODGE, A. O. U. W.

Officers for 1881.

RODERICK ROSE, Davenport, Iowa, P. S. M. W.,
WM. H. BAXTER, Detroit, Michigan, S. M. W.
M. W. FISH, East Oakland, Cal., S. F.
THEO. O. CASE, New York, S. O.
M. W. SACKETT, Meadville, Penn., S. R.
S. S. DAVIS, Cincinnati, O., S. Recr.
R. H. FLANDERS, Georgia, S. G.
R. M. M. PATTEN, Ontario, S. W.
J. D. VINCIL, Missouri, S. T.

A GRANDFATHER, coming to read his paper, found that he had mislaid his spectacles, and thereupon declared: "I have left my glasses somewhere and can't read the paper." A little three and a half years old girl, desiring to assist him, answered: "G'an'pa, you go outside and look froo ze window, and I will hold ze paper pu so that you can read it."

"A. O. U. W. Diplomas."

EVERY MEMBER CAN HAVE ONE.

Each and every member of the A. O. U. W., who wishes a really artistic Certificate of Membership, should not fail to procure, without delay, one of "Adler's Diplomas," lithographed in five colors; size, 19x24 inches, with space for photograph of the holder. It is a fine ornamental picture, and distinguishes you as a member. Any Brother desirous of obtaining a perfect copy of the best issue can do so by applying to the WATCHMAN PUBLISHING CO., No. 202 Sansome St., S. F. P. O. Box 2361. Price, postpaid, $1, in cash or postage stamps.

☞ It is an ornament for your room, as well as expressive and pleasing to yourself and friends.

OFFICERS and members of the A. O. U. W. receiving a complimentary number of the WATCHMAN with this notice marked are invited to examine its merits for their support, as we expect our agent to call and present personally further information concerning our enterprise for the future. Should our agent fail to call soon in some instances, we shall be glad to have our friends favor the office directly with their response. Persons receiving duplicate copies are requested to circulate them to the advantage of our cause and the publishers.

THE RECORDERS of all Subordinate Lodges are requested to correspond and act as agents in securing subscriptions for the WATCHMAN. We will pay liberal rates for services rendered. Remember, Brothers, that you can accomplish a mutual benefit to the Order and ourselves.

BY TELEPHONE.—Subscribers, advertisers and other patrons of this office can address orders, or make appointments with the proprietors or agents by telephone, as we are connected with the central system in San Francisco.

BRO. JOSEPH GIUSTI'S OYSTER, CHOP, AND CHOWDER HOUSE, 105 California Market, for ladies and gentlemen, is the place to get an oyster cocktail, or a meal fit for a king. His customers always feel happy after partaking of his good cheer. His parlors are open night and day.

CHEAPEST PLACE to buy NEW and SECOND HAND MACHINES. All kinds rented, $2.50 per month. Repairing done. Satisfaction guaranteed. All kinds of Needles 25 cents per dozen. P. MCCANN, No. 27 Sixth Street, (Singer Office) San Francisco.

A Curious Phenomenon.

All who have visited the polar regions are familiar with the appearance of red or scarlet snow, in those high latitudes. The broad fields of everlasting snow that flank the northern coast of Greenland are flanked with the strange blood red, and farther toward the poles miles of it stretch as far as the eye can reach. The phenomenon is due to the presence of a minute red animalcule in the snow. A microscope detects its presence, but how it gets there is a difficult question and one that has never been quite satisfactorily answered.

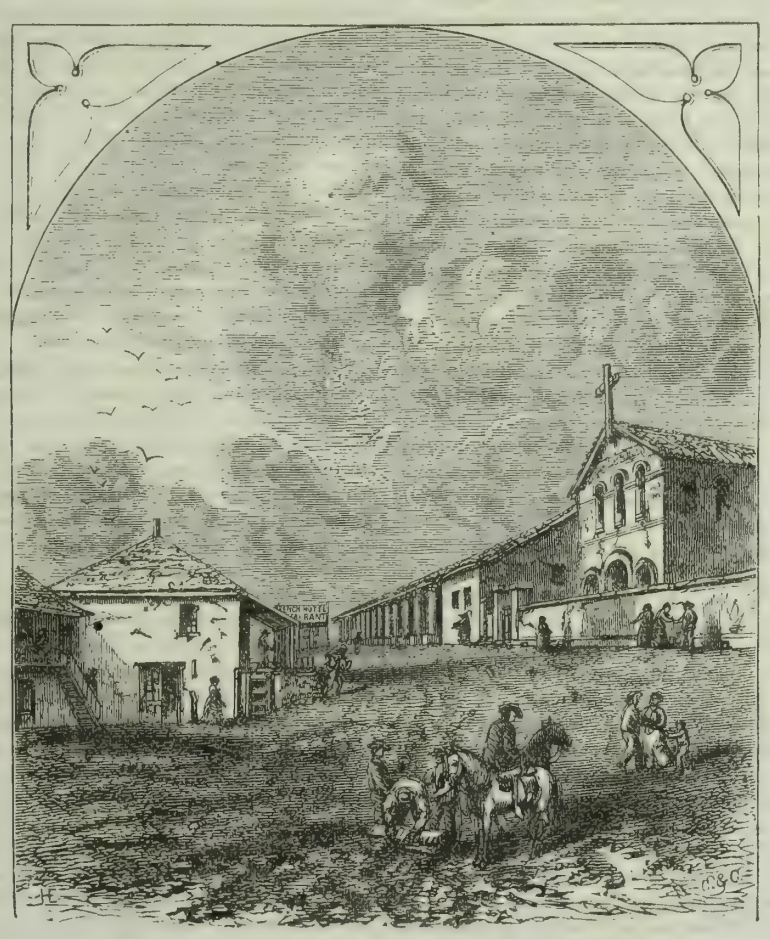
Until recently the only place in the United States where this phenomenon has been observed is upward near the summit of Mount Shasta. But the Leadville *Chronicle* of a recent date states that this peculiar phenomenon has made its appearance in the Holy Cross county, in Colorado, a very elevated region in that Territory. That paper says:

"The red snow in this region is first seen at the head of Cross creek, where it may be observed in patches of intense carmine, varying in area from as large as a man's hat to 20 ft. in diameter. Taken in the hand and closely examined, nothing can be detected that gives it color, and it melts into clear red water, leaving no stain. Farther on, in some of the steep gulches, with which the country abounds, the bottoms are entirely covered with the strange substance. In some places the color is vivid in the extreme, while in others it fades to a faint pink, producing an effect not readily described in words. Old prospectors who penetrated the regions two years ago, say that there was no snow of this description there, and its fall can scarcely have antidated this year. Still higher, and at the very foot of the mountain, the red snow disappears, and nothing save the pure white coverlet greets the eye. How the same tiny insects that appear in the polar regions can find their way to the inaccessible Holy Cross, is a thing beyond human ken, and will be a problem for the scientists of the future to ponder over."

TIDINESS ABOUT THE HOMESTEAD.—There is an old story to the effect that once upon a time there was a man in search of a housekeeper, and as applicants for the position arrived he arranged matters so that each one, as she entered, found a broom lying on the floor in her way. All the women but one stepped *over* the broom and passed serenely on. The one woman who stooped and picked it up secured the place of housekeeper solely from that fact. It was her only recommendation; but her employer argued from that, that the woman was observant and orderly—two qualifications that he highly appreciated. Whenever you walk over sticks and brush and rubbish in your yard, that disfigure its tidy appearance, instead of picking them up, remember that you are "stepping *over* the broom," and somebody will pass judgment upon you, by what you may be pleased to call very insignificant indices. But the judgment in most cases will be quite correct. If every man, woman and child about the premises were trained to pick up and remove from view all rubbish and litter that he or she comes upon in walking about a yard or lawn, there would always be an appearance of neatness secured at little cost.—*Rural New Yorker.*

ORIGINATING NEW IDEAS.—The most difficult mental or material operation in the universe is that of originating an entire new idea. Many philosophers deny the possibility. An important thought in the youthful mind, is matured by reflections on the more simple meditations and ideas of childhood, and these are, obviously, begotton by what is seen and heard in the still more early dawn of mental receptiveness. First words and ideas, then, are the seeds of germs of thought and they are planted by our early teachers. This being conceded our originality can consist only in the new arrangement of words and ideas. To illustrate: We cannot form in our minds even an original animal. We may fancy a living creature with the body of a horse, the head of a lion, the face of a man, the scales of a fish and the feet of a cangaroo; but this would not be originating anything. It might be a combination not before dreamed of, but no proof of genius. So with the working of all powers. We cannot create anything. The most original thinkers and workers are those who are able to form the most beautiful and useful combination.

AN ANCIENT AND UNIQUE CANNON.—The Governor of Cyprus has sent to England one of the oldest pieces of ordinance in existence. It is of cast iron, and weighs 25 hundred-weight. Its form is that of a cup or goblet, having the mouth wide and deep to receive a large stone shot, while the pedestal has a much narrower chamber for the powder. This chamber is 7 inches in diameter, extends 30 inches behind the mortar, and terminates in a vent at right angles fully an inch in diameter. It is probably of Venetian manufacture.



A NEWSPAPER canvassing agent, being told by an old lady that it was no use to subscribe for the papers now, as Mother Shipton said the world was coming to an end this year, said, "But won't you want to read an account of the whole affair, as soon as it's over?" "That I will," answered the lady, and she subscribed.

San Luis Obispo Mission.

The early Catholic fathers who established the first civilized settlements in California, having plenty of time before them, with no railroads, telegraphs, expresses or mails, to hurry them up, took their time in selecting the sites upon which to build their missions. That they exercised care and judgment in the selection is manifest from the fact that to-day the remaining missions are centered in localities where climate is good, soil is excellent, and the surroundings are pleasant.

The early missions formed centers around which gathered the people of the country. Near by they cultivated small patches of ground or tended their flocks and herds. The missions were more numerous in the southern part of the State, and wherever the sites were, there would be formed inviting surroundings, and advantageous topographical features for such centers.

The padres were well aware of the advantages of the sea ports, and established missions at San Diego, Los Angeles, Santa Barbara, San Luis Obispo, Monterey and San Francisco. In some cases, as at Los Angeles and San Luis Obispo, the locations near the ocean not being agreeable, they wisely put their buildings back from the sea, but still near enough to reap the advantage from proximity to a sea port.

THE OLD MISSION OF SAN LUIS OBISPO.

The style of all their buildings was the same: plain adobe structures, with red baked tile roofs, and a surrounding veranda, the church roof being higher than the other one-story buildings, and having a walled enclosure attached to it. The engraving shown herewith, representing the San Luis Opispo Mission, will give a good idea of the style of building. San Luis Obispo is nine miles from the harbor, and is connected by railroad. The place has much the appearance of the old Mexican towns, the old cathedral, and many other adobe houses still standing. It is the center of a wool and wheat country and is now one of our thriving towns, being the only one of any size between Monterey and Santa Barbara. A great many native Californians still live in the vicinity of San Luis Obispo, and perhaps there is no better town in the State to study the types of the race.

THE BELL CLAPPER.—It has been supposed among antiquarians that the clapper is a modern addition to bells, and that it did not form a part of those employed in Japan and China. Henry O. Forbes, however, writing from Sumatra, says that when in Java a year ago he saw, in the possession of a gentleman there, a bronze bell dug up on the site of one of the old Hindu settlements, of which now only the graves remain. It had lost the clapper, but the hook to which, doubtless, the clapper was attached, existed still.

A MAN bought an estate in Ireland the other day. He was of small stature, we are told, and very thin and wiry looking. When he went down to see the place, the tenants turned out to inspect the new landlord, and, after his departure, began to discuss him "Well, Pat, what do you think of the new landlord?" "Oh, begorrah, not much! Why, that little gossoon would be as hard to shoot as a jack-snipe!"

The President and his Family.

During the two weeks that the President has been lying upon his couch of suffering, nothing has been so touching—not even his brave resistance to death—as the love which the entire family has exhibited. Each one seems more concerned about the others than he does about himself, or she does about herself. The first thought of the President when he fell was of his wife and mother, to the former of which he directed a dispatch asking her to come to him, and concerning the latter he forbade any information being conveyed to her that would cause her unnecessary pain. The brave little wife—just off a bed of dangerous sickness—received the news of the attempted assassination with the deepest grief, but with that calmness which comes of the sublimest fortitude. She started for Washington, and upon her arrival was told that she must be perfectly calm as she entered the chamber of her prostrate husband. She replied that she would be entirely so, and stifling the tears that were ready to burst forth, she was. She entered the room as bravely as a soldier ever went into battle, and throwing her arms about her husband, and kissing him, said: "I am here now; it is all right." After 15 minutes of private intercourse—in which no one knows what was said, and has no right to know—the considerate man insisted upon the retirement of the fatigued lady. Soon after she left the room, the wife of the Postmaster General entered, and the President immediately inquired if she had seen "Crete,"—Mrs. Garfield's name is Lucretia,—and upon being informed that she had, he anxiously enquired how she bore it, adding that he would rather die than have her again attacked with sickness. The President then fell asleep, and upon waking, he asked Mrs. James where his wife was. She replied that she "was near watching and praying for her husband." He said: "Go tell her to undress and go to bed, and if she will, I will turn over and go to sleep, and will sleep all night. If she will do as I wish, I *will* sleep all night." Mrs. James conveyed the message, and was instructed by Mrs. Garfield to say that she was then undressing; and the President turned over and immediately fell into a sound sleep. All of his anxiety is for the wife, and all hers is for the husband. His dear old mother, when she heard the news exclaimed: "My baby, my baby! Who could shoot my baby?" These things go to show that the home of the Garfields is a pure home, a home of discipline and a home of love—just what every home should be. Parents should never cease to be lovers, and children, whatever their age, or whatever their position, should never fail to be considerate of the claims of parents.—*Western Rural.*

A BETTER *bon mot* than this of Lord Beaconsfield, when near his end, has not lately been reported: He was intimating his purpose to provide for such of his servants as had been only a short time in his service. "As for the others, it will not be necessary to make any provision, as they have already done so for themselves."

THE horn of a rhinoceros, when cut through the middle, is said to exhibit on each side the rude figure of a man, the outlines being marked by small white strokes.

False Exercise.

We use this term to express a contrast to natural exercise. Every part of the system requires exercise, and in order that exercise may promote health, it should generally be gentle, not violent. Animals, if left to themselves, take exercise that is general in the main; they run, frolic, kick up their heels, and play fight, and thus set an example for human beings, who contrive methods of partial exercise, and thereby produce partial muscular culture, and sometimes overtax one part of the system, while the other parts have too little activity. We have entered gymnasiums and seen young men struggle to put up dumb-bells, weighing perhaps 100 lbs. Now, this requires a very powerful effort, and tends to wrench the spine and produce an undue exertion of a part of the muscles, those of the chest and loins in particular. Some may say that the gymnast alternates the arms; but we answer by saying that because one strains the muscles of the right arm by excessive lifting, there is no reason why he should strain the opposite muscles by undue lifting with the left arm. If men would lift a pair of dumb-bells weighing, say 10 lbs., one in each hand, and thus make the use of the muscles equal, simultaneous and harmonious, and all within the just limits of power, it would be much better than to strain and struggle to put up one heavy affair.

A great objection to the usual exercises in the gymnasiums is that the chief desire seems to be to outdo everybody else, and only those who are specially well endowed with muscular power make any show at all. * * *

We like what are called "free gymnastics." The horse, the calf, lambs and kids have free gymnastics. * * * Free gymnastics are a series of exercises without dumb-bells, clubs or other apparatus. In this method persons are not obliged to overwork. To practice this let the person stand erect, fill the lungs and strike out first one arm and then the other, then both, then advance one foot and strike out with one hand and then the other, and thus take exercise with the shoulders, arms, back and legs. Persons can thus take abundant exercise and bring themselves to a state of perspiration, and at the same time incur no danger of a strain. In these methods the action of the muscles is harmonious, and may be vigorous or gentle, and always useful; besides, it costs nothing in the way of apparatus or tuition, and can be taken every night and morning and at midday by teachers, students, clerks, literary men, and all girls and women.

A series of such exercises every day would tend to build up the muscular system better than taking irregular exercise at a gymnasium once or twice a week, where one is very apt to be led to over-exercise. When a person is half dressed in the morning, or half undressed at night, he can take exercise that will make the blood fairly tingle in the extremities, relieving the brain and vital organs, especially the digestive organs, and thus promote sleep at night, and growth and vigor during the day. * * *

People as they advance to old age should take easy, active exercise. One who walks considerably, keeps his feet and legs in better condition than those who keep themselves housed up and sit a great deal, or always ride when they can. Nothing shows age more than a tottering step, and he who keeps his legs in good working order by a good deal of walking, manages to keep up a very general circulation, and, of course, promotes the general health, and in this way will avoid many of the pains which age is usually made accountable for. If a man use his bones and muscles as he advances in years, he is not half as likely to fall; or if he fall, to break a bone, because the bones are kept in healthful condition by means of daily exercise. Everybody knows that if the arm be suspended in a sling, from any cause, it becomes soft and flabby. In the same way the bones become weak and brittle by non-use, nature declining to furnish them with food or nutritive support if they are not called into use. If an elderly person can stand well on his feet, be brisk and nimble in walking up and down stairs, he not only has more comfort and independence, but appears better, more vigorous and younger, and isn't half as liable to accidents as those are who, by taking but little exercise, become clumsy, awkward and ungainly in their walk.—*Phrenological Journal.*

FEMALE DELICACY.—Above all other features which adorn the female character, delicacy stands foremost within the province of good taste. Not that delicacy which is perpetually in quest of something to be ashamed of, which makes merit of a blush, and simpers at the false construction its own ingenuity has put upon an innocent remark; this spurious kind of delicacy is far removed from good sense; but the high-minded delicacy which maintains its pure and undeviating walk alike among women and in the society of men—which shrinks from no necessary duty, and can speak when required, with a seriousness and kindness, of things of which it would be ashamed to smile or blush—that delicacy which knows how to confer a benefit without wounding the feelings of another—which can give alms without assumption, and pains not the most susceptible being in creation.

A NEW YORKER is named Stealing, and he hates the name; but he took the curse off it for his daughter by making her Christian name "Worth."

PACIFIC STATES WATCHMAN.

A. O. U. W. Home Paper.

Issued on the 1st and 15th of each month.

AT No. 202 SANSOME STREET, SAN FRANCISCO, CAL.

Subscription (in Advance), $2 a Year.

Favorable to Advertisers.

By consolidating the large subscription lists of the *Pacific Workman* and *Fraternal Record* with the PACIFIC STATES WATCHMAN our advertisers gain an unusually great advantage. We doubt if any one weekly newspaper has ever been circulated to as many different readers on this coast, as have been served heretofore by the *Workman*, *Record* and WATCHMAN together. It is certain that no other periodical is now patronized by a better class of industrial, professional and business men. In fact, our subscription list embraces many of the foremost business and representative men throughout the towns and cities of the coast.

We have pride in making our paper "clean and handsome," and first class in all respects—to the benefit of both our readers and advertisers.

ADVERTISING RATES.

One Square (¼ inch), per issue	$ .75
One Square per month	1.25
Two Squares, per issue	1.50
Two Squares per month	2.50
Obituary notices and resolutions (with 25 copies post-paid for friends of deceased) per sq. (¼ inch)	50

☞For reading notices, extraordinary display, special advertising and choice places permanently, extra rates will be charged. Reasonable reduction will be made for large and long-continued advertisements. No extra rates for the space occupied by engravings.

OFFICIAL RECOMMENDATION.

[*Resolutions adopted by Grand Lodge of Cal., Feb. 3, 1881*]

WHEREAS, the PACIFIC STATES WATCHMAN, the pioneer A. O. U W. advocate on this coast, without official aid, has long rendered able and valuable services for the good of our glorious organization, we earnestly recommend that our Lodges and the brethren individually patronize the WATCHMAN as liberally as circumstances will justify.

Entered at San Francisco P. O. as second-class matter.

San Francisco, - August 15, 1881.

The Supreme Master Appeals.

Not only the A. O. U. W., but the whole world owes to the venerable founder of our Order, a debt of everlasting gratitude, for to him we are indebted for first conceiving the idea which has made it possible for every man almost to protect his family from pecuniary distress or want when the grim messenger shall summon him to that undiscovered country from whose bourne no traveler ever returns. No more fitting manner of discharging this obligation can be conceived than that of making a little donation for this benefactor of the human race while he still lives to enjoy it, inasmuch as he is poor, and in feeble health. It was a just and kindly act on the part of the Supreme Lodge to direct the Supreme Master to issue an appeal in his behalf. Had all other jurisdictions done as well as California, this appeal had not been necessary; but we have not done our whole duty. One thousand of our members have no right to claim the honor of contributing anything to the Upchurch fund, owing, no doubt in most cases, to sheer forgetfulness. We know the generous impulses of the average Californian too well to believe for one moment that there is a single Lodge or a single member of the A. O. U. W. in this State who would hesitate to give the little amount asked, for the relief of the grand old founder of our Order. The appeal of the Supreme Master Workman is printed elsewhere in this paper. Let those who forgot to take action on the appeal of Past G. M. W. Taylor now respond to that of the Supreme Master, and California's duty in this regard will be fully done.

We learn that several Lodges have already responded, and transmitted their contributions to the Grand Recorder. No doubt the missing links will all be soon supplied, so that the chain of generous endeavor shall be complete.

HARMONY, No. 9, will celebrate its fifth anniversary by a musical and literary entertainment and dance, at Ixora hall, on the 29th day of September, 1881. Judging from the past it will be a good one.

W. S. LUCKY, of Valley, who has been very sick for the last two weeks, we are happy to say, has put in an appearance in his Lodge, convalescent.

Hasty Legislation.

At the recent session of the Supreme Lodge the following was adopted as an amendment to the constitution, to apply to the Order generally for the time limited therein :

Resolved, That until July 1st, 1882, and no longer, members suspended for non-payment of assessments may by a vote of two-thirds of the members present at a stated meeting of their subordinate Lodges be reinstated by paying a sum equal to the amount charged by such subordinate Lodges for conferring of the degrees upon an applicant, and by otherwise complying with the laws applicable to the laws for the re-instatement of members.

The facts which brought forth this peculiar legislation may be briefly stated to be these : In 1878 Kentucky was a separate jurisdiction. During that year, from some cause, her death rate was so great as to necessitate 28 assessments. The following year they were still heavier, being 37½, when her ranks became so decimated that she was compelled to return to the protective fold of the Supreme Lodge. To recruit their wasted ranks the degree fees have been reduced to the minimum allowed by the Supreme Lodge—$5 for both degrees. The old members wish, many of them, to return to the Order, but, under the constitution, it would cost more to them than to new members, and more than it costs to join some other beneficial organization. Under these circumstances the Kentucky representatives prayed that relief be granted, and the result is embodied in the act quoted above; a sort of enabling act, to be used only when a Lodge, by a two-thirds vote, may so determine. It follows that without such action the constitution, as it now is, or originally was (we scarcely know how to express it), must govern. In this jurisdiction, where our degree fees are at least $10, the act gives no advantage, and we presume will not be applied; but the mischief is that many seem to regard it as a mandatory enactment instead of a mere privilege granted, to be used or not as may be desired; and then, owing to its want of perspicuity, it is taken to apply to the suspension of a member, or rather a member's certificate, for non-payment of one or more assessments, when in reality it applies only to members suspended from the Order altogether.

It was, no doubt, a piece of hasty legislation which should have never been passed in its present form. In attempting to act under it many difficulties will at once suggest themselves to the practical mind. Suppose you reinstate a man and he pays $10. Does this payment all belong to the beneficiary fund, to be sent forward as "back beneficiary?" If so, nothing would be in the fund to the member's credit for the next assessment. If part is to be applied as arrearages for dues, how much? or what portion? Does the provision override the provisions of Grand Lodges in relation to the matter of dues, fines, etc., on re-installments, and make the subordinate Lodge superior authority? These are a few of the questions that naturally arise, and that fact, that they do arise, proves the enactment a piece of illy-considered legislation.

The Supreme Lodge has always reserved and asserted the right to regulate the beneficiary laws of the Order, and very properly too, because they should be everywhere substantially the same, for reasons that must be apparent to all, and because the Supreme Lodge is the party of ultimate responsibility for the payment of every beneficiary certificate issued by any portion of the whole Order; but the Supreme Lodge never claimed the right to interfere in the matter of dues, etc., which is purely a local matter to be regulated by each jurisdiction to suit itself. Therefore we conclude that, working under the enabling act, we should charge—

1st. The fee that is charged for the degrees in the Lodge; and

2d. Whatever might be arrears for dues; for our constitution for subordinate Lodges requires this.

Now, as to the disposition of the funds collected on such re-instatements, it would seem that all but $1 of the re-instatement fee should be forwarded as "back beneficiary fund," for it is a well established principle of the Order that all moneys paid in for the beneficiary fund cannot be diverted from that fund, and can only be used in payment of death losses. The $1 reserved should go into the fund in the Lodge, to be subject to call on the next assessment after paid in; and the arrearages for dues would go into the general fund of the Lodge.

No doubt an official interpretation of the law will be called for, which may be at variance with the views herein expressed, but we feel confident that it cannot be materially different.

Closing Accounts.

California has closed her account with Relief Call No. 1, issued by the Supreme Lodge, in behalf of Indiana, to pay her excess of assessments of last year over 20. Whether any other jurisdiction has been more prompt, we have no means of knowing at the present time of writing. We believe this call has been met without a single case of complaint on the part of any Lodge. True, ten cents a member would be a small matter to grumble about, but even that would have been sufficient to elicit a very considerable fuss, had the Relief Law been an unpopular measure. But the necessity of some such law became so apparent through the calamity of the yellow fever scourge that the commonest and most superficial observer could see it without the aid of any argument.

So far as we know, the law has been willingly complied with, except in the jurisdiction of Iowa, which, we are pained to say, appears to be in a chronic state of rebellion against the authority of the Supreme Lodge.

Now, we submit in all candor and all fairness, and all charity for the erring, that this rebellious disposition has been tolerated about long enough. Only for her we should have been rid of our yellow fever burden long ago. Only for her our membership to-day might as well be 200,000 as 100,000. Only for her no spot or blemish would deface any page of our glorious history. And now she stands in contempt of the Supreme Lodge and the whole Order, by simply doing nothing in the way of paying either her quota of the yellow fever fund, or of Relief Call No. 1. It is time she were called upon to purge herself of this contempt, and in default she should be cut off as a cumberer of the ground.

We do not believe the trouble in Iowa to lie with the membership in general. We believe the great mass of the rank and file of the Iowa Workmen to be as large-hearted and loyal as any that gather about our altars. But they are powerless to carry out their best impulses. The ruling powers are against them, and the folly of biennial sessions puts a remedy beyond their reach for a year to come, as it has been for a year gone by. The Grand Master of Iowa gives as a reason for his course that he was elected on the issue of defiance to the Supreme Lodge. We suggest that it might not be out of place for the Supreme Master to intimate to him that he was elected to execute the laws of the Order and to discharge that duty without fear or favor or partiality. He might possibly go so far as to suggest to the Grand Master of Iowa that, if he entertained the opinion that he could not execute the laws and at the same time suffer no violation of faith or conscience, that he could at least gratify more than 90,000 Workmen by his resignation.

In years that are past Iowa has been blest with a low death rate within the Order. It will not always be so. Her time will come. One extreme will follow another just as certain as man is mortal, for time will make all things even in this regard as well as others. But immunity from heavy losses in the past has seemingly bred a delusion amongst the head men of the Order there, and they appear to think they will never die, and that the balance of the Order is only a burden to them. It may be safely presumed that Sodom and Gomorrah once held to the same opinion, substantially.

There are many true and able Workmen in Iowa, beyond all possibility of question. Of these are the Representatives and members of the Supreme Lodge. Should the charter of the Grand Lodge of Iowa be revoked, these able and excellent men could gather round them enough of the Lodges to rehabilitate the jurisdiction at once. Just in what direction the Supreme Master will see his duty to lie we have no means of knowing, but we presume he will not much longer allow the authority of the Supreme Lodge to be set at defiance.

THE bush of Australia is so overfed by the multiplying of wild horses that they have to be shot down in common with rabbits and kangaroos. In one district an Arab stallion got away 30 years ago, and was never recaptured. He was a chestnut, and took a couple of colts with him, and it had been remarked that a large portion of the wild horses of the district are of his color. Horses believed to be very old are occasionally seen far off in distant ranges. One man has shot 3,000 horses in two years.

Encouraging Marriage.

Late files of Eastern exchanges bring reports of the institution of societies which have for their object the payment of a stipulated sum of money upon the contracting parties getting married. Three of these societies were about to be instituted in Ohio, but the Secretary of State refused to allow them to be incorporated. He based his refusal upon the fact that he believed their institution would not be conducive to public morals, inasmuch as it would hinder instead of promote marriage. One of the associations required that a person must be a member for 10 years before he (or she) could marry. that is, we suppose, he (or she) could marry, but if they did, they would not be entitled to the benefit.

In New York and Pennsylvania these societies have attained more headway. The circular of a New York association sets forth the following as the aims of the society:

"The founders of this association believe that the moral, social and political welfare of society depends largely upon the marriage relation existing among its members. Recognizing that fact they have organized this association for the benefit of all unmarried men, of good moral character, between the ages of 15 and 50 years, who may desire to become members thereof, for mutual assistance and contribution at the time of marriage. It is conceded that many estimable men hesitate to enter the marriage state for the reason that they do not possess the necessary means to meet the increased expenses of such relation. This association is, therefore, instituted for the purpose of providing the requisite funds desired in such cases."

A table of assessments of the society shows that it is modeled somewhat after the system adopted by the fraternal beneficial societies. Upon the marriage of a member each one pays according to the class in which he or she entered, sums of money ranging from 25 cents to $1, and the fortunate married person receives the amount to which he or she is entitled, which ranges from $500 to $2,000. The circular gives the following rules which must guide a member who desires to enter into the married State:

"Any member is at liberty to marry at any time during his membership, but if he marries during the first year thereof [the endowment will not become due or payable until one year and 60 days from the date of his endowment certificate, at which time he will be entitled to receive one assessment from each person who belonged to his class at the date of marriage—not to exceed, however, the amount of his endowment certificate. In case a member of this Association in good standing remains unmarried until he has reached two-thirds of his life-expectancy, according to the tables of this Association, he will be entitled to receive one-half the amount of his endowment certificate. Should he marry before reaching the full expectancy, or should he remain unmarried the full period, then he will be entitled to the balance of his endowment."

By reading the first sentence, it will be seen that everything is not as lovely as might at first be thought. We should think that most persons who desire to marry and join an association of this sort, would want their money immediately. But no, they will have to wait 14 months for the benefit which they derive from holding an endowment certificate.

The K. of H. *Reporter* has the following pertinent remarks upon one of the clauses contained in the circular:

"'In case a member of this association in good standing remains unmarried until he has reached two-thirds of his life expectancy, * * * * he will be entitled to receive one-half the amount of his endowment certificate. * * * Should he remain unmarried the full period, then he will be entitled to the balance of his endowment.' So you see the man remaining single is not so far behind after all. It is true he has to wait longer for his endowment, but if he lives, he will get it sometime (?); if he dies, he won't need it. He pays in more money, but he escapes the expenses of matrimony. There is a crudeness about this association that might be expected from the getters-up of any such insane enterprises. It looks as if there was a very considerable cat under the meal here, and that cat's name is 'money-catching.'"

We have not heard that any of these matrimonial societies have yet been introduced into this State, but suppose that it is impossible for California to escape the infliction. It seems to us that the action taken by the Secretary of State of Ohio, upon the advice of the Attorney-General, was eminently wise, and commends itself to our own State officials. It does certainly look as if there were a "cat under the meal," this organization of societies for every conceivable purpose. Whether it is for the purpose of bringing the really good societies into contempt, and involving all in one common ruin, we cannot at present say, but it certainly looks that way. A wide berth should be given to all such nonsensical affairs.

Grand Recorder's Department.

Headquarters of Grand Lodge, A. O. U. W., Rooms 40 and 41, St. Ann's Building, corner of Eddy and Powell, San Francisco. H. G. PRATT, G. R.

WM. C. FLINT, ESQ., 216 Sansome street, San Francisco, is Chairman of Committee on Laws and Supervision. All By-Laws, or amendments to same, should be sent directly to him.

WE have issued to date 14,370 beneficiary certificates, and still there seems to be little or no abatement in our increase.

MUCH trouble has been experienced in getting jewels for the badges of Master Workmen, and also badges, the capacity of the manufacturer being overtaxed by the deluge of orders flowing in.

EVIDENTLY some of our medical examiners are not in possession of the book of instructions adopted by our Grand Lodge. They can always be had on order from this office, and no examiner should be without one.

AT the date of writing this (Aug. 13th), some 50 Lodges have not sent in their monthly reports. There is no good reason for this delay. Recorders can just as well have their reports sent out the first week in the month as later, except in extreme cases, and then our books and records can be better and more accurately kept.

THERE will probably be two assessments next month, but possibly only one. Assessments Nos. 7 and 8 paid 12 losses, and No. 9 will, with the surplus left over, pay 7, it is believed, when all in. We have that number already officially reported, and if no more come in up to the time of making the list to send out to the Lodges, there will likely be one assessment for September, otherwise two.

THE Committee on Laws and Supervision complain that many by-laws are sent them bearing no evidence of official character, or that they have been adopted by the Lodge from which they purport to have emanated. Whenever by-laws are sent out for approval of the Committee, they should be certified to by the Master Workman of the Lodge, attested by the Recorder, the seal attached, and the date of passage given, the names of the committee reporting having been first erased or crossed off. When a committee reports to a Lodge and the report is accepted, the matter contained in such report is no longer the property of the committee, but of the Lodge, and it can be, and often is, so amended and changed by the Lodge, that no member of the committee would care to have his name connected with its paternity.

From Supreme Master Workman.

Upchurch Fund.

OFFICE OF SUPREME MASTER WORKMAN,
DETROIT, Mich., July 15, 1881.

To the Members of the A. O. U. W.—BRETHREN:—At the late session of the Supreme Lodge, the Supreme Master Workman was instructed to issue an appeal to the subordinate Lodges throughout the Order earnestly requesting contributions to the Upchurch Fund.

In obedience to the above instructions, I hereby earnestly appeal to the brotherhood at large to promptly respond to this call, and forward the amount of 10 cents (or as much as circumstances permit) for each member direct to S. S. Davis, Supreme Receiver, 61 West Third street, Cincinnati, who will acknowledge receipt and apply the same to the purpose for which it is intended.

Bro. Upchurch, *the Father of our Order*, owing to poor health and misfortunes, has been reduced to want, and is absolutely in need of all the assistance that can be given him. He is a worthy Master Workman of our Order, and as such is entitled to your serious consideration.

This appeal is made with the confident hope that *every Lodge* that has not heretofore made a donation will, at the first stated meeting after the receipt of this circular, contribute to this worthy cause. It is a just tribute we ought gladly to pay to one to whom not only we as members of this beneficent brotherhood, but humanity at large, are so deeply indebted. To Bro. Upchurch must be accorded the honor of laying the foundation of that system of mutual assurance on a society basis which to-day is so popular and has been promotive of such great good.

WM. H. BAXTER, S. M. W.

THE last month has been an eventful one in the life of Bro. J. G. Samuels, Med. Ex. of Yerba Buena, viz: The marriage of a daughter and the birth and death of a child.

BRO. M. S. LEVY, having lately removed from San Jose to Oakland, has been invited to speak before Keystone Lodge, in the latter city, at an early date, as a grand chief in eloquence in the A. O. U. W., and we trust he will accept.

The Napa Explosion.

Many of our readers have heard ere this of the explosion of a threshing engine in Napa county, by which three men were instantly killed and others wounded. Two of the men killed were members of the A. O. U. W. It is a sad theme to dwell upon, and yet the findings of the coroners jury are such that they must be set forth for the warning of many who are working with steam machinery.

It seems in the instance to which we allude, that the engine had been out of order and had not run well for two or three days, and that its dangerous condition was the talk of those about the machine. The gauges were defective, and, just before the accident the proprietor allowed the engineer to screw down and firmly fasten the safety-valve, in order to save steam that it was thought ought not to escape. The witnesses before the coroners jury testified that they did not regard the proprietor or the engineer competent to manage an engine. The verdict of the coroners jury was as follows:

We, the jury convened to inquire into the cause of the death of the deceased, find their names to be J. G. Platt, aged 44, a native of Germany, and Willis Crowe, aged 32, a native of Pennsylvania, and Robert Davis, aged 19, a native of California, and that they came to their death from the explosion of a portable engine while at work threshing on the ranch of Mr. W. T. Sneed, in Napa county, on the morning of the 28th of July, 1881, and that the cause of the explosion was from incompetency of the engineer, in carelessness on the part of the proprietor, and we strongly recommend that the law or laws in reference to engineer's certificates be enforced, and the attention of the Board of Supervisors of this county and our representatives in the Legislature is called to the matter.

We trust that this warning will be heeded. There is altogether too much carelessness and incompetency in the ownership and management of these motors, and some agency to place them in skilled and careful hands is needed.

In Europe, they have boiler insurance and steam-power companies, who inspect and insure boilers. The chief engineer of one of these companies, whose headquarters are at Manchester, in discussing the question of additional legislation effecting boilers, says that it is quite evident that the general adoption of independent inspection of boilers, coupled with insurance, throughout the country, would lead to a very great diminution in the number of accidents. If additional legislation be really necessary, all experience, in his judgment, goes to show that it is to the enforcement of efficient periodical inspection of boilers by independent persons other than government officials that attention should be directed.

The conclusion seems a valid one. We have a good deal of "red tapery" and not much good practical result out of Government inspection. The inspection seems more a matter of form than anything else. If, however, it were left to people whose principals had to pay for bad judgment, few poor boilers would be passed. Those companies whose business lies in this direction find a gradual increase in their operations. The one above referred to, in England, reports that operations of the company during the 12 months have been on a scale of much greater magnitude than heretofore, and they have also been unusually successful. Two thousand eight hundred and ninety-five boilers were proposed for insurance, being an advance of 840 over the previous year, and the largest number proposed in any one year since the commencement of the company. In addition to the ordinary inspections, 13,071 thorough or internal examinations and hydraulic tests were carried out. Only one serious collapse of flue occurred, and not one explosion, fatal or non-fatal, for which the company were liable took place, although over 20,000 boilers were under supervision during the 12 months. From these figures some idea of the magnitude of the business may be gleaned.

These remarks refer especially to the large stationary boilers used in workshops and the like. The need of protection against poor portable concerns and against those who do not know how to use a good one is needed fully as much. We trust the Napa county disaster will not be allowed to go unheeded by.

Items of the Order's Stability.

EDITORS WATCHMAN:—The article on the first page of your paper of August 1st induces me to send you two examples of father and son belonging to one Lodge. Noe Valley Lodge, No. 185, A. O. U. W., has among its charter members, Bros. A. V. Thompson and D. V. Thompson, the former being M. W., and the latter Foreman. Bro. D. V. Thompson is the father of Bro. A. V. Thompson, so that father and son not only sit in the same Lodge, but both hold office in the one Lodge.

Bro. George Dudley is also a charter member of this Lodge, and his son, W. C. Dudley, age 21, has recently joined, and is now Recorder of the Lodge. It will, I think, take many words to speak louder than the actions of men bearing those relations to one another.

W. C. DUDLEY, Rdr. Noe Valley, 185.
San Francisco, August 2, 1881.

Read and Act Upon.

The following good and wholesome resolutions are taken from an Eastern exchange, and if *all* brothers would only live up to the sentiments contained, the resulting good would be manifest. But we are afraid the millenium hasn't quite arrived, nevertheless we earnestly commend them to the serious attention of our readers:

Let us resolve, brothers—
That we pay our assessments promptly.
That we will religiously attend all Lodge meetings.
That we will do our level best to make those meetings attractive.
That we will act up to the maxim, that "what is worth doing at all is worth doing well," and observe all the forms and ceremonies laid down for the government of the Lodge.
That we will talk only when we have something to say.
That after we have said that something, we will stop talking.
That when we have nothing to say, we will keep quiet.
That we will pay respectful attention to what the other brothers may say.
That we will second the efforts of our officers o make the exemplification of the "work" effective.
That we will maintain the good name and fame of our Order, everywhere, and at all times.
That we will extend its influence to the full extent of our ability.
That we will, every one of us, hand in the name of at least one good and true man for membership.
That we will search out and care for all brothers sick or suffering.
That we will help one another in every way possible.

Society Run Mad.

We have alluded before to the numerous societies which are being started up all over the land. The present period may well be called the society era. Almost every conceivable manner of human endeavor must have a society. The wits of the country are at work, we imagine, for the purpose of bringing this society craze into contempt. They have formed an organization which is called "The Tell the Truth and Shame the Devil Club." One of its members having died, the following resolutions were passed as expressive of their sorrow:

WHEREAS, Death has removed one of our number, therefore be it

Resolved, That the loss of his companionship falls less heavily upon us than the loss of the money which we are obliged to pay to his widow, under the rules of the society.

Resolved, That, as a citizen, he was no better than his neighbors, for he grumbled when his wife asked for the price of a new dress for herself, or for a rig-out for the children, the same as a great many men do, and he wasn't a saint by a long chalk, any more than any of us are.

Resolved, That he could have been a much better man than he was if he had not been born a human being and inherited the frailties of human nature.

Resolved, That we congratulate his widow on being still young and good looking, and also on being the recipient of a handsome sum from this society, which will render her a very desirable match when the regular period of mourning has ended.

Resolved, That these resolutions be published in the Somerville *Journal*, and a copy sent to the bereaved wife of our deceased brother.

Mechanics' Fair.

The 16th exhibition has now been in progress over two weeks, and the interest taken and constantly improving exhibition of goods and new and useful inventions, warrant us in saying, that this will be the most successful fair yet held. The objects of interest to the visitor are numerous and attractive, among which are the elevated miniature railroad, on which the little engine and train are despatched the length of the building each afternoon and evening, to the great delight of the younger folks. The prismatic fountain which plays on each evening always attracts a large crowd who at intervals promenade through the garden which is lighted by 12 electric lights. The band enlivens the time by the selection of varied music, having a change of programme on each evening. Through the kindness of a number of our leading citizens the Art Gallery is filled with choice paintings from their selections, a number being paintings from the old masters. While the young and gay are promenading hither and thither, paterfamilias gather around the fountains in sitting groups noting passing events or scanning the *Mechanics' Fair Daily*, which is printed in the pavilion nightly. The proprietors, Messrs. Dewey and Co., are veterans in this business, this being their 13th volume as publishers of the *Fair Daily*. As indicated in our last issue we want our Bro. Workmen in the country to so time their visits to the city as to be able to see the last and best fair that wil be held in the present pavilion.

Grand Recorder's Statement for July.

We condense from Grand Recorder Pratt's Financial Statement for July the following leading figures:

INSURANCE AGGRESSIONS.—EDITORS WATCHMAN: Undoubtedly the readers of the WATCHMAN have noticed the attack of the insurance companies of the State of New York upon the benevolent and charitable societies. The object seems to be the destruction of their usefulness to humanity, in order that they may continue to live off the public and the dupes whom they may succeed to insure in their unstable concerns, even with a State Commissioner at their head for the protection of the public. Their policies are just so much fancy paper, and their principal value consists in the artistic labor with which honest toil has been rewarded. Fraternal societies are a terrible blow against them. All over the whole civilized world, their only thought by day and night is to keep their perpetual leech upon the body of the people. Fraternal societies invert the principle of life insurance companies, to wit: The many for the benefit of one member and his family, and not like they do, the many for the benefit of our family and our agent's family. I am glad that the lifeinsurance men have commenced this warfare; it will only hasten their own destruction.—J. S. M.

A DIAMOND TESTER.—A correspondent of the Rocky Mountain *News* tells of an amusing incident that occurred lately on a train that was crossing the Rocky mountains: A traveling peddler undertook, in the cars, to sell a large "diamond" ring to a miner who had made his pile. "Humph," said the miner, after critically examining the ring, "they've got common stone up in the diggings where I've been that'll cut that diamond all to pieces." "If you'll find a piece of stone that will cut that diamond, I'll give it to you," replied the peddler. "All right," said the miner, "if I can't cut that 'diamond' with a stone I'll buy it of you." Thereupon the miner took the ring in his hand, and pulled from his pocket a small piece of brown-looking stone, similar to a bit of brown free-stone, except the grain was very fine, and with this he proceeded coolly to cut and scratch the "diamond" with several ugly-looking gashes. A group of passengers that had gathered about the miner were amazed, but, while they smiled, the peddler with the "diamond" withdrew discomfited. "That little piece of brown stone," explained the miner, "is a piece of corundum that I got in the Rocky mountains, and it's the best diamond tester in the world. It won't scar a genuine diamond, but it will everlastingly cut up pieces of glass or quartz."

SCIENTIFIC ENGINEERING.—A curious fact and one showing the value and percision of modern engineering may be mentioned in connection with the recent picking up of one of the Atlantic cables, which became useless some 10 years ago, and which has since been lying neglected on the bottom of the Atlantic at a depth of some 2,000 fathoms. The location of the fault, with so much exactness, and the small expense of picking up and repairing the cables at a slight comparative cost, gives additional value to ocean telegraph property, and increased confidence in that scientific engineering which is able to calculate so closely into such hidden mysteries.

EIGHTEEN THOUSAND more females than males in Boston, says the census man. That's what makes it so delightful to live here.—*Boston Transcript.*

THE CALIFORNIA EQUESTRIENNES.—Horseback riding should be taught the little girls. It is a graceful and healthful accomplishment, and necessary in future life to render a woman able to care for herself. Passing the gate lately at the entrance to a farmhouse which stood a quarter of a mile back from the road, we saw a young woman riding rapidly down the lane with the intention, we supposed, of intercepting the stage. But she made no sign, and we drove on while she bent in the saddle and opened the gate. Before we had proceeded far there was a clatter of hoofs, a cloud of dust swept by, and she galloped ahead out of sight. Going for the doctor, somebody suggested. Several miles along we saw two horsemen approaching. They came fast and furious. One was our fair horsewoman about three strides in advance of a young chap, who was doing his level best with his California half breed. She rode like a Centaur or Phil. Sheridan. There was a rush of streaming ribbons and curls, a wave of the whip hand as she looked back with a smile, and the stampede disappeared in a whirley-gust toward the hills.—*Santa Rosa Republican.*

ONE hour after an "old master" had painted the name of a patent medicine on a big rock, a cow came along, licked it off, and died before sundown. When the simple name of a medicine kills a cow, human beings want to beware of the stuff itself. A cow was never killed by licking the name off a patent medicine in a newspaper, and no other kind can be recommended.

MRS. MOUNTJOY, who was reproached for her lack of sentiment, replied, "Bless me, how can a woman have any sentiment whose husband goes to bed six nights out of the seven with his boots on?"

FOR MEMBERS of the A. O. U. W. ONLY.

ADMISSION FEE, $3.00; ANNUAL DUES, $2.00.

Probable Cost to Each Member, about $8 a Year.

The object of this Association is to afford an additional protection of $1,000 to families of deceased members of the Ancient Order of United Workmen.

To become a member the applicant must be a Master Workman in good standing in his Lodge, under 50 years of age, and in sound bodily health. No re-medical examination is demanded, though the Association reserves that right, and when necessary, the applicant must pay the Examiner's fee.

There are no Lodge meetings to attend or Lodge dues to pay. There is no sinking fund, consequently the members have the benefit of every dollar received.

No Director receives any remuneration for services rendered.

The admission fee includes the first assessment of $1, which assessment is levied, and made payable on the death of a member, and disbursed on the same principle as the Beneficiary Fund of the Ancient Order of United Workmen.

The Association is governed by a Board of Directors, elected annually by the members. It is endorsed by Hon. Roderick Rose, Past Supreme Master of the Order in the United States, also, by W. H. Jordan, M. T. Brewer and C. W. Taylor, Past Grand Masters of California, H. G. Pratt, Grand Recorder, C. H. Haile, Grand Receiver, C. C. Terrill, P. Peck and E. H. Morgan, Finance Committee of the Grand Lodge, all of whom are members, and cordially recommend the Association to the support of the Brothers throughout the State.

The average cost of this additional $1,000 to the $2,000 already pledged by the Order, will be about $8 per year, or less than 20 cents a week.

Franklin's Anniversary.

The third anniversary of Franklin, No. 44, was celebrated by a grand musical and literary entertainment at Ixora Hall on Friday evening, Aug. 12th. Prof. Coggins had added a number of devices and ornaments of a pleasing character to his finely decorated hall in the way of evergreens, extra flags, etc., and across the platform, in large golden letters, was THIRD ANNIVERSARY FRANKLIN LODGE, No. 44, A. O. U. W., under which was the word WELCOME. The immense hall was packed (nothing but standing room left) with a select audience of ladies and gentlemen and the smaller folks, who had the pleasure of listening to the following exercises: Speech of welcome, C. N. Payson, M. W., who appropriately welcomed his guests in the name of the Old Pioneer and "Mother of Lodges," Franklin, No. 44. Overture, Second Regiment Band, 16 pieces. Piano solo (Mendelssohn), Master Denis Foley, the blind pianist, who, as on a former occasion, acquitted himself with much credit and was rewarded with an encore. Solo, "Say not Farewell," Miss Lena Hoffman (daughter of Bro. S. H. Hoffman), Prof. Chas. H. Hoffmann accompanying on the piano. Miss Hoffman is a finished musician, and on this occasion was in excellent voice and carried her audience to the highest pitch of enthusiasm and was doubly encored, and received a very beautiful bouquet. Recitation, Mr. M. Mayer. A very affecting piece that was well rendered and recalled, when he gave in fine style "Under the Walls of Monterey." Banjo specialties, Mr. P. Winant. This was rather too funny, but the applause given it filled the bill; recalled and received a bouquet. Aria, "*Non Ever*, (It is not true), by Tito Mater, Prof. S. Koppell, an operatic singer of much note; and those who listened to his artistic efforts, enjoyed a rare treat which was loudly applauded, receiving a recall, when he sang, "Good-night, my Child," by Abt. Address, J. A. Fairweather, P. M. W. This was a logical and masterly effort, that was well received, and is published elsewhere. Vocal trio, from "Attilla," Miss Lena Hoffman, Profs. Koppel and Lowenstein, Bro. Chas. H. Hoffman, pianist. Here was a union of skilled musicians in high-art music, that is only heard in select circles. At the close it was heartily encored and kindly answered. Piano duet (Trevelere), Miss Lena Hoffman and Prof. Chas. Hoffman. This was one of the favorite pieces of the evening, and was listened to with rapt attention, and rewarded with a hearty encore. Vocal solo (original), "Keep the A. O. U. W. over the Door," Miss Linda Hoag; her mother, Mrs. M. E. Hoag, played the accompaniment. This was quite a favorite, as each verse was heartily applauded and at the close an encore, and presented with magnificent bouquets. Aria from "A Night in Granada," Mr. R. Lowenstein, a baritone from the opera, and received with great favor and a generous recall. Violin duet, "Concertante," Professor Herzog and H. Schmidt. This was a specimen of high art music that had such an approval as it justly deserved. New songs, "Men We Know," Mr. Josh Davis, of the *Evening Post*. This was the humorous and comic part of the programme, that kept the house in the highest glee, repeatedly calling for more. Vocal duet, "Valse," Misses Lizzie Dechant and Dolly Hartman. These young ladies acquitted themselves with great credit, and were recalled and presented with beautiful bouquets. Musical specialties, Mr. F. Bean. This performance was the feature of the evening, as Brother Bean showed a versatility of musical talent that was surprising, the audience keeping him until he had gone through his list of instruments down to a ten cent tin whistle. Cornet solo, Professor Coggins. The Professor is well known as a master on this instrument, and which happily closed a pleasant evening. This was an entertainment of excellence that is seldom had, even with full-paid admission, and the several committees who managed to bring together so much talent for the amusement and instruction of the largest audience that ever graced this favored hall, shou d be congratulated, and we herewith print their names: Committee of Arrangements—S. Hoffman, J. F. Brown, J. A. Fairweather, Chas. H. Hoffman, F. Bean. Reception Committee—M. S. Cox, D. A. Brown, J. L. Franklin, John Hartley, W. McNally. Musical Director, Prof. Chas. H. Hoffman.

Anniversary Celebration.

The third anniversary and reunion of Myrtle, No. 42, was celebrated by a grand social party and musical and literary entertainment, at Covenant hall, B'nai B'rith building, on Friday evening, August 5, 1881. A large and well-dressed audience was in attendance, and a very entertaining programme was commenced by Jas. H. Barry, P. M. W., as Master of Ceremonies, who made a few trenchant remarks on the progress and purposes of the Order, and in the name of Myrtle, No. 42, welcomed his guests and friends. Quartette, Mr. A. W. Bogart, Mr. F. White, Mrs. C. Joost and Mrs. J. F. Bolts, Chas. S. Hoffman, P. M. W. of Memorial, accompanist—a very artistic and pleasing effort that was enthusiastically received; piano solo, Master Bennie Fabian, a youth of ten, but who is a master as a pianist, and upon this occasion received a hearty encore; reading from Mark Twain, Jas. M. Baird, which was well done and well received; duet, Chas. E. Baker, Financier of Myrtle, and Mrs. Crocker, wife of J. H. Crocker, P. M. W. Although well known as highly cultivated musicians, they certainly won new honors on this evening. Recitation, "The Smack in School," Miss Minnie Gately—a pleasing and interesting effort that was rewarded with a double encore; duet, Mrs. J. F. Bolts and Mrs. C. Joost, who were received with marked favor; piano solo, Master Sewall W. Bogart—a remarkably good performance for a youth of 10. G. Master Barnes being present, was requested to make a few remarks, which he did in his grand and interesting manner, lifting his audience to the highest point of enthusiasm; solo, A. W. Bogart, organist of Myrtle. Those who heard him on this evening may know something of the pleasure the members and visitors enjoy each Lodge meeting in Myrtle. Select reading. "A Bugle Song" and "Snyder's Nose," Prof. H. C. Eastman, teacher of elocution. On this evening he showed a versatility of talent and cultivation that stamps him as a master in his profession. Violin solo, Prof. F. Bean, Mrs. C. Joost accompanying on the piano—a rare treat and performance that was enthusiastically received, and he was recalled four times; solo, Mrs. J. F. Bolts—a very sweet and pleasing effort that was heartily applauded; harmonica solo, Mr. Wm. T. Sebelle. It was really a surprise to see how much music could be fingered out of so small an instrument. By request, Wm. H. Barnes, G. M. W., closed an evening's entertainment by a solo that was happily and enthusiastically received, and rewarded with recall after recall, as usual. The hall was cleared, and Blum's band of six pieces discoursed the best music for a grand march that was headed by Bro. Geo. H. Williams and wife, followed by a large company, who were soon engaged in spirited dancing, which was kept up until a late hour in carrying out an order of 12 dances. The committees and members seemed to take an especial interest in making this reunion a grand success, which it really was. In coming years the members of Myrtle and their guests can look back with pride and satisfaction at the worthy efforts of the several committees on this occasion, and we herewith give them: Committee of Arrangements—C. C. Gilmore, P. M. W., Jas. H. Barry, P. M. W., H. F. Morris, A. W. Bogart, C. E. Baker, Fin. Reception Committee—A. Loane, T. Vice, J. M. Lyon, E. L. Levey, J. Bolts, D. T. Phelps, C. E. Baker, A. W. Bogart. Floor Committee—J. J. Hammond, F. C. Woodbury, C. D. Malline, J. B. Mulcahy, C. C. Gilmore, P. M. W. J. H. Crocker, P. M. W., H. L. Sanborn, M. W., W. S. Dewey. Floor Director—G. H. Williams.

Friendship, 179.

The choice entertainment of this Lodge which was published in our last issue was followed by a more interesting meeting on August 10th. The M. W. degree was conferred on three in a very creditable manner, and eight applications received for the degrees. There was a goodly number in attendance on this evening, and was materially swelled by a delegation of 16 from Valley No. 30, among whom were some of the Grand Lodge officers. Under head of Good of the Order E. F. Loud, D. G. M. W., made a few of his usual straight-forward remarks that are always interesting and to the point. Bro. H. Hoeber, P. M. W., in his humorous manner entertained his hearers, and in the course of his remarks paid a high compliment to the PACIFIC STATES WATCHMAN, followed by E. H. Black, M. W., who is known as the humorist of Valley in the Lodge room, and on this evening he concluded that the most humorous thing he could do was to call on Bro. J. S. Mysell, the Talker of Valley Lodge. Bro. Mysell fulfilled, in his speech, the highest expectations of his brethren. Bro. Wells of Valley, followed in a few remarks, and a speech of welcome from the Master Workman, Chas. Creighton, who is filling the position with great credit.

Noe Valley, 185.

Noe Valley Lodge, No. 185, held its usual enjoyable monthly entertainment on Tuesday, July 26th, when the following programme was presented: Piano solo and encore, Mrs. Goldhoit; song, Miss Magener; recitation, Master Walter Axford; recitation, Miss Emma Dunsing; song, Wm. Ganzart; song, Mrs. A. T. Ruthrauff; "Our Nation's Medley," Mrs. W. P. McDermott; recitation, Bro. E. Watson; Othello's Defense, Bro. C. T. Maher. This was a masterly effort. Piano duet, Mrs. McDermott and Miss Minnie Axford, which was a splendid exhibition of musical talent; song and double encore, Mr. Matthews; Personal Reminiscences. Bro. Houghton, which pleased the audience very much; reading, "Artemus Ward," Bro. Jeness—a very fine reading and well received; recitation, Miss Dehna Silverstone. This closed the literary and musical programme, when dancing ruled the hour, the audience joining in the mazy whirl with joyous satisfaction. Noe Valley is a thriving subordinate, and its excellent monthly entertainments are a prominent feature in the social and fraternal world of this part of our city.

Aurora, 8, D. of H.

A meeting of more than usual ordinary interest was held by this Degree of Honor Lodge on Tuesday evening, August 9th. A goodly number of members were in attendance, including visitors from Silver Spray. Three new members were initiated into the mysteries of the Degree of Honor. After the initiation a recess was had, upon the termination of which the Lodge was called to order and the following programme was announced: Flute solo, David Wilder, accompanied on the piano by Dr. C. T. Deane, and an encore was given to repeated calls. Essay, Mrs. A. H. Cummins, which was very neatly recited. Essay, Dr. C. T. Deane, which bristled with dry humor. Music, duett, Mrs. Rossbach and Mrs. Sexton, the latter at the piano, and an encore being called Mrs. Rossbach presided at the instrument which charms the ear and soothes the senses. Then came a recitation (Curfew) by Mrs. E. Holland, who, with graceful gesture and neat delivery, delivered exceedingly well the beautiful lines. Sister Holland is one of the most valuable members of the Lodge, and is always seeking to make the meetings interesting. A reading by S. F. Freeman closed a very pleasing entertainment.

Lodge Locals.

Dixon, 50.

One of the most interesting society meetings ever held in Dixon, took place August 3d, when Grand Master Barnes paid a visit to the Lodge, and presented to the widow of our deceased brother, Edward Weihe, a check for $2,000. Eleven new candidates were initiated, and received both degrees, after which the doors were thrown open and a public meeting held. We take from the Dixon *Tribune* the following account of the proceedings: A programme of musical selections and a lecture by Bro. Barnes constituted the entertainment of the evening. The lecture was a humorous and eloquent exposition of the principles of the Order. A supper was afterward given the members of the Lodge and their lady friends at the Arcade hotel. Mr. Willott was ordered to prepare for only 30 guests, but over 40 took seats, and the viands were so plentiful that a good many more might have been accommodated. Roast turkey, chicken pie, oysters and various other toothsome dishes tempted the appetites of the guests. After the gastronomical part of the entertainment, Bro. Dr. Alexander was called for, and responded in a short speech, while the Grand Master talked, sang, gave a burlesque recitation, and in other ways made himself the life of the company. For entertaining an audience, Grand Master Barnes is a "whole team and a little dog under the wagon," as they say in New England. Before adjourning, the guests tendered him a vote of thanks.

Enterprise Lodge Visits Mt. Hamilton.

Enterprise Lodge, No. 17, San Jose, paid a fraternal visit to Mt. Hamilton Lodge, No. 43, of the same place, on August 3d. It was one of the most enjoyable gatherings of the members of the Order in that city since the organization of the Lodges. From the beginning to the end, says the *Herald*, there was a vein of pleasantry running through all the proceedings that kept everybody in the best of humor. Under the head of "Good of the Order," Max. Blumenthal, M. W. of Mt. Hamilton Lodge, called upon the visiting members for remarks, Past Masters Clark, Lendrum and Lauery responding with appropriate sentiments. The remarks of Past Master Clark were highly appreciated. He paid a very graceful compliment to Mt. Hamilton for its rapid growth from a charter roll of 30 or 40 to a membership of over 160, and for the restless activity which the present indications gave as evidence of still greater triumphs in the future. Past Master Lauery's speech on the "bald heads" of his Lodge, was exceedingly happy, claiming, with much show of reason, that one thing he could say for Enterprise Lodge was, that it could turn out more old baldheads than any organization outside of the Mormon church. Bro. Jas. G. Kennedy, of Enterprise Lodge, made an appropriate response to a call. S. J. Hinds then responded for the "jaw-bone and young orators" of Mt. Hamilton Lodge in a vein of humor that set the house in fine spirits. He was followed by Past Master McNeil, who gave a recitation that was loudly applauded. Bro. C. M. Shortridge, of the "young orators," responded in a splendid speech upon the principles of the Order, and closed with a glowing tribute to friendship, love and protection. Other remarks were offered by visiting brothers, after which ice cream and cake were passed around, and several hours were spent in social and fraternal greetings. The affair was a complete success, and it was the parting sentiment of all, that these fraternal visits could not be renewed too often.

Mission, 56.

EDITORS WATCHMAN:—The last communication from this place in your paper was one by P. M. Now, whether P. M. stands for private member, Past Master, or public mouthpiece, I know not, neither do I care. However, I can bear testimony to P. M.'s assertion that we have as good material in this Lodge as there is in any Lodge in the State, and I say so without fear of successful contradiction. P. M. made some laudatory remarks about our M. W. Now he might have gone on and mentioned others; for instance, our efficient Recorder. We of Mission, No. 56, pride ourselves on having the model Recorder in the State of California. Our Recorder is the famous school teacher of Washington Corners, Mr. P. M. Fisher. Bro. Fisher's school was pronounced by the Supt. of schools of this county as the model school of the model county of the State. The school Supt would perhaps have gone farther and would have pronounced Bro. Fisher the model teacher in the State, had he not known that Bro. Fisher was a bashful young man, and such a remark might have brought a blush to his cheek. But without any braggadocio, Bro. Fisher is a full team and a horse to spare. In debate he is almost invincible. Not that he is the only good debater in this Lodge, for we have a great many, but to enumerate them in one letter would make the epistle too long. At some other time I may mention others. Since P. M.'s letter to your paper our Lodge has been going on in its usual line of progress. We have good attendance at Lodge meetings, spicy debates, and good times generally. Our Lodge has lately voted to so amend its by-laws, to abolish sick benefits. We came to the conclusion that $1 per month dues would not bear $10 per week benefits very long. Since abolishing sick benefits we have reduced dues to 50 cents per month, and now everything is lovely and "the goose hangs high," if I may be allowed to use a slang phrase. More anon.—MISSION.

Resolutions of Respect.

[IN MEMORIAM.]

HALL OF FORTUNA LODGE, No. 13, A. O. U. W., NAPA, August 3, 1881.

WHEREAS, It has pleased the Great Ruler of the universe to remove suddenly from our midst our esteemed brothers, John George Platt and Willis Crowe, and

WHEREAS, It is but just and fitting that we should recognize their many virtues; therefore be it

Resolved, By Fortuna Lodge, No. 13, A. O. U. W., that while we bow with humble submission to the will of the Grand Master, we do not the less mourn for our brothers who have so suddenly been taken from amongst us.

Resolved, That, in the death of Bros J. G. Platt and Willis Crowe, this Lodge has lost members who were ever ready to proffer the hand of aid and extend the voice of sympathy to the needy and distressed of the fraternity, whose utmost endeavors were exerted for its welfare and prosperity, and the community citizens whose upright lives were a standard of emulation for their fellows.

Resolved, That this Lodge extend to the families of the deceased brothers its heartfelt sympathy in this their great affliction.

Resolved, That the members of this Lodge wear the usual badge of mourning, and that the charter be draped in mourning for 30 days.

Resolved, That a copy of these resolutions be spread upon the minutes of this Lodge, a copy sent to the respective families of the deceased brothers, and copies furnished the daily papers of this city and the PACIFIC STATES WATCHMAN for publication.

Respectfully submitted in C. H. and P.,

T. N. MOUNT,
G. M. FRANCIS, } Com.
J. W. MCBAIN,

THE New Eldridge sewing machine exhibited by Bro. E. C. Bodley on the right hand side, upper floor, is attracting more than usual attention in the Mechanics' pavilion. The points of excellence of this new machine are a double thread lock stitch shuttle machine, easy in operation, moderate price and handsome, having points of merit that no other machine possesses. Bro. Bodley's parlors are at 26 New Montgomery, under the Palace Hotel, where he is always ready to explain the working of his improved sewing machine. See his advertisement in this number.

THE firm of Jackson & Truman, manufacturers of agricultural implements, corner of Sixth & Bluxome St., have a large line of agricultural implements and labor saving machines which are kept in motion each afternoon and evening. Bro. Jackson has had a large experience in his line previous to the formation of the present firm. Mr. Truman has been with the house of Baker & Hamilton for years, and understands the wants of the farmers. It is a live firm and a reliable firm that will be patronized.

BRO. LOUIS DAMPF, leading frame manufacturer for oil paintings and picture dealer, make an exhibit of goods in his line in the Mechanics' pavilion, in keeping with the fine stock he always carries at his large store, corner Montgomery and Market, under the Hibernia bank. It is a reliable place to get the best work done at reasonable rates.

Address at Franklin's Entertainment.

The following address was delivered by J. A. Fairweather, P. M. W., on the occasion of the third anniversary of Franklin Lodge, No. 44:

Mr. Chairman, Ladies and Gentlemen:—As the newspapers abound with accounts concerning the various beneficiary societies throughout the land, in all probability nothing can be said that will be new to you; but in deference to a time-honored custom, it was determined by a majority of the committee on arrangements that at this, our third anniversary, something should be said explanatory of who we are and what we are, and as to the work we have done and are doing, and I have the honor of being the spokesman.

I know that you have assembled for recreation rather than instruction, and doubtless very many of you consider an address upon the origin, objects, aims or merits of the A. O. U. W. as the least interesting of the evening's exercises, therefore I promise you that I shall be very brief.

Every effect is traceable to a cause. Our existence as an Order is an effect; if you will follow me we will examine and ascertain the cause, or causes, which necessitated and brought about that existence.

The people of the earth are divided into three great classes:

First—The very rich and comparatively useless. Second—The very poor and utterly worthless. Third—The struggling mediocrity, on whose shoulders rests the burden of the world.

In European countries, where the government is monarchical, the title to property was vested in the King, and by him apportioned to the favored few in payment for services, real or imaginary. The law of entail prevails, and property has descended from father to son in an unbroken chain throughout the generations. These lands have been leased to the (so-called) common people, and, until a very recent date, without the right of assignment; and so it comes that the indolent aristocrat has fattened from the labors of the toiling plebian.

In America, where the government of the people is, in theory, by the people for the people, the title to property was vested in the people as a body politic, and a title in fee has been derived from the people as a body by the people as individuals.

Passing our earlier history and avoiding unnecessary details, we come down to the numerous land laws to be found upon our statute books, good, perhaps, in theory, but infamous in practice, whereby sordid wealth has withdrawn from actual, honest settlement the major portion of the desirable lands throughout the Union, and holds them, unimproved, unproductive, and comparatively free from taxation, for purposes of unrighteous speculation; but, to the credit of America be it said, the law of entail is unknown within her boundaries, and the dishonest accumulations of the miser father may be speedily scattered by the imbecile, spendthrift son.

Land grabbing is not the only evil, nor yet the worst, with which we, as a people, have to contend. There is another rapidly increasing and much to be dreaded evil—that of corporation monopoly. Designing men, anxious to secure control over the property of others without assuming personal responsibility, conceived the idea of forming private corporations under general laws, and these institutions have, since the masterly argument of the gifted Webster in the Dartmouth College case, sprung rapidly into prominence and power.

These creatures of the laws of creation are nominally of 50 years' duration, but while the individual corporators die, the corporation itself, practically, never dies, but stands and will stand a menace to American institutions, as long as the corner grog-shop exists, and women are denied their equal rights with men to vote.

The land-grabbers and the corporations, by their united effort, have materially increased the number of unfortunate beings who form my second subdivision of the earth's population.

In the years succeeding the war of the Rebellion, the available lands were withdrawn from settlement, and powerful corporations, with unlimited pecuniary and mechanical facilities, crushed all private competition. This unholy union for aggressive purposes necessitated co-operative action, on the part of the people, for defense, and up sprang labor leagues in every section of the country, whose members were pledged, among other things, to resist a reduction of wages and to support unemployed brothers.

Encouraged by the results of these co-operative efforts, labor looked abroad, and observing the outrageous frauds that were being perpetrated by capitalists under cover of life insurance corporations, with a stock capital of a million and a cash capital of a thousand dollars, with expensive offices and useless officers, with soliciting agents who received one-half the first year's premium as compensation for their services—labor concluded to insure itself.

Many are the fraternal beneficiary societies, called into existence by American ingenuity, that offer protection to the friendless widow and helpless orphan; but the greatest and grandest, the noblest and the best of all these institutions is the A. O. U. W. Born in poverty, cradled in obscurity, but embracing in its earliest infancy the undying principles of Faith, Hope and Charity, this child of the little city of Meadville, in the State of Pennsylvania, grew apace, found favor in the eyes of the world, and stands to-day pre-eminently superior to any of its kind. Though but an infant in years, yet a giant in performance, the A. O. U. W. encircles with its arms of protection the northern and middle portions of the Western Hemisphere.

The A. O. U. W. was established in 1868, in Meadville, Penn., under the leadership of J. J. Upchurch, Superintendent of the railroad machine shops in that city. It was established for a two-fold purpose. Its first object, as conceived by its founder, was to prevent labor strikes, by uniting on a common level, on the floor of the Lodge-room, both employer and employee. The second object was to provide for the payment of $2,000 from a common fund to the widows and orphans of deceased members. The Grand Lodge of Pennsylvania was chartered in 1871, and the Supreme Lodge of the United States was established in 1873.

The first Lodge in California was established at West Oakland, on the 21st day of August, 1875, less than six years ago. Yet to-day we have in California over 200 Lodges, with a membership of 12,500. The membership throughout the United States is in excess of 100,000.

Among the old insurance companies, the death-rate is about one per cent.—10 to 1,000. In the A. O. U. W., the death-rate is four-fifths of one per cent.—8 to 1,000—which is a big difference in our favor. This can be accounted for on the ground that we have no soliciting agents anxious to make a commission, and therefore accepting undesirable risks.

Any white male of good moral character and sound bodily health, between the ages of 21 and 50 is eligible for membership in the A. O. U. W.

Among the Odd Fellows, Masons, and old insurance companies, as well as the A. O. U. W., the average age of membership is about 40.

No distinction is made on account of age in the cost of membership or insurance in our order, but the average cost to individual members is about $20 per year for carrying $2,000, *i. e.*, $14 assessments and $6 for running expenses, while the cost of $2,000 on insurance in the old stock companies, to a man 40 years of age (which as I said is the average age of membership in all insurance companies, ours with the rest) will be about $64 per year. In other words, while it costs us $6 per member to run our insurance company, it costs the old companies (making allowance for 1-5 of 1% increase in their death rate) about $47 per *victim* to run others.

These are the amounts which the patrons of the respective organizations are called upon to contribute outside of the money required for the redemption of policies.

Last year we paid out in California to the widows and orphans of the deceased brothers about $160,000, and all in the world many a widow and orphan had was the money received from the Workmen.

The prosperity of the A. O. U. W. is assured beyond peradventure. Its foundation is as solid as a rock. It will live and perform its duties when we, and generations after us, are gone and forgotten. Let me say, in conclusion, that I hope every man who is not morally or physically disqualified, will place himself in a position to be benefited by it.

Let me say to the ladies, that riches are uncertain in their acquisition and retention, and that "Death is no respecter of persons." He comes at a time when, and to those by whom he is least expected. See to it, therefore, that your fathers, husbands, brothers and sons avail themselves of this opportunity of making provision for your protection. See to it that they do it now, otherwise you may have occasion to regret the delay.

One of the finest exhibits in the Mechanics' fair is that of the Standard Soap Co.—wholesale house, 204 Sacramento street. Under the able management of Bro. J. J. Applegate, the enterprise exhibited in the manufacture of toilet soap, and various kinds for domestic and family use, is not equalled by any house in this State. The well-known brand known as the bleaching soap, is still a great favorite, but may, in a measure, be supplanted by a new brand that furnishes the blue, that ingredient being mixed with the soap.

The Franco-American Perfumery Co., whose laboratory is at 109 Battery St., of which P. Peck, P. M. W., of Washington, is a co-partner, exhibits in the Mechanics' pavilion several ornamental stands of the choicest perfumery, which is all manufactured in this State, and embraces all the fashionable and choicest perfumery.

Bro. G. G. Burnett makes a fine exhibit of proprietory medicines and perfumery, which have attracted a good deal of attention during the Mechanics' fair. The playing fountain of cologne free to all to get a spray has been well patronized, and all the ladies say they are the best to be had.

Dr. Wm. L. Breckinridge once said to his mother: "Ma, I think you ruled us with too rigid a rod in our boyhood. It would have been better had you used gentler methods." She took a pinch of snuff, and said, "Well, William, when you have raised up three as good preachers as I have, then you can talk."

When the shopman seizes you warmly by the hand when you enter his establishment, you readily understand what is meant by a pressure of business.

Fraternal and Corporate Life Insurance Companies.

During the last 12 months no less than 124 life insurance companies suspended, a good portion of them being known as Chicago wildcats, their headquarters being in the balloon city of the West. The present week a gentleman called on an agent of a solvent New York company. The applicant was 42 years of age, and he wished to know the annual cost of insuring for $2,000. He was handed the reduced premium rates, a reduction of 15% having taken place within three years, the reduction, we opine, being largely due to the existence of the A. O. U. W., Knights of Honor and kindred associations. From this list he learned that his insurance would cost him $57.32 per year, for life, payable in advance, less the dividends received after the first year, which of course are only the interest on the money advanced from payment to payment, which certainly is at a lower rate than prevails at Santa Cruz, the company loaning its money from its New York office and probably on New York securities. The annual interest on $57.32 in Santa Cruz is $5.70, making a total of 62.02. The New York dividend on the same amount will not probably exceed $2.02. This leaves an actual cost of $60 per annum for a policy of $2,000. The computor is a member of the Knights of Honor and the Ancient Order of United Workmen. He was among the charter members of both institutions, and in no instance has his insurance in either of them for $2,000 cost him to exceed $20 per annum. As between corporate and fraternal insurance companies here is a yearly saving in disbursements of $40, which, at the end of 10 years, will amount to $400, to say nothing of the interest that will accumulate on the savings during the 10 years. This $400, loaned at the low rate of 5%, will earn $20 per year, the entire cost of being insured in one of the fraternal societies named, consequently it will cost him nothing for his insurance after 10 years, and at death his heirs will receive $2,400, the $2,000 policy and the $400 saved and loaned. But he says the fraternal benefits he derives from being a member of a society that meets weekly and is governed by the best parliamentary laws, the opportunity offered for intellectual and social development, are fully worth one-half of the entire cost of membership.—*Santa Cruz Sentinel.*

A Farming Woman In Tulare County.—A very remarkable example of prudence, foresight and continuity, has recently developed in the southern part of this county. The more so in that the subject is a woman. And in comparison with the conduct of so many men who become easily discouraged and "tramp" as the more praiseworthy, this young lady had started with nothing but her education; taught school a few terms and acquired a little ready money. The occasion for its use speedly arrived, which she was not slow to perceive. A young man in the neighborhood had taken up 160 acres of land, built a house upon it, a barn, bored wells, dug ditches, sown it in wheat, and in all spent hundreds of dollars upon it. It happened to be a dry season, and the crop failed. He became discouraged, and like many desired to leave, and offered his claim and improvements at a sacrifice, for means to get away. The young lady alluded to gave him $100 for his right, title, and interest in the land and everything on it. She let it lie. She need do nothing more. She sold the insufficient crop for hog feed. The hogs rooted and scattered it. The winter rains came, and with them came the volunteer crop, which matured and has just been cut, yielding 12 bushels per acre on 120 acres. She will clear at least $1,500, besides having the land and improvements. So much for adhesion—and the girls.—*Visalia Delta.*

New Patents.—Dewey & Co.'s Scientific Press Patent Agency has received official notice of the issue of the following patents to Pacific coast inventors, for the week ending Aug. 2, 1881:

244,977, ore crusher and pulverizer, G. F. E. Brinckmann, S. F.; 245,129, vehicle spring, G. G. Buckland, Tulare Cal.; 245,131, hill coupling, A. Cadwell, Petaluma, Cal.; 244,991, hand rake, J. Fox, Alameda, Cal.; 245,153, folding seat, Geo. H. Fuller, S. F.; 245,195, refrigerator for beer barrels, Mesenburg & Weacher, S. F.; 245,229, feed water heater, I. M. Scott, S. F.; 245,030, ore stamp mill, Jas. M. Thompson, S. F.; 245,031, machine for making blasting charges, Geo. Trench, S. F.; 245,033, harrow, Van Gelder & Batchelor, Sacramento, Cal.; 245,032, grappling and bale hook, J. M. Vance, Eureka, Cal.; 245,038, mine draining apparatus, Wilcox & Farquharson, S. F.; 245,039, clothes pin, Jas. Williams, Menlo Park, Cal.; 245,251, revolving dip net, T. F. Williams, Lower Cascades, Or.; 245,041, can for effervescing liquids, Samuel, Wood, S. F.; 245,255, stock car, L. Woodruff, Ellensburg, Or.

Training School for Travelers. The International Geographical Institute of Berne has put forward a project for the establishment of an international school for training travelers. The programme of study is a formidable one, and is divided into two distinct divisions. The first includes instruction in numerous branches of knowledge more or less necessary for a traveler, and the second practical training in the field.

Order American Union.

Three Assemblies of this Californian fraternity are now in process of formation in this city, and three in the interior.

Jefferson Assembly, the organization of which has been unavoidably delayed, will be instituted within two weeks. A preliminary meeting of the charter members of this Assembly took place at Shiels' building Saturday night, August 13th. Two hundred notices of the meeting have been sent out, and the officers of the National Assembly will be present.

The Secretary of the National Assembly reports the receipt of letters of inquiry concerning the Order from many points on this coast and the East.

Medical Examiners at large for this Order have been appointed as follows: San Francisco, Drs. P. H. Humphrey and Marc Levingston; Stockton, Dr. E. A. Stockton; Petaluma, Dr. J. B. Christie; Nevada City, Dr. C. D. Bobo; Grass Valley, Dr. Geo. Ivancovich; San Rafael, Dr. J. A. Callender.

Among the initiates of Washington Assembly, of this city, last Monday night, was Judge Wm. P. Byler, of Alameda, who has since been appointed a Deputy for Alameda county, and who is actively at work for the Order in that section. He reports that he will institute an Assembly in Oakland at an early day, and another in Alameda, after which he will visit San Leandro, Livermore and Pleasanton.

The Possible Source of Coal Oil.—The original source and formation of coal oil is one of the questions that has long agitated the scientific world. Among the many theories given is the following lately put forth by Prof. Mendeljeff who thinks that, on the first formation of the earth, vast reservoirs of inorganic iron and carbon existed in the interior of the globe. These were reached by the water condensing on the newly-formed land percolating beneath its surface. The heat decomposed the water into its component parts, oxygen and hydrogen, the first forming with the iron, oxide of iron, the latter with the carbon, petroleum and other hydro-carbons. It this theory be the correct one, there still exists in the center of the earth reservoirs of petroleum that are to the sources as yet known as the ocean is to the spring whose waters finally find a resting place in its bosom.

To Patrons and Business Men.

In the consolidation of the *Fraternal Record* with the Pacific States Watchman we have added to our large list of subscribers those of the *Fraternal Record*, which will make the Pacific States Watchman one of the most desirable papers for advertisers published in this State. Our circulation is general throughout the Pacific coast, a small circulation in many of the Eastern States and among all fraternal and beneficiary societies. As a family and fraternal paper, patronized by a select class of citizens, we offer a portion of our columns to the public, with our increased circulation, without any advance in rates.

HIGHLAND SPRINGS,

LAKE COUNTY, CAL.

BEAUTIFUL AND HEALTHFUL SUMMER RESORT FOR FAMILIES, INVALIDS, CAMPERS AND PLEASURE SEEKERS.

Hotel and Cottages Newly Furnished.

Board and Room, $10 per week, including Mineral Baths. Children under 5 years, and Servants, Half Rates.

Direct route by steamer "Donahue" to Donahue Landing, connecting with N. P. & N. P. R. R. to Cloverdale, thence by Stage to Highland Springs.

The springs are situated at an altitude of 1,700 feet above sea level; and for natural beauty of scenery, healthful climate, hunting and fishing, are unsurpassed in the State. The surrounding forests and valley are particularly inviting to campers, who will be especially entertained at the Springs.

The waters have produced many wonderful cures in the following diseases: Dyspepsia, Paralysis, Erysipelas, Rheumatism, Sciatica, Liver and Kidney, Bronchitis, Pulmonary Complaints, in their early stages, General Debility, and a never failing remedy for Chills and Fever.

For further particulars, address

THE FEEDING-BOTTLE AND ITS DANGERS.—The newly-formed Paris Municipal Laboratory has to justify its existence, and will no doubt do so if it can establish the truth of the facts stated in the following paragraph. Some feeding-bottles having a fetid odor were lately brought by Dr. Du Mesnil from a *creche* to the Paris Municipal Laboratory for examination. M. Fauvel found that the milk remaining in all smelt badly, was acid, and half coagulated; the globules were deformed, and numerous very lively bacteria, along with some vibrions, were present. On cutting open the caoutchouc tube throughout its length, coagulated milk with small organisms was met with; but a still more important fact was the presence in the nipple of a mass of vegetation of cryptogamic nature. Sown in whey, this developed considerably in a few days. A visitation of all the *creches* was arranged by the police and medical authorities, and the following was the result: Of 31 feeding bottles examined in 10 *creches*, 28 contained, in the nipple, the caoutchouc tube, and in some cases in the glass bottle, vegetations of the kind indicated, as well as bacteria, etc. Several that had been washed carefully, and were considered ready for use, still contained these cryptogams. Two feeding-bottles in a very bad state were found to contain pus and blood corpuscles; the children who had used them had injuries in the cavity of the mouth. It is thus probable that saliva enters the feeding-bottle, and its ferments are added to those of the milk. The accidity of the milk is attributed by M. Fauvel to the bacteria present. If further investigation proves that the observations above recorded are generally accurate, it will be desirable to recommend the frequent use of Condy's fluid, or some such agent, wherewith to wash out the bottles and tubes.—*Chemist and Druggist.*

BAGGING FOR CHEMICALS.—A patent has been taken out for making bagging which resists chemical action. The bagging is plunged in the following solution at 60° C. (142° F.) and left for an hour. Sulphate of alumina, 1 kilometer; water, 25 liters; borate of lime, 1 kilometer. The borate of lime is added after the sulphate of alumina has dissolved in the boiling water, and the whole decanted when settled. After taking out of this bath, the textiles are put in a second bath composed of 1 kilometer of resinous soap and 1 kilometer of Marseilles soap, dissolved in 25 liters of water and carried to the boiling point. At the end of ten minutes the cloths are allowed to drip, and dried, and then re-washed and dried. Bagging made in this way will, it is claimed, resist the action of any acids or chemicals put into them.—*Druggists' Circular.*

A NOVEL PROJECT.—It is no new thing to transport fluids, gases and even solids by means of tubes, pneumatic or otherwise; but now it is proposed to pass human beings through tubes from one point to another, but not exactly in the same way as fluids and gases or letters are passed through. Mr. Bradley Leslie, the engineer of the East India railway company, proposes to travel into France through a steel tube submerged 40 ft. below the surface of the water. The tube would be so ballasted as to make it weigh 1¼ tons to the foot less than the water displaced, its buoyancy being counterbalanced by moorings at every 250 ft. At the shore ends it would be laid in dredged or excavated channels, and would be made to rise from the mid-channel depths by easy gradients. The cost of carrying out this scheme is estimated at $40,000,000.

"SLEEPING out loud" is the latest child definition for snoring.—*Texas Siftings.*

The Comet.

The comet whose appearance has attracted so much attention during the past few weeks, has also been the subject of much scientific study, both in this country and in Europe. Though less brilliant than some which have appeared to the present generation, it has nevertheless been more interesting and important, in a scientific point of view, than any of its recent predecessors. In our last week's issue, we gave the results of Prof. Davidson's examination of the stranger from his observatory in this city. It will probably be some time before we shall get the results of Eastern and European observations in calculating the elements of the comet. When first observed, it was about 70 000,000 miles from the sun and receding at the rate of 1,000,000 miles a day. It was at the same time about 30,000,000 miles from the earth. The nucleus at that time was estimated to be about 1,200 miles in diameter, with a tail 40,000,000 miles long. The semi-circular envelope or haze about the head was estimated to be about 14,000 miles across. The comet was photographed by Dr. Draper, of New York, on several succeeding nights. The same gentleman has also made it a careful study by means of the spectroscope. He announces that the nucleus gave a continuous spectrum, indicating it to be a solid or liquid body heated to incandescence. The envelope about the head gave a spectrum indicating the presence of carbon in a gaseous form. The spectroscope appeared to indicate that the tail shone by its own, and not a reflected light—that it was made up of great numbers of separate solid or liquid particles in a state of incandescence.

On the strength of these observations, Dr. Draper expresses the belief that the nucleus is composed of mineral substances, partly, perhaps, of olivine, which is an ingredient of meteorites, and of some volatile element which yields to the influence of heat. As the comet approaches the sun, the volatile part is turned into gas by the heat, and flames out to form the coma. The fact that the coma is always on the sunward side of the nucleus strengthens this supposition. But after bursting forth on the side toward the sun, the vapor seems to be repelled, and, losing its gaseous form, to stream away from the sun as a solid or liquid, thus forming the tail. The cause of this repulsion cannot be absolutely asserted; but in all probability electricity has something to do with it.

NEW FORM OF PLATES FOR IRON CLADS.—At a recent meeting of the Engineers Club of Philadelphia, Prof. M. L. Haupt read a paper describing a system of deflecting armor for seacoast defence, designed by Mr. N. B. Clark, Past Assistant Engineer United States Navy. The inventor improvements are based upon the fact that it is much simpler to resist the effect of a projectile by deflecting it than by opposing it by thick masses of inert matter, as is evinced by the "ricocheting" of a shot upon the water. He protects all the vital parts of the vessel by an iron shield, convex upward, placed below the water-line, and so curved that a shot cannot strike point blank. It is claimed that by this means a great economy is effected in the weight of metal required for attack and defence; the vessel is more readily handled, more seaworthy, and is invulnerable. The principle may be applied equally well to the construction of batteries for defence on shore.

REVIVING INVENTIONS.—Says an Eastern paper, there are in the archives of the Patent Office thousands of applications which have been allowed, but on which the final Government fee has not been paid. The business prosperity of the country seems to have had the effect of starting many of these to life, and now more or less of them are daily being put into the issue.

Scene in Manilla.

We give on this page a companion picture to the engraving in our last issue. It shows the great bridge of Manilla, which connects the city proper with its chief suburb, Binondo.

Manilla is situated in the island of Lucon, in the Phillipine group, and is the principal seaport of those islands. It has a population of about 150,000 souls. The city is strongly fortified, and the Spanish, who have possession, maintain strict military discipline. The island of Lucon has been visited by earthquakes at different times. Two thousand lives were lost in Manilla alone by one of these disasters in 1863. Manilla is divided by the river Pasig into three parts, viz: Manilla proper, Binondo and Romero. Most of the business is carried on in the suburbs of Binondo, where the manufacture of cigarettes and cheroots, the latter under the name of "Manilla cheroots," being well known to smokers, is largely engaged in. The building at the right of the engraving is a cigarette manufactory. The bridge connecting these suburbs was first built in the 17th century. It has been several times destroyed by floods and injured by the earthquakes, but is now in a substantial condition.

A VIEW OF THE GREAT BRIDGE OF MANILLA AND VICINITY.

IF the presiding officer of a Lodge or Council wants to see the business move along quickly, and the meetings well attended, he must realize that it cannot be done unless he infuses life and spirit into his actions. Depend upon it, his example will have a great influence upon his brethren, and cause them to heartily second his efforts.

"GRAVEYARD INSURANCE" is what they call the business in the East of insuring old and decrepit men. The mania has spread rapidly throughout Pennsylvania, New York, New Jersey, Delaware and Maryland. Cases have come to light where aged people have been insured for a fabulous sum, and then because they did not die as soon as expected, the murderer stepped in and finished the business.

Decorative Art.

California was peculiarly peopled. The early Spanish residents had no desire in life beyond that of living in a state of quiet ease, and having the numerous bands of Indians perform the more rugged duties attaching to their immense landed possessions. It is a question whether art found in them earnest promoters. At least, we have never heard that decorative art did. It is not easy to find a reason for this, for some of the finest landscape and ideal painters have been produced in the land of Ferdinand and Isabella. It is also known that the Spaniards hold in fond affection the names of their great painters, and that the treasured canvas is handed down from generation to generation as precious heirlooms. The finest art gallery in the world is, we believe, located in the city of Madrid. But if the Spanish of this coast loved and treasured art, it is certain that decorative art did not find in them enthusiastic advocates. Their esthetic culture did not go beyond the gratification which their immense flocks and herds afforded them. It would require considerable imagination to find in the dwellers of ancient adobes a taste for this beautiful branch of art which at present is receiving so much attention.

Then came the discovery of gold and the consequent excitement. It was not for the purpose of unfolding and expanding the esthetic part of their nature that these bands of eager, earnest men flocked to the Golden shore. It was gold they wanted, and not skeletonized leaves, pottery, porcelain and tiles. Back in their snug Eastern homes, mayhap, these adornments were to be found, but their transportation to the distant shore of a then almost unknown world would seem almost a desecration, and was not to be thought of. Still in the thronging mass that came hither, there were many with cultivated tastes and who loved art for its own sake. They came to California with the intention of amassing a fortune, and then to return from whence they came. But the clear skies and balmy air of California seduced them from their allegiance to their homes beyond the Rockies; they sent for their families, resolving to live in a land which had so generously befriended them. This might be called the transition period in this State. First came the settlement by the Spaniards, then the discovery of gold, and the intense excitement which ensued for about a decade thereafter, and lastly, the quiet which followed, when woman with her hallowed presence softened the rough natures of the men, and made those who had almost forgotten their former softer civilized natures realize that there was something worth living for beside the mad thirst for wealth. With each succeeding year the love for the beautiful has been planted firmly in the community. The taste for decoration has spread among the homes of the very wealthy and those moderately conditioned, until now, in this city and also throughout the State, are to be found residences whose interiors impress one with the graceful arrangement and artistic finish of the many articles that enter into home decoration.

A visit to the rooms of the Decorative Art Society, located at 631 Sutter street, in this city, will show what progress this branch of artistic knowledge is making. The society has been recently organized, and its objects are the diffusion of a knowledge of decorative art among women. To do this they intend to induce art workers to master thoroughly the details of some one kind of decorative art, acquire skill therein, and make for themselves a reputation of commercial value. They intend, also, to suggest to those who have hitherto worked unsuccessfully, some practical direction for their labor. It is the purpose of the society to maintain a library of handbooks on subjects of decorative art and design; to develop the art of needlework, and assist in adapting it to the requirements of house furnishing and decoration. They propose to encourage and stimulate the production of designs for manufactured objects. Appropriately decorated articles of household or personal use—pottery, china, tiles, placques, embroideries, window, bookcase, and other hangings or curtains; mantel and bracket lambrequins, decorated table and other house linen, panels for cabinet work, painted upon wood, leather, etc.; paintings upon silk for screens, panels, fans, etc.; decorated menus, dinner cards, note paper, and articles of like description, are received and sold by the society. Drawings and sketches in crayon, pen and ink, oil or water colors, are not received by the society, unless applied as decoration to some useful or ornamental article. This rule does not exclude original pictures, which are entitled to rank as works of art.

The society is supported by the voluntary contributions of some of the prominent ladies and gentlemen of San Francisco. Any person may become a member of the society by the payment of $5 annually. A course of free classes has been formed, and members have the privilege of nominating a pupil for a single course, to enter when a vacancy occurs. The society should receive the encouragement of all lovers of household decoration, and we would urge our lady readers to pay a visit to the rooms of the society, 631 Sutter street. The many beautiful things there shown will be sure to interest them, and serve to create a desire to put in practice the theories which the society is engaged in disseminating.

THE question of how long a person is likely to live is figured down to a fine point in insurance companies, and it may be certain that the average expectancy is always put down in their favor. One of their tables is as follows: A person one year old may expect to live 39 years longer; of 10 years, 51; of 20 years, 41; 30 years, 34; of 40 years, 28; of 50 years, 21; of 60 years, 14; of 70 years, 9; of 80 years, 4. We give the above figures for what they are worth, and as showing how long a person may live according to the figures given.

A BROTHER, in renewing his subscription, says: I am highly pleased with "our paper" in every department, and with the detailed statements made pertaining to "our other fraternal societies," of which some of us belong to quite a number.

IF you have a beneficiary certificate in any fraternal association, see to it that you do not let it lapse through want of attention.

Home Miscellany.

San Francisco.

By Clara Dolliver.

[Read at the opening of the Mechanics' fair in this city, August 2, 1881.]

Young city of a proud new world,
Kissed by the waters of a sea
Which hath its bounds of mystery;
But whose far western wave is curled
By palace-stones, whose history
Was old when Rome's rude wall was young—
Who shall foretell your destiny?
The time-worn, and the stripling, face!
The Orient, cradle-land of art,
Greybeard of nations, weary, wrung
With the misery of its selfish heart,
Is feverish with its teeming race!
And you stand proudly by the sea,
So strong, and fresh, and brave, and free,
Sending your white-winged argosy
With precious wealth of golden grain,
To that old world across the main
Whose starving nations cry to thee:
"Most happy land beyond the sea,
More blest your treasures of the field
Than all the gold your mines can yield!"

Oh! fair young city, you are crowned
With nobler wreaths than ever bound
The victors of the olden time!
Your laurels are unstained of blood!
In your memorials may be found
Strange tales of fright, and fire, and flood;
Of heroes black with smoke and grime;
Of lofty deeds scarce understood,
And unremembered, but sublime !
Of romances of darker days,
The days of lawlessness and crime,
That dragged your name in hideous ways,
Until your own heroic hand,
And upward struggle without cease,
Have given you the right to stand
Among the proudest in the land,
And claim the victories of peace!
Your sons, our city, know the word
That opens ev'ry door—the name
Of that great goddess who has stirred
The blood of all mankind, to fame,
To honor, wealth, in every age—
Labor! From kings upon their thrones,
And scholars stooping o'er the page
In midnight toil, to peasants bent
Beneath the burden of their groans,
Is labor still salvation. Drones
Taste of a bitter discontent;
Tho' titled princes, they are weights
That drag upon the steps of States.
To-day is Labor's *festa!*—down
Where smoking incense clouds the street,
Where engines shriek and anvils beat
With thund'rous noise her triumph-song,
Her knights, with brawny arms, and strong,
Have forged for her an iron crown!
We cast our off'rings at her feet,
Varied as human souls. The thought
That almost flies the poet's pen;
The marvels patient hands have wrought;
The skillful touches of the brush
That make the tender morning flush
The purple mountain-tops again;
The rougher work of ruder men—
The crushing mill, the whirling wheel,
The ponderous hammer, and the wires
That fetter Earth with bands of steel
And prison Heaven's immortal fires.

Oh, brave young city! raise on high
Your banners, blazoned "Industry."
For those who 'neath that standard fight,
Can lift a mighty arm for right,
And home and country in its need;
For who so battles day by day,
Where tares and briars set the way,
Loves home and Liberty, indeed,
And faces death without dismay.
We *love* you, Oh, our city! We
Have seen your stately streets arise
As if by magic from the sand;
We love your deathless energy,
Your courage, and your enterprise;
Your ever-open, generous hand;
And though we wander far, our own,
And search the dim old world, our true
Hearts ever backward turn
To linger with our distant home;
The chord you touch is never dumb;
Your children all come back to you;
The laurel fades by Athens' streams,
But buds anew by your's; and we,
Who love you, guess your destiny,
And hail you proudly in our dreams:
Another Athens by the sea!

How Helena Mills Found Her Level.

"Harvey Mills has failed!" said Mrs. Smithson, one chilly spring evening, as she ran in to see her next-door neighbor and intimate friend, Mrs. James. "My husband just came home, and he says that what we supposed to be a rumor only, is a sad fact; the assignment was made yesterday. I threw on a shawl and ran right over to tell you. They are to keep the house under some sort of an arrangement, but they have discharged all their servants, and what in the world the Mills will do, Mrs. James, with Mrs. Mills' invalid habits, and Miss Helena with her dainty ways and refined bringing up, is more than I know," and pretty, shallow Mrs. Smithson looked at her nerve-loving friend and neighbor with the air of an epicure regarding some favorite dish.

"I heard all about it late last evening," said Mrs. James, adjusting the pink ribbons at the throat of her black silk dinner dress, "and this morning I presumed upon our cousinship so far as to drive over and see how they were getting along. And really, Mrs. Smithson, you will be surprised when I tell you that, although I expected to find the family in great confusion and distress, I never saw them in such a comfortable way and in such good spirits. The worst was over, of course, and they all had settled into the new order of things as naturally as could be. My cousin, Mrs. Mills, was sitting, as calm as you please, up there in her sunny morning-room, looking so fresh and dainty as she ate her crisp toast and sipped her coffee."

"'Our comfortable and cosy appearance is all due to Helena,' said she. 'That dear child has taken the helm. I never dreamed she had so much executive ability. We were quite broken down at first, but she made her father go over all the details of his business with her, and they found that by disposing of Helena's grand piano, the paintings, and slabs, and costly bric-a-brac her father had always indulged her in buying, we could pay dollar for dollar, and so keep the house. My husband's old friend, Mr. Bartlett, who keeps the art store, you know, and who has always taken a great interest in Helena, bought back the paintings, statuary, vases, etc., at a small discount, and Barker, who sold us the piano a year ago or so, and who is another old friend, and knew, of course, just how we were situated, took it back, deducting only $25.

"'Helena has just gone into the kitchen. What she will do there I don't know, but she says she needs the exercise, that she has not attended the cooking school here in the city for nothing, and that so long as the meals are served regularly and properly, and the house is kept in good order, her father and I are not to worry.' After she told me that, I drew my call to a close, and ran down into my cousin's kitchen to see her dainty daughter there. And what do you think! I found that girl at the sink, with her sleeves rolled up, an immense waterproof apron on, washing a kettle!"

"*Washing a kettle!*" repeated Mrs. Smithson, holding up both her soft white hands in unmeasured astonishment.

"Yes, Mrs. Smithson, washing a great, black, greasy iron kettle that meat had been boiled in, and that had been left unwashed and gummy when the cook left. And, do you know, she was laughing over it all, and saying to her youngest brother, who stood near by, that she really liked it, for she now felt she was making herself useful."

"The idea! *Liking* to wash kettles!" and the two fine ladies looked at each other in open-eyed wonder.

"It seems to me as if Helena Mills were trying to make the best of her altered fortunes, and was simply doing her duty in the premises," spoke Miss Carlton, Ida James' new drawing teacher, who was that evening engaged in giving her pupil a lesson on the opposite side of the center-table. She spoke earnestly and yet in a modest way, and it being the vogue in New City just then to patronize Miss Carlton, the pretty and accomplished graduate from Vassar, the two ladies looked at her amiably, and she went on:

"Somebody must wash the kettles, and it is always best, when one has a disagreeable duty to perform, to do it not only at once, but cheerfully."

"Yes, perhaps," replied Mrs. Smithson, "but how could a young girl of real *native* refinement [both sides of the Smithson family were of the "old stock"] take so kindly to washing pots and kettles? The fact of it is, people have been mistaken in Helena Mills. She never possessed that innate gentility she has had credit for. But everyone finds their level sooner or later—he, he!"

These two women having thus summarily disposed of Helena Mills socially, they repeated their belief that the lovely and dutiful young girl had now found her proper level over and over in their set until it was the common talk in New City. Miss Carlton, in her round of professional calls among the so-called *elite*, was entertained in nearly every household with the information that Helena Mills had given up her studies even, and gone into the kitchen to work—and, if you'll believe it, *she likes it!*" Then would follow reflections upon the natural ability and bias of mind of a young woman who was "*fond* of washing dishes."

This sensible, accomplished little drawing teacher was the only one to be found, who mingled in the "upper circles" of New City, who said a word either in praise or defense of Helena Mills' new vocation. Miss Carlton always and everywhere protested that the young girl's course was not only praiseworthy, but beautiful. She maintained that every woman, young or old, high or low, who took upon herself the labor of elevating the much abused as well as despised vocation of housework—upon which the comfort of every home depends—to a fine art, was a public benefactor.

Miss Carlton's friends all listened and laughed, and then went on with their senseless and malicious tirade. She was heartily glad when her engagements in New City were ended, and she was no longer obliged to move in such "select" society, whose ideas were always a mere echo of opinions—no matter how trivial and foolish—which had been expressed by a few of its more wealthy members.

* * * * * * * *

Mrs. Dr. Forbes, *nee* Miss Carlton, had heard very little about New City society for five years. But having occasion to pass through the place on the cars lately she treated herself to a little gossipy chat with the conductor, whom she had known as a New City gallant.

"There is no particular news, Mrs. Forbes," said he, "unless it is the engagement of Helena Mills to young lawyer Bartlett, son of Col. James Bartlett, owner of the big corner art store. A capital choice the young squire has made, too. She's as good as gold, and everybody says she's the best girl in the city. She's a perfect lady, withal, and treats *everybody* well. Not a bit of nonsense or shoddy about *her*. Why, bless you, Mrs. Forbes, when her father failed in '75, she took entire charge of the family, and she has managed the house ever since.

"Her father is now in business again for himself, and employs more men than ever. Her mother, who had been an invalid for years, was forced by Helena's example to try and exert herself so as to share her daughter's burden to some extent. As a result of the new, active life she has followed, she lost all her ailments, and is now a happy, hearty, healthy woman. Helena's brothers have grown up to be fine, manly, helpful fellows, and the whole family are better off every way than ever before. As things were going on before Mr. Mills' failure, the whole family were in danger of being spoiled by too much luxury.

"There was a great deal of talk at first among the big-bugs about Helena's 'pots and kettles,' and they used to say she had found her true 'level.' I always thought there was a spice of malice in their talk, for the girls of her set envied her beauty and accomplishments. I am rather fond of telling them now that Helena Mills has found her 'level' in the richest, most influential, and just the best family in New City."—*Mrs. A. E. Preston.*

A Pioneer Woman.

One of the most remarkable women in New York State is Mrs. Catherine Loper, who lives with her daughter, Mrs. Ketchall Lyon, in Rathboneville, Steuben county. She is in her 92d year, and is in the enjoyment of perfect physical and mental vigor. In 1823, she settled, with her husband and seven children, the oldest child being 12 years of age, near where Rathboneville now stands. The region was literally an unbroken wilderness, and in the midst of it, says the Utica *Observer*, Loper commenced the clearing up of a farm, and getting out timber. A small log house was erected, the nearest neighbor being miles away.

Mrs. Loper and her oldest son were Loper's sole aids. "I have sawed 55 big pine logs a day for weeks at a time," says Mrs. Loper. "With the help of my oldest child, I cut with a cross-cut saw the greater part of the logs my husband ran into the mill in winter. I have taken my end of the saw many a time with my husband at the other end, and standing in snow knee-deep, have sawed logs all day, stopping only long enough to prepare meals for my family. When, after we had cleared up a few acres of land, and got it in crop, my husband began making trips down the river with rafts that I aided in getting together from the log-cutting to the river bank, I have remained at home alone with my children for months at a time, the trips and necessary business in getting a good market, sometimes requiring my husband's absence for half a year. In order to reach home he had to come most of the way from below on foot through the woods, and it was not possible, therefore, for him to return until his business was settled for that trip. At such times I took care of the horses and cattle, and did all the farm work except plowing, which I hired a man to do. Besides this, I had all my housework to do, and my brood of little ones to care for. The woods were filled with wild animals, wolves being especially plenty and panthers yet abounding. Deer actually ran in droves through the woods. After machinery was introduced for carding wool and preparing the rolls, it was a very easy task for me to spin 100 knots a day, and entertain company all afternoon at that. My skill became known all around the neighborhood, and the spinning of 100 knots was such an uncommonly large day's work, that a cloth draper of Penn Yan, named Squires, made a bet of $50 with my husband that I could not do it. I went to work at sunrise, and by three o'clock in the afternoon I had the 100 knots completed. Squires paid the $50, and gave me $10 besides, so I made $60 by one day's work. I have accomplished this large task many a time since I was 85 years old, and I am not sure but that I can do it now. Since that time I have made over 300 pairs of socks, mittens, wristlets and other knit articles."—*Woman's Journal.*

The True Wife.—Oftentimes I have seen a tall ship glide by against the tide as if drawn by some invisible tow-line, with a hundred strong arms pulling it. Her sails were unfilled, her streamers were drooping, she had neither side-wheel nor stern-wheel; still she moved on stately in serene triumph, as with her own life. But I knew that on the other side of the ship, hidden beneath the great hulk that swam so majestically, there was a little toilsome steam-tug, with a heart of fire and arms of iron, that was tugging it bravely on; and I knew that if the little steam-tug untwined her arms and left the ship, it would wallow and roll about and drift hither, thither, and go off with the influent tide no man knows where. And so I have known more than one genius, high-decked, full-freighted, wide-sailed, gay-pennoned, but for the bare, toiling arms and brave, warm-beating heart of the faithful little wife that nestled close to him so that wind nor wave could part them, he would have gone down with the stream and have been heard of no more.—O. W. Holmes.

Æsthetics at Ascot. Dialogue reported by Punch: Philistine sportsman (quoting the odds): "Two to one on Robert the Devil, you know." Sweet she æsthetic: "Did he really? How delightful! What a quite too awfully utter name for a jockey!" Philistine sportsman (puzzled): "Beg pardon, I — ha — don't understand." Sweet she æsthetic (surprised): "Why, did you not say that 'Too-too won' on—the horse you mentioned."

It cast a gloom over the entire church fair the other night when the minister's son walked up to the grab-bag and prize-cake table and demanded that the game be explained to him before he bought his chips.

Influence of Sensible Women.
